CONSOLIDATED TRANSLATION SURVEY

PREFACE

This survey is prepared monthly by the Foreign Documents Division, Office of Central Reference, CIA, from lists received through the cooperation of US government agencies and includes translations prepared by such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects completed or started during the preceding month.

Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date of publication, and publication identification of the completed project are given when available. Tables of contents of journals translated cover-to-cover are reproduced from the current publications.

Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and, when available, a project-control or "in-process" number is noted in parentheses following the title. Certain details may be unavailable on such projects. New projects in process are not listed again until they are completed.

An index to authors of items in this issue is provided at the end of the survey.
REQUESTS FOR COPIES

Requests for copies of published projects should be made direct to the designated producing organization.

TELECOMMUNICATIONS ABROAD

V. N. Golubev: Basic Characteristics of Modern Receivers for Trunk Communication Lines

New Books
W. Michalikiewicz, J. Baron, L. A. Przybora: Testicular feminization syndrome (Clinical, hormonal and histopathological studies in five cases occurring in two sibships).

J. Teter, K. Boczkowski: Syndrome of testicular dysgenesis in a boy with ambiguous external genitalia and male 46/XY karyotype.

S. Magas: Thyroid sensitivity to 131I and the distribution of radioiodine among plasma protein fractions in hyperthyroid subjects treated with 131I.

W. Gasiorowski, W. Czech: The behavior of 131I conversion ratio and F13 THR in "hot" thyroid nodules independent of TSH.

R. Rogozinski, J. Rykala: Effect of carboxylase chloride administered simultaneously with chlorpropamide and insulin upon the pattern of glucose tolerance curves in juvenile diabetes.

W. Fortak, T. Modanska: The behavior of activity of alkaline phosphatase in the cells of vaginal smears in the course of estrogenic cycle in the female white rats.

E. Samojlik: The effect of monoamino oxidase inhibitors on morphologic features of the pituitary and reproductive organs in rats. II.

J. Stanoeck, J. Gregorczyk, A. Lemienowska-Tokarz: Biochemical changes in guinea pigs treated with large doses of hydrocortisone.

Transactions of the 111rd Conference of the Pediatric Section, Polish Endocrinological Society.

R. Flick: The effect of thyroxin and gonadotropins on oxygen consumption by gonadal tissues.

* The papers denoted by asterisks may be found in the Polish edition of periodical.

The journal covers ferrous and non-ferrous metallurgy, including ore beneficiation, extraction and refining, mechanical properties at ordinary and elevated temperatures, alloy compositions and structures, effects of impurities and methods of purification, methods of testing both for routine examination and for research investigations, etc. Increasing attention is being paid to metals and alloys with new properties, such as, very high strength, resistance to high temperatures, radiation and corrosion, superconductor and semiconductor materials.

Following is a complete translation of the Russian-language periodical Kibernetika (Cybernetics), Kiev, No 6, November-December 1965, "Naukova Dumka", pages 1-103, plus inside front and rear covers. Names of authors and original page numbers accompany each article.

CONTENTS

Sidel'nikov, V.M.
Statistical Properties of Transformations Accomplished by Finite Automata .......................... 1
A statistical course is connected to the input of a generalized automaton. The ratio between entropies at the input and output of the automaton is considered. In the second part of this work a formula interrelating the lengths of the output words of a one-to-one strongly connected automaton is derived.

Spivak, M.A.
Representation of Automaton Mapping by Regular Expressions 27
Automaton mappings are considered as events in the alphabet of pairs of input and output signals. It is shown that an automaton mapping is a finite-automaton mapping when, and only when it is a regular event. Hence follows a new method of specifying finite-automaton mapping by means of regular expressions. Algorithms for automaton analysis and synthesis are described.

Borodinskiy, Yu. M.
Experiments With Moore's Finite-State Automata ........... 32
The article examines the Moore problem of the shortest experiment establishing the distinguishability of an arbitrary representative of the class of all strongly (Continued)

connected Moore \((n, n, p)\)-automata with pairwise distinguishable states from all the other representatives of this class.

Nikitin, A.S.

Algorithm for an Economical Utilization of Memory \(52\)

The author describes an algorithm for economical utilization of memory which can be used to both optimize the number of working registers in electronic digital computers whose functioning is described in the operator-scheme language and the memory volume within a certain class of computer programs.

Pukhov, G. Ye.; Borkovskiy, B.A.

Dynamic Electronic Simulation of Mathematical Operations \(59\)

As a continuation of the authors' previous investigations, the simulation of mathematical operations by means of a switchable amplifier and memory capacitors is examined.

Borovskiy, B.A.

Method for Dynamic Simulation of Differential Equations \(68\)

The article describes a method of constructing a variable-structure electronic circuit with one operating amplifier for the integration of differential equations.

Mishutin, V.G.

On a Sufficient Sign of Convergence of the Balancing Process for Quasianalog Models \(74\)

The article introduces a general definition of the positive definiteness of an operator in Hilbertian space. On the basis of this definition the author isolates a class of matrices for which the process of balancing in quasianalog models is a convergent process.

Borkovskaya, V.N.

Simulation of a Simplex Method of Solution of a General Problem of Linear Programming by Means of Reversible Linear Converters \(81\)

The author describes a method for simulating the general problem of linear programming that does not require the use of diodes and can be realized in a reversible linear converter whether AC or DC.

Losinskiy, L.S., Pogrebinskii, S.B., Yarovitskii, N.V.

Associative Search in Processing Non-Ordered Information \(91\)

The article deals with the problem of processing a disordered flow of information. An algorithm for processing a disordered flow of phrases in accordance with their attributes is presented and a complex of associative

- 181 -
and periodic memory devices realizing this algorithm in real time scale is described.

Brodi, S.M.
Investigation of a Queueing System by Means of Semi-Markov Processes .......................... 106

The article isolates the recurrence relations for the Laplace transformation of the residence time of a class of Semi-Markovian processes in a fixed set of states. These recurrence relations make it possible to derive certain steady-state characteristics of various queue systems.

Knopov, P.S.
On the Estimation of the Spectrum of a Homogeneous and Isotropic Gaussian Field .................... 116

The article examines the problem of constructing the estimates of the spectral density and spectral function of a homogeneous and isotropic random field. It is shown that these estimates will be asymptotically unbiased and valid.

Dem’yanov, V.F.
On the Minimization of Functions on Convex Bounded Sets ............................................. 131

The work examines a series of algorithms for the solution of the problem of the minimization of functions in the presence of convex constraints. These algorithms may be effectively applied when the operation of projecting a point onto a domain can be accomplished without special difficulty.

Leonov, V.V.
On the Numerical Solution of a Class of Optimum-Value Problems by L.S. Pontryagin’s Method ......... 156

The article examines a computational scheme based on the method of L.S. Pontryagin for a class of optimum problems. It proves the existence theorems and uniqueness of a system integrodifferential equations whose solution is equivalent to the solution of the optimum problem. This system has singularity.

Liptser, R.S.
On the Control of a Wiener Process According to Incomplete Data ........................................ 170

The work examines a problem of controlling the drift of the diffusion process observed against a background of "white" noise.

Rvachyov, V.L., Stoyan, Yu. G.
On the Problem of Non-Intersection of Geometric Figures of Special Form ................................ 178

(Continued)
The author proposes a method of composing inequalities representing the conditions for the intersection of geometric figures whose contour follows arcs of circles and segments of straight lines. The apparatus of R-functions is utilized in writing the conditions for the intersection of elements of the figure contours.

Firsov, V.V.
On the Isometric Embedding of a Graph in a Boolean Cube...

The article examines the problem of the isometric embedding of an arbitrary graph into a Boolean cube of sufficiently large dimensionality; this problem arises in mathematical linguistics. A sufficient condition for this embeddability is presented. It is shown, however, that there exist graphs not embeddable into the Boolean cube, even in the presence of an arbitrary monotonic transformation of the metric.

Number of Ways of Coloring the Elements of a Tree and a MultiTree...

The note elucidates the numerical characteristics of the multi-tree which affect the number of methods of correctly coloring its ribs with a specified number of colors. An explicit formula is presented.

CONTENTS

Influence of Solvent and of Steric Factors in the Michael Reaction—A. N. Kost and S. I. Suminov ................................. 1359 1341
Calculation of the Basicity of Pyridine Bases—L. I. Grandberg, G. K. Faizova, and A. N. Kost ................................ 1366 1348
Reactions of Nitrosyl Chloride with Unsaturated Compounds. XXII. Reaction with α-, d-Unsaturated Aldehydes—K. A. Ogloblin and A. A. Potchkhin .................... 1370 1352
Reactions of Nitrosyl Chloride with Unsaturated Compounds. XXIII. Reaction with 3,3,3-Trichloro-2-methylpropene and 2-Nitropropene—K. A. Ogloblin and V. P. Semenov .......................................................... 1374 1356
Reactions of Nitrosyl Chloride with Unsaturated Compounds. XXIV. Reactions with Methyl Acrylate and Acrylonitrile—K. A. Ogloblin and V. P. Semenov .............. 1378 1361
The Reaction Between Hydroxylamine and Some Glycidyl Ethers—M. S. Malinovskii and V. A. Martyushenko ............................... 1382 1365
Vinyl Monomers Based on Dicarboxylic Acids. VII. Vinyl Alkyl Esters of Asiacid and Sebacic Acids—G. N. Freidlin, A. P. Chumak, and L. I. Dzaroikhovska .................................................. 1385 1367
3-(p-Methoxyphenyl)cyclopentan-1-one-2-carboxylic Acid N-Dutylamide and Piperidine. XIII—N. I. Men'shova, G. S. Grinenko, V. A. Mironova, and V. I. Makitmov .......... 1388 1370
8-Dilactones—Structure and Reactivity—L. P. Zalkusev and V. V. Measev ............................................................. 1393 1375
 Halo-Arylation of Unsaturated Compounds by Means of Aromatic Diazo Compounds. XXV. Chloro-arylation of Vinyl Chloride: 1,1-Dichloro-2-arylides, 2-Chlorostyrenes and 2-Arylmethylhydroxylate—V. M. Naidan, N. V. Daumedzei, and A. V. Dombriskov .................................................. 1395 1377
Terpenophenols. XXVI. Study of the Products of Condensation of Dihydrocyclopentadiene with o- and p-Carboxylic Acid Derivatives and Further Conversion of the Condensation Products—L. A. Knihova and S. I. Vozub .......... 1401 1384
Ketovinylation of 9-Nitroanils—V. F. Bolyaeve and R. I. Shashonkova, ................. 1405 1388
Synthesis of Di-tert-butyl Peroxide—V. L. Antonovskii and Yu. D. Emelin ........ 1408 1391
N-Alkylideneacrylamides. II. Condensation of N-Alkylideneacrylamides with 1,4-Quinones—V. L. Floren'tev ................................................................. 1411 1393
Vinyl Esters of Terephthalic Acid. II. —F. N. Stepanov and T. N. Veresnchova .... 1414 1396

Ms. Roberta Schoen  
Deputy Director for Operations  
Defense Technical Information Center  
7725 John J. Kingman Road  
Suite 0944  
Ft. Belvoir, VA 22060

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the "Non-NIS" referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

Sergio N. Alcivar  
Chief, CIA Declassification Center,  
Declassification Review and Referral Branch
