(2) On 8 August 1969 Battery B incurred 2 KIA and 10 WIA when an enemy 120mm rocket landed approximately 10 meters from the unit messhall at approximately 0710 hours.

(3) On 11 August 1969 LTC Isaac D. Smith assumed command of the Battalion from LTC Frank M. Kulik, Jr.

(4) On 16 August 1969 at FSB C-2, the Battalion Commander, LTC Isaac D. Smith, fired the 200,000th round expended by this battalion since its arrival in country.

(5) On 22 August 1969 at YD185588, the Battery C commander received light sniper fire. No casualties or equipment damage were suffered.

(6) On 24 August 1969 at YD133627, a Battery C convoy received light sniper fire. No casualties or equipment damage were suffered.

(7) On 2 September 1969 this battalion and all its units were hit by typhoon Dora from 0800-1500 hours. There was extensive equipment and building damage, but no personnel injuries.

(8) On 2 September 1969 Battery C incurred one WIA NNC who accidentally shot himself while cleaning a .45 caliber pistol.

(9) On 26 September the Army Concept Team in Vietnam from USARV headquarters visited this battalion.

(10) On 30 September 1969 Battery A retubed from 175MM to 8 inch.

(11) On 11 October 1969 Battery C displaced from C-2 to A-4 at YD11836989 without incident.

(12) On 20 October 1969 Battery A displaced from Elliot Combat Base to Camp Carroll at YD06205450 without incident.

(13) On 23 October 1969 this battalion received a change of mission from 108th Artillery Group. The new mission is that of general support of the XXIV Corps.

(14) On 29 October 1969 this battalion received a further change of mission from 108th Artillery Group. The new mission is that of general support - reinforcing the 5th Battalion, 4th Artillery.

(15) On 31 October 1969 Battery A displaced one platoon to the west at YD03185629 to support a 101st Airmobile Division operation. Ninety-five rounds were fired with a surveillance of 17 bunkers destroyed and one damaged. The platoon returned to the battery position before nightfall.

(16) During the reporting period, Batteries A and C received satisfactory ratings from the XXIV Corps Command Maintenance Management Inspection Team.

(17) During the reporting period, this battalion received a satisfactory rating from the USARV Annual General Inspection Team.

(18) During the reporting period, Battery A received satisfactory ratings from the XXIV Corps Firing Battery Inspection Team.

(19) During the reporting period, Batteries A and C were calibrated by the USARV calibration team.
CONFIDENTIAL

(20) During the reporting period, the battalion destroyed 179 bunkers and was credited with 23 enemy KIA confirmed.

(21) Missions and rounds fired during the reporting period:

<table>

c. Training: In addition to continuing its normal 24 hour operational capability, this battalion conducted a total of 125 hours of scheduled training for all personnel. Also, this battalion requested several technical maintenance visits from WECOM representatives and began intensive gunner's training in preparation for gunner's tests to be administered in November.

d. Observation: During this reporting period, this battalion provided four forward observer teams to ground forces in Northern I Corps. These teams, consisting of a forward observer and a radio telephone operator, were provided to the 2nd ARVN Regiment, 3rd ARVN Regiment, 101st AirMobile Division, and 3/5th Cavalry squadron.

e. Logistics:

(1) During the months of August and September, this battalion was engaged in an extensive rebuilding program at Fire Support Base C-2. This included personnel bunkers, FDC bunker, and XO post. Since Battery C's move to A-4 and Battery A's move to Camp Carroll, total battalion effort and support has been given to construction of Camp Carroll and improvement of the position at A-4. Gun pads, projectile and powder bunkers, personnel bunkers, messhalls, and other battery installations are under construction at both A-4 and Camp Carroll.

(3) CONFIDENTIAL
CONFIDENTIAL

(2) Average Daily Deadline Rates for the reporting period were computed using the number of vehicles on hand, with the exception of wheeled vehicles. The deadline rate for wheeled vehicles was computed utilizing the number of vehicles authorized. The average daily deadline rates are as follows:

<table>
<thead>
<tr>
<th>ITEM</th>
<th>PER CENT</th>
</tr>
</thead>
<tbody>
<tr>
<td>SP Artillery, 175MM and 8 Inch</td>
<td>5.2%</td>

</tr>
<tr>
<td>Wheeled Vehicles</td>
<td>13.0%</td>
</tr>
<tr>
<td>FADAC Generators</td>
<td>17.3%</td>
</tr>
</tbody>
</table>

f. Civic Action: This battalion maintained four MEDCAPS at the following locations: Dong Luong, An Lac, and two in Dong Ha City. These MEDCAPS were initiated in August and November, 1968 and March, 1969 respectively. During the reporting period, a total of 2092 patients were treated. In addition to treating patients, the MEDCAPS included distribution of clothing, soap, and candy to the Vietnamese people.

g. Personnel and Administration:

(1) Strength at end of period (31 October 1969).

(3) Casualties: Two KIA in Battery B as a result of enemy rocket fire. Ten WIA in Battery B also as a result of enemy rocket fire. One WIA in Battery C not as a result of hostile action.

2. (C) Lessons Learned: Commander's Observations, Evaluations, and Recommendations.

a. Personnel. None

b. Intelligence. None
CONFIDENTIAL

c. Operations.

(1) Assigned Radio Frequencies

(a) OBSERVATION: Tactical support helicopters in this area have limited capabilities concerning the FM tactical radio frequencies which they can use because of limitations imposed by the AN/ARC 44 and AN/ARC 54 radio sets.

(b) EVALUATION: Tactical air support helicopters employing the above radio sets have the capability to monitor frequencies up to 51.9 and 65.00 megacycles respectively. During convoy movements and other operations, it is often necessary to have gunships monitor the ground control frequency because the battery commander only has the capability to communicate on one frequency. This dictates that the ground control frequency be within the limitations of the AN/ARC 44 radio set to insure communications compatibility between air and ground. At times in the past, this battalion has not had any frequencies assigned within these limitations which has caused difficulty in coordinating air support with the ground commander. This has necessitated requests to higher headquarters to use frequencies not assigned to this battalion as the control frequency.

(c) RECOMMENDATION: All battalions be assigned at least one frequency which is within the communications limitations of the AN/ARC 44 radio set. This would assure that the battalion has a frequency which could be used in conjunction with air support. The formal frequency assignment within the battalion SOI would be unimportant, the main purpose of this being to assure that an appropriate frequency is available to the commander at battalion level for the coordination of its use.

(2) Time Fuse Malfunctioning

(a) OBSERVATION: Simple wearing away of the lands in the breech end of the bore of an 8" howitzer caused time fuse, M564, to malfunction as evidenced by consistent grenade bursts when firing fuse time.

(b) EVALUATION: TM 9-1000-202-35, paragraph 9c states that a bulge which enlarges the land diameter 0.01 inch or more for a distance of one and one-half calibers or more tends to disturb the functioning of the fuse. The case in point is an example of malfunction of the time fuse not caused by a bulge in the lands but rather by tube wear. The howitzer tube in question was at approximately half life and had no visible erratic effects on the rounds it fired as evidenced by accurate fire with PD fuse. However, when firing time fuse, an air burst could not be obtained. The fuse lot was fired by another howitzer and the time setting was easily adjusted to yield an air burst. Regardless of fuse setting, an air burst could not be obtained with rounds fired by the defective tube. The tube was inspected and it was observed that the lands at the breech end of the bore were considerably, but evenly worn. This wear, however, manifested itself only in the malfunction of time fuses fired by the defective tube. Upon borescoping the tube, it was found that the wear was rapidly approaching the point where erratic fires would result; the tube was condemned and replaced.

CONFIDENTIAL
CONFIDENTIAL

(c) RECOMMENDATION: Above information be disseminated to artillery units to insure inspection and necessary replacement of howitzer tubes when time fuse malfunctions occur for no apparent reason.
