DTIC® LabConnect: S&T Resources for the Lab Community

RESEARCH. COLLABORATE. NETWORK.

DTIC provides tools to meet the information needs of your laboratory team.
DTIC Registration is required: https://www.dtic.mil

DTIC ONLINE ACCESS CONTROLLED (DOAC) is the gateway to DTIC's products and services. Through DOAC's unified interface, search over 2 million DoD technical reports, Information Analysis Center (IAC) research reports plus research project information and Independent Research and Development (IR&D) (proprietary) summaries. Query Congressional budget information, locate scientific and technical (S&T) resources, and access other Web sources.

DODTECHIPEDIA, DoD's S&T wiki, provides a collaborative environment for information sharing among scientists, engineers, program managers and operational warfighters. Federal and DoD personnel and contractors can participate in locating and meeting technology needs, communicate within the research and engineering (R&E) Community, and contribute unique information. On the left, in the R&E Community Area, find out more about DTIC. Use the *Defense Communities* area to build your own collaborative group open only to DoD and DoD Contractors.

ARISTOTLE is a Web-based professional networking tool for the DoD and Federal R&E community. Included are People, Projects, Topics, and Documents. Contribute and collaborate with the ability to share or restrict as desired. Develop your profile, upload resources, and network with your peers.

WANT TO LEARN MORE ABOUT HOW DTIC CAN WORK FOR YOU?

DTIC welcomes the opportunity to visit your organization and provide a personalized briefing or hands-on training. Our instructors focus on using these tools, searching DTIC and other resources, and submitting information to DTIC. A customized briefing can be presented to meet organization specific needs.

To schedule a briefing or hands-on training contact DTIC: training@dtic.mil, (703) 767-8224.

DTIC® is a registered service mark of the Defense Technical Information Center.
