41st Civil Affairs Company
1. (C) OPERATIONS; SIGNIFICANT ACTIVITIES

a. GENERAL: During the period 1 November 1969 through 31 January 1970 the 41st Civil Affairs Company's activities encompassed the supporting of Pacification and Revolutionary Development (RD) programs, providing direct support to Province/District Senior Advisors, implementing civil affairs programs, initiating civic action projects and providing refugee assistance. These activities are accomplished throughout II Corps Tactical Zone (CTZ) by the platoons of the 41st Civil Affairs Company, which are depicted on the attached map.

In performing the primary mission of providing direct support to the Province Senior Advisors and supporting tactical operations and pacification programs within II CTZ, the Company engages in the following:

(1) Strengthen the Government of Vietnam (GVN). This is accomplished by utilizing GVN sources and officials and avoiding the circumvention of GVN channels to accomplish a project.

(2) Coordination between US/RWAF, RWAF and the GVN, so as to make a concentrated effort in the area of Pacification and Development.

(3) Orienting the people in the utilization of proper government channels and sources of materials.

(4) Increase ARVN and Regional Force/Popular Force (RF/PF) support in the civic action/civil affairs programs.

(5) Direct aid to the people in the form of civic action projects. The 41st Civil Affairs Company has fourteen TDG platoons, four of which remain attached to the 29th Civil Affairs Company in I CTZ. In addition to the fourteen TDG platoons there are eight provisional platoons which are

SUBJECT: Operational Report - Lessons Learned, 41st Civil Affairs Company for Period Ending 31 January 1970, RCS CSFOR-65 (R2) (U)

also deployed in II CTZ. A list of the Platoons and their locations is attached as Enclosure 3.

b. INTELLIGENCE: The combined military police patrols coordinated by the Public Safety Supervisors have continued to prove beneficial. Four of the civil affairs Platoons in Binh Dinh Province continue their involvement in combined patrols. In Pleiku City, Pleiku Province, Platoon 15 has also established patrols. These patrols are usually comprised of National Police, National Police Field Forces (NPFF), and U.S. Military Police. During a one week period in Binh Dinh Province, 45 VC were killed and 91 VC were captured as a result of combined and independent police operations. Combined patrols conducted search and cordon operations in Tan Quan, Binh Dinh Province, Platoon 6's area of operation. The result was the capture of two draft dodgers, one deserter and four VC suspects. Combined patrols in Bu Nuy, Binh Dinh Province, Platoon 11's area of operation, have been concentrating on black market and prostitution raids.

c. OPERATIONS AND TRAINING ACTIVITIES:

(1) Plans: The 41st Civil Affairs Company is presently in the process of deactivating under Phase III of the withdrawal of troops from the Republic of Vietnam. The Company will be officially deactivated on 27 February 1970. The Platoons throughout II CTZ are presently turning their projects over to HAV Advisory Teams, U.S. Tactical or ARVN units. In many instances, the Platoons are attempting to complete the projects prior to the deactivation date.

The survey team continued to conduct surveys in II CTZ with the idea of relocating Platoons. In Khanh Hoa Province a survey of Van Minh and Minh Hoa Districts were completed. As a result of these surveys, Platoon 1 at Khanh Doang, Khanh Hoa Province was relocated. The Platoon has been divided and now is located in Minh Hoa and Van Minh Districts. The survey team also conducted surveys of Tuy Hoa and Dong Khoi District in Phu Yen Province. As a result of this survey, Platoon 12 at Tuy Hoa has extended some of its activities to Dong Khoi District. The survey team also surveyed Tuyen Duc Province.

(2) Operations: The 1969 Village Self Development Program ended during this reporting period. The 1970 program was initiated. The VSD Program continues to be the key tool used by the Platoons to both accomplish work needed and promote self-help and participatory government. The Platoons throughout II CTZ have been assuring proper use of VSD funds and the completion of projects. In working with the VSD Program, the Platoons attempt to assure more participation by the villagers and less hired labor. Under the 1970 VSD Program the population of a village determines the amount of funds to be allocated. In line with this, the Platoons are assuring the proper taking of a census in many areas. Working with the VSD Program also calls for the proper training of village and hamlet officials.
CONFIDENTIAL

AVFA-CA

SUBJECT: Operational Report - Lessons Learned, 41st Civil Affairs Company for Period Ending 31 January 1970, RCS CSFOR-65 (R2) (U)

In some cases the platoons conduct the training. The platoons also coordinate the transportation of officials to the Vung Tau Training Center. Platoon 15 at Pleiku City has coordinated the transportation of 105 village/hukloc officials and 60 VIS/Chieu Hoi Cadre to Vung Tau.

(a) Economics and Industry: The local project at Plei Lai Reo, previously reported, has materialized into a stable industry for the Montagnard village. Platoon 9A, working in the area, has also supervised the establishment of a sewing center in the village. These two projects are particularly important with the pending withdrawal of the platoon from the village. Along with providing a needed income for the village, these projects have become a model for other villages seeking forms of industry. Platoon 9A has had numerous visits from personnel who have expressed an interest in this project for possible use in other locations. In Binh Thuan Province, Platoon 4 at Song Hao is coordinating the transportation of rice from three centrally located assembly points within the harvest region to the village market. The platoon has been able to transport approximately 75-100,000 kilos of rice with the aid of two borrowed 2½ ton trucks. This project has served not only as a means of rice transportation, but discouraged VC interference with the harvest.

(b) Agriculture: In the agricultural area, Platoon 6 at Tan Quan, in conjunction with the District Agricultural Chief, has persuaded thirty farmers to participate in the new IR-8 rice program. The platoon distributed 239 kilograms of rice and 6600 pounds of fertilizer to the participating farmers. Each participant signed a contract with the district. Under the program each farmer is required to turn back a percentage of the crop to the district, so that more IR-8 can be dispensed to other farmers, thereby expanding the program. The program will be administered by the Vietnamese District Agricultural Service. Extensive coverage is being given the program by the VIS in the local papers. Platoon 4 at Song Hao, Binh Thuan Province, has also established a model IR-8 demonstration plot. Along with the plot the platoon is conducting classes in rat and insect control. The agricultural specialist with Platoon 4 has established a comprehensive garden program in the Montagnard village. The platoon is furnishing wire and technical assistance in the construction of permanent enclosures for the gardens. The platoon, along with the Agricultural Service, is teaching classes on the proper establishment and care of gardens. Platoon 13, Bong Son, Binh Dinh Province, is conducting a comprehensive program with the cattle in the Bong Son area. The program was initiated to prevent the spread of a disease which is killing a number of the cattle. The platoon is also supervising the spraying of insecticide to protect the local rice crop. In the area of animal husbandry, Platoon 14 at Tuy Hau, Binh Dinh Province, has introduced 150 ducklings into Huynh Ha refugee camp, in order to provide a better source of food. Platoon 6, at Tan Quan, has instituted a swine project and is conducting classes in the care and handling of swine. The platoon is working with local US/Wright units to supply garbage for the project.
CONFIDENTIAL

AVN CL 14 February 1970

SUBJECT: Operational Report - Lessons Learned, 41st Civil Affairs Company for Period Ending 31 January 1970, RCS CSFOR (R2) (U)

(a) Public Health: In Pleiku Province, Platoon 15 in conjunction with a MILPHAP Team and Province Hospital is administering plague shots throughout the province. The platoon has established a comprehensive plan which calls for the maximum amount of GVN participation. As of this report over five thousand people have been vaccinated.

In Phu Yen Province, Platoon 12 at Tuy Hoa has instituted a Medical Training Program for village and hamlet health workers. The first course was held in Tuy Hoa District with seventeen people attending, including seven ARVN medics. Both Tuy Hoa and Hieu Xuong Districts have been covered by the program, and the remaining three districts in the province will be included in the program. In addition to training village and hamlet medics, the program also trains RD Cadre chiefs in rudimentary first aid. The engineer officer with Platoon 12 coordinated with the 84th Engineer Battalion on the construction of a helipad for the Province Hospital.

The platoons throughout II CTZ continue to utilize the medical facilities of nearby US/FMLF units. Platoon 4, at Song Hoi, has taken two civilians to the 8th Field Hospital in Nha Trang. A Montagnard village chief was examined for cataracts. A Vietnamese child was treated for a leg and hip ailment and returned to his village. In Khanh Hoa Province, Platoon 1, Van Ninh District, has arranged an eye operation in Qui Nhon for a Vietnamese girl. The operation will restore sight to the girl’s only blind eye. The platoon was also able to arrange an emergency appendectomy on a Vietnamese girl by flying her to the U.S. military hospital in Nha Trang.

At Ben Me Thuot, Darlac Province, Platoon 2 has translated the health lectures into Raho for the Montagnard medics that the platoon has been training. The platoon has also had Raho leaflets handed out at RRCGAS and by the MILPHAP team.

(b) Training Programs: Increased emphasis has been placed on training programs by all the platoons. These programs are particularly useful since they enable the platoon to reach and aid more people, as well as utilize the expertise of platoon members and local US/FMLF units. The Con Ranh Bay Provisional Platoon is engaged in setting up training programs in carpentry, auto mechanics, and animal husbandry. The platoon is able to utilize U.S. personnel at Con Ranh Bay to teach various classes, e.g., a veterinarian has volunteered to teach various classes on animal husbandry.

Platoon 1, while at Khuong Duong in Khanh Hoa Province, was concentrating on training programs. The platoon trained ten Montagnards how to mix and pour concrete, and six well forms have been constructed. They have also arranged for the local Vietnamese to accompany DENTCALS. As a result, he has learned to perform simple extractions. These training programs were particularly important since Platoon 1 has been relocated in the province.

In Binh Thuan Province, Platoon 4 at Song Hao is training and working with RD Cadre teams. Particular emphasis has been placed on village and hamlet defense.
SUBJECT: Operational Report - Lessons Learned, 41st Civil Affairs Company for Period Ending 31 January 1970, PES CSFOR (R2) (U)

(o) Construction Projects: In Binh Dinh Province, Platoon 14, at Tuy Phuoc, reported that 6,132 feet of lumber has been procured for three Thuan Phuoc Bridge projects. This lumber was used to complete bridges on the extension of Highway 142 in Tuy Phuoc. The platoon was also instrumental in the completion of two bridges on the Vinh Thang Road. The platoon placed special emphasis on these bridges because they will speed up the movement of refugees back to their homeland. The lack of bridges has prevented these refugees from returning to their homesteads which were destroyed during Tet of 1968.

Platoon 14, Thu Cat, has completed repair of a road that was washed out between two villages in Binh Dinh Province. The road's previous condition had prevented villagers from taking their goods to market. Platoon 2, Phu Hoa, Daklak Province, has completed work on the installation of a windmill at the Chieu Hoi Center. The windmill is running water at an estimated 300 gallons per hour at average wind conditions.

In Phu Yen Province, Platoon 12, at Tuy Hoa, has completed work on three significant projects: construction of a dispensary, coordinating the construction of a floating bridge in Hieu Xuan District, and the construction of a well drilling rig. The drilling rig will be utilized in Hieu Xuan District, and if it proves effective, more rigs will be built for the other districts in the province. In addition, the platoon is also coordinating the building of an addition to the province library in Tuy Hoa City, Phu Yen Province has recently acquired a new fire truck and Platoon 12 is coordinating the construction of a building to house the truck.

In Phan Thiet, Binh Thuan Province, Platoon 7's Public Safety Supervisor has procured the necessary materials and is supervising the repair of the provincial prison. The Public Safety Supervisor is also coordinating with the Chief of the Health Services to aid in improving the province's health facilities. Also in Binh Thuan Province, Platoon 6, at Song Hoi, has completed the construction of the Song Hoi Youth Center. The platoon is now in the process of obtaining sports equipment for the Center, and will eventually aid in establishing athletic programs.

(3) Training: During the period 19-23 November 1969, the 41st Civil Affairs Company conducted a Civic Action Orientation Course for the S-5's from units in II CTZ. Subjects covered included: functions of an S-5, relationship between the S-5 and the civil affairs platoon, reports and records, project evaluation and selection, development of a civic action program, preparation of an area survey, utilization of the HES reports, civil affairs lessons learned, and functions and capabilities of the various CORDS agencies.

(4) REWMA: In Binh Dinh Province, Platoon 6, at Tuy Quan, has been instrumental in establishing a District PSYOP Coordinating Committee.
This committee will be comprised of the District S-5, VIS Chief, Chieu Hoi Chief and the POLWAR teams. This committee will do a great deal to avoid the duplication of efforts as well as concentrate the PSYOPS activity on carefully planned areas. In addition, the platoon supervised the distribution of 332,000 Chieu Hoi leaflets, as well as the showing of movies in a number of villages. A Cultural Drama Team was in their area for one week and held shows in four hamlets. The platoon arranged the coordination and support for the team. In addition, the platoon is working closely with a PSYWAR Team from the 8th PSYOPS Battalion on loudspeaker missions.

In Song Mao, Binh Thuan Province, Platoon 4 has utilized a photographer from the 8th PSYOPS Battalion. He is taking pictures of completed civic action projects and the team is distributing them throughout the hamlets in an attempt to stimulate more projects. Platoon 9A, Plai la Lou, Pleiku Province, continues to combine MEDCAPS and the distribution of PSYWAR literature.

d. Logistics: Since the last reporting period, there has been only one change in the two support units for the 41st Civil Affairs Company. Expendable and self-service items are now obtained from the 154th Supply and Service Company. Maintenance support is being provided by the 557th Maintenance Company.

e. Personnel: The personnel situation has remained relatively stable during the reporting period with personnel inputs generally balancing the losses of personnel due to rotation. Personnel statistics are included as enclosure 2.

f. Transportation: The 41st Civil Affairs Company is presently in the process of preparing their vehicles for turn-in, in compliance with the Phase III deactivation. The vehicles are to be turned in at designated depots on 18 and 15 February 1970.
LESSONS LEARNED: COMMANDER'S OBSERVATIONS, EVALUATIONS AND RECOMMENDATIONS.

a. PERSONNEL:

(1) Utilization of Interpreters.

(a) OBSERVATION: Assigned Expert Interpreter, MOS 0422L, often has other skills which can be very useful to a civil affairs platoon.

(b) EVALUATION: The extreme difficulty in mastering the Vietnamese language has resulted in the recruiting of many college graduates to fill MOS 0422L. As a result of this, the interpreter becomes valuable to the civil affairs platoon not only as an interpreter, but also in the area of his previously acquired skill. The interpreter's degrees in such areas as economics, education, and political science can be very useful in the platoon's mission.

(c) RECOMMENDATION: Positive steps should be taken to utilize interpreters in areas outside of their MOS. Every effort should be made to assign these qualified interpreters to an area where their talents can be utilized.

(2) Interpreter's Familiarity With the Vietnamese Language.

(a) OBSERVATION: The Interpreter, MOS 0422L, very often has difficulty with the Vietnamese language in areas outside of Saigon. This is especially true in the highland provinces.

(b) EVALUATION: The inability of interpreters to translate and comprehend will detract from the effectiveness of a civil affairs platoon and its mission. Where an interpreter is forced to utilize a dictionary he often slows down the conversation.

(c) RECOMMENDATION: The individual conducting the interview or visit should prepare a script for the interpreter prior to the visit. This script should be rehearsed between the individual and the interpreter so that the conversation will flow smoothly during the actual visit.

b. INTELLIGENCE: NONE

c. OPERATIONS:

RESC Coordinating Committee.

(a) OBSERVATION: The numerous units working with psychological operations in a province often do not coordinate their work amongst themselves, thereby causing duplication of effort, and a general undermining of the
CONFIDENTIAL

14 February 1970
SUBJECT: Operational Report - Lessons Learned, 41st Civil Affairs Company for Period Ending 31 January 1970, MSG GSFOR-65 (b2) (U)

PSYOPS effort.

(b) EVALUATION: The civil affairs platoons frequently find themselves working with PSYOPS personnel in the villages and hamlets. Very often there are numerous PSYOPS groups working in a province, i.e., cultural drive teams, FOMAR teams, US/NAV POL PSYOPS personnel. The problem encountered is that these various groups do not coordinate their activities, and as a result they often find their activities overlapping one another. To the extent that when this occurs they are defeating a good portion of their assigned mission.

(c) RECOMMENDATION: A PSYOPS coordinating committee should be established at the province headquarters. This committee would have the responsibility of coordinating and planning PSYOPS activity within the province. In addition to planning coordinated efforts it can develop new techniques and means for reaching the populace.
