**A. Mission Description and Budget Item Justification:** CAMS-ME has been approved by the Finance and Accounting, Logistics, and Acquisition Domains as the Mid-Term Systems Solution for reporting the value of military equipment (ME). As part of the Department's enterprise system solution for valuing and reporting ME, CAMS-ME will maintain the work in process (WIP) cost, calculate the value of ME, and depreciate delivered ME end items over the course of their useful lives. CAMS-ME will be developed by the Department of the Navy working with OUSD(AT&L), and with Air Force and Army assistance, to ensure that all ME valuation requirements are met.

Implementation of CAMS-ME will:

Provide reliable and accurate information to decision makers

- Total acquisition cost of assets will be consistently determined

- Decision makers will get comparable information over time and between programs

- It will allow better investment planning for replacements

Increase public confidence in the Department's ability to account for its assets and help achieve a clean audit opinion.

Bring the Department into compliance with the Chief Financial Officers Act of 1990 and the Federal Financial Management Improvement Act of 1996.

The RDT&E budget funds business process modeling & analysis, configuration management, system engineering, reports design, hosting implementation, and software development costs for the CAMS-ME DoD-wide Enterprise Solution.

FY 2006 Plan: Capital Asset Management System-Military Equipment (CAMS-ME)

- Migrate from the baseline valuation tool release 1 to release 2
- Primary purpose is to change from calculating asset values at the program level (phase 1) to a contract level (phase 2)
- Will be used by the P&E Policy Office, and DoD Components for maintaining and updating the baseline and for valuing military equipment assets delivered under contracts awarded post 10/1/2006
- The system will include the functionality described in phase 1 and will have added capabilities to calculate asset and program Work-In-Process values using data obtained from the contract (e.g., asset values)
