SUBJECT: Operational Report of Lessons Learned for Quarterly Period ending 31 January 1967

To: Commanding Officer

52nd Artillery Group

APO 96295

SECTION I: Significant Activities

1. At the start of the reporting period the battalion was supporting the 1st Cavalry Division on Operation Thayer I/Irving and the 101st Airborne Division on Operation Geronimo. "A" Battery and the battalion command group were located vic Phu My at LZ Crystal (BR 895659), "B" Battery was located vic Tuy Hoa (CQ 116438), "C" Battery and "E" Battery were located vic Phu My in LZ Uplift (BR 927755). On 1 November 1966, "E" Battery moved to Camp Radcliff (BR 467458) to support the base defense mission. On 2 November 1966, "C" Battery moved to LZ Oasis (ZA 073239) to support the 1st ACD and 4th Division on Operation Paul Revere IV. On 3 November 1966, "C" Battery moved to vic Plei Djereng (YA 656536) to support Paul Revere IV. On 21 November 1966, "B" Battery moved to vic CQ 137524 with the mission of GSR 5/27th Artillery. On 30 November 1966, "C" Battery returned to base camp (BR 467458) for a short period. During this move the "C" Battery Executive Officer and Chief of Firing Battery were injured by a mine. On 1 December 1966, "B" Battery moved further north to vic CQ 070715, mission unchanged. On 5 December 1966, "C" Battery moved to the Vinh Thanh Valley (BR 615607) and the battalion forward command post moved to LZ Hammond (BR 680540) to support Operation Thayer II. "C" Battery had the mission of GS 1st ACD and the battalion forward command post had the mission of reinforcing the 1/21st Artillery. On 20 December 1966, "A" Battery (-) moved to LZ Pony (BR 800832) and assumed the mission of reinforcing the 2/19th Artillery. On 25 December 1966, the battalion forward command post returned to An Khe (Base Camp). On 1 January 1967 the battalion forward command post returned to the Thayer AO, occupying a position vic Bong San at LZ Two-Bits (BR 847946) with mission of GS 1st ACD. On 23 January 1967, "B" Battery moved to CQ 253553 with the mission of GSR the 5/27th Artillery. At the termination of the reporting period battalion forward command post is at LZ English (BR 875007), "B" Battery is in vic CQ 253553, "A" Battery is at LZ Pony (BR 800832), and "C" Battery is in the Vinh Thanh Valley (BR 615607).

2. During the reporting period all batteries of the battalion became composite 8" How/175mm Gun. This process was begun when "B" Battery moved to Tuy Hoa on 22 October 1966. This process required exchanging two weapons with the 6th Battalion, 14th Artillery.
3. On 13 November 1966, "E" Battery (155mm How) was deactivated, General Order 3780, 1st ACD, dtd 13 November 1966, activated "D" Battery (155mm How), 2/17th Artillery. All 155mm peculiar equipment, and some personnel, were transferred to the 2/17th Artillery.

4. On 17-18 December 1966, the 1st ACD was heavily engaged in a battle which has become known as the "Battle of the 506 Valley". Highway 506 runs thru this valley (MR 850785) and was being upgraded by the 8th Engineer Battalion, 1st ACD, to permit "A" Battery to move by this route from LZ Crystal to LZ Pony. An attempt was made on 16 December 1966 to move "A" Battery by this route but it was found to be impossible due to road conditions. Prisoners captured after the "506 Battle" stated that the mission of the two VC battalions in the valley was (1) to ambush the battery that was to come up the road and (2) ambush the reaction force when committed. During the battle, "A" Battery fired in excess of 560 heavy artillery rounds during a seven (7) hour period. This represents approximately 51 tons of steel. During this period excellent support was provided the battery by the 1st ACD to include night resupply of ammunition and critical repair parts.

5. On 31 December 1966, a Low Level Extraction (LOLEX) resupply technique of artillery ammunition was accomplished via LZ Pony. The ammunition was dropped from Air Force C-130 aircraft into the Lowlands surrounding LZ Pony, and CH-47 helicopters were used to accomplish final delivery into the battery area. Thirty-one of 150 8 inch powder charges were ruptured.

7. On 18 January 1967, "C" Battery, under the command of Captain Joe A. Moore, fired its 25,000th round in country. BG De Saussure pulled the lawn. This represents approximately 5 million pounds of steel or the equivalent of 176,800 105mm rounds.

8. During the reporting period a total of 30 firing battery days were spent away from base camp.

9. During the reporting period the battalion fired a total of 8798 missions (35 PREPS, 40 TOF, 225 WILL ADJUST, 8222 INTERDICTION, 276 others) with a total expenditure of 17,945 rounds. Since firing its first mission on 21 November 1965, the battalion has fired a total of 35,705 missions and expended 92,992 HE rounds, 477 WP and 542 ILL. Fuze utilization has been 89,905 FD, 2,511 GFT, 1,555 MFSQ, and 2 CP.
AVFA-AT-3/18

SUBJECT: Operational Report of Lessons Learned for Quarterly Period ending 31 January 1967 (Cont'd)

SECTION II: Commanders Observations and Recommendations

PART I: Observations: The LOLEX delivery system utilized on 31 December 1966 is an effective resupply technique, but presents problems such as burial of the pallets in the mud due to weight of the rounds, some fouling of the rounds due to mud and water, and, most important, rupture of the powder bags due to excessive shock.

PART II: Recommendations: That heavy artillery ammunition be delivered by the LOLEX technique only when no other delivery means is available.

FOR THE COMMANDER:

HEADQUARTERS, 52D ARTILLERY GROUP, APO 96318, 4 Feb 67

TO: Commanding General, I Field Force Vietnam Artillery, APO 96350

2. Spelling errors have been corrected with pen and ink.

3. Information is current and appropriate.

4. The observation concerning LOLEX delivery of artillery ammunition is valid. The value of heavy artillery support to the supported unit should preclude the use of the LOLEX technique except under emergency condition.

5. Daily formal training is held in all units in fire direction and firing battery procedures to ensure individual and unit proficiency and accuracy of fires.

SUBJECT: Operational Report of Lessons Learned for Quarterly Period
Ending 31 January 1967 (RCS CSFOR) (U)

HEADQUARTERS, I FIELD FORCE VIETNAM, APO 96350

TO: Commanding General, United States Army Vietnam, APO 96307

1. (U) This headquarters concurs with the contents of the Operational Report of Lessons Learned for Quarterly Period Ending 31 January 1967, and the preceding indorsements with the following exception.

2. (C) Reference Section 2, Part II - Recommendations:

   The LOLEK delivery system is a tested and proven means of efficient delivery of supplies. There are many facets in the system, any of which could have been the cause of the damage, i.e., packing, type pallets or containers used, selection of drop zone, etc. Records of this headquarters indicate no record of an after action report which is required when damage is noted per paragraph 4(6), USARV Regulation 700-1.
