SECTION I
SPECIAL ORGANIZATIONAL OR UNIT ACTIVITIES

1. (U) COMMAND:

a. This report covers the activities of the 54th Transportation Battalion (Truck) and assigned units as listed in inclosure 1, during the period 1 August 1969 through 31 October 1969. All units assigned during this reporting period were engaged primarily in line haul operation with the exception of the 545th Transportation Company (Lt Trk) which was primarily engaged in port and beach clearance operation from Vung Ro Bay to Phi Haip and Tuy Hoa.

b. Changes in command and staff personnel during the reporting period were as follows:

LTC Everett W Rackley replaced LTC William R Sarber as Battalion Commander;
CPT Daniel R Jones replaced CPT Jeffrey P O'Leary as S-3 Officer; CPT Ruben G Thompson assumed the duties of S-2 Officer; LTC Roy K Ordner replaced CM2 Donald Widman as Maintenance Officer; CPT Paul A Satch replaced 1LT Brian M Aspland as Commanding Officer of the 545th Transportation Company (Lt Trk); CPT Timothy J Trumb replaced CPT Ruben G Thompson as Commanding Officer, 669th Transportation Company (Lt Trk); CPT Jay R Russell replaced 1LT Obadiah P Higgins as Commanding Officer of the 512th Transportation Company (Lt Trk).

FOR OT

692765

inclosure
2. (U) PERSONNEL ADMINISTRATION, MORALE AND DISCIPLINE:

a. Personnel continue to perform in an outstanding manner, and are continuing to work at least 12 hours a day with the exception of the drivers, whose hours range somewhat longer than the standard 12 hour shift. Rest and recuperation are being used to the maximum extent possible, however allocations for in-country R&R were unavailable. Shortages in the driver's MOS' (64110, 64B20) have been alleviated to a great extent. However, shortages in the units remain critical in the mechanics MOS (63B20).

b. Promotions are no longer a problem. During the reporting period, the majority of eligible personnel have been promoted due to a sharp increase of allocations to grades E-4 and E-5.

c. In order to maintain a high state of morale, numerous activities were planned during the reporting period. Floor shows have played at the EM/NCO Club five (5) times per month. Movies were shown five (5) nights a week; personnel were enjoined to spend their free time at the Qui Nhon Recreation Center, Red Beach; maximum utilization has been made of the multi-purpose recreation pad, however basketballs are unavailable through normal supply channels. In addition, model kits have been obtained from Special Services and distributed to all the units in the battalion.

3. (U) OPERATIONS:

a. During this reporting period assigned vehicles travelled 714,593 miles, delivered 33,078 short tons of cargo, transported 7,636 personnel and accumulated 2,334,427 ton miles.

b. The Heavy Lift totaled 23,503 miles, carried 4,437 short tons of cargo and accumulated 286,430 ton miles during this reporting period. (Figures included in "a" above)

c. The drop in miles travelled and short tons delivered this quarter was due to the following problem areas:

(1) Large turnover of personnel during the quarter. The battalion lost 156 personnel through attrition and gained 232 newly assigned personnel. These new personnel had to improcess, attend an eight hour block of instruction on convoy procedures, embark procedures, safety and defensive driving, orientation on battalion policies, standards, facilities and battalion mission, zero and care and cleaning of individual weapons, testing and fitting of protective mask, and practical exercises on maintenance and operation of 2½ ton and 5 ton cargo trucks. After completing this initial improcessing the new personnel were then turned over to their respective companies. Company NCO's then gave the new drivers behind the wheel training and a drivers test. The first two convoys the new drivers participated in they were accompanied by an experienced driver.

(2) During this quarter the battalion received 209 new 5 ton drop
CONFIDENTIAL

AVCA 04-TG-54-3

5 November 1969

SUBJECT: Operational Report of the 54th Transportation Battalion (Truck), WFRKAZ, for Period Ending 31 October 1969 (RCS SCFQAR-65) (R-1) (U)

side cargo trucks (M54A1C). The unit maintenance sections had to inprocess the new vehicles and "TI" and outprocess the old 5 tons. This was accomplished with a 50% shortage of mechanics.

(3) During this period of available trucks with a driver shortage, it was sometimes necessary to put clerks, NCO's, and mechanics on the road in order to move priority cargo.

(4) The movement of cargo was hampered by the monsoon season. Bridges were washed out and temporary bridges and by-passes were not able to accommodate the weight of the heavy lift platoon. This battalion was unable to load cargo for two days due to flooding of a by-pass between this location and the Qui Nhon landing sites.

(5) The number of hardened security vehicles that could be placed on the road was limited for a period of time due to the stripping down of the old sun-trucks and converting new 5 ton trucks into sun-trucks.

(6) The final contribution factor to the reduction of the tons carried was due to the large number of trucks committed for troop/unit moves and shuttles from Phu Cat Airbase to Qui Nhon during the period the Qui Nhon Airbase was closed for repairs to the runway.

d. During the reporting period the battalion had 1975 RON's due primarily to the following:

(1) The 54th Transportation Company ran two (2) convoys from Phu Hiep to Qui Nhon.

(2) The 54th Transportation Battalion ran fifteen (15) convoys from Qui Nhon to Phu Hiep.

(3) Slow and in some cases inefficient off-loading at destinations.

o. Trailer Operations: During the reporting period the 54th Battalion's Trailer Transfer Point processed 6000 forward trailer loads. While the TOE call for 9 personnel, it was found necessary to augment the strength by nine (9) additional men and fourteen (14) Local Nationals.

f. The practical situation and local regulatory requirements for convoy communications are two (2) radios per twenty (20) vehicles although the standard truck company TOE provides for only one (1) radio per twenty (20) vehicles.

g. Trailer Operations: During one twelve hour period five enlisted men and two officers devoted their entire energies to replacing tires, air couplings and headboards on 35 RORO 12 ton flatbed trailers. These trailers were used for only one trip to Pleiku and then they were returned to RORD control.

h. Backloads of retrograde vehicles loaded on sem-trailers are consigned to the 526 COAB facility in Phu Than. In order to eliminate loading, off-loadin...
and reloading the retrograde vehicles remain loaded on the semi-trailers for their processing and eventual disposition to the Port or Property Disposal Yard. During the last 90 days, approximately 750 trailer loads were handled in this fashion.

4. (U) TRAINING:

   a. The 54th Transportation Battalion complied with all necessary training regulations. Due to mission requirements, the main portion of the classes were held at night. They include training on unit level and classes for the whole battalion.

   b. Drivers training is given to all newly assigned personnel and to personnel involved in driver-fault accidents. These classes are held either weekly or bi-weekly depending on the number of personnel requiring instructions.

   c. On 21 October 1969 the battalion held a gas chamber exercise with a make-up class on 24 October 1969, all personnel attended.

5. (C) INTELLIGENCE:

   a. There were three (3) recorded incidents involving enemy action within this reporting period.

   b. A further description of the individual incidents is as follows:

      (1) 12 August 1969 - At approximately 1715 hours a disabled gun jeep being towed by a 545th Transportation Company wrecker were ambushed on Highway QL #2 at the area known as "Rocking Chair" at coordinates QQ 229290. Two (2) home made claymore type mines were fired at the wrecker from an overhanging boulder on the western edge of the road. The blast and associated shrapnel literally blew the two vehicles off the road, killing the two occupants of the wrecker. Neb rate to intense fire was received from undetermined enemy positions on the rocky hillside for approximately 45 minutes. This ambush resulted in two (2) US personnel WIA and four (4) US personnel WIA. Equipment losses were one (1) wrecker and one (1) gun jeep destroyed along with associated radio equipment from the gun jeep.

      (2) 9 October 1969 - 1825 hours, the east bound Pleiku convoy received a large amount of small arms, automatic weapons and some mortar rounds from both sides of Highway #19 at BR 362332, 1 ½ mile east of Bridge #6. The enemy force was undetermined size with a kill zone of approximately 500 meters. The 54th Transportation Battalion sustained the following damages: One (1) US person WIA and one (1) 5 ton cargo truck damaged.

      (3) 21 October 1969 - 1645 hours, the east bound Pleiku convoy received a large amount of small arms, automatic weapons, 8-40 rocket and mortar rounds from both sides of Highway QL #19 approximately 300 meters east of "Deadman's Curve" between Bridges #30 and #29. The enemy force was estimated at company strength and with a kill zone of approximately 500 meters. The battalion sustained the following damages: One (1) US person injured, and five (5) 5 ton cargo trucks damaged.
AVCA ON-TG-54-3
5 November 1969

SUBJECT:  Operational Report of the 54th Transportation Battalion
(Truck), WFR&J, for Period Ending 31 October 1969 (RCS
SCOR-65) (H-1) (U)

6. (U) LOGISTICS:

a. The caliber of company supply procedures and paperwork are continuing
to be upgraded. Particular emphasis is being placed on instructing supply
sergeants in the most efficient supply methods to follow.

b. The battalion Repair and Utility Team continues to improve the living
and recreational standards of our compound.

(1) It built additional arms rooms in barracks for greater weapons
safety.

(2) It renovated the battalion barber and tailor shop area.

(3) It cleared and re-dug drainage ditches in the battalion area for
the monsoon season.

(4) It built wooden abutments around field grade quarters and guard
towers.

(5) It installed trailer back stops in the Trailer Transfer Point.

c. During the reporting period the 54th Battalion area was smoothly changed
over to central power supply by the Winnell Corporation. It should be noted
however, that at this time there is no back-up power supply for the perimeter
lights.

d. The 299th Engineer Battalion, Company "B", worked for two days on the
hardstand and drainage project for the 505th TTP, saving the facility from
inundation during the torrential rains of mid-October. Liaison on completing
the project in the face of the inactivation of Company "B" is continuing between
the 299th Engineer Battalion and the 54th Transportation Battalion.

7. (U) MAINTENANCE:

a. By the end of the reporting period the total number of vehicles increased
to 414 plus 11 trailers. Eighteen of these 414 are on hand receipt to other
units. Fourteen (14) vehicles of this total are 10 ton tractors which belong to
the 512th Transportation Company. The remaining 382 are categorized as follows:
300 task vehicles, 50 administrative vehicles, and 32 security vehicles. The
companies did an outstanding job of getting the new 5 ton drop-side cargo vehicles
processed and on the road. As present 203 of the total of 209 new trucks have
been processed and made ready for use. A total of 105 old trucks will be
processed out. This figure includes the new 2½ ton trucks as well as the old
5 ton "hard sides".

b. On 29 September 1969, the guntrucks and gun jeeps hand receipted to 512th
Transportation Company were returned to their original units. The 523rd Trans-
portation Company, 512th Transportation Company, and 665th Transportation Company
now each have five (5) guntrucks and four (4) gun jeeps on hand.

c. The deadlining rate for the reporting period was 5.8%. This figure shows
a reduction of 4.7% from the end of the last reporting period.
SUBJECT: Operational Report of the 54th Transportation Battalion (Truck), WFR641, for Period Ending 31 October 1969 (RCS SOPOR-63) (r-1) (U)

d. Seven (7) units received OMIs during the reporting period, all of which received a satisfactory rating. The 54th Transportation Company received an IG which also resulted in a passing score.
CONFIDENTIAL

SECTION II
LESSON PLANNED
COMMANDER'S OBSERVATIONS, EVALUATION AND RECOMMENDATIONS

1. (U) PERSONNEL:
   a. Item: In Country R&R Allocations
      (1) OBSERVATION: This unit has not obtained any In-Country R&R allocations during this reporting period.
      (2) EVALUATION: 1st Log Command Regulation 28-2 states that quotas will be announced monthly by letter. The local situation has become so acute that the 8th Transportation Group has instituted a recreation area of its own. The Vietnam news media such as the Stars and Stripes and Armed Forces Network often publicize the Vung Tau Recreation program creating a morale problem in this unit.
      (3) RECOMMENDATION: In-Country R&R allocations should be granted according to regulation.

2. (U) OPERATIONS:
   a. Item: Bridge By-passes
      (1) OBSERVATION: Bridge #302 on QL #1 was closed to night traffic for one week when the by-pass was flooded.
      (2) EVALUATION: Loading and unloading, and all convoy operations were severely hampered during this period. Two (2) Local Nationals drowned and four (4) military vehicles were submerged. The bridge was damaged for nine (9) months yet when the monsoon rains hit, the required repairs had not been completed.
      (3) RECOMMENDATION: All bridge by-passes be kept in a state of good repair to prevent interruption in the Main Supply Route due to the action of the enemy or weather.
   b. Item: Unloading Problems, 5 ton cargo trucks
      (1) OBSERVATION: The majority of the 1,975 vehicles remaining overnight at destination were caused by poor off-loading facilities.
      (2) EVALUATION: While local depot areas are well equipped with MHE, the destinations of LZ English, LZ Uplift and Phu Loc have continual off-loading problems caused by a lack of MHE and the inefficient use of MHE. The consignees have no prior knowledge of the incoming cargo and they customarily cease work completely for over an hour during lunch. The open road hours for truck convoys are limited and the situation unconditioned. The resulting from these problems and practices is considerable.
      (3) RECOMMENDATIONS:
         (a) Additional MHE be provided where required.
SUBJECT: Operational Report of the 54th Transportation Battalion (Truck), WFRAM, for Period Ending 31 October 1969 (RCS SCPOR-65) (R-1) (U)

(b) The Movement Control Center contact the consignees with prior incoming cargo information.

(c) Consignees stagger lunch hours to enable the maximum use of MHE.

c. Item: Unloading Problems, Semi-trailers

(1) OBSERVATION: On occasion, up to forty (40) semi-trailers are under load at the 526 CC&G yard for over one day and in some cases for over a week.

(2) EVALUATION: When semi-trailers remain under load for over one day, they are removed from the system just as if they were inexcusably deadlined. Daily commitments for trailers customarily exceed available trailers, thus it is certain that these trailers could be used elsewhere. While the great benefit of processing the loaded retrograde vehicles is recognized, the drain on the common carrier transportation system should be evaluated.

(3) RECOMMENDATION: The 526 CC&G facility should be provided with civilian and military labor and equipment with which to complete their processing efficiently (within one day).

d. Item: Convoy Communications

(1) OBSERVATION: TO&E Authorization for convoy communications are short of requirements.

(2) EVALUATION: On 13 August 1969 this unit submitted a request for MTOE concerning communications equipment which is as yet unanswered. The USARV Convoy Security Seminar dated 27 November 1967, HQ IFFV Highway #19 SOP dated 17 July 1968 and 8th Transportation Group Reg #55-1 dated 1 March 1969 require more radios than currently authorized. The three ambushes described in paragraph 5 which this battalion experienced during this quarter make it clear that those are not only words on paper requirements but real life and death needs.

(3) RECOMMENDATION: The 54th Transportation Battalion request for MTOE concerning communications equipment be promptly approved and the equipment promptly issued.

3. (U) TRAINING: None

4. (C) INTELLIGENCE:

Item: Convoy Ambushes

(1) OBSERVATION: Number of US casualties are low due to convoy procedures presently being used.

(2) EVALUATION: Convoy practices of keeping a 100 meter interval between
AVCA 76-TO-54-3
5 November 1969
SUBJECT: Operational Report of the 54th Transportation Battalion (Truck), WFR6AA, for Period ending 31 October 1969 (RCS SCFOR-65) (R-1) (U)

vehicles and all vehicles leaving the kill zone as quickly as possible and following vehicles not entering the kill zone, has greatly reduced the number of casualties that are incurred after the initial force of contact.

(3) RECOMMENDATION: The current policy of convoy operations be kept in effect, minimizing the damages to vehicles and cargo, and keeping the casualty rate low.

5. (U) LOGISTICS: None
6. (U) MAINTENANCE: None

DA, HQ, 8th Trans Op (MT), APO 96226, 15 Nov 69

Commanding General, USAEC, QM, ATTN: AVCA QN-GO-H, APO 96238

1. The Operations Report for the 54th Transportation Battalion (Truck) has been reviewed and the information contained therein is considered adequate.

2. The following comments are submitted:

   a. Reference Section I, Personnel. Concur. The 8th Transportation Group received very few in-country R & R allocations to Vung Tau. Increased allocations would be a highly positive morale factor.

   b. Reference Section II, Operations - Bridges and By-Passes. Concur. Entire highway system is in need of upgrading. Certain portions of QL 19 are actually hazardous to convoy operations.

   c. Reference Section II, Convoy Communications. Concur. Each gun truck should be provided with a radio for adequate communication during periods of enemy contact.

3. This indorsement may be regarded or unclassified when separated from classified inclosures.

TDL: PT 2561/2589

ALIX T. LANCASTER, JR
Colonel, TC
Commanding
AVCA 80-00-2 (5 Nov 69) 2nd Ind

SUBJECT: Operational Report of the 54th Transportation Battalion (Truck) for the Period Ending 31 October 1969 ECS CPFOR-65 (R2) (U)

DA, HeadQUARTERS, US Army Support Command, Qui Nhon APO 96238 22 Dec 69

TO: Commanding General, 1st Logistical Command, ATTN: AVCA 80-0, APO 96234

The Operational Report, Lessons Learned, of the 54th Transportation Battalion for the quarterly period ending 31 October 1969 has been reviewed by this headquarters and the following comments are submitted:

a. SECTION II, paragraph 1(a): Concur. This command received approximately 30 in-country USA allocations per month. These allocations are distributed among major subordinate commands on a percentage basis determined by the assigned strengths of these units. The allocations given to the 8th Transportation Group are to be distributed among the group's subordinate units. The 8th Group received 3 or 4 such allocations each month of the reporting period. The Special Services officer of this headquarters will attempt to obtain larger numbers of monthly allocations for in-country units; however these will continue to be distributed among all of the major subordinate units of this command.

b. SECTION II, paragraph 2(a): Concur with recommendation; nonconcur with observation for evaluation. A check of the SHO Daily Log at this headquarters reveals that the by-pass for bridge 202 on W-1 was closed to traffic only during the night of 11-12 Oct 69. While it is true that the bridge was damaged for nine months, seven months of this period were spent processing the project, obtaining funding approval and designing and evaluating the most effective and least expensive means to repair the bridge. The actual construction time was less than 60 days. Main supply routes are maintained in accordance with availability of funds, priority of effort, and availability of resources. It should also be noted that the by-pass at bridge 202 was in satisfactory condition and remained in place during the six day period when it was submerged.

c. SECTION II, paragraph 2(b): Concur. Action is being taken to implement the recommendations.

d. SECTION II, paragraph 2(c): Concur. Action is being taken to implement the recommendation.

e. SECTION II, paragraph 2(d): Concur. The subject request for HIDC was not received by this headquarters. The request was resubmitted by the 8th Transportation Group on 24 November 1969 and appropriate action is being taken.
AVCA QN-GO-H (5 Nov 69) 2nd Ind
SUBJECT: Operational reports of the 54th Transportation Battalion (Truck) for the Period Ending 31 October 1969 RCS CSFOR-65 (R2) (U)

f. SECTION II, paragraph 4: Concur. The procedures described are the current policy of this command.

2. The report is considered adequate as modified by the above comments.

DA, Headquarters, 1st Logistical Command, APO 96384

TO Commanding General, United States Army, Vietnam, ATT: AVHQC-DST APO 96375

1. The Operational Report - Lessons Learned submitted by Headquarters, 54th Transportation Battalion for the quarterly period ending 31 October 1969 is forwarded.

2. Pertinent comments follow: Reference item concerning In-Country R&H allocations, page 7, paragraph 1a. Concur. One hundred and twenty spaces were allocated to 1st Logistical Command (less USASUPCM Da Nang) during the months of August and September 1969, and 140 spaces were received for October 1969. The allocations are distributed to the support commands and HHD 1st Logistical Command based on the percentage of the strength less the Da Nang Support Command.

3. Concur with the basic report as modified by this and previous indorsements.

FOR THE COMMANDER:

CF: USASUPCM, QNH
8th Trans Gp
54th Trans Bn.
AVHCC-DST (5 Nov 69) 4th Ind
SUBJECT: Operational Report of the 54th Transportation Battalion (Truck),
WFR6AA, for Period Ending 31 October 1969, RCS CRFOR65 (R2) (U)

HEADQUARTERS, UNITED STATES ARMY, VIETNAM, APO San Francisco 96375 25 JAN 1970

TO: Commander in Chief, United States Army, Pacific, ATTN: GPOP-DT,
APO 96598

1. This headquarters has reviewed the Operational Report—Lessons Learned
   for the quarterly period ending 31 October 1969 from Headquarters, 54th
   Transportation Battalion (Truck) and comments of indorsing headquarters.

2. Comments follow:

   a. Reference item concerning "Bridge By-passes", section II, page 7,
      paragraph 2a; 1st Indorsement, paragraph 2b; 2d Indorsement, paragraph 1b;
      concur. The major lines of communication are programmed for upgrade in
      accordance with MACV Directive 415-6. The 18th and 20th Engineer
      brigades respond rapidly to construct or repair by-passes as required.

   b. Reference item concerning "Unloading Problem, 5 ton cargo trucks",
      section II, page 7, paragraph 2b and 2d Indorsement, paragraph 1c; concur.
      Currently, USA SUP COM QNH is providing consignees with advance notification
      of instances when an excessive number of 5 ton cargo trucks are dispatched
      to LZ English or LZ Uplift. Recently the CO of the 4th Inf Div has enforced
      the convoy speed limits (25 mph) and Pleiku convoys naturally are unable to
      go to Pleiku and return in a single day. In instances where additional MHE
      has been required to facilitate discharge of 5 ton cargo trucks at LZ's
      English and Uplift, the required MHE has been moved to discharge points
      when available. Consignees at LZ's English and Uplift have commenced to
      stagger lunch hours when necessary to make maximum use of available MHE.

   c. Reference item concerning "Unloading Problem Semi-trailers", section
      II, page 8, paragraph 2c and 2d Indorsement, paragraph 1e; concur.
      USA SUP COM QNH is in the process of reorganizing the CCAS company and hiring
      additional personnel. The CCAS facility has been recently relocated and
      necessary paperwork submitted for the construction of wash racks and requisi-
      tions submitted for 350 gallon per minute (GPM) pumps. Once wash racks
      have been constructed and pumps obtained, semi-trailer turnaround should
      be expedited.

   d. Reference item concerning "Convey Communications", section II, page
      8, paragraph 2d; 1st Indorsement, paragraph 2c; and 2d Indorsement, para-
      graph 1c; concur. Request will be considered as an exception to the current
      moratorium on MTDA/HTOE actions when received.
