

ACGU Working Group Report

Working Group Lead: Mr. Kostoff, DD JS J-7 JCW

Identified issue regarding long term sustainment of the ACGU enclave

Briefed Australian, Canadian, British and American country perspectives on ACGU Training Enclave and way-forward

Briefed existing ACGU Training Enclave technical architecture

Determined way ahead tasks for member countries, including staffing of MOU, Joint Planning Document development, persistent technical services and capabilities and cataloging of available services

Discussed wider operator buy-in and detailed operator requirements for ACGU Training Enclave

Sustainment of ACGU Enclave

28 Sept 11

Briefer: John Vinett

Issue 11-xxx: Lack of defined operator need for Australia, Canada, Great Britain, United States (ACGU) Training Enclave has resulted in a technical solution without long term sustainment.

Discussion: ACGU Training Enclave grew out of an Australia Minister of Defence - US Secretary of Defense memorandum of agreement. POTUS directed a fundamental change in the way the US shares information with its trusted mission partners. Technical community built on the Australian DTEN – US JTEN connection to put in place a solution consistent with POTUS intent. Lack of a defined ACGU requirement has resulted in a technical solution without long term sustainment. Detailed operator requirements and wider audience (experimentation, testing and concept development) buy-in is now needed for the project to survive.

Endstate: Full operator buy-in, event scheduling and support for ACGU Training Enclave. ACGU Training Enclave exists because an operator needs it.

POA&M: ACGU countries brief leadership on enclave capabilities, use existing ACGU collaborative forum to document requirement, vet and analyze requirement, propose final technical architecture and resources required to implement and sustain, present to Stakeholder Leadership for approval.
