SIGNIFICANT HEADQUARTERS OR UNIT ACTIVITIES

1. (c) Administration and Personnel.

   a. The 1st Battalion, 27th Artillery, remains assigned to the 23d Artillery Group.

   b. Normal SI activities have been conducted during the period 1 May 1967 through 31 July 1967.

   c. Personnel strength of the command on 31 July 1967 was:

<table>

**m.** The morale of the command is outstanding
n. Educational opportunities for personnel are provided by USAFI extension courses.

o. Religious services, both Protestant and Catholic, are held on a regular weekly basis.

p. Throughout the Battalion, personal hygiene, prophylactic usage and frequent lectures on venereal diseases have helped in lowering the VD rate. The Battery Commander, Surgeon and Chaplain complement each other's efforts in their approach to the problem.

2. (c) Intelligence. The 1st Battalion, 27th Artillery initiated a visual Reconnaissance program on 28 July 1967. Resources allocated to the program are two fixed wing observation aircraft provided by the 21st Aviation Company. Air observers are furnished by this battalion.

3. (c) Training

a. On the job training has continued in all units of the 1st Battalion, 27th Artillery. Survey personnel continue cross training in Fire Direction procedures and are used to supplement the TOE complement in 24 hours operations.

b. The following periods of mandatory training for personnel were conducted during the reporting period:

   (1) CBR Refresher: 1 Hour
   (2) Armed Forces Censorship: 1 Hour
   (3) Clandestine surveillance and listening devices: 1 Hour
   (4) Command Information: 13 Hours
   (5) Civil Affairs: 1 Hour
   (6) Subversion and Espionage: 1 Hour
   (7) Survival, Evasion and Escape: 1 Hour
   (8) Geneva Convention: 1 Hour

c. Replacement training was accomplished by orientation at the 90th Replacement Battalion and a one week course at Phu Loi Replacement Training Company.

d. On 20 May 1967 two personnel attended a projectionist school conducted at Phu Loi by the 69th Signal Battalion.

e. Predeployment training and the Army Training test did not give the personnel of the unit a suitable appreciation of sustained 24 hour a day operation. Many of the early difficulties in sustaining the battalion throughout 24 hour a day operations are attributed to this lack of appreciation of the requirements associated with firing 1000 rounds per day on a continuing bases and maintaining the normal flow of maintenance administration and logistic actions.
4. (c) Operations

a. Normal operations consistent with the battalion mission were conducted during the reporting period.

b. Headquarters and Headquarters Battery moved its base camp from Phu Loi to Dau Tieng on 26 June 1967.

c. Service Battery moved its base camp from Phu Loi to Tay Ninh on 26 June 1967.

d. Battery B deployed from its Phu Loi staging area to its base camp in Tay Ninh on 3 May 1967.

e. Battery C departed the Phu Loi staging area on 4 May 1967, establishing base camp in Dau Tieng.

f. The 1st Battalion, 27th Artillery participated in the following operations during the reporting period.

(1) Operation LAM SON 67, conducted by the 1st Infantry Division, was supported by Battery A from 1 May to 7 July, and 29 through 31 July 1967 from the base camp location at Phu Loi. This operation was also supported by Battery B from 1 - 3 May 1967 and Battery C from 1 - 4 May 1967 from positions at Phu Loi base camp.

(2) Operation Manhattan was supported by Battery C during the period 4 - 10 May 1967 from FSB Echo located at XT 458261. The battery reinforced the fires of the 25th Division Artillery under the operational control of the 3d Battalion, 13th Artillery.

(3) Operation AHINA. Batteries B and C reinforced the fires of the 2d Battalion, 77th Artillery during the period 12-19 May 1967 from firing position at Soui Da (XT343576). The operation was conducted by the 3d Brigade, 4th Infantry Division under operational control of the 25th Infantry Division. Two forward observer parties were furnished to the 36th Ranger Battalion (ARVN), which participated in the operation as a blocking force. After termination of operation AHINA Battery B supported the withdrawal of 25th Division elements from the old French Fort (XT2867) by reinforcing the fires of the 25th Division Artillery.

(4) On 25 May Battery A displaced from its Phu Loi base camp to a firing position at XT792216 for a one day artillery assault mission. The battery fired 314 rounds on preselected targets in the Iron Triangle returning at Phu Loi the same day. A road clearing operation and security for the battery was furnished by the 2/8 Infantry Battalion (ARVN), 5th ARVN Division.

(5) Operation Diamondhead. Batteries B and C provided artillery support, mainly in a General Support Reinforcing role during the period 27 May through 31 July 1967. The operation was primarily a series of brief search and destroy operations conducted by elements of the 3d Brigade, 4th Division.

(6) From 1 June-9 July the battalion headquarters operated the FSCC for the Dau Tieng Base Camp Defense, controlling the fires of all artillery and mortar units positioned at Dau Tieng. The mission included the planning and coordination of the H&I program, counter mortar program, defensive concentrations, and a counter rocket program in support of the base camp defense.
(7) Operation PINEVILLE, 12 June - 1 July 1967. Two forward observer parties were provided to Special Forces teams conducting reconnaissance in Area of Operation BEAR. AO BEAR formed an inverted triangle with its apex the river junction at XT 4554 and the legs extending north to the Cambodian border at XT 3090 and XT 5991.

(8) Battery A conducted a one day artillery assault on 19 June 1967, moving from Phu Loi to a firing position at XT 773205. The battery fired 186 rounds of ammunition at preselected targets and returned to the Phu Loi Base Camp the same day.

(9) From 7 to 29 July Battery A from a position at XT 024147, fired in support of search and destroy operations conducted by the 1st Brigade, 1st Infantry Division in AO Strike. During the same period the battery also provided artillery support to the Dong Nai Sector.

5. (c) Logistics
a. Supply

(1) Class I and III support has been superior throughout the reporting period.

(2) Some problems have been encountered in obtaining repair parts. Continuous aggressive coordination and follow up action has been required to obtain critical parts for the M109 Howitzers. Assistance provided by the 23rd Artillery Group and Technical Representative from the USATAC has been required on a regular basis to obtain M109 Howitzer parts. The problem has been reduced by an improved reaction of the supply system to demand supported requisitions during the month of July.

(3) The battalion is assigned 43 personnel above TOE strength. TA-50-501 items were not on hand to equip all of these personnel upon arrival and initial requisitions were not filled on a timely basis. The S4 section made 8 visits and four telephone calls to the supporting supply agencies within a 23 day period. Assistance from 23d Artillery Group was requested by the battalion commander on 1 June 1967 and critical shortages were filled.
CONFIDENTIAL

(4) Supply of Class V for widely separated units has required maximum utilisation of the battalion assets. (The battalion has fired over 91,000 rounds during the reporting period requiring an average daily transport of 66 tons.) Unit distribution of 155mm projectiles to Fm Ldi was arranged with the supporting ASP. The remainder of the ammunition has been hauled by organizational transportation.

b. Maintenance. The M109 howitzer has presented the only significant maintenance problem. Contributing factors are the high ammunition expenditure (which is primarily fired with the maximum charge), the lack of a demand supported PLL, and the lack of experience in organisation and supporting maintenance repairmen. Continuous command attention by commander of the battery, battalion and group has been required to keep the howitzers operational. Technical advice and instruction of the USAFAC team has improved the maintenance skill of supporting maintenance units.

SECTION II

PART I, OBSERVATIONS

1. (5) Personal and Administration

a. ITEM: Courier Service

(1) DISCUSSION: An enormous backlog of administration accumulates unless adequate planning for messenger service is accomplished. Most field positions cannot be served by vehicle messengers due to insecure routes. Units must be alert and take advantage of each aircraft arriving or departing the area in order to pass correspondence on a timely basis.

(2) OBSERVATION: The planning for each operation must include adequate provision for regular messenger service to include the use of aircraft when required.

2. (6) Intelligence

a. ITEM: Use of air observers to assist ground observers.

(1) DISCUSSION: Forward observer parties operating in heavy jungles frequently experience difficulty in orientation and observation. An air observer can work with several ground observers providing accurate information on the enemy, terrain, location of friendly elements. When contact is made with enemy forces the air and ground observers work as a team, complementing the observation capabilities of each other.

(2) OBSERVATION: This technique requires extra coordination and training on the part of radio operators, but proved to be very effective in dense jungles during combat operations. The air observer must not disclose the location of friendly elements by circling directly overhead.

3. (7) Training and Organization

a. ITEM: Prodeployment training.

CONFIDENTIAL
DISCUSSION: Prodeployment training should include, after completion of the training test, a comprehensive field exercise of at least seven days duration, requiring continuous 24-hour operation. The exercise should match the conditions and requirements that will be faced upon arrival in country. In order to provide the unit with an appreciation of the problems to be encountered the battalion should fire 1000 rounds per day for seven days (90% to be fired at the maximum charge). Resupply should be restricted to one convoy daily from a base camp and be accomplished partly by aerial resupply. All normal administration must be accomplished, primarily from the base camp, with some administration handled from the forward area.

OBSERVATION: Units deploying to Vietnam need an appreciation of the magnitude of the tasks to be performed. An extended field exercise requiring sustained 24-hour operation, with a large ammunition expenditure and its associated logistics, will provide the unit with the experience needed to successfully perform its combat mission.

ITEM: Operations

(1) DISCUSSION: Construction of field fortifications in tactical positions during the rainy season is difficult due to the loose wet soil, high water table, and limited amount of material that can be carried into position with the unit. Improperly constructed bunkers are likely to collapse under the weight of overhead cover.

(2) OBSERVATION: Small size fortifications can be constructed with small pieces of lightweight material. Materials should be prefabricated according to a detailed plan of construction utilizing several small fortifications with overhead cover rather than one large bunker which requires heavy cumbersome materials which give way in loose soil.

ITEM: Operations in terrain impossible to wheel vehicles.

(1) DISCUSSION: Self-propelled artillery batteries can cross wet marshy terrain impassable by wheeled vehicles. Firing positions inaccessible to wheeled vehicles can be utilized by loading necessary equipment on the M109 howitzers, M548 cargo tracks and the M577 command post carrier.

(2) OBSERVATION: The use of tracked vehicles only allows the artillery to furnish fire support when terrain conditions prohibit the use of wheeled vehicles. Units must develop separate loading plans for this type of employment and rely on aerial resupply for sustained operations.

LOGISTICS

SECTION II

PART II, RECOMMENDATIONS

ITEM: Administration and Personnel

None
2. (U) Intelligence

None

3. (U) Training and Organization

That units programmed for Vietnam conduct an extended seven day field training exercise which will require sustained 24 hour a day operation and duplicate the ammunition expenditure, maintenance, resupply, and administrative requirements that will be experienced upon arrival in country.

4. (U) Operations

None

5. (U) Logistics

That continued command emphasis be placed on the training and qualification of M109 Howitzer artillery mechanics at all echelons.

WALTER G. KENNEDY
LTC, Artillery
Commanding Officer
SUBJECT: Operational Report-Lessons Learned (RCS-CSFOR-65) WD3EAA (U)

Department of the Army, Headquarters, 23d Artillery Group, APO 96289, 20 August 1967

TO: Commanding General, II Field Force Vietnam Artillery, ATTN: AVFB-FAC, APO 96266

1. (U) The quarterly report of the 1st Battalion, 27th Artillery is approved.

2. (U) Section I, paragraph in. The R&R utilization is very low since most battalion personnel arrived in the RVN in April 1967 and were not eligible for R&R until mid July.

3. (C) Section I, paragraph 5a (2). Usage demand data for support of repair parts for the M109 howitzer has been in the formulative stage. Supply support has improved to some extent during the reporting period. Aggressive individual actions have assisted in overcoming the supply lag and lack of PLL in most areas. Priority effort in supplying adequate PLL and ASL items for this weapons system is required.

4. (C) Section I, paragraph 5a (3). Shortages of TA 50-901 were overcome to some extent by relocation of 23d Artillery Group assets. The time lag for issue of these common items still remains as a problem area. Increased stockage is required to support demands and reduce sporadic issue of tropical boots, tropical fatigues and body fragmentation armor.

5. (U) Section II, Part II, paragraph 3. Concur.

ROBERT J. KOCH
Colonel, Artillery
Commanding
SUBJECT: Operational Report - Lessons Learned

DA, II, II Field Force Vietnam, APO 96266

6 SEP 1967

THRU: Commanding General, II Field Force Vietnam, APO 96266

Commanding General, United States Army Vietnam, ATH: AVHC-DH, APO 96507

Commander-In-Chief, United States Army Pacific, ATH: GPOP-OT, APO 96558

TO: Assistant Chief of Staff for Force Development, Department of the Army, Washington, D. C. 20310

1. (U) The quarterly report of the 1st Battalion, 27th Artillery adequately reflects the operations and lessons learned during the reporting period.

2. (U) Reference Section II, Part II, paragraph 3. Concur. The extended training exercise should parallel to the extent possible the situation to be encountered in Vietnam stressing such items as local security, short notice movements over roads likely to be under enemy surveillance and 24 hour-a-day FDC operations.

3. (U) Reference Section II, Part II, paragraph 5. Concur. This is a matter of continued command attention.

RAYMOND P. MURPHY
Brigadier General, USA
Commanding
SUBJECT: Operational Report-Lessons Learned, HQ 1st Battalion, 27th Artillery, 31 July 1967 (RCS CSFOR-65) (U)
