<b>Exhibit R-2, RDT&amp;E Budget Item Justification</b>							Date: February 2007	
Appropriation/Budget Activity RDT&E, Defense-wide BA: 6				R-1 Item Nomenclature: Program Title: Defense Technology Analysis (DTA) Program Element: 0605798S				
Cost (\$ in millions)	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013
Total PE Cost	6.991	7.947	0.000	0.000	0.000	0.000	0.000	0.000
Project 1: DoD Technology Analysis Office (DTAO)	4.598	4.841	0.000	0.000	0.000	0.000	0.000	0.000
Project 2: Technology Integration (TI)	0.717	0.715	0.000	0.000	0.000	0.000	0.000	0.000
Project 3: Commodity Management System Consolidation (CMSC)	1.676	2.391	0.000	0.000	0.000	0.000	0.000	0.000
<b>A. Mission Description and Budget Item Justification:</b>								
<p>This program element provides mission support to the Office of the Deputy Under Secretary of Defense (Science and Technology) (ODUSD(S&amp;T)). It covers a wide range of studies and analyses in support of the RDT&amp;E program and impacts the Department's decision to fund efforts to sustain operations for general R&amp;D.</p> <p>Project 1: The Defense Technology Analysis Office is responsible for providing engineering, scientific, and analytical support to the ODUSD(S&amp;T) in its responsibility for direction, overall quality, and content of the Science and Technology program and ensuring that the technology being developed is affordable and minimizes systems development risk. Science and Technology is defined as consisting of Basic Research, Exploratory Development, and Advanced Technology.</p> <p>Project 2: Technology Integration activities advance international S&amp;T cooperation of specific projects of bilateral or multilateral interest. It provides the management support for U.S. participation in NATO's Research and Technology Organization (RTO) and "The Technical Cooperative Program" (TTCP). Technology Integration oversees coordinates, and reviews RTO and TTCP activities in which the U.S. has an interest including ongoing and proposed collaborative programs, technical symposia and conferences, and standard operating procedures.</p> <p>Project 3: The Commodity Management System Consolidation and Integration team is charged with transitioning Commodity Systems to support the DOD Logistics Transformation Vision. This plan includes reducing response time, operational costs, and inventory and enhances customer satisfaction. To support this, the existing commodity management systems, in use by the Defense Logistics Agency (DLA), must migrate to a common operating environment, which utilizes shared data, and business rules that are accessible to DLA, its customers and its suppliers. Requirements include: 1) Development of an automated parts ordering tool allowing a technician working off an Interactive Electronic Technical Manual (IETM) to requisition parts interactively from the technical manual, 2) Perform a Business Case Analysis (BCA) to determine economic feasibility of the use of Freight on Board (FOB) origin contracts in the Distribution Planning and Management System (DPMS), 3) Research and perform digital (DVD) Conversion. 4) Other studies that will aid DLA in the transition to a paperless enterprise.</p>

<b>A. Mission Description and Budget Item Justification:</b>								
This project provides engineering, scientific and analytical support to the Office of the Deputy Under Secretary of Defense (Science and Technology) (ODUSD(S&T)) in its responsibility for direction, overall quality, and content of the Science and Technology (S&T) program and ensures that the technology being developed is affordable and minimizes system development risk. The primary purpose of this program element is to facilitate the development of the S&T program and conduct assessments and analyses of the S&T program to ensure maximum utilization of Research and Development funds to accomplish the overall objectives of the S&T program. Funds are required for technical and analytical support, equipment, supplies, travel, and publications.

<b>A. Mission Description and Budget Item Justification:</b>								
Technology Integration activities advance international science and technology (S&T) cooperation of specific projects of bilateral or multilateral interest. It provides the management support for U.S. participation in NATO’s Research and Technology Organization (RTO) and “The Technical Cooperative Program” (TTCP). Technology Integration oversees, coordinates and reviews RTO and TTCP activities in which the U.S. has an interest including ongoing and proposed collaborative programs, technical symposia and conferences, and standard operating procedures. This effort will leverage Tri-Service S&T dollars through new and ongoing international partnerships. Technology Integration also provides selective funding support for administration, travel, conferences, and technical evaluations related to RTO activities carried out by the Services and other organizations.

<p><b>A. Mission Description and Budget Item Justification:</b>            The Commodity Management System Consolidation (CMSC) and Integration team is charged with transitioning Commodity Systems to support the DOD Logistics Transformation Vision. This plan includes reducing response time, operational cost, and inventory, and enhancing customer satisfaction. To support this, the existing commodity management systems, in use by the Defense Logistics Agency (DLA), must migrate to a common operating environment, which utilizes shared data, and business rules that are accessible to DLA, its customers and its suppliers. Requirements include: 1) Development of an automated parts ordering tool allowing a technician working off an Interactive Electronic Technical Manual (IETM) to requisition parts interactively from the technical manual, 2) Perform a Business Case Analysis (BCA) to determine economic feasibility of the use of Freight on Board (FOB) origin contracts in the Distribution Planning and Management System (DPMS). 3) Research and perform digital (DVD) Conversion. 4) Other studies that will aid DLA in the transition to a paperless enterprise.</p> <p>Successes with developing the IETM parts ordering tool include fielding at pilot sites in Air Force and Navy locations. Ongoing research includes seeding the project at each of the remaining Services and fostering the development and expansion across the Service. Expanding the Knowledge Management Capability will enable DLA to better serve the warfighter.</p> <p>The recently completed BCA facilitated DLA in developing and managing a strategy for transitioning FOB Origin contracts. In addition, DLA gained knowledge about the impact that the transition to FOB Origin will have on vendor operations and how these might affect the vendor's acceptance of the system. The ability to aggregate freight may have a significant impact on the supplier's distribution network.</p> <p>The research and digital conversion project has yielded the development of a multimedia laboratory for the evaluation and testing of alternatives. The laboratory simulates the DLA media environment value chain through production, management, and delivery of rich media content. This simulation will permit the integration and optimization of emerging media technologies and organizational processes across the multimedia supply chain.</p>
