COMMERCIAL SUPERSONIC TRANSPORT AIRCRAFT
RESEARCH PROGRAM

Selected References—Bibliographic List No. 8

April 1963

Federal Aviation Agency
Washington 25, D.C.
P R E F A C E

This bibliography lists citations on the subject of the commercial supersonic transport aircraft research program, the ultimate goal being the development of a Mach 3 and 3,500 mile range transport that can cruise the world airlanes.

The contents have been divided into six sections with subdivisions to facilitate a ready subject approach to selected references.
