13. ABSTRACT *(Maximum 200 words)*

The International Conference on Strongly Coupled Coulomb Systems meeting, by all accounts, was quite successful. The number of Participants was 157 from 23 countries, including, in addition to the U.S., Canada and Western Europe, Yugoslavia, Russia, Ukraine, Kazakhstan, Korea, Japan, China, India, and Australia. The interdisciplinary aspect of the Conference was much appreciated by most participants and it was generally agreed that the Conference had broken new ground by involving groups from contiguous areas and by creating a bridge between plasma physics and areas of condensed matter physics.

The Proceedings of the Conference will be published by Plenum Press.
