Information Analysis Centers

http://iac.dtic.mil/

Do you need to conduct research on a specific subject?

As a researcher, engineer or program manager, you have a wide range of information needs, many of which can be fulfilled by calling on an Information Analysis Center (IAC).

What are IACs?

- Research organizations chartered by the Department of Defense (DoD) to improve productivity in defense research, development, and acquisition communities.
- Staffed by experienced technical area scientists, engineers and information specialists who help customers locate and analyze scientific and technical information in specialized subject areas.
- Establish and maintain comprehensive knowledge bases that include historical, technical, scientific, and other data collected from around the world.

Specialized Information Solutions

DTIC® administrative activities include the management and funding of contractor-operated, joint service-oriented IACs. A full description of each IAC can be found at http://iac.dtic.mil/.

The DoD-sponsored IACs

AMMTIAC Advanced Materials, Manufacturing and Testing Information Analysis Center	**CBRNIAC** Chemical, Biological, Radiological and Nuclear Defense Information Analysis Center
CPIAC Chemical Propulsion Information Analysis Center	**DACS** Data and Analysis Center for Software
IATAC Information Assurance Technology Analysis Center	**MSIAC** Modeling and Simulation Information Analysis Center
RIAC Reliability Information Analysis Center	**SENSIAC** Military Sensing Information Analysis Center
SURVIAC Survivability/Vulnerability Information Analysis Center	**WSTIAC** Weapon Systems Technology Information Analysis Center

DTIC® is a registered service mark of the Defense Technical Information Center.

What types of products and services do the IACs provide?

With raw data to technical analysis, IACs support your research success.

Technical Area Tasks (TATs)

TATs are fee-based services that are more extensive than basic IAC products and services. TAT timetables vary from a fraction of a staff year to several staff years and can cost anywhere from a few thousand to several million dollars. These "tasks" can be ordered by any DoD component or on a case-by-case basis by other federal organizations.

DTIC Online Access Controlled (DOAC): IAC Reports and Documents

Total Electronic Migration System (TEMS) is a gateway to the IAC collection. To learn more about TEMS, visit http://iac.dtic.mil/resources/tems.html. Registered DTIC users (see below) have access to TEMS and can perform full-text searches and retrieve mission-critical information. To access TEMS, go to https://tems-iac.dtic.mil. These IAC documents are also searchable from the DOAC banner search on More Search Options.

How to Reach IACs

Contact IACs directly for their particular areas of technical expertise. For general information please contact the DTIC IAC Program Office at 703-767-9120, DSN 427-9120 or email iac@dtic.mil.

DTIC Registration
IF you are eligible to access the collection and other DTIC products and services, register online at https://www.dtic.mil/.
