Significant Headquarters or Unit Activities

1. (U) Administration and Personnel

a. The 2d Howitzer Battalion, 35th Artillery remained assigned to the 54th Artillery Group. Headquarters and Headquarters Battery and Battery B maintained a permanent base camp at XUAN LOC, YT 473097. Battery A maintains a permanent base camp at NUI DAT, IS 428665. Battery C maintained temporary base camps at BILAN HOA, YT 023148 and a permanent base camp at XUAN LOC, YT 473097. On 26 April 1967 C Battery was relieved of the responsibility of maintaining a base camp at BILAN HOA.

b. Normal S1 activities have been conducted during the period 1 February 1967 through 30 April 1967.

c. Personnel strength of the command on 30 April was:

<table>
<thead>
<tr>
<th>UNIT</th>
<th>TOE AUTH</th>
<th>MTOE FENDING</th>
<th>DESIGNATED</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>OFF WO EM</td>
<td>OFF WO EM</td>

</tr>
</tbody>
</table>

General Order No. 60, HQ, 5th US Army dated 20 April 1966 authorized the strength of the battalion as 33 officers, 4 warrant officers, and 574 EM. This includes all of the above mentioned pending MOS except 2 officers and 7 EM of the aviation section.

d. Critical MOS shortages in ECO grades: During the reporting period there were no key MOS shortages experienced.

e. Personnel changes during this quarter include:

<table>

m. The morale of the command is outstanding. Units in permanent base camp enjoy nightly movies and organized athletics to include basketball, volleyball and softball. Dry room equipment has been issued to Headquarters, A, and Service Batteries, the three which have dayrooms, and permanent buildings are being constructed. NCO and enlisted mens clubs are provided in all base camp areas.

n. Educational opportunities for personnel are provided by USAFI extension courses.

o. Religious services, both Protestant and Catholic, are held on a regular weekly basis. A Bible study is conducted weekly by the 54th Artillery Group Chaplain. A permanent chapel has been provided in the XUAN LOI base camp.

p. Throughout the battalion, personal hygiene, prophylaxis usage and frequent lectures on venereal diseases have helped in lowering the VD rate. The battery commanders, surgeon, and chaplain complement each other's efforts to find solutions to the problem.
2. (U) Intelligence.

a. The semiannual inspection of classified documents was completed 3 April 1967. No discrepancies were found.

b. The battalion continues its mission to provide air observers for visual reconnaissance of the XUAN LOC area. The area of responsibility is generally limited by the range of the 175mm guns. The average number of missions and hours flown per day are three missions and six hours respectively.

c. Target acquisition and the planning of H&I fires continue to be performed by the 54th Artillery Group.

3. (U) Training

a. The battalion has undertaken an extremely intensified on-the-job training program for all personnel. All newly assigned personnel are receiving forty hours of formal training in tactics and weapons familiarization prior to being assigned to the batteries. A program to acquaint new artillery fire direction computes with the problems and procedures inherent with operations in the Republic of Vietnam as well as the cross-training of survey computers as artillery computes has proved extremely effective.

b. The following periods of mandatory instruction were given to all personnel during the reporting period.

(1) Command information - 12 hours
(2) Character guidance - 6 hours
(3) Prevention of heat casualties - 3 hours
(4) First aid (basis on controlling bleeding) - 2 hours

4. (C) Operations

a. Normal operations, consistent with the battalion mission, were conducted during the reporting period.

b. At the beginning of the reporting period the battalion was deployed as follows:

(1) Headquarters and Headquarters Battery located at XUAN LOC, YT 473097, with normal support missions and base camp defense.

(2) Service Battery at LONG BINH, YT 056116, with normal support mission.

(3) A Battery at NUI D.T YJ 428665 with mission of general support reinforcing (GSR) the 1st En 83d Arty.
(4) B Battery at T/L AT-11 attached to the 25th Infantry Division with the mission of GSR 25th Infantry Division Artillery.

(5) C Battery was located at D/AU T/L 62, XT496475, attached to the 1st Infantry Division with a mission of base camp defense.

c. On 18 February the battalion (less C Battery) was attached to the 25th Infantry Division to support Operation Junction City. The battalion (-) was positioned northwest of T/L AT-11 City. Btry A, 2d En, 32d Arty (8th SP) was attached to the battalion on 19 February. During the operation the battalion occupied three tactical positions, all in PHUOC HIII District. Btry A, 2d En, 32d Arty was detached on 13 March. On 15 March the battalion was detached from the 25th Infantry Division and moved to XULI LOC base camp. A Battery moved to HUI DAT base camp on 20 March. Battalion missions during the operation were:

19 Feb - 21 Feb GS 25th Infantry Division, Reinforcing 3/13 Arty
21 Feb - 6 Mar GS 25th Infantry Division, Reinforcing 3/32 Arty
6 Mar - 14 Mar GS 25th Infantry Division, Reinforcing 11th Armored Cavalry Regiment Artillery
6 Mar - 10 Mar GS 3/21 Infantry (C Battery only)

d. C Battery was committed to Operation Junction City on 18 February by the 1st Infantry Division, to which it was attached. During the operation the battery made 12 tactical moves within QUIL PHUOC Province. The battery was detached from the 1st Infantry Division on 14 April and returned to HUI HQT base camp on 14 April. The missions of C Battery during the operation were:

21 Feb - 3 Mar GS 1st Infantry Division, Reinforcing 8/6 Arty
3 Mar - 18 Mar GS 1st Infantry Division, Reinforcing 2/33 Arty
18 Mar - 20 Mar GS 1st Infantry Division, Reinforcing 1/5 Arty
20 Mar - 7 Apr GS 1st Infantry Division, Reinforcing 8/6 Arty
7 Apr - 10 Apr GS 1/26 Infantry
10 Apr - 14 Apr GS 1st Infantry Division, Reinforcing 8/6 Arty

e. C Battery was moved to XUL I LOC base camp on 16 April reverting to battalion control.

f. On 14 March B Battery was attached to the 3/32 Arty and moved into a tactical position north of T/L AT-11 City to support Operation Junction City, and from 14 March to 10 April B Battery remained in a role of GSR the 3/32 Arty. During this period the battery made 10 tactical moves within QUIL PHUOC Province. On 10 April B Battery was detached from the 25th Infantry Division and moved to GO D/AU IL, XT412939, with a role of GS to II Field Force Vietnam, Reinforcing the 25th Infantry Division Artillery.

g. On 21 March A Battery was moved from its base camp at HUI DAT to the southwest to support Operation Portsea, an Australian Task Force search and destroy operation. Battery mission during the operation was Reinforcing the 1st Bn, 83d Arty. Battery was split on 5 April and three guns each put
in two separate tactical positions. The unit was consolidated in the original field location on 12 April and returned to NUI BAT base camp 15 April.

b. On 22 April the mission for B Battery was changed to reinforcing the 25th Infantry Division and the battery deployed to a fire support base at TM97266. From this position the battery fired in support of Operation Manhattan, a search and destroy operation in the BOI LOI Woods. At the end of the reporting period the battery was still engaged in this operation.

c. On 25 April C Battery moved to vicinity CIA RAY, YN628113, to support a search and destroy operation of the 3/5 Cavalry, 9th Infantry Division, in that area. At the end of the reporting period the mission was unchanged.

d. The following number of missions were fired with total amounts of ammunition expended:

<table>
<thead>
<tr>
<th>UNIT</th>
<th>NUMBER OF MISSIONS FIRED</th>
<th>AMMUNITION EXPENDED</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Battery</td>
<td>2,689</td>

</tr>
<tr>
<td>B Battery</td>
<td>2,161</td>
<td>17,567</td>
</tr>
<tr>
<td>C Battery</td>
<td>4,139</td>
<td>41,161</td>
</tr>
<tr>
<td>TOTAL</td>
<td>8,989</td>
<td>74,898</td>
</tr>
</tbody>
</table>

5. (C) Logistics

a. During the reporting period there has been improvement in all classes of supply with the exception of TI-50-80 items. Due to the recent influx of replacements this has become a problem. Close coordination was required to bring rotating personnel in from the field to turn over their equipment to their respective replacements.

b. Maintenance support has improved due to an increase in the stockage of M109 howitzer parts. There continues to be a shortage of replacement parts for multi-fuel vehicles. Primarily, these shortages are fuel tanks, radiators, tires and batteries.

6. (U) Civic Actions

a. During the period 1 February 1967 to 30 April 1967 the Battalion Civic Actions MEDCAP Team concentrated its activities in the assigned sector in LONG KHANH Province, with particular emphasis on the village of TAN LAF, which consists of 5 hamlets. Local GVN, RF/FF and civilian leaders have worked closely with the team to coordinate activities. All projects are of a joint effort with US personnel providing material and technical assistance as required.
b. The MEDCAP Team, headed by the battalion surgeon, treated 581 patients through visits to TAN LAP. Approximately 24 of those patients have had to be brought in to the provience hospital at XUAN LOC or have required follow-up action of some nature. In addition, approximately 78 Vietnamese were treated by battery medics on field operations during this period. The battalion surgeon visited the provience hospital on an average of twice weekly during this period, assisting in the wards and in 26 emergency operations.

c. The village of TAN LAP received assistance in the form of soap and food stuffs. Assistance was also given in material and technical aid to improve the sanitation and defense of TAN LAP. This was accomplished through water well improvements, training of the village medic, and work on protective fences and bunkers.

d. The civic action team assisted the XUAN LOC orphanage through the contribution of food stuffs and clothing.

7. (V) Communications

a. From 1 February to 30 April the battalion communications section handled approximately 450 radio messages. The message center handled 750 messages in addition to all incoming and outgoing distribution for the battalion.

b. The battalion communications section has begun an intensified on-the-job training program which encompasses all phases of communications.

c. Supply of communication replacement parts continues to be extremely limited.

SECTION II

PART I, OBSERVATIONS

1. (U) Personnel and Administration.

ITEM: Difficulty in obtaining information about personnel who have been air evacuated.

DISCUSSION: When a unit suffers a casualty requiring emergency air evacuation it loses all contact and is frequently unable to ascertain the seriousness or disposition of the individual. This is particularly true when the individual is moved from aid stations to surgical or evacuation hospitals without being admitted. Although notification is sometimes sent by mail from the hospital admitting the individual, this process takes several days. Since this period is critical for submitting personnel reports it creates a hardship on the unit.

OBSERVATIONS: Present reporting system is too slow to enable units to process required reports and personnel actions within required time.
PART I, OBSERVATIONS (Cont’d)

2. (U) Intelligence. None

3. (U) Training and Organisation. None

4. (C) Operations.
   a. ITEM: Hardships created by lack of organic aircraft.

   DISCUSSION: This battalion deployed to the Republic of Vietnam
   less any organic aircraft due to the Department of the Army deletion of
   the air augmentation as listed in the TOE. This lack of aircraft has proven a
   severe limitation to target acquisition, command and control, personnel move-
   ment, communications, and movement of critical maintenance parts.

   OBSERVATION: This battalion should be authorized an augmenta-
   tion of two O-1 type aircraft and one OH-13 or OH-23 aircraft.

   b. ITEM: AM radio transmitter failures.

   DISCUSSION: Radio Set, AN/GRC-46 has been used in the continuous
   wave (CW) mode to a great extent. Experience has shown that the T-195 trans-
   mitter does not last under this prolonged use. Deadtime rate for this trans-
   mitter and repair time have been excessive. Attempts to cool the transmitter
   by improvised fans and overhead shielding from heat have been unsuccessful.

   OBSERVATION: Radio Set, AN/GRC-46 is not sufficiently durable
   for sustained operation in a tropical climate.

c. ITEM: Problems inherent in apparent change of mortar tactics.

   DISCUSSION: Recent use of heavy mortars and daylight attacks by
   the enemy have created increased demands on bunker construction and passive
   defense measures. Mortaring of C Battery during noon meal hours indicates an
   effort to attack when personnel are congregated and unprotected.

   OBSERVATION: Personnel losses and injuries through mortar attacks
   can be reduced by increased emphasis on construction of bunkers with overhead
   covers; however, batteries are severely limited by the quantity of engineer
   materials that can be carried organically. The availability and field deli-
   very of sufficient engineer construction materials must be improved. A lesson
   relearned is that meal hours must be established on a random schedule, posi-
   tions of serving lines and wash cans frequently changed and troop congregation
   prevented. All personnel should return to their duty stations to eat so as to
   have immediate access to personnel shelters. The increased use of expendable
   eating utensils will prevent exposure of personnel while washing mess gear.
SECTION II

PART I, OBSERVATIONS (Cont'd)

d. ITEM: Need for mechanized earth moving equipment at unit level.

DISCUSSION: Batteries are being deployed in tactical missions which require frequent moves. Each time a battery moves into a new area it is extremely vulnerable to mortar or ground attack until proper bunkers are constructed. With units moving daily, there often is insufficient time to construct those bunkers properly without some mechanized earth moving machinery. This requirement to prepare positions by hand also leads to serious problems of personnel fatigue, a major contributing factor in artillery incidents. When a unit prepares to leave a position area it takes several hours to fill in bunkers and level parapets.

OBSERVATION: The only satisfactory method of rapidly preparing satisfactory mortar protection is by utilizing earth moving equipment. It is therefore desirable to attach a scoop loader or bulldozer to a battery that is required to make frequent moves in a high mortar incident rate area. This unit has submitted a request for temporary issue of four scoop loaders, one per firing battery and one for battalion headquarters.

e. ITEM: Reducing the vulnerability of vehicles to mortar attack.

DISCUSSION: It has been found that the primary causes for deadlining vehicles following a mortar attack are punctured tires, radiators, and fuel tanks.

OBSERVATION: By sandbagging, digging in, and providing revetments for vehicles the deadline rate following a mortar attack will be considerably reduced.

SECTION II

PART II, RECOMMENDATIONS

1. (U) Personnel and Administration.

Recommend that one central information clearing agency be established in each field force area to provide a locator service for evacuated personnel. Information should be disseminated to parent units by electrical means.

2. (U) Intelligence. None

3. (U) Training and Organization. None

4. (U) Operations.

a. Recommend that artillery battalions in a general support role be authorized organic aircraft as required by their mission.
b. Recommend that the Radio Set AN/BCR-46 be replaced with KRT Set AN/BCR-142.

c. Recommend that all separate artillery battalions be provided with some type of earth moving machinery.

5. (U) Logistics. None

WILLIAM H KITTER
LTC, Artillery
Commanding
The quarterly report submitted by the 2d Bn, 35th Artillery is considered adequate.

2. (C) Reference Section II, Part I paragraph 1, Air Evacuees. Letters have been sent to the Divisions that this Group normally supports in the field, requesting that their liaison personnel at hospitals notify their Division Artillery Headquarters when personnel from 54th Artillery Group Battalions are admitted to the hospital to which they are assigned. This service was requested for units of the Group that are placed under Divisional Operational Control.

3. (C) Reference Section II, Part I paragraph 4a, Lack of Organic Aircraft. Artillery units in Vietnam are severely restricted by the lack of organic aircraft. Aircraft are desperately required for target acquisition, command and staff visits, personnel replacements and supply of critical maintenance parts.

4. (C) Reference Section II, Part I paragraph 4b, AN Radios. Due to the high failure rate and age of the AN/GRC-46 radios, the Army is in the process of replacing the AN/GRC-46 with the new single side band AM radio AN/GRC-4/2. This new radio has proven to be more dependable in adverse climates.

5. (C) Reference Section II, Part I paragraph 4c, Mortar Attack. Basic artillery training demands the need for proper bunkers and overhead cover for passive defense against mortar attacks. The random feeding times and staggering of mess lines are standard operating procedures.

6. (C) Reference Section II, Part I paragraph 4d, Need for Mechanical Earth Moving Equipment. The requirement of firing batteries for mechanical earth moving equipment has been realized. This headquarters is preparing a request for earth moving equipment for all firing units.
CONFIDENTIAL

SUBJECT: Operational Report for Quarterly Period ending 30 April 1967, Reports Control Symbol CSFOM-65

7. (C) Reference Section II, Part I paragraph 4e, Reducing the Vulnerability of Vehicles to Mortar Attack. Sandbagging and protecting vehicles from enemy attack are SOP.

8. (U) Reference Section II, Part II. This Headquarters concurs in all recommendations of the 2d Bn, 35th Artillery

CHARLES M. MIZELL
Colonel, Artillery
Commanding
CONFIDENTIAL

AVNRC-PAC (14 May 67)  2d Inf
SUBJECT:  Operational Report - Lessons Learned (U)

Department of the Army, Headquarters, II Field Force Vietnam Artillery,
APO 96266  9 JUN 1967

TO:  Assistant Chief of Staff for Force Development, Department of the
Army, Washington, D. C.  20310

1.  (U)  The quarterly report of the 2d Battalion, 35th Artillery ade-
quately reflects the operations and lessons learned during the reporting
period.

2.  (U)  Reference Section II, Part I, paragraph 4b, AM Radios.  The
deadline rate for the radio set AN/GRC-46 has been high throughout the com-
mand.  Suitable cooling equipment should be provided for the Electronic
Equipment Shelter E-89C/0 and the issue of the new radio sets AN/GRC-142 and
122 should be expedited.  This recommendation was included in all previous
reports of this headquarters.

3.  (C)  Reference Section II, Part I, paragraph 4d, Need for Mechanical
Battle Moving Equipment.  This headquarters is presently staffing the letter
referred to in paragraph 6, lst Indorsement.

4.  (U)  Concur with other comments, recommendations, and observations
in basic document and lst Indorsement.

AVHGC-DST (9 May 1967) 4th Ind
SUBJECT: Operational Report-Lessons Learned for the Period Ending 30 April 1967 (RCS CSFOR-65) (U)

HEADQUARTERS, UNITED STATES ARMY, VIETNAM, APO San Francisco 96307 (P) JUL 1967

TO: Commander in Chief, United States Army, Pacific, ATTN: G-31 CT, AIO 96558

1. (U) This headquarters has reviewed the Operational Report-Lessons Learned for the period ending 30 April 1967 from Headquarters, 2d Howitzer Battalion, 35th Artillery as indorsed.

2. (C) Pertinent comments follow:

a. Reference item concerning shortage of replacement parts for multi-fuel vehicles, paragraph 5b, page 7: Concur. There have been shortages of batteries and tires in the past, however, deadline reports at this headquarters do not reflect any shortages of these or other parts for this vehicle.

b. Reference item concerning hardships created by lack of organic aircraft, page 9, and paragraph 3, 1st Indorsement: The requirement for aviation support is recognized; however, this headquarters has no assets with which to fill this requirement. Assets to meet this and similar requirements have been requested from DA by this headquarters. Until such time that requested assets are made available, aviation support must be provided from resources currently available to II Field Force Vietnam.

c. Reference item concerning the difficulty in obtaining information about personnel who have been air evacuated, page 8, paragraph 2 and paragraph 2, 1st Indorsement, and page 10: Under the provisions of USAF Regulation 40-8, a copy of the hospital admission and disposition report is required to be sent to the parent organization of each patient admitted or dispositioned. It is acknowledged that distribution and communication delay do create difficulties as noted. The solution of such problems lies with improved direct liaison between the medical unit or surgeons providing organic medical service and the supporting hospitals. It is only through this method that essential information can be obtained in a timely manner.

d. Reference item concerning AF radio transmitter failures, page 9, paragraph 4, 1st Indorsement, and page 10: Concur with the comments of the 1st Indorsement.
