MARKING

The classified or limited status of this report applies to each page, unless otherwise marked.
Separate page printouts MUST be marked accordingly.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE LAWS, TITLE 18, U.S.C., SECTIONS 793 AND 794. THE TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW.

NOTICE: When government or other drawings, specifications or other data are used for any purpose other than in connection with a definitely related government procurement operation, the U. S. Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use or sell any patented invention that may in any way be related thereto.
SUBJECT: Operational Report - Lessons Learned, Headquarters, 52d Combat Aviation Battalion

TO: SEE DISTRIBUTION

1. Subject report is forwarded for review and evaluation by USACDC in accordance with paragraph 6f, AR 1-19 and by USCONARC in accordance with paragraph 6c and d, AR 1-19. Evaluations and corrective actions should be reported to ACSPER OT within 90 days of receipt of covering letter.

2. Information contained in this report is provided to insure appropriate benefits in the future from Lessons Learned during current operations, and may be adapted for use in developing training material.

BY ORDER OF THE SECRETARY OF THE ARMY:

KENNETH G. WICKHAM
Major General, USA
The Adjutant General

SECTION I - SIGNIFICANT ORGANIZATION OR UNIT ACTIVITIES

a. The 52d Combat Aviation Battalion is stationed at Camp Holloway, Pleiku, RVN. Subordinate elements consist of the following units located as indicated: (Detail list of detachments is shown in enclosure 1)

(1) Headquarters & Headquarters Detachment - Pleiku, RVN

(2) 119th Assault Helicopter Company - Pleiku, RVN. Equipped with the UH-1D and UH-1C(A) helicopter.

(3) 155th Assault Helicopter Company - Ban Me Thout, RVN. Equipped with the UH-1D and the UH-1C(A) helicopter.

(4) 170th Assault Helicopter Company - Pleiku, RVN. Equipped with the UH-1D and the UH-1C(A) helicopter.

(5) 179th Assault Support Helicopter Company - Pleiku, RVN. Equipped with the CH-47 helicopter.

b. Type aircraft authorized and on hand:

2. (C) Intelligence. The Battalion S-2 section continued to publish a daily INTSUM which is distributed to each company within the Battalion, Headquarters, 17th Combat Aviation Group, and other units on request.

a. Major enemy action during this period centered in the western and southwestern quadrants of Pleiku province. Enemy activity and movement has increased during the month of April and is expected to become greater during the monsoon period. Action during the enemy summer monsoon campaign is expected to center around the cities of Kontum, Pleiku, Special Forces camps (particularly Duc Co and Plei Me) and resettlement areas.

b. Ground to air fire was received on 50 occasions during this period resulting in 34 aircraft being hit. Twelve of these aircraft received major damage. Only one was totally destroyed.

3. (C) Operations & Training Activities.

a. The Battalion supported numerous operations to include Sam Houston, Thayer II, Pershing, Summerall, Francis Marion, Omega, Stark, Prairie Fire, Hancock I and Shining Brass. In addition aviation support was provided for II Corps, Special Forces, and the 9th ROK Inf Div. 44 per cent of the hours flown during this period were in support of the 1st Infantry Division in Operation Sam Houston and Francis Marion. Another 22 per cent of the total time was flown in support of the 3d Bde, 25th Inf Div. in operation Thayer II and Pershing. The remaining 34 per cent was flown in support of the smaller operation, Free World Assistance Forces and unit training. The battalion was in support of tactical operations every day during the reported period.

b. Operational statistics for the period appear below:

1. Total number of aircraft hours flown during the reported period - 26,723.

2. Total number of aircraft sorties flown during the reported period - 84,226.

   a) Tactical and logistical sorties flown in support of tactical operations - 79,350.

   b) Training and maintenance sorties - 4876.
d. During the reported period the following subjects were stressed in the training conducted for the officers and enlisted personnel:

(1) Aviator Training
   (a) Escape and Evasion
   (b) Instrument Flying
   (c) Practice GCA and ADF Approaches
   (d) Night Flying
   (e) Formation Flying
   (f) Pre-Flight Inspections
   (g) Density Altitude
   (h) Use of "Go-No-Go" Chart
   (i) Flight Safety
   (j) Rules of Engagement
   (k) Safety Procedures of 2.75" Rockets

(2) Ground Training
   (a) Escape and Evasion
   (b) Defense Plans
   (c) Function of Claymore Mines
   (d) Weapons Familiarization
   (e) Troop Information
   (f) Medical Training

4. (c) Logistics.
   a. Class I: No difficulties encountered during the period.
   b. Class II, III, IV and V: Class II and V requirements were met during the quarter without difficulty. Class II and IV support continued to improve. Tool set, aircraft mechanics general were received in small quantities. In addition six more XM-21 armament systems were received.
CONFIDENTIAL

during this period giving the Battalion a total of twelve presently on hand. Several experimental items were issued for test and evaluation; a smoke generator mounted on a UH1, new fire resistant flight suits, and the CAR-15 automatic rifle. A large number of the new APH-6 flight helmets were also issued during this period. The shortage of the following radio test sets continues to restrict the unit's capability to properly test avionics equipment:

c. Two problems were encountered with the receipt of the APH-6 flight helmet. The helmet is issued in two sizes, large and medium. The large size equates to approximately 7 1/8 while the medium is smaller than size 7. Although the large size can be worn by most air crew-members it causes severe pressure and becomes extremely uncomfortable after several hours of flying. Another problem encountered with this helmet has been a high failure rate of the wiring harness. An EIR was submitted on this item on 2 April 1967. The non-availability of technical manuals for this helmet has prevented the units from requisitioning spare parts and establishing a PLL. The only source of repair parts has been through cannibalization of non-repairable helmets.

d. The Battalion has been without any means of reproducing orders and other type reports due to the breakdown of the only mimeograph machine. Numerous requests and liaison visits have been made to every known supply point in Vietnam in an attempt to obtain a duplicating machine. At this time all efforts have proven negative. All items must be reproduced at some other installation whenever a machine is available. Although this is a minor item in cost it has proven to be a major problem area.
5. (U) Civil Affairs.

a. The civic action teams, headed by the Battalion S-5, began regular visits to the Montagnard villages in the battalion area. They have treated the village personnel for skin rashes and minor ailments and have distributed USAID packages. A dam and waterway has been constructed in Plei Bong Phun by the 405th Maintenance Detachment.

b. The Battalion sponsored, Tu Tam orphanage, was accepted by the Vietnamese government as a national home in a dedication conducted on 27 March 67. The home is now caring for 80 children and is guaranteed continued support by the Vietnamese government.

c. Civic action projects include a Little League Baseball team program and assistance to the boy scout troop for the Montagnard boys in Pleiku.

d. The 155th Assault Helicopter Company continued to provide medical assistance to the patients of the Ban Me Thout hospital charity ward. Assistance was also rendered in the construction of a new ward.

6. (C) Personnel.

a. In-country transportation of replacement personnel continues to be a problem. In most instances unit tactical aircraft had to be dispatched to pick up incoming personnel.

b. A shortage in replacement personnel with MOS 11B10 (basic infantryman) continues to exist. The Battalion is temporarily using MOS 67A10 (basic aircraft mechanic) as a filler in maintaining strength in the post security detachment and as aircraft door gunners.

7. (U) Religious Activities.

a. During this quarter the chapel attendance has risen. The officers and men of the Battalion continue to support every phase of the religious program.

b. The Easter season was the religious highlight of the quarter. Holy Week and Easter Sunday services were well supported.

c. The Catholic congregation has continued its support of the St Paul School in Pleiku.

d. The Protestant congregation continued to sponsor the Christian missionary alliance hymn sing for the men of the Pleiku area.

e. A Protestant men's organization was formed in the 155th Assault Helicopter Company at Ban Me Thout in February. This organization meets twice monthly.
8. (U) Awards and Decorations. Total awards approved during this period:

- Silver Star: 2
- Legion of Merit: 3
- Distinguished Flying Cross: 19
- Bronze Star: 24
- Bronze Star W/V: 1
- Air Medal: 1295
- Air Medal W/V: 10
- Army Commendation Medal: 28
- Army Commendation Medal W/V: 2
- Purple Heart: 6

TOTAL 1390

9. (U) PIO Activities during the period.

a. Feature stories: 17
b. Hometown news releases: 165
c. Hometown tapes (Mothers' Day Messages): 31
d. Three issues of the Battalion paper "Dragon News" was printed with a circulation of 1000 copies monthly.
e. A daily summary of aviation activities is submitted to USAF/V giving the daily aviation performance data and highlights.
f. On 4 February 67, the installation at the Ban Me Thout city airfield was designated Camp Coryell in memory of Warrant Officer Michael N. Coryell, who was killed in action on 30 October 1966.

10. (U) Special Services. Four special service shows appeared at Camp Holloway during the reported period.

11. (U) Safety. During the period 15 February - 8 March 1967, the 52d Combat Aviation Battalion set an all time 1st Aviation Brigade Safety Record when it flew 52 consecutive days and over 15,000 hours without an accident.

SECTION II - COMMANDER'S OBSERVATIONS AND RECOMMENDATIONS

Part I, Observations (Lessons Learned)

1. (C) Personnel.

- a. Item: Shortage of Gunners

* This item was discussed in the last quarterly report.
Discussion: TO&E 1-258F does not authorize gunners for the 179th Assault Support Helicopter Company. These duties are presently being performed by personnel with other MOS's and duties within the unit.

Observation: The use of these personnel continues to be detrimental to the unit's efficiency. Six gunners were assigned to the unit during this reporting period, however, without an authorized TO&E position personnel can not be requested. MTOE 1-258F for the 179th Assault Support Helicopter Company was submitted by Headquarters, 17th Combat Aviation Group on 21 November 1966.

2. (C) Operations.
   a. Item: Aircraft Utilization

   Discussion: During this period, the assault support helicopter unit has encountered an increase in the number of missions flown between fixed wing bases.

   Observation: In order to obtain a fixed wing transport aircraft the request must be processed 14-18 hours in advance. In a tactical situation this is not always feasible. To eliminate this situation a designated number of fixed wing aircraft should be made available on an area support basis to cope with unscheduled missions.

   b. Item: Command, Control and Communications

   Discussion: The assault support helicopter company operates in widely separated locations. This method of operation results in communication problems with the unit operation officer and the aircraft. Many times an additional mission is received to be performed in an area where an aircraft is already operating. Due to poor communications the mission often times can not be relayed until the aircraft has returned to a point closer to home base.

   Observation: The CH-47 has the ARC-102 radio installed, however, no ground set is available to the unit. With a ground mounted HF radio i.e. the ARC-95, this problem could be eliminated. This item was included on the MTOE 1-258F submitted by Headquarters, 17th Combat Aviation Group on 21 November 1966.

   c. Item: Booby Trapped Landing Zones

   Discussion: During the period covered by this report several landing zones were found to be booby trapped or mined. All these landing zones had been utilized previously by American Forces, but were abandoned for periods of three days or more. Investigation by the ground units
indicated that some of these devices were fabricated from demolitions and ammunition which could have been abandoned by friendly units. On one occasion the booby traps were of the type set to explode in the air.

Observation: Areas selected as landing zones should have preparatory fires placed in the center of the landing zone to detonate any emplaced mines or booby traps especially if the landing zone had been previously occupied.

d. Item: Use of Artillery Illumination

Discussion: When artillery is utilized as a source of illumination a hazard is created by the separation of the flare and cannister. The position of the flare can easily be ascertained by visual reference, however, the unlit cannister will continue for another 1000 to 1500 meters along the gun target line.

Observation: Aviators utilizing artillery illumination must remain informed of the gun target line to preclude flying through the trajectory of the cannisters. The gun target line should be made known to an aviator prior to departure for proper planning of flight routes.

3. (U) Maintenance.

a. Item: Inspection and Cleaning of Fuel Filters

Discussion: During the period covered by this report several malfunctions with the T-53 engine were experienced. An intensive investigation disclosed that the present inspection and replacement frequency of the fuel filters was inadequate in the extremely dusty conditions encountered in the central highlands.

Observation: The frequency of inspecting and replacing the fuel filter was doubled. This practice is expected to reduce the engine problems encountered.

b. Item: 600 Hour PE

Discussion: The 179th Assault Helicopter Company and its supporting maintenance detachment has completed eight, 600 hour PEs to date with the ninth one programmed for completion in the next few days. The normal number of 600 hour PEs should have been six. The increase in the number of these inspections is a result of an increase in the flying hours.

Observation: If the present flying hour program continues it is anticipated that eleven to twelve 600 hour PEs will be completed during the first year of operation in country. Adequate resupply of spare parts and an extremely high degree of professionalism among the maintenance personnel is the key factor in the outstanding aircraft availability rate of the CH-47 within this battalion.
PART II, Recommendations

1. (U) Personnel

a. Ref., section I, para. 6b, and section II, para. 1a. Recommend approval of MTOE 1-258F be expedited or an interim augmentation be authorized to assign personnel to be utilized as door gunners on the CH-47 aircraft. Further recommend that sufficient personnel in MOS 11B10 be made available to the aviation units to avoid utilizing aircraft mechanics for these duties.

2. (C) Operations

a. Ref., section I, para. 6a and section II, part I, para. 2a. Recommend additional fixed wing aircraft be made available to perform missions between fixed wing airfields.

b. Ref., section II, part I, para. 2b. Recommend approval of MTOE 1-258F be expedited or an interim augmentation be authorized to obtain the MRC-95 radio.

3. (U) Logistics

a. Ref., section I, para. 6c.

(1) Recommend that the APH-6 flight helmet be made in a larger size.

(2) Recommend that an immediate study be conducted to determine a modification for the wiring harness of the APH-6.

(3) Recommend immediate action to procure the technical manuals for the APH-6 flight helmet.

b. Ref., section I, para. 6d. Recommend mimeograph machines be included as a supply stockage item.

AVFA-GC-OT (4 May 67) 2d Ind
SUBJECT: Operational Report of Lessons Learned for Quarterly Period Ending 30 April 1967 (U)

HEADQUARTERS, I FIELD FORCE VIETNAM, APO 96350 8 JUN 1967

TO: Commanding General, 1st Aviation Brigade, APO 96307

1. (U) This headquarters has reviewed the contents of the 52d Combat Aviation Battalion operational report for the period ending 30 April 1967, and the preceding indorsement with the following comments.

2. (C) Reference Section II, Part II - Recommendations:

   a. Paragraphs 1a and 2b - Personnel: Concur. The ORLL is not a means to expedite action for approval of MTOs' for personnel or equipment. Appropriate administrative action should be taken in accordance with USARV message (U), 19073, DTD 251132Z March 1967, subject: Changes in Equipment Authorisations. The 17th Combat Aviation Group has been informed of this procedure.

      (1) This recommendation is a generalization and may be misleading. The problem is one in which CH-47 aircraft requirements have increased sharply during the past quarter. Many relatively long distance missions are being performed by CH-47 aircraft to transport items of equipment between airfields which are capable of accepting C-123 and C-130 type aircraft. Even though it is recognized that fixed-wing aircraft are more economical for long distance missions, most users are apparently unwilling to accept the delay in the request to fill time for USAF fixed-wing aircraft. As a consequence, a number of urgent short notice requests for CH-47 aircraft are submitted.

      (2) Designation of a number of fixed-wing aircraft to provide support on an area support basis would seriously dissipate the resources to support airlift requirements in RVN. Fixed-wing transport aircraft have been and can be made available within a three to four hour period, dependent upon the priority of the mission. However, this does not relieve commanders of the responsibility of proper prior planning to prevent excessive use of tactical emergency and combat essential airlifts, which disrupts the scheduled airlift system in RVN.

   c. Reference paragraph 3a (1) - Logistics: Concur. Electronic command recognizes the problem of helmet size. Removing a portion of the existing padding by the unit is an interim solution. 34th Group Avionics newsletter, dated May 1967, has an article on the APH-6 helmet which includes numerous federal stock number line items for assistance to the unit in requisitioning spare parts. This information has been furnished the 17th Combat Aviation Group.

DOWNCARDED AT 3 YEAR INTERVALS
DECLASSIFIED AFTER 42 YEARS.
DOD DIR 5200.10

CONFIDENTIAL
AVFA-GC-OT (4 May 67)
SUBJECT: Operational Report of Lessons Learned for Quarterly Period Ending 30 April 1967 (U)

d. Paragraph 3a (2) - Logistics: Concur. Further investigation of this deficiency will be conducted by this headquarters.

e. Paragraph 3a (3) - Logistics: Concur. Technical manuals are required. Action taken by unit is considered adequate to initiate necessary measures to obtain technical manuals.

f. Paragraph 3b - Logistics: Concur. Mimeograph machines are available in limited quantities. These are procurement of equipment and missiles, Army (PMA) items and are not stocked below depot level. The 52d Combat Aviation Battalion has recently received three mimeograph machines, which has corrected this discrepancy.

SUBJECT: Operational Report-Lessons Learned Period Ending 30 April 1967  
RCS-CSFOR 67)

HEADQUARTERS, 1ST AVIATION BRIGADE, APO 96307  JUN 2 01917

THRU: Commanding General, U. S. Army Vietnam, ATTN: AVHC-G-DH, APO 96307  
Commander in Chief, U. S. Army Pacific, ATTN: GPQP-JH, APO 96558

TO: Assistant Chief of Staff Force Development, Department of the Army  
(ACSFOR DA), Washington D. C. 20310

1. (U) This headquarters has reviewed subject report of the 52nd  
Combat Aviation Battalion as indorsed and considers it to be adequate and  
concurs with the contents except as noted.

2. (C) The following additional comments are considered pertinent:

   a. Reference Section I, Part I, para 4b, page 3: Shortage of  
avionics test sets. Three of the four avionics detachments assigned are  
collocated in Pleiku. Inventory records on file at this headquarters reveal  
that the majority of needed equipment is available, although not all assign-  
ed to one unit. It has been recommended many times in the past that units  
which are collocated pool resources until all test equipment becomes avail-  
able. The 17th Combat Aviation Group will be advised to ensure that  
appropriate follow up action has been taken on all outstanding avionics  
equipment requisitions.

   b. Section II, Part I, para 1a, page 6: This headquarters is  
acutely aware of the problem concerning absence of authorization for door  
gunners in the 179th Assault Support Helicopter Company. The space ceiling  
imposed upon USARV did not permit favorable consideration of the MTCE  
submitted by the 17th Aviation Group in November 1966. Since no space  
trade-offs could be identified which would permit the 17th Aviation Group  
strength to remain within authorized limits, subject MTCE was not forward-  
ed for further consideration. Department of the Army has directed MTCE  
action on all Assault Support Helicopter Companies in RVN to accommodate  
new, light weight items of equipment previously approved for inclusion  
by DA. This proposed MTCE will also be used to realign the strengths of  
all CH-47 organizations. Each will now be provided with an identical  
structure which will include 13 door gunners, yet remain with total space  
authorizations of present force structure.

   c. Section II, Part I, para 2a, page 7: Non-concur with as-  
cussion concerning utilization of CH-47 aircraft contained in 2nd indorse-  
ment. The concept of utilization of CH-47 helicopters to perform missions  
between fixed wing bases, regardless of separation distance, is certainly  
one which will rapidly deplete our medium helicopter assets. This pro-  
blem extends beyond the scope of comparison of operating cost between

CONFIDENTIAL
fixed and rotary wing aircraft. All maintenance spare parts and equipment are programmed and procured on the basis of the monthly flying hours established in PM 101-20. Rebuild turnaround times on major assemblies such as engines and transmissions are also keyed to this flying hour program. This ORLL indicates the CH-47 aircraft are already overflying the established monthly flying hours by approximately 30%. (Section II, Part I, para 3b, page 8) Although the supporting field maintenance detachment has done an outstanding job of keeping up with this accelerated flying program, it cannot be assumed that spare parts and rebuild assemblies will continue to flow at a rate far in excess of that established by DA planning. The 2d endorsement infers that when users have failed to completely anticipate their requirements, it is better to utilize CH-47 assets airfield to airfield than to dissipate or disrupt the scheduled airlift system in RVN. In fact, when compared with Army aviation support, the scheduled airlift system in RVN is sluggish and unresponsive. In order to conserve expensive rotary wing assets; responsive, economical, Army fixed wing support should be made available on an area basis to cope with unscheduled missions. Utility type fixed wing aircraft have been requested, as mentioned in 1st indorsement, to reduce the flying hours now being expended on rotary wing aircraft in the administrative support role. Supported units must carefully consider mission requirements and exercise extreme care in the management of this valuable asset if continuous, reliable support is expected.

d. Section II, Part I, para 2b, page 7: Command, Control and Communication. The HF SSB radio sets AN/VSC-2 are presently being issued to the field. This will eliminate the problem of long range communication.

e. Section II, Part II, para 3, page 9: Logistics:

(1) Natick Lab has already been informed concerning the difficulty encountered with the size of the APH-5A.

(2) A study was recently conducted by the brigade surgeon on all aspects of the new helmet; a copy of which was also forwarded to Natick Lab.

(3) Technical manuals and spare parts were also requested. Spare parts have arrived, but as yet no manuals have been received.

(4) This headquarters concurs with the recommendation of maintaining float stocks of mimeograph machines. The present practice is to sustain the loss of a machine while it is being repaired under
AVBA-C

30 April 1967 (RCS CSFOR-65) (U)

HEADQUARTERS, UNITED STATES ARMY VIETNAM, APO San Francisco 96375 JUN 22 1967

TO: Commander in Chief, United States Army, Pacific, ATTN: GPOP-OT,
APO 96558

1. (U) This headquarters has reviewed the Operational Report—
Lessons Learned for the period ending 30 April 1967 from Headquarters,
52d Combat Aviation Battalion as indorsed.

2. (C) Pertinent comments follow:

   a. Reference item concerning aircraft utilization, paragraph 2a,
   page 7; paragraph 2b, 2d Indorsement and paragraph 2c, 3d Indorsement:
   Concur except for paragraph 2b, 2d Indorsement. The discussion presented
   by 1st Aviation Brigade in paragraph 2c, 3d Indorsement is valid and con-
   forms with the policy of this headquarters in regard to utilization of
   CH-47 helicopters.

   b. Reference item concerning cleaning of fuel filters, paragraph
   3a, page 8: Concur. The additional effort and man-hours employed in dou-
  bling the inspection requirement undoubtedly reduces the over-all effort by
   eliminating a number of malfunctions in the T-53 engine which were pre-
   viously encountered.

SUBJECT: Operational Report for the Quarterly Period Ending 30 April 1967 from HQ, 52d Cbt Avn Bn (RCS CSPF-65) (U)

HQ, US ARMY, PACIFIC, APO San Francisco 96558 1 SEP 1967

TO: Assistant Chief of Staff for Force Development, Department of the Army, Washington, D. C. 20310

1. (U) This headquarters has reviewed subject report and concurs in the report as indorsed.

2. (C) Reference Section II, Part I, paragraph 2a, basic report; paragraph 2b, 2d Indorsement; paragraph 2c, 3d Indorsement; and paragraph 2a, 4th Indorsement. DA message 828870, DTG 211957E August 1967, subject: Fixed Wing Aircraft, approved the loan of 60 utility fixed wing aircraft in addition to those currently authorized to USARV. The aircraft are being prepared for shipment and should assist in reducing the flying hours now being expended on rotary wing aircraft in the administrative support role.
