1. (C) Operations: Significant Activities

a. MISSIONS

(1) During that portion of the reporting period from 1 November 1970 to 28 February 1971, the 1st Cavalry Division (Airmobile) was located in three Brigade Areas of Operations. The 1st Brigade was in the center, encompassing Camp Goyad (Division Headquarters) at Phuoc Vinh and extending East into War Zone D. 2d Brigade extended North to the Cambodian border, and 3d Brigade was East of Bien Hoa extending Southeast to the South China Sea. Division missions were: Concentrate on the supply/infiltration routes out of Cambodia; monitor AR-6 and War Zone D; locate enemy cache sites; eliminate the 33rd NVA Regiment; destroy enemy base areas; counter enemy attempts to disrupt pacification; upgrade territorial Forces; and exploit ralliers and conduct extensive SFOPS in support of the rallier program.

(2) On 20 December 1970, the 1st Cavalry Division (Airmobile) was notified that it had been selected as an element of the Sixth Increment RVN redeployment plan - KEYSTONE ROBIN CHARLIE. The Division was directed to conduct a phased redeployment of the Division (-) from the Republic of Vietnam and concurrently organize the 3rd Brigade (SEP), 1st Cavalry Division (Airmobile) for continued operations in RVN under OPTION II FORCES. The Division (-) was programmed for redeployment during the 60-day period 1 March to 29 April 1971. The period 1 January to 28 Feb-
Operational Report for Semi-annual Period Ending 30 April 1971

The army was characterized by continued operations in the Division's AO while concurrently the Division Staff planned, coordinated, and organized for redeployment.

b. GENERAL

1. The 1 November 1970 to 28 February 1971 period saw no significant changes in boundaries or realignment of forces of the Division. The Division remained in the same operational area, stretching from the Cambodian border to the South China Sea, that it entered upon withdrawal from Cambodia in June 1970.

2. Enemy activity within the Division's area of operations remained at a low level during the reporting period as enemy main and local force units avoided contact. The intensity and frequency of attacks by fire on base camps further decreased over the previous reporting period.

3. The Division continued to emphasize location and evacuation or destruction of enemy caches. As during the previous reporting period, a significant number of enemy impresarios laborers and local force VC continued to rally. In Phuoc Long Province the continuing intensified psychological operations program in conjunction with combat operations, and a critical food shortage were primary reasons for rallying.

4. The Division program of upgrading territorial forces continued and included combined operations, deployment of Combat Advisory Teams to train and fight alongside RF/FP soldiers, and formal training of Popular Forces officers and NCO's and ARVN units at the Division's First Team Academy in Bien Hoa.

5. During the month of February 1971, while the Division was planning and preparing for redeployment, it accounted for 609 enemy KIA, 2 Prisoners of War, 16 Ho Chi Minh, and 338 individual weapons and 4 crew-served weapons captured or destroyed.

6. In preparation for redeployment, coordination was effected with ARVN forces to assume control of the 2d Brigade Area of Operations and portions of the 1st and 3d Brigade Areas of Operation. Elements of the 7th ARVN Regiment, 5th ARVN Division assumed responsibility for the 2d Brigade AO on 7 March, and on 11 March 1971, control of FSB Buttons at Song Be was assumed by the CVN forces, completing the 2d Brigade disengagement. Upon standdown of the 1st Brigade on 24 March 1971, the 3d Brigade Area of Operations encompassed major portions of the previous AO's of the

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

1st and 3d Brigades. The remaining Area of Operation was turned over to GVN Forces. The sequence of Division AO changes and reduction can be followed by referring to overlays in Annex T.

(7) In retrospect, the successful interdiction of enemy supply routes, location and destruction of enemy caches, successful operations directed towards influencing enemy and enemy impressed laborers to rally, and the smooth disengagement associated with redeployment were the most significant aspects of 1st Cavalry Division (Airmobile) operations during the period 1 November 1970 to 30 April 1971.

c. 1st Brigade Operations:

(1) Mission: During the period 1 November 1970 through 24 March 1971, the 1st Brigade conducted operations in War Zone "D," along the MR2/MR3 boundary, Southern Phuoc Long Province, Long Khanh Province, Northeastern Dinh Quan Province, and Northeastern Bien Hoa Province. They were targeted against SR-5 and the 81st Rear Service Group, and tasked with closing infiltration routes between War Zone D and Eastern SR-5. The Brigade conducted operations to prevent enemy mortar/rocket attacks against Camp Gorvd. Additionally, Combat Advisory Teams were employed, and combined US-ARVN operations were conducted to advance pacification and Vietnamization.

(2) Execution: During the reporting period, ground activity was light to moderate. Normally the encountered enemy was in small groups throughout the area of operations. Enemy initiated contacts usually occurred in the vicinity of cache sites or enemy headquarters area, however, the vast majority of all contacts were friendly initiated. The general concept of operations employed during this reporting period was to keep one battalion targeted continually on the 81st RSG and its cache sites (1-7 Cav) and one battalion targeted on Hqs, SR-5 and the associated infiltration/infiltration routes from western War Zone "D" (2-7 Cav). The remaining battalion focused its efforts on the seasonal rice denial operations of Dinh Quan District and later the Hqs and operational elements of the 3-95 (logistical unit). Later when the Brigade received a fourth battalion (2-12 Cav), it was used to provide the external defense for Camp Gorvd. This entailed targeting on the N1/N2 LWR battalions and various local force units.

(a) From 1-25 November the 1st Brigade with 1-7 Cav, 2-7 Cav, and 1-12 Cav conducted operations in War Zone "D." The mission was directed against Headquarters SR-5, 81st RSG and its cache sites, and the interdiction of enemy infiltration/exfiltration routes in War Zone "D."

(b) From 26 November - 13 January, the 1st Brigade with the 1-7 Cav, 2-7 Cav, and 1-12 Cav conducted operations in War Zone "D" and southern Long Khanh Province. The mission was directed against Headquarters of SR-5, the 81st RSG and its cache sites, infiltration/exfiltration routes in War Zone "D," and operations to support GVN pacification and rice denial programs in...
southern Long Kanh Province. During this period the 1st Brigade Combat
Advisory Team was placed OPCON to 1-12 Cav to assist in combined operations
consisting of eagle flights, and mobile checkpoints in southern Long Kanh
Province (Dinh Quan District).

(c) From 14 January - 6 February, the 1st Brigade with the 1-7 Cav, 2-7 Cav, and 1-12 Cav continued operations in War Zone "D" against SR-5 and the 81st RSG and conducted operations along MR2/MR3 boundary targeted on 3-95 Headquarters (previously the 82nd RSG) and associated units while supporting PF training in MR-3. To accomplish the PF training mission in MR-3, D Co (-), 2-7 Cav was placed OPCON to Divarty and 1st Brigade received OPCON C Co, 1-5 Cav and B Co, 1-27 Inf, 25th Inf Div. The PF training units conducted operations in Bien Hoa and Gia Dinh Provinces.

(d) During the period 7 February through 4 March, the 1st Brigade with the 1-7 Cav, 2-7 Cav, 1-12 Cav and 2-12 Cav continued operations in War Zone "D" and northern Long Kanh Province, conducted operations in southern Phuoc Long and northern Binh Duong Provinces, continued training of territorial forces and assumed the mission of defending Camp Gurnard and GVN installations in the Phuoc Vinh area from rocket/mortar attack.

(3) Discussion and Analysis of Significant Events:

(a) Contacts during the month of November:

1 011418 - YT 425682, 1/D/1-7 Cav: G/R (Ground Recon) rec S/A (small arms) and B-40 fire from 75-100m to the south. Eng/Org (Engaged with Organics) AFA, arty, and A/S (Airstrike). Contact broke 1500 W/E evading in unk direction, resulting in 6 US WIA, 1 RGS KIA. Search of area ind 1 FVA KIA and 2 AK-47's captured.

2 011739 - YT 420601, 2/D/1-7 Cav: While setting up Ambush obs 1 ind 50m to the E, c/o/org, rec neg return fire, resulting in 1 FVA KIA, captured; 1 AK-47, 1 pack, 1 civilian radio, 1 full AK-47 magazine, 1 lb of documents, and 1 cooking pot.

13 111245 - YT 003248, C/2-7 Cav: While in DAP had an AA detonate 600m to the NW. Eng/Arty. Results: 1 NVA KIA, 1 AK-47, 2 CG grenades, 2 AK nag (60 rds). The inc was wearing green fatigues and HCM sandals.

14 121415 - YT 936317, RGR TM 22/75th RGK: In eng/org 1 Ind 1015m to the E while in the process of setting up an ambush. The inc org the TN with a frag grenade. Results: 1 NVA KIA, 1 AK-47 captured and 4 nag K-47 (120 rds).

15 131055 - YT 582622, 4/A/1-7 Cav: While taking a break on a trail heard movement to the E and set up a hasty ambush. Obs and eng/org 3 Ind 50m to the E. Results: 3 VC KIA, 1 SKS, 1 AK-47, 1 pack. Contents of the pack: 15 lbs of flour, 15 lbs of rice, 4 AK nag (120 rds), 1 roll of thread, 1 NVA poncho, 10 pieces of plastic, 1 canteen cup, 2 lbs of dried fish, 15 lbs of black and blue uniforms, 3 hammocks, 5 lbs of dough, 10 ink pens, 1 lb of documents.

16 141130 - YT 582622, 4/A/1-7 Cav: 0/R eng/org 1 Ind 25m to the SW. There was nag rto fire. Results: 1 VC KIA, 1 AK-47, 1 pack: 1 pair of wool socks, 11 rds AK ammo, 1 small rice bowl, 1 parachute from illumination rto, 1 OD shirt, 1 VC poncho and 1 2 lb birthday cake. The inc was wearing blue shirt and pants and a boony hat.

17 151550 - YT 954453, BLACK LRRP TN/2-12 Cav: 0/R rec'd S/A and frags from a squad sized enemy force 50m to the E. Eng/org and the enemy evaded to the E. Results: 2 US WIA, 1 VC KIA, 2 VC WIA PM, 1 M-16, 1 AK-50, 1 .45 caliber pistol, 7 M-16 nag (140 rds), 1 AK nag (30 rds). There were also 2 blood trails to the E. Initial interrogation of NV's: They said that the KIA was the squad leader of the 7 man Phuoc Vinh Special Action Group responsible for the recent mortar attack in the area of Phuoc Vinh. They said there was an 82mm mortar buried in the vicinity of contact. They said they were out of mortar rcs. They said their base camp is in the So Geng rubber plantation (possible coordinates XT 917455). They said their ammo came from Phuoc Son (V). They said they were going to Vinh Son (V) for rice and they referred to it as some 111.

18 160630 - VINH HOA (V): As a result of the second cordon and search which ended at 1400 hrs there were 11 more detainees. Of the total of 12 detainees in the two actions 6 were classified innocent civilians, 1 was civilian defendant, and 2 were unclassified.

19 171545 - YT 578613, 4/A/1-7 Cav: Had an AA detonate 250m to
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

The NVA/M. Sweeps of the area revealed 1 NVA-KIA and 3 sets of footprints headed to the S. The KIA was carrying a pack containing 2 lbs of clothing, 3 L. mag with 86 rds and 4 green tracers, 1 centen end cup, 1 pistol bolt, 1 jar of fish, 1 jar of yeast, 2 NVA pouches, 5 lbs of toilet articles.

20 181620 - YT 154373, 3/D/2-12 Cav: G/A tripped a booby trap with the results of 3 US KIA. The booby trap consisted of 1 frag with 1 stick propped up holding the frag to a tree.

21 190840 - YT 094399, B(R)/1-12 Cav: While in LBP obs (16-15) inds 150m to the S. The inda entered a bled complex consisting of 6 bled 5x5's. At 0852 hrs eng/eng inda in the bleds 30m to the N. AFA, Arty, MAC and Pink Team were on station. The pink team eng 3 inda 1500m to the N resulting in 3 VC KDN. At 1055 hrs at YT 093996 an A/S was put in resulting in 1 secondary explosion.

22 201200 - YT 578613, 4/4/1-7 Cav: While again sweeping through the crec of the A1 detonation on 171545 Mar 71 that resulted in 1 NVA/KIA for 1 NVA helmet (very bloody), 1 part of a leg and a foot from the leg, 1 VC pouch, 3 home made knives, 1 VC machettes, and 1 N-16 ammo containing "C" ration, coffee and cream. 4/4/1-7 Cav is credited with 1 additional NVA KIA for the A1 detonation on 171545 Mar 71 as a result of the find.

d. 2d Brigade Operations:

(1) Mission: The 2d Brigade, in conjunction with the 7th ARVN Infantry Regiment, had the mission of conducting ground operations, air reconnaissance and pacification operations aimed at fixing and destroying the enemy, as well as interdicting enemy supply lines, locating enemy caches and pacifying Phuoc Long Province. The Brigade conducted combined operations with ARVN and Province Forces, supported local clearing operations in its area of operations, continued Cobalt Advisary Team support to territorial forces of Phuoc Long and Binh Long Provinces, continued its efforts to neutralize Base Areas 351 and 203, conducted ground operations against the K-28 and K-29 Local District Force Units, and upgraded resources control operations.

(2) Execution:

(a) During the period 1-17 November, the 2d Brigade continued operations to support the pacification and Vietnamization programs within its assigned area of operations. On 18 November the 2d Brigade conducted a combined operation in coordination with the 7th ARVN Regiment along the military boundary vic YU 170365 to YU 217410. The ARVN portion of the operation entailed employing three companies of the 7th Regiment.
in intensive reconnaissance operations which extended three kilometers into Cambodia. During this combined operation, the 5th Battalion, 7th Cavalry, the 1st Battalion, 8th Cavalry, and the 2d Battalion, 12th Cavalry performed interdiction, blocking, and supporting operations in conjunction with the airborne assaults. The Brigade initiated Route Plow operations along Highway 309 utilizing the 60th Land Clearing Company with security provided by A/1-11 ACR.

(b) The 2d Brigade, during the month of December, employed the 5th Battalion, 7th Cavalry against the K-28 District Force, in Base Area 203. The 5th Battalion, 7th Cavalry conducted their operations in the vicinity of FSBs NAREI, KUNTEN TRAI, and DJAMCO. The 1st Battalion, 8th Cavalry performed the mission of interdicting enemy routes of communication and supply within their assigned AO, conducting combat operations against elements of MR 10, K-50, and the X-41 Communications/Liaison Base. The 2d Brigade prepared and upgraded contingency plans for the Duc Phong, Funard, Dong Xoai, and Song Be areas. On 13 December the 2d Brigade increased aerial visual reconnaissance in its area of operations, with A and E Troop, 1st Squadron, 9th Cavalry in general support.

(c) During the period 27-31 December, Battery B, 6th Battalion, 27th Artillery was moved from Duc Phong to FSB SNUFFY. The 60th Land Clearing Company, having completed its mission in the 2d Brigade AO, moved from FSB SNUFFY to Long Binh, and A Troop, 1st Squadron, 11th Armored Cavalry Regiment moved to Di An and reverted to OPCON 11th ACR. The upgrading of Highway 309 continued with D/31st Engineers making an all weather road and emplacing culverts and ditches where needed.

(d) Indications on 28 January 1971 were that for the next forty-five days the enemy would attempt a major infiltration effort on the Adams and Jolley Trails leading from the Cambodian Base Area 351, through Phuoc Long Province into the heart of the 3d Military Region. The 2d Brigade intensified its operations during the period 29 January through 1 March. The operation was conducted in two phases: Phase I, 29 January through 5 February; Phase II, 6 February through 1 March. Phase I operations were conducted with maximum emphasis on aerial reconnaissance by 1-9 ACS elements, reconnaissance and surveillance by LRRP teams and Reconnaissance in Force and ambush by OPCON battalions. Phase II operations were highlighted by the redeployment of the 1st Battalion 8th Cavalry and the realignment of the 2d Brigade AO internal boundaries. Continued emphasis was placed on operations conducted by 1-9 ACS and LRRP teams. Infantry units conducted reconnaissance, reconnaissance in force and ambush operations. The upgrading of Highway 309 was completed on 15 January to permit the passage of convoys to Bu Gia Map (FSB SNUFFY).
During the period 10-24 February the 5th ARVN Division, elements of the 1st Cav Div (AM) and territorial Forces of Phuoc Long Sector executed the Dong Khoi Campaign. The objectives of the campaign were the destruction of the VC/VCI, Guerrilla/Local District Force Units, and enemy supply units. During the period of the campaign, the 2d Brigade continued operations in its assigned AO and conducted operations in support of the Dong Khoi Campaign. The 5th Battalion, 7th Cavalry initiated operations targeted against infiltration units; the 8th Recon Service Group Units and K-28 District Force Units; the 1st Battalion, 8th Cavalry initiated operations targeted against infiltration units and the 8th Recon Service Group. On 12 February 1971, the 2d Brigade executed an Economy of Force operation to limit the mining incidents along Route 309. Snipers were employed along Route 309 by the 5th Battalion, 7th Cavalry and the 1st Battalion, 8th Cavalry. The 1st Battalion, 77th Field Artillery supported the operation by planning and firing at defensive targets on likely locations to impede mining activities along Route 309. On 22 February the 2d Brigade realigned its internal boundaries to facilitate and insure complete exploitation of the extensive cache site vic YU 2745, and exploited the enemy bunker complexes vic YU 6535. 2d Brigade continued employment of LRRP and 6-9 ACS elements with primary emphasis on the Adams and Jolley Trails.

During the period 1-6 March, the 2d Brigade continued combat operations. Additionally the period 1-12 March 1971 found the 2d Brigade executing a disengagement of its forces from its area of operations in compliance with 1st Cav Div (AM) OPORD.183-70 Keystone Robin Charlie. On 1 March, the 5th Battalion, 7th Cavalry entered standdown at Bien Hoa Army Base. On 7 March, the 1st Battalion, 8th Cavalry entered standdown at Bien Hoa Army Base, followed by HHC, 2d Brigade, which entered standdown at Bien Hoa Army Base on 12 March. The 2d Brigade released OFCON of its battalions upon their entry into standdown.

Impact of weather or weather support on combat operations: During this reporting period combat operations were not altered or severely hampered by the effects of weather. Combat Weather Team 2, 5th Weather Group provided this Brigade with outstanding support.

Use of Composite and Split Artillery Batteries: Artillery batteries were split on many occasions to provide sufficient coverage to all elements operating within the AO. This was normally done by having the battery minus remain at a battalion CP FSB, while a 3 tube section with necessary FDC equipment moved to another. Although this was not the most desirable configuration, it provided the wide coverage which was required. This was augmented upon occasion by the reinforcement of the 105 half battery by 3 tubes of 155 to form a composite battery. Again, the logistical difficulties of separating a unit made this course acceptable only where a better solution was not available.

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

(d) Contacts during the month of February:

1. 021200 - YT 557969, D/1-8 Cav: W of FSB DRAGON HEAD, a ground recon obsr 1 ind 30m E of loc and eng/org. Results: 1 VC KIA (KIA wearing blk PJs); optd 1 GKG rfl w/grenade launcher, 3" Crimped 7.62mm cartridges and 1/7.62mm rfl rd.

2. 060923 - YU 175358, E(R)/1-8 Cav: NW of FSB BETTY, a ground recon obsr 2-3 ind 220m W of loc, Eng/org, AFA supported, Rcn 3/A and 11 rds of RPG fire when EN evaded to NW. Results: 1 VC KIA, optd 1 AK-47 rfl (excellent condition), 4 full AK-47 mags (120 rds), 1 CHICOM grenade, 1 rfl cleaning kit, 1 US canteen cup, and 2 oz of med supplies. Neg frs cs.

3. 150955 - YU 278450, C/1-8 Cav: Fnd a cache site, which was further exploited by other elements of the battalion. The final inventory of items fnd at the cache site included: 47/.51 cal rds, 118,140/7.62mm rds, numerous 82mm mtr propellant charges and fuses, 200 lbs of medical supplies, 3 tons of rice, 1200 lbs of salt, 2,500 lbs of corn and 2 ind weapons.

3. 3d Brigade Operations:

(1) Mission: During the reporting period, the missions for 3d Brigade were many, with the primary mission being destruction of the 33d NVA Regiment. Other major missions included targeting HQ, MR-7 and enemy local force elements within the AO. On 24 March, as the 1st Brigade, 1st Cav Div (AM), completed standdown, the 3d Brigade assumed the additional missions of targeting HQ, SR-5, and the 81st Rear Service Group in War Zone "D." Also on 24 March, the responsibility for defense of Camp Gorvad was assigned to 3d Brigade.

(2) Execution: During the reporting period, operations can best be separated into two periods: the first from 1 November 1970 to 24 March 1971 when the 3d Brigade operated primarily in Binh Tuy Province with three airborne battalions and one armored cavalry squadron; the second period from 24 March 1971 to 10 April 1971 when the Brigade assumed OPCON of three additional airborne battalions and the responsibility for the old 1st Brigade and Camp Gorvad A0's.

1. During this period of almost five months, the 3d Brigade operated in virtually all areas of the assigned AO, with the exception of the Northeastern section and the extreme Southwestern section of the AO. Operations were conducted utilizing the 1-5 Cav, 2-5 Cav, 2-8 Cav and 2-11 ACR as principle maneuver elements. During all operations, emphasis was placed on small unit tactics, with individual companies breaking down to platoon, squad and sometimes half-squad size units. The enemy continued
to travel in 02-05 man elements and continued to avoid contact with U.S. units. Activity remained light, with only a few exceptions, during the entire reporting period.

2. There were many different types of operations conducted during the reporting period. These varied from widely separated ground reconnaissance by individual battalions to concentrated efforts by all four battalions massing in one area. One significant operation was called the "Rice Denial Program". Beginning in late November, two battalions, the 1-5 Cav and 2-5 Cav, were employed in the area of the Vo Dat - Tanh Linh "Rice Bowl". The U.S. units operated on the fringes of the "Rice Bowl" and RF-PF Units operated within the "Rice Bowl" itself. The objective was to deny the rice produced in the "Rice Bowl" to the enemy. In the past this area had been an extremely good source of food. However, the success of the "Rice Denial Program" was unquestioned. The enemy managed to take some rice out of the area, but for the first time in many years, the villagers in the "Rice Bowl" area had sufficient food for themselves and had excess rice to sell in Saigon.

(b) Period II (24 March 1971 - 10 April 1971):

1. With the stand-down of the 1st Brigade, more responsibility fell to the 3d Brigade. Concurrently with the addition of these battalions to the "Task Organization", the 3d Brigade assumed the 1st Brigade's former AO, thereby increasing the 3d Brigade's AO to include virtually all of Long Khanh Province in addition to Binh Tay Province.

2. There was no significant change in operations with the assumption of control over the new units and AO. The 1-7 Cav, 1-12 Cav, and 2-12 Cav continued operations in southern War Zone "D", and the 2-5 Cav, 2-8 Cav and 2-11 ACR continued operations in Binh Tay Province. The 1-5 Cav began standdown on 19 March and was passed OPCON from 3d Brigade at that time. On 27 March 1971, the 2-12 Cav began standdown operations, reducing the Task Organization to four airmobile battalions and one armored cavalry squadron. On 10 April 1971, the 3d Brigade was redesignated as a separate brigade and passed OPCON to II Field Force.

(c) General:

(a) Vietnamization Program: Throughout all operations during the reporting period, emphasis was increasingly placed on the Vietnamization Program. Combined and coordinated operations were conducted periodically with GVN Forces. Training programs were conducted by both CAT-MTT teams and line companies. Response by the GVN Forces showed that they were becoming increasingly capable of conducting their own operations.

(b) Population/Resources Control: Continued emphasis was placed on this program in an effort to disrupt and disorganize the Shadow Supply System, operating primarily along Route QL#1. Mobile checkpoints and Eagle Flights were the primary means of checking the daily traffic on QL#1 in an effort to curtail enemy transshipment of supplies. No definite
success can be claimed in this program, but it is felt that the Supply System was hampered by this operation.

(4) Discussion and Analysis of Significant Events:

(a) Contacts during the month of November:

1. On 1 November, the 2-5 Cav closed FSB Silver and began construction of FSB Cheyenne (YT926536). The 2-5 Cav began operations in the Northern portion of the Brigade AO. The period 1-6 November was one of negligible activity. At 051530/AN 767475, B/1-9 Cav observed and engaged 3 individuals while on VR resulting in 3 enemy KIA. While conducting VR in the same area on 6 November, B/1-9 Cav received 8 rounds of S/A fire with negative hits. Area was engaged with negative enemy assessment.

2. A total of two significant events were reported during the period 7-8 November. At 071815/YT 659032 F Troop/2-11 ACR reported an automatic ambush detonation resulting in 3 VC KIA and 1 AK-47 capt. On VR, B/1-9 Cav observed and engaged 2 individuals near a bunker complex resulting in 2 VC NVA KIA.

3. The period 9-13 November was one of very light activity. At 091500/YT 656025 F Troop/2-11 ACR reported an automatic ambush detonation resulting in 2 VC KIA. At 101350/YT 117462, while on VR, B/1-9 Cav observed and engaged 1 individual resulting in 1 KIA.

4. The period 14-15 November was one of light activity. On 14 November a series of automatic ambushes by F Troop/2-11 ACR detonated resulting in 5 VC KIA. B/1-9 Cav made one sighting at 1517-5/YT 973387 resulting in 1 KIA.

5. At 161145/YT 856523 B/2-5 Cav observed and engaged 1 individual resulting in 1 NVA KIA. An automatic ambush detonation was reported by F Troop/2-11 ACR resulting in 01 VC KIA.

6. The period 17-18 November was one of light contact. At 171445/YS 674947 LRRP Team 75 observed and engaged 1 individual resulting in 01 VC KIA. At 181120/YT 746122 1/D/2-8 Cav observed and engaged 5-8 individuals. Enemy returned fire with 10-15 rounds AK-47 fire resulting in 1 US WIA. Negative enemy assessment. At 181545/YT 675041 F Troop/2-11 ACR reported 5 VC KIA's resulting from an automatic ambush detonation.

7. The period 19-27 November was one of very light activity with a total of 10 fleeting contacts with 1-3 individuals resulting in negative friendly casualties and 1 AK-47 capt. No instances of ground-air fire were reported resulting in light damage to a LCH from B/1-9 Cav. Negative friendly casualties. On 21 November, 2-5 Cav conducted retrograde of FSB Cheyenne and opened FSB Peggy, vicinity YT 860330, beginning operations in the northern "Rice Bowl".
On 28 November, activity increased somewhat. At 280930/YT 768224, C/2-5 Cav made contact with 03 individuals, while sweeping the area, C Company received heavy small arms and D-40 fire. Artillery, AFA and air strikes supported the contact. Results: 3 NVA KIA, 3 US WIA.

While supporting the contact, a B/3-17 LCH received ground-air fire on two occasions resulting in minor damage to the aircraft. The 2-5 Cav command and control helicopter also received ground-air fire resulting in 1 US WIA.

At approximately 291550, the 3d Brigade LNO at Ham Ten reported that an RF convoy had been ambushed at X 662849. 3d Brigade supported the contact with AFA and Pink teams. During the contact with an estimated NVA Company the supporting aircraft of C/2-20 AFA and B/3-17 Cav received ground-air fire on five occasions, one of which was .51 cal. Results of the contact were 8 NVA KIA and minor damage to a LCH from B/3-17 Cav.

At 301530/XT 752078 D/2-8 Cav observed and engaged 3 individuals resulting in 1 VC WIA POW.

(b) Contacts during the month of December:

1. The period 1-5 December was one of light activity, characterized by seven fleeting contacts with 1-3 individuals. There was no enemy assessment from the contacts and 1 US was slightly wounded. A ground-air fire at 041530/XT 764425 resulted in 1 US KIA and light damage to the aircraft. At 051130/XT 655032, an M-551 from F Troop/2-11 ICR detonated an anti-tank mine resulting in severe damage to the M-551 and 1 US WIA.

2. At 061715/XT 694094, LRRP Team 51 moved into a bunker complex and began receiving heavy small arms fire. The B/1-9 Cav Aerial Rifle Platoon (Blues) was inserted in support at 061715. Sporadic contact continued until approximately 1800 hours, resulting in 3 US WIA. Negative enemy assessment. At 061000/XT 837447, E RCH/2-8 Cav spotted and engaged 2 individuals resulting in 2 VC KIA.

3. On 7 December, the 1-5 Cav concluded operations in AO Chief and passed OPCON to 3d Brigade at 1710 hours. The 1-5 Cav opened FSB Apache (YT 730245) in conjunction with the 3d Brigade's "Rice Denial Operation." At 070930/XT 891201, an APC from G Troop/2-11 ICR detonated a mine resulting in 04 US WIA and loss of the vehicle. Also, there were 2 incidents of ground-air fire during the day with negative damage to the aircraft involved.

4. The period 8-10 December was one of light activity. There were a total of five ground contacts with 1-3 individuals resulting in 3
CONFIDENTIAL

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

VC KIA and negative friendly casualties. At 082310, the radio relay station on Nui Chua Chan received 1 round of mortar fire resulting in 1 US WIA. On 10 December, B/1-9 Cav sightings resulted in 2 enemy KIA at 2T 035520.

The period 11-15 December was one of negligible ground activity with only two ground contacts occurring. No NVA KIA resulted from these contacts. There was a significant increase in ground-air firing incidents. A total of six occurred during this period resulting in 4 US WIA and 1 LOH combat loss. Enemy firing sites were engaged with negative assessment.

Activity was light during the period 16-20 December with three fleeting contacts reported. There were negative injuries and negative enemy assessment resulting from these contacts. On 192135, FSB Macc received 6/60mm mortar rounds impacting inside the perimeter. At 192225, an additional 60mm mortar round impacted at FSB Macc. Suspected enemy firing sites were engaged with counter-mortar fire, AFA, and Nighthawk. Negative damage or friendly casualties resulted from the standoff attacks. On 201220/ YT 84049 0/2-8 Cav was engaged by a possible command detonated mine resulting in 5 US WIA.

Light activity continued during the period 21-24 December. On 211445/ YT 616250, LRRP Team 42 engaged 2 VC resulting in 02 VC KIA at 221550/ YT 799245, B/1-5 Cav was engaged by an USEF. Friendly returns fire and AFA and pink team supported. Results: Eng. wk: US - 1 KIA, 2 WIA. Two other light contacts and two ground-air fires were reported with negative friendly casualties and negative enemy assessment.

On 24 December at 1745 hours, the 3d Brigade began the observance of the 1970 Christmas Truce. No hostile activity marred the truce and elements of the 3d Brigade spent Christmas day in stationary positions. At 1800 hours, 25 December, combat operations were resumed.

Only two ground contacts were reported during the remainder of December, resulting in 1 VC KIA and negative friendly casualties. Two automatic ambushes employed by 4/2-8 Cav detonated on 28 and 29 December, accounting for 3 VC KIA and 04 enemy weapons captured. At 1755 hours on 31 December, 3d Brigade ceased combat operation in observance of the New Year's Truce.

(c) Contacts during the month of January:

New Year's day passed with no offensive operations on the part of 3d Brigade. The truce terminated at 1800 hours on 1 January and preparations were made to begin a new operation on 2 January.
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

Operation against HQ, MR-7, all elements of the Brigade were massed in the area east of FSB Race, but contacts remained relatively light for the period 1-10 January. On 2 January, 1A/2-8 Cav engaged 7-10 individuals resulting in 1 NVA KIA. One US was wounded during the contact. Also on 2 January, 1D/1-5 Cav was engaged by an USEF utilizing B-60 and AK-47 fire. AFA and Artillery supported the contact. The contact resulted in 02 US WIA and 2 US KIA with negative enemy assessment. On 5 January, in order to support the operation in progress, the 1-5 Cav opened mini-FSB Trap. At 060955/YT 795009, 2B/2-8 Cav engaged 2 individuals resulting in 1 VC KIA. At 091442/YT 720088, D/2-5 Cav was engaged by an USEF resulting in 4 US WIA and negative enemy assessment.

There was negative contact on 11 and 12 January and only one contact reported on 13 January. D/2-8 Cav observed and engaged 6 individuals resulting in 1 enemy KIA. A total of four contacts were reported on 14 January. These contacts were fleeting engagements and there was negative enemy assessment. 1 US WIA. Also on 14 January, mini-FSB Trap was closed and the 1-5 Cav reconsolidated at FSB Apache.

The period 15-22 January was one of light contact. B/1-5 Cav made contact with 6-8 individuals at 160905/YT 769267. The enemy was in a bunker complex and pink team and Artillery supported. There was negative enemy assessment and 3 US WIA. At 161523, B/1-5 Cav was sweeping the contact area, they were again engaged by the enemy resulting in 1 US KIA. Negative enemy assessment. At 182155/2S 025782, 2C/2-8 Cav and the 15th and 8th FF Platoons from Binh Tuy Province, while on a combined operation, observed and engaged 9 VC, resulting in 1 VC KIA and negative friendly casualties.

Four other light contacts were reported during this period with negative results.

At 231110/YT 777289, 2B/1-5 Cav engaged 5 individuals resulting in 1 NVA KIA. During the period 24-28 January, most activity resulted from B/1-9 Cav operations. On 24 January, visual sightings by a pink team resulted in 3 VC KIA. Also on 24 January, ground sightings by the B/1-9 Blues resulted in 2 VC KIA. On 28 January, a visual sighting by B/1-9 Cav resulted in 1 enemy KIA. The B/1-9 Cav Blues were inserted on the sighting and made contact with an USEF resulting on 1 US WIA and 1 US KIA.

Due to intelligence data obtained during January, the 2-8 Cav was displaced from FSB Silver on 28 January and established FSB Fontaine in order to support an operation against HQ, MR-7 on the Nui Be complex.

The period 29-31 January was characterized by continued light activity. On 29 January, the 1-5 Cav shifted its operations to the area north of the Vo Det "Rice Bowl" and established mini-FSB Claire (IT 820455). FSB Apache continued to be maintained by the 1-5 Cav. At 301134/YS 829939, G Troop/2-11 ACR made contact with 2 individuals resulting in 1 VC KIA.
CONFIDENTIAL

AVDACT-FT
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

4C/2-8 Cav received sniper fire at 310900/YS 850907 resulting in 1 US WIA. Friendly element returned fire with negative results. Also on 31 January, an automatic ambush established by 2 Troop/2-11 ACR detonated at YS 914912 resulting in 1 VC KIA.

(d) Contacts during the month of February:

1 On 1 February, the 2-5 Cav conducted retrograde operations at FSB Peggy and began construction at FSB Sandra (ZT 096195) in support of an operation begun against HQ and 1st Bn, 33d NVA Regiment.

2 Light activity continued during the period 2-5 February. At 020935/YS 860917, 2D/2-8 Cav engaged 2 individuals resulting in 1 VC KIA and 1 US WIA. Also on 2 February, FSB Sandra received 14-20 rounds of 81mm mortar fire at 0645 hours. All rounds impacted outside the perimeter and caused no damage. At 041330/ZT 176175, the B/1-9 Cav Blues engaged an USEF resulting in 2 VC KIA and 1 VC POW (WIA). Two other light contacts were reported during this period with no significant results.

3 A significant contact took place on 6 February. 1A/2-5 Cav at 0849 hours moved into a bunker complex and observed 2-3 individuals. Contact was initiated and the enemy returned fire with small arms. At 1130 hours, 1A again reconed by fire and received small arms and 3/B-40 rockets in return. Contact was broken and was reinitiated at 1440 hours when the friendly element again reconed the area by fire and received small arms and B-40 fire in return. The contact was supported by air strike, pink team, AFA and Arty. Results: Enemy - 5 VC KIA; Friendly - 3 US WIA.

4 Another significant contact took place on 7 February. At 070930/YS 796902, 2B/2-8 Cav found an enemy comms wire and began following the wire to the south. Recon by fire was conducted with negative returns. At 1005 hours 23 triggered an enemy booby trap resulting in 3 US WIA. Also at this time the unit received a light volume of small arms fire. As the Platoon began maneuvering towards the enemy, it began receiving a heavy volume of small arms, automatic weapons, and B-40 fire. Contact continued throughout the day although the intensity lessened to sporadic fire shortly after the initial period of contact. AFA, Arty, pink team, air strikes and MEDEVAC supported the contact. Results: Enemy - Unknown; Friendly - 5 US KIA, 3 US WIA.

5 Activity in the AO decreased considerably during the period 8-13 February. A total of six minor contacts were reported with only one yielding any significant results. E recon/2-5 engaged one individual resulting in 1 NVA KIA. FSB Fontaine received 2 standoff attacks during this period. At 083300, 3 rounds of enemy launched 105mm rounds were received causing 4 US wounded. The second attack was received at 102236 when 4 rounds of enemy launched 155mm rounds were reported, causing negative casualties or damage.
Light activity continued from 14-17 February. On 14 February, the 1-5 Cav conducted retrograde of mini-FSB Claire and reconnoitered the CP at FSB Apache. A/2-8 Cav at 140912/YS 820927, received 20-30 rounds of sniper fire resulting in 2 US WIA. Suspected area was engaged with negative results. At 150835/2T 065311, 2A/2-5 Cav observed 5-7 individuals and engaged with organics, resulting in 1 NVA KIA. E recon/2-5 Cav engaged 2 individuals at 171630/2T 014144, resulting in 1 NVA KIA.

Ground activity during the period 18-23 February centered in the 2-8 Cav's AO. At 182050 hours, FSB Fontaine received 6/60mm mortar rounds, 5 impacting within the perimeter and 1 impacting without detonating. Five US were wounded in the attack. Counter-mortar fire, AFA, and Nightingale reacted to the attack. At 191012/YS 848932, E Recon/2-8 Cav engaged 5 individuals resulting in 1 NVA KIA. Enemy KIA was later identified as an NVA Captain. There were negative friendly losses. E Recon/2-8 Cav at 201016/YS 850932 was engaged by an USEF utilizing small arms and B-40 rockets, resulting in 1 US KIA and 3 US WIA. Friendlies returned fire with negative results. Two other contacts were reported in the 2-8 Cav's AO with negative significant results. Also during this time period, the 1-5 Cav opened mini-FSB Cheryl (YT 86113) to support operations against the 2d Bn, 33d NVA Regiment.

The remainder of February was extremely quiet with only two contacts reported. There were negative significant results from either contact.

(e) Contacts during the month of March:

The lull in activity that began in late February continued in early March. During the period 1-9 March, only one significant contact occurred. At 051445/YS 865925, E Recon/2-8 Cav observed and engaged 13 individuals in a bunker complex. The enemy returned fire with small arms. Contact broke almost immediately, but was reestablished sporadically until 1700 hours. The 2-8 Cav's command and control helicopter received fire while over the contact area and had to make an emergency landing at 1530 hours. Negative injuries. A LCH from F/1-9 Cav also received ground-air fire while supporting the contact and made a forced landing at 1600 hours. Negative injuries. The contact was supported by AFA, Artillery, pink teams, and Rash PACs. Results: En - Unk; Fmly - 1 KCS KIA; 1 US WIA.

On 9 March, the 1-5 Cav began prepositioning forces for an operation south of FSB Mace. On 10 March, the 1-5 Cav began moving into the area south of FSB Mace and D(-)/1-5 Cav made contact with 3 individuals at 1C1545/YT 625023 resulting in 1 NVA KIA and negative friendly casualties. On 11 March, the 1-5 Cav closed FSB Apache and moved the OP to FSB Mace.

On 13 March at 1417 hours/YS 609991, E Recon/1-5 Cav engaged 1-2 individuals resulting in 1 VC KIA.
Operational Report for Semi-annual Period Ending 30 April 1971

During the period 14-17 March, one minor contact and two significant contacts were reported. At 141210/2T 195162, 1A/2-5 Cav received small arms fire while in log posture, resulting 1 US WIA. 3D/1-5 Cav at 151528/5S 635940, engaged 2 individuals in a bunker complex. Received return fire from 10-12 enemy utilizing light automatic weapons, small arms and B-40 fire. AFA, Arty, pink team and air strike supported the contact. Results: En - Unk; Fdy - 6 US WIA. At 170045/2T 070170, LRRP Team 22 engaged 4 individuals with claymores and small arms resulting in 4 NVA KIA. While searching the bodies, the team received small arms fire from 3 individuals. Contact broke at 0830 hours and the LRRP team was extracted at 1145 hours with negative casualties. Pink team and B/1-9 Cav Blues supported the contact. Negative enemy assessment.

The period 18-22 March showed a marked increase in enemy activity. On 18 March, a total of five ground contacts occurred. E Recon/(-)/1-5 Cav engaged 02-03 individuals at 181200/2S 655035 resulting in 1 VC KIA. At 181530/2S 842961, 20/2-11 ACR engaged 2 individuals resulting in 1 VC KIA. There were negative results from the other three contacts. Four contacts were reported on 19 March resulting in 2 VC KIA by 3B/2-8 Cav at 2S 849390 and 1 VC KIA by by 26/2-11 ACR at 2S 843957. Also on 19 March, the 1-5 Cav ceased combat operations in RVN and began standdown at Bien Hoa. The unit was released OPCON from 3d Brigade at 191530 hours.

On 20 March there were three instances of ground-air fire that resulted in negative damage or casualties. Three ground contacts were reported on 21 March resulting in 1 VC KIA by 2E/2-11 ACR at 2S 367964, 2 UC KIA and 1 VC POW by the 513 RF Company, OPCON to the 2-8 Cav and 2 US from 2D/2-5 Cav were WIA in a contact at 2T 021173.

Activity again became light during the period 23-25 March. At 21100/2T 836066, a LOH from F/1-9 Cav received ground-air fire, receiving an unknown number of hits to the aircraft. The aircraft lost direction control and crashed resulting in 2 US KIA and 1 US WIA.

On 24 March, as the 1st Brigade Headquarters began standdown, the 3d Brigade assumed OPCON of the 1-7 Cav, the 1-12 Cav and the 2-12 Cav. The 3d Brigade also assumed control of the 1st Brigade's AO and the Camp Gorvad AO. On 27 March, the 2-12 Cav ceased combat operations in RVN and began standdown at Bien Hoa. The 2-12 Cav was released OPCON from 3d Brigade at 270810 hours. Also on 27 March, the 1-12 Cav assumed responsibility for defense of Camp Gorvad and moved a TAC CP to that location.

Activity for the remainder of the month remained relatively light. At 260915/2S 827897, 3A/2-8 Cav engaged 3 individuals resulting in 1 VC KIA. Recon/2-8 Cav at 270937/2S 834923, engaged 4 individuals resulting in 1 VC KIA.
in 1 NVA KIA. At 271210/YS 634925, A/2-8 Cav received small arms fire from 2 individuals resulting in 1 US WIA. Return fire by A Company produced negative results. At 311150/TT 096105, E Recon 2-5 Cav engaged 2 individuals. Enemy returned fire with small arms. Results: En-2 VC KIA; Fdy - 1 US WIA.

(f) Contacts during month of April:

1. The period 1-6 April was characterized by light activity. 3D/2-5 Cav was engaged by 1 individual at 011100/ZZ 097287 resulting in 1 US WIA. 4E/2-11 ACR at 021315/YS 929954 engaged 4 individuals resulting in 2 VC KIA. 10/2-5 Cav at 051330/TT 974137 engaged an USEF resulting in 1 VC KIA. Four other fleeting contacts were reported with negative results.

2. On 7 April, in response to recent intelligence, the 1-7 Cav re-oriented operations from War Zone "D" to an area south of FSB Laser. To support the operation, the 1-7 Cav CP relocated to FSB Laser.

3. After the arrival of the 1-7 Cav, activity in the area south of FSB Laser increased. At 061025/TT 572007, C/1-7 Cav engaged 3 individuals, AFA, Arty, pink team, and air strike supported. 1 enemy was reported killed as a result of the air strike. At 090715/TT 643007, 1A/1-7 Cav was ambushed as it left its night position. The unit received small arms, automatic weapons, and B-40 fire from approximately 15 individuals. 1A returned fire with organics and AFA, Arty, pink team and air strike supported, resulting in 1 enemy KIA/S. Friendly losses were 1 US KIA and 6 US WIA. Due to this increased activity, the 2-5 Cav was relocated from the eastern portion of the AO to the area south of the contacts. The 2-5 Cav moved a TAC CP to FSB Laser to control operations.

4. At 1200 hours on 10 April, the 3d Brigade was redesignated 3d Brigade (Separate), 1st Cavalry Division (A), and became OPFON to II Field Force. Two contacts were reported on 10 April resulting in 1 enemy KIA at 2S 064234 by the 513 RF Company, OPFON to 2-11 ACR, and 1 enemy KIA at YS 817956 by D/2-6 Cav.

5. 1st Squadron, 9th Air Cavalry Operations.

(1) Mission: The 1st Squadron, 9th Air Cavalry remained in general support of the Division, continuing to provide visual reconnaissance throughout the Division Area of Operation. In addition, the 1/9 ACS provided convoy escort and cover and had responsibility for Ranger Team and Combat Tracker Team insertions and extractions. During the latter part of December, 1-9 Cav, with C/17 Cav (-) OPFON, was assigned the additional missions of supporting the 7th and 9th ARVN Regiments and the 2d ARVN Airborne Brigade. On 22 February, TF 1-9th was assigned
AVIATION

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

The mission of supporting the ARVN operations in Cambodia under HQ MP-3 with four troops of Air Cavalry.

(2) Execution:

(a) On 5 December 1970 the 9th Cavalry Brigade (Provisional) was formed, and included the newly created F Troop (Prov) 1-9 ACS and E Troop (Prov). Both Air Cavalry Squadrions were placed OPRC to the provisional 9th Cavalry Brigade, and the brigade task organized as follows:

<table>
<thead>
<tr>
<th>TF 1-9</th>
<th>TF 3-17</th>
<th>BDE Control</th>
</tr>
</thead>
<tbody>
<tr>
<td>A/1-9 ACS</td>
<td>B/3-17 ACS</td>
<td>H C 75th Rangers</td>
</tr>
<tr>
<td>E/1-9 ACS</td>
<td>B/1-9 ACS</td>
<td>62nd Cmbt Trackers</td>
</tr>
<tr>
<td>A/3-17 ACS</td>
<td>C/1-9 ACS</td>
<td>D/1-9 ACS</td>
</tr>
<tr>
<td>E/3-17 ACS</td>
<td>F/1-9 ACS</td>
<td></td>
</tr>
</tbody>
</table>

During the remaining 26 days of December the Brigade restructured the task organization three times and conducted one independent operation.

(b) In late December, there was a noticeable increase in activity in the 7th and 9th ARVN areas of operation. Additionally, the 9th ARVN Regiment was conducting cross-border operations into Cambodia. A/1-9 ACS was diverted into the 7th and 9th ARVN Regimental AOs during the period 23-29 December to assist A/3-17 ACS in locating the enemy forces that had moved across the border.

(c) At 242000 December 1970 the Brigade received a warning order to send two air cavalry troops to Tay Ninh to support operations by the 2nd ARVN Airborne Brigade. At 242100 December TF 3-17 was notified to release C/1-9 ACS from OPCON on order. TF 1-9 was also informed to be prepared to receive OPCON C/1-9 ACS on order and be prepared to send E and C/1-9 ACS to Tay Ninh. Initial coordination was made by TF 1-9 Commander and the S-3 with the 2nd ARVN Airborne Brigade, when orders were received 250830 December to commit one air cavalry troop in support of the Airborne Brigade. By 1/10 hour, C Troop, 1-9 ACS had already made contact in the new area of operations. In the space of two days the Bic had moved five air cavalry troops into new areas of operation and each troop was operational upon arrival. A recapitulation of the moves are as follows:
CONFIDENTIAL

AVDAGT-DT

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

UNIT SUPPORTED (AO)

A/1-9 ACS 7th and 9th ARVN Regiments
E/1-9 ACS DIVARTY
E/3-17 ACS Binh Hoa Sector
B/1-9 ACS Royal Thai Army Volunteer Force
C/1-9 ACS 2nd ARVN ABN BDE

(a) At 252000 December 1970 the task organization was changed again by placing E/3-17 ACS under OPCON to TF 3-17. This troop was further placed in support of the 2nd Bde, 1st Cav Div (AM). At the same time B/1-9 ACS returned to OPCON of TF 3-17. This organization was retained until 31 December 1970.

(b) On 29 December 1970 the brigade received a warning order to locate and free some allied prisoners of war supposedly located in the Razor Back area. At 302000 December the order to execute the plan was received. At 210645 December Task Force Novins arrived at an abandoned air strip at Dau Tieng and established a forward operation AC base. Two Air Cavalry troops and an Infantry Battalion (-) were OPCON to the Task Force. Rearm and refuel points were established and operational by 0745 hours. The operation resulted in one heavy contact, but due to the holiday cease fire the operation had to terminate at 1800 hours that day. By 1930 hours all elements of the TF had cleared Dau Tieng and the air strip.

(c) The task organization in the beginning of January remained the same. A Troop 1/9 ACS was in support of the 2nd Bde, 1st Cav Div (AM). A Troop 3/17 ACS continued to support the 7th and 9th ARVN Regiments. C 1/9 ACS was supporting the 2nd ARVN Bde in Tay Ninh Province, E Troop 3/17 ACS worked in support of the 2/12 Cav, F Troop 1/9 ACS was in support of the 1st Bde, 1st Cav Div (AM), and E Troop supported 33 Bde, 1st Cav Div (AM).

(g) On 17 January, E Troop (Prov) 3/17 ACS was inactivated with its assets reverting to the 334th Attack Helicopter Company. F Troop was then given the mission of supporting the Divarty AO.

(h) Because of increased activity in the 5th ARVN Division and 2nd ARVN ABN Bde AOs and the 6th ARVN Ranger Group's move to eastern Tay Ninh, a further alignment of Air Cavalry assets was necessary. C Troop 1/9 ACS continued in support of the 2nd ARVN ABN Bde in western Tay Ninh while A Troop 3/17 ACS was tasked to support the 6th Ranger
May 1971

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

Group in eastern Tay Ninh. E Troop 1/9 ACS was then moved to support the 7th and 9th ARVN Regiments. A Troop 1/9 ACS continued to support the 2nd Bde, 1st Cav Div (AN). F Troop 1/9 ACS was in support of the DIVARTY AO and additionally supported the 8th ARVN Regiment in its AO.

(1) The 1-9 ACS continued its mission supporting the 1st Cav Div (AN) with little change in its mission or operations throughout the remainder of January and into February. 22 February 1971, TF 1-9 commenced operations in support of ARVN forces in Cambodia. Four air cavalry troops supporting four ARVN task forces were to operate under HQ MR-3. Major enemy units, including the 5th and 9th VC and the 7th NVA Divisions, were located from Kampong Cham to Smol.

(j) The two OPCON troops of the 3/17th ACS (-), in addition to the 1/9 ACS, had been tasked to provide aerial reconnaissance along the entire northern border between MR-3 and Cambodia. Area responsibilities were divided between the two squadron headquarters; however, CO 1/9 ACS remained as the overall coordinator of air cavalry operations for the Division.

1. To support the operation, rearm/refuel points were established at Katum and Thion Ngon and B Troop 1/9 ACS moved closer to the Cambodian border from Bear Cat to Quan Toi. Headquarters, 1/9 ACS, established a tactical command post at Katum to facilitate coordination with Headquarters, MR-3, and the supporting Task Forces.

2. Because of the unique rules of engagement in Cambodia, minor modifications to normal air cavalry tactical maneuvers were required. ARVN ground forces called "Browns" were trained in air cavalry tactics to act as Quick Reaction Forces. They replaced the "Blues" (Aerial Rifle Platoons) normally employed by Air Cavalry troops. Some of the "Browns" had previous experience in operating with the Air Cavalry units along the MR-3 Cambodian border, thus easing the transition from "Blues" to "Browns". To be responsive to ARVN ground forces and to provide close in air cavalry support, it was necessary to establish a system for direct communications between the air cavalry and the ground commanders. This was accomplished through the use of command and control helicopters continuously on station with a senior officer of the air cavalry troop and an ARVN liaison officer on board to coordinate operations with the ground commanders. The ARVN liaison officer also coordinated the clearance to engage targets.

2. On 24 February the Air Cavalry Troop of the 11th ACR was placed OPCON to the 1/9 ACS and immediately deployed into Cambodia.
CONFIDENTIAL

AVDAGT-DT

SURJECT: Operational Report for Semi-annual Period Ending 30 April 1971

1. On 26 February E Troop (Prov), 1/9 ACS, inactivated, and D Co, 227th AHB was reorganized using E Troop assets.

2. A Troop, 1/9 ACS, commenced to move its permanent location from Fire Support Base Buttons at Song Be to Camp Gorrod at Phuoc Vinh in preparation for the scheduled standby of the 1-9 ACS. The troop completed its move on 8 March and continued its tactical operations during the entire move.

(k) On 1 March, the 62nd Combat Tracker Platoon entered standby at Phuoc Vinh and was completed on 6 March. Delta Troop, 1/9 ACS, entered standby on 8 March and was completed on 16 March. On 8 March it was announced that the remaining troops of the 1/9 ACS would not enter standby but would continue with their commitment to support MR-3 in its Cambodian operation with the exception of B Troop which would become a part of the 3d Bde (Sop) and F Troop (Prov) which would inactivate. The responsibility for F Troop's AO was assumed on 28 March by B Troop, 1/9 ACS, which was released OFCON to the 3d Bde (Sop) 28 March and moved from Quan Loi to Brr Cat. B Troop's Cambodian commitment was assumed by B Troop 3/17 ACS. Troop AOs were then realigned to compensate for these changes. A Troop 1/9 ACS joined C Troop 1/9 ACS in Tay Ninh while both A Troop 3/17 ACS and B Troop 3/17 ACS were based in Quan Loi.

(l) On 1 April F Troop, 3-4 Cavalry, was placed OFCON to the 1/9 ACS. They deployed to Cambodia from Lai Khe. This brought the total number of Air Cavalry troops supporting MR-3 in Cambodia to six under the control of Headquarters, 1/9 ACS. Additionally, A Battery, 2/20 Aerial Field Artillery, was placed in direct support of the task force.

1. The rear headquarters for 1/9 ACS including A Troop, C Troop, and Headquarters Company was moved on 2 April from Phuoc Vinh to Di An.

2. Following the move to Di An, the 1/9th ACS (-) was reassigned to the 12th Combat Aviation Group, First Aviation Brigade, from the 1st Cavalry Division (Airmobile). This reassignment was completed on 10 April 1971.

g. 11th Combat Aviation Group

(1) Mission: During the period 1 November 1970 to 5 April 1971, the 11th Combat Aviation Group continued operational control of Aviation units in support of the 1st Cavalry Division (Airmobile). The Group units were the 227th and 229th Assault Helicopter Battalions, the 228th Assault Support Helicopter Battalion, and the 11th Aviation Company (GS). The elements of 11th Group provided direct and general support for the 1st Cavalry Division (Airmobile), the 5th ARVN Division, 11th ACR, and other ARVN, RF, and PF elements located in MR III. These missions con-
CONFIDENTIAL

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

13 May 1971

The 11th Aviation Group provided all firefinder, traffic and airfield control for the Division and supported ARVN units.

(2) Execution:

(a) The Aerial Weapons Company (D Company) of the 227th AHB was redeployed to NR I during the period to reinforce the gunship support required by XXIV Corps during Operation Lam Son 719. Upon redeployment to NR I, D/227th was attached to the 101st Airborne Division (Airmobile). The area of operations covered III Corps, Southern II Corps, Cambodia, Laos, and the reinforcement of XXIV Corps.

(b) Execution of "Keyston Robin Charlie" redeployment called for the inactivation of E Troop (Prov) and F Troop (Prov) 1/9th Cavalry and their reorganization as D/227th and D/229th respectively. 229th AHB was reorganized as the 229th Aviation Battalion (Composite) with the mission to support the 3rd Brigade (Separate), upon redeployment of the 1st Cavalry Division (-). The Group also redeployed A/228th, C/228th, A/227th, B/227th, and C/227th to the 1st Aviation Brigade with station in II Corps. Transfer of B/229th to the 1st Aviation Brigade with station in III Corps will be completed under supervision of the 229th Aviation Battalion (Composite). HHC/227th AHB and HHC/228th AHB were inactivated in-country. HHC, 11th Combat Aviation Group, has been reorganized and relocated in MR I under the 1st Aviation Brigade.

h. Division Artillery.

(1) Mission:

(a) The 1st Cavalry Division (Airmobile) Artillery and its assigned units provided fire support to the 1st Cavalry Division (Airmobile) maneuver forces within the Division's assigned AO and took action to advance pacification and Vietnization efforts.

(b) The 1st Cavalry Division (Airmobile) Artillery continued to act as maneuver headquarters for AC Chief and to control the 1st Cavalry Division (Airmobile) Base Camp (Camp Gorvod) at Phnom Vihok until 7 February 1971. On that date responsibility for AC Chief was assigned to the 1st Brigade. Division Artillery retained responsibility for Camp Gorvod base defense. On 18 January 1971, Division Artillery assumed responsibility for Popular Forces training in Kau Khigh Province; on 15
February responsibility encompassed Binh Duong and Tay Ninh Provinces.

(2) Execution:

(a) 2/19th Artillery continued its primary mission of direct support to the 1st Brigade. All batteries to include the Battalion Headquarters successfully completed the Divarty combat operations test. The battalion also underwent its annual OMNI and received outstanding ratings. The unit prepared for and completed standdown on 31 March 1971.

(b) 1/77th Artillery continued its primary mission of direct support to the 3d Brigade. Firing Batteries A and B successfully completed the Divarty combat operations test and the Battalion underwent its Annual General Inspection earning a satisfactory rating in all areas. The unit prepared for and completed standdown on 20 March 1971.

(c) 1/21st Artillery continued its primary mission of direct support of the 3d Brigade. By 30 March 1971 the Battalion assumed the mission of direct support for the 3d Brigade (Separate), 1st Cavalry Division (Airmobile). Two additional batteries were assigned on that date: A Battery 2d Bn 19th Art and C Battery 2d Bn 20th Art.

(d) 1/30 Artillery continued its mission of general support of the 1st Cavalry Division (Airmobile). The Battalion (-) continued in direct support of AC Chief. Two of three batteries were split throughout the period. The battalion headquarters received its OMNI and passed with a satisfactory overall rating. The battalion prepared for and completed standdown on 6 April 1971.

(e) 2/20th (AFA) continued in general support of the Division. Battery A reinforced the fires of 2/19th Artillery, Battery B reinforced the fires of 1/77th Artillery, and Battery C reinforced the fires of the 1/21st Artillery. In February the Battalion received a classified mission to support operations in Cambodia on a selected basis; later, the battalion supported 1/9 Cavalry operations in Cambodia. On 8 December 1970, the 2/20 Artillery assumed the mission of armed aerial escort of troop carrying aircraft. To accomplish this mission six AH-1G helicopters and 20 personnel were attached to the Battalion from D 30, 229th AV.

(f) E Battery, 82d Artillery (AVN) continued to support Division Artillery units throughout the reporting period. Aviation assets continued to be fully utilized. The fixed wing section continued the mission of supplying convoy cover for the Division TACOR. During the first part of this period 4 ICH aircraft were transferred to the 1/9 Cav to enable them to support their missions.
AVDAGT-DT 13 May 1971
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

(g) AO Chief (Binh Duong Province and Phuoc Long Province).
Activity within AO Chief remained extremely light during the reporting period. In the southern portion of the AO several contacts were initiated against elements of K1, Dong Nai Regiment; C510, SR-5; and local guerrilla forces. The C2 Company, K33 Artillery Battalion was identified in the northern portion of the AO, along with K2, C11 Supply entrance and exit control unit of the 81st Rear Service Group. The primary threat against Camp Gorvad during the reporting period was from standoff attacks, with 6 conducted against the installation. The total enemy losses for the reporting period were 31 KIA, 1 FW, and 5 Ho Chi Minh. On 7 February 1971 responsibility for AO Chief was transferred to the 1st Brigade.

(h) Training:

1 General: In addition to the normal recurring training periods required by 1st Cavalry Division Regulation 350-1, the 1st Cavalry Division Artillery conducted Forward Observer and Fire Direction Center Schools, Battalion/Battery Combat Operations Tests, and training and assistance to ARVN artillery units. Fire support coordination and Forward Observer Classes were taught at the First Team Academy while Division Artillery battalion liaison officers and forward observers conducted informal artillery training for supported US/ARVN units on a continuing basis. During the period, Division Artillery was tasked to train Popular Forces in Hau Nghia, T.v Minh, and Binh Duong Provinces using two OPCOM airborne rifle companies.

2 Formal training was conducted at Division Artillery Headquarters for personnel being assigned as part of a forward observer party. The purpose of the instruction was to familiarize forward observer personnel with artillery adjusting techniques used in Vietnamese operations. The course of instruction consisted of two days of classroom instruction and one day of practical exercise in adjustment of both tube and aerial field artillery. During the period 1 Nov 70 - 4 April 71, four classes were conducted, graduating 54 students. One class on Fire Direction Center procedures was taught with four fire direction officers in attendance.

3 Fire support coordination: During this period fire support coordination and forward observer classes were conducted at the First Team Academy. The purpose of the classes was to discuss and illustrate effective fire support by the Artillery Liaison Officer. The classes consisted of a discussion of fire support coordination followed by a live demonstration by aerial field artillery.
Battalion/Battery Combat Operations Test: During this period, Division Artillery conducted combat operations tests for the batteries and battalions subordinate to this headquarters. The purpose of the tests was to assess the combat readiness posture and state of training of the cannon/aerial field artillery battalions dedicated to the delivery of timely and accurate artillery fire in the support of maneuver forces.

Artillery Assistance/Training: During this reporting period, Division Artillery units continued to follow an active program of training and assistance to the ARVN artillery units.

Popular Forces Training: On 16 Jan 71 Division Artillery assumed the task of Popular Forces training in Nau Nghia, Tay Minh, and Binh Duong Provinces under the direction of the S5. Training consisted of an American airborne rifle company moving to a district within the assigned provinces and conducting the training in all aspects of counter-insurgency warfare at various popular forces compounds. Rifle companies utilized in this training were D Co, 2nd Bn, 7th Cav and F Co (Prov), 2nd Bn, 12th Cav. Popular Forces trained under this program numbered 2,375 individuals.

Aerial Field Artillery Training: A program was initiated within this command to effectively evaluate and test the three individual aerial firing batteries in all phases of combat operations. This was adopted as the operational readiness test; through successive examinations of the operations section, mission responses, aviation safety, and quality control maintenance. A complete and accurate evaluation of the battalion's overall effectiveness in its general support role was determined. In addition a firing test was conducted to determine the battery with the highest rocket firing accuracy. The operational readiness test has significantly increased the professional attitude and morale of all battalion personnel. It has provided an accurate evaluation of the battalion's over-all effectiveness and has helped maintain a high level of proficiency.

(1) Pertinent statistical data:

1 Aircraft utilization: During the reporting period, E Battery, 82d Artillery (Aviation) flew a total of 6,946 hours and 13,500 sorties averaging 40 minutes per sortie.

i. 8th Engineer Battalion

(1) During the reporting period, the 8th Engineer Battalion continued its efforts in support of the 1st Cav Div (AM) in combat operations. The end of the reporting period saw the completion of the stand down of the Battalion Headquarters, Headquarters Company, and Companies A and B. Company C was reorganized, reinforced and continued its mission of combat support of the 3rd Brigade (Separate).

(2) Non-Divisional engineer support, coordinated by the 8th Engineer Battalion, was directed toward upgrading roads, and the construction of facilities within the Bien Hoa complex to support the 3rd Brigade. Non-Divisional Engineers continued work on the Special Intelligence bunker, Communications bunker, modification of the Bde TOC, and construction of a refuel facility. A rearm-refuel point was also completed at Katum.
AVDACG-DT

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

13 May 1971

(3) HHC, 8th Engineer Battalion remained at Phuoc Vinh until completion of standdown on 2 April 71. Maintenance was conducted on the tactical airfields at Tanh Linh, Quan Loi, Song Be, and Vo Dgt. Air-mobile construction equipment was provided to open, maintain, and close 27 FSBs in the Division AO. Over 600 helicopter sorties were utilized to move equipment in response to combat support and standdown missions. At Camp Garval, HHC personnel repaired facilities, assisted Post Engineer personnel in preparing house trailers for movement, and conducted daily mine sweeps. In addition, personnel were assigned to the Division Roll-Up Force to close Camp Garval as a US Installation. HHC water points provided Division units with over 1,000,000 gallons of potable water during the period. At the close of the period the headquarters had completed the transfer of all equipment within the Battalion, either transferring it to C Company, returning it to CONUS, or turning it in for Keystone disposal.

(4) Company A remained in direct support of the 1st Bde with its CP at Bien Hoa. Until stand down on 25 March 71, Company A provided demolition and mine sweep teams; opened, maintained, and closed 13 FSBs. Company A also provided engineer support for upgrading of facilities at Bien Hoa. Building rehabilitation, work on drainage, construction of helicopter pads and preparing heliports and roads were continuing projects in the Bien Hoa area.

(5) Company B remained in direct support of the 2d Bde with base camp at FSB Buttons at Song Be. On 11 March 71 Company B moved from Song Be to Phuoc Vinh and completed standdown at Phuoc Vinh on 18 March 71. During the reporting period Company B opened and closed 6 FSBs and provided support for FSB Buttons. Upgrading of facilities and preparing areas within the FSB were completed prior to the turnover of the FSB to ARVN authorities.

(6) Company C continued support of the 3rd Bde at FSB Nacco and completed the move from FSB Nacco to Bien Hoa on 2 April. Company C, reinforced with an equipment platoon, an operations section, water point section, and one additional line platoon, continued in support of the 1st Cav Div (AN) residual Bde. Company C continued support at Nacco to include relocating a new barn and construction of new ASP and rearm-refuel facilities. Runway repairs at the airfield at Tanh Linh were completed. The rearm-refuel facility was begun at Rock/Le Nga. On completion of the facility, preoperating was begun. Prior to Company C's move from Nacco, personnel essential for operations at Bien Hoa were moved to Bien Hoa where they began support of standdown operations of the Division and preparation for support of the 3rd Bde (Sep). Assuming projects of Company A, the unit began upgrading facilities at Bien Hoa.
These projects included athletic facilities, road maintenance and drainage, and renovation and modification of the 3rd Bde (Sep) HQs area.

1. 13th Signal Battalion

(1) During November 1970, the 13th Signal Battalion provided support to separate battalions in the Division by deploying VHF Jump teams to provide the firebases with radio relay access to MARS facilities. Utilizing the AN/GRC-163 radio, the teams established a four channel system from various firebases back to brigade base camps. The shots were terminated at the brigade base camps and patched through to the local MARS station. Three VHF teams were deployed at the beginning of November, FSB Audio, FSB Forsling, and FSB Silver. By 25 November, these teams were redeployed to Camp Camvad and three new teams were deployed to FSB Snuffy, FSB Andro, and FSB Peggy.

(2) There were two new circuits activated during November. A teletype circuit was activated on Channel 5 of the SCW system (Phuoc Vinh to Bien Hoc). The circuit is a hotline from the 371st RNU at Phuoc Vinh to the 371st RNU in Bien Hoc. The circuit is carried on AN/GRC-163 equipment and is the only teletype channel in use on any of the Battalion's GRC-163 equipment. The second activation was on channel 5 of the 107 system (Phuoc Vinh to Haco). It is a hotline from Air Force Weather at Buoc Vinh to Air Force Weather at FSB Haco.

(3) At the beginning of December 1970, the 13th Signal had VHF Jump Teams deployed at Fire Support Bases Snuffy, Peggy, and Andro for the purpose of providing radio relay access to MARS facilities. In mid-December, these teams were extracted and redeployed to Fire Support Bases Dragonhead, Apache, and Jupiter. These teams remained in place for the rest of the month with the exception of the teams at FSB Dragonhead. This team attempted to establish a 4 channel system from Dragonhead to Phuoc Vinh, a distance of fifty-four miles. The planning range for the AN/GRC-163 is fifty miles, but due to the terrain and distance, the shot was not of patch quality. The Dragonhead team was extracted when the shot failed and plans were made to re-establish the system at a later date with a relay at FSB Green.

(4) The AN/MRC-69 twelve channel system from Phuoc Vinh to the 2nd Brigade located at FSB Buttons was down several times during the month due to frequency blocks. To alleviate this problem, clearance was obtained from II FFV to operate the system on C Band frequencies rather than B Band frequencies. This made the frequencies in use much higher and further out of range of interfering FM frequencies. This system has functioned perfectly since this change.
CONFIDENTIAL

AVDGR-17

SUBJECT: Operational Report for Sector General Period Ending 30 April 1971

(5) Utilizing the AN/GRC-162, a four channel system was established from Camp Goward to the 2nd Brigade at FSB Mar. This system included a relay on Nui Chau Gian and serves as a back-up system for the AN/VRC-69 twelve channel system. The back-up system was operational on 30 December 1970.

(7) On 03 December, the 13th Signal deployed a three man team and an AN/VRC-2 complete with back-up to 46 hour located in Bien Hoa. The purpose of this deployment was to establish a station in the D-3 Radio Teletype Net. By entering the D-3 RTT Net, personnel data essential to 46 operations was readily available.

(7) January began with V.F. Jump Teams deployed to Fire Support Bases Jupiter and Apollo. These teams were extracted on 16 January. On 9 January, a team was deployed to FSB Bolan. The teams established four channel systems to provide radio relay access to NARS facilities. The Bolan team was extracted on 25 January.

(8) A major training exercise was conducted on 19 January when the Battalion established a practice Forward Signal Center at Bien Hoa. The order to establish the Signal Center was issued at 0600 hours on 19 January. The men and equipment moved to Bien Hoa in convoy and established the following: a four channel VHF system, secure and non-secure FM radio nets to include an airborne relay for FM transmission from Bien Hoa to Phuoc Vinh; an AM radio teletype station in the D-3 net; a switchboard for telephone communications within the CF and circuits into 1st Brigade's Scorpion Switch; and trunks to Phuoc Vinh via the VHF system; and CONCAP circuits to the Division CONCAP in Phuoc Vinh. All systems were operational by 1330 hours on 19 January.

(9) On 1 February, a VHF team was sent to FSB Green to establish a four channel VHF system from Green to Phuoc Vinh to provide radio relay access to NARS facilities. The team was extracted on 17 February. On 10 February, a three man VHF team was deployed to FSB Betty. The team remained at Betty until 28 February.

(10) On 21 February the Battalion installed a relay on Nui Ba Den in support of 1/9 Cavalry's operations in the vicinity of Tay Ninh. The relay was established to accommodate the D-1 Command Net, the D-2 Operations and Intelligence Net, and the 1/9 Command Net. The relay was operational at 1330 hours on 22 February. On 24 February, 2 man were sent to Tay Ninh East in support of the G3 INFO and on 3 March one man was sent to Katum to provide radio support to the 1/9. When the relay on Nui Ba Den was initially installed, there was a problem with the secure nets going off squelch during transmission. The problem was found to be one of the frequencies in use. The frequency was changed and the net was operational loud and clear.
2. (C) Lessons Learned: Commander's Observations, Evaluations and Recommendations.

a. Personnel. None

b. Intelligence. Use of CMEC Teams.

(1) OBSERVATION: Personnel in the field frequently lack the expertise required to make a judgment about how long cache sites have been in place.

(2) EVALUATION: The MACV Combined Material Exploitation Center (CMEC) has personnel on call who are experts in the field of captured material. Use of CMEC Teams by this Division has proven highly beneficial and successful, and has provided more timely intelligence readouts on captured enemy material and caches in those instances where the teams were deployed directly into the cache sites.

(3) RECOMMENDATION: Emphasis be placed on calling for a CMEC Team whenever its services would be of benefit, particularly upon discovering large enemy caches.

c. Operations.

(1) Control of Woodcutters.

(a) OBSERVATION: One brigade encountered significant difficulties coordinating with the respective GVN district headquarters to find a workable solution to control activities of legal woodcutters and isolate them from the illegal Shadow Supply System.

(b) EVALUATION: GVN province and district officials establish and announce the authorized areas for woodcutting normally with insufficient coordination with the US tactical headquarters within whose AO the area lies. The control of these woodcutters (the enforcement of existing GVN regulations) is the responsibility of the district officials. In all cases encountered by the brigade it was beyond the capability of the territorial forces to control the woodcutters. As a result, the Shadow Supply System flourished among those woodcutters who can be exploited while earning a living. All attempts at an effective resources control program by the brigade met with only limited success, mainly due to the magnitude of the problem. There were simply too many loggers working in small groups over too large an area to be effectively controlled in the jungle.

(c) RECOMMENDATION: A joint plan should be established by the GVN officials and US Force Commander to control the woodcutters as they enter and leave the authorized areas since it is obviously impossible to control them once they have dispersed. This would require a very limited number
of entry and exit points (and some engineer support to close the additional ones normally now in existence), an inspection team to insure all vehicles are sanitized when entering and exiting the forest area, and sufficient aerial surveillance to apprehend violators. It may even be feasible to escort the cutters utilizing escorts to avoid intimidation while in the forest.

(c) **Searchlight Employment.**

(a) **OBSERVATION:** In an area where there are no RVN installations, an effective Chieu Hoi program involves rallying to US units. Leading prospective ralliers to US units is a problem which requires attention.

(b) **EVALUATION:** Searchlights can be employed on US fire support bases to guide individuals into the bases. The employment of searchlights in conjunction with PSYOPS aircraft and leaflet drops, telling prospective Hoi Chans to rally at the source of light, has proven to be an effective means of leading ralliers to US units.

(c) **RECOMMENDATION:** Use searchlights in psychological operations wherever possible.

(3) **Employment of a Composite 105/155mm Battery.**

(a) **OBSERVATION:** A concept recently employed by the 1st Cavalry Division Artillery may have application beyond the current Vietnam situation and should be evaluated by the Field Artillery School for inclusion in the program of instruction relating to counterinsurgency and stability operations.

(b) **EVALUATION:** The First Cavalry Division (Airmobile) has been operating in an extremely large area of operations. The Division has made extensive use of its mobility to conduct wide ranging small unit operations. The composite 105/155mm battery concept has been employed in certain instances for limited periods of time.

When the tactical situation necessitates that the maneuver element work beyond the range capability of the direct support 105mm battery located at the fire base providing support to the maneuver element, the 105mm battery displaces a platoon of three howitzers with an FDC element to a light fire base. The platoon that is split away from the original battery position is augmented with additional communications and fire direction equipment from DS battalion resources as required. As a result of the large area covered by the split 105mm battery, the 155mm battery, normally in a GS-R role to the DS battalion, is no longer able to reinforce
the fires of the DS units from a single battery position. This is true not only because of the need to cover a larger operational area but also due to the increased requirement for mutual support of the three gun fire support bases.

2. To meet the increased fire support requirements a composite battery is formed by attaching three 155mm howitzers to the 105mm battery thus placing three howitzers of each caliber on a selected fire support base under command of the DS 105mm battery commander. The composite battery operates a combined FDS, composed of appropriate personnel from both caliber units for efficient 24-hour operation. The firing charts of the 105mm unit are modified to include deflection indices for the 155mm howitzers M114A1. The FADAC is used to provide primary firing data and is programmed to include both 105mm and 155mm calibers.

3. The advantages and disadvantages listed below pertain in forming the composite battery.

a. Advantages:

First, the two calibers can be easily and promptly massed or separate missions can be fired simultaneously. When massed the speed of adjustment and volume of fire of the 105mm howitzer is combined with the greater shock effect and bunker destruction capabilities of the 155mm howitzer.

Second, range capabilities from the respective fire support bases are enhanced, thus permitting the maneuver unit commander a greater radius of action.

Third, the mix of calibers provides flexibility to allow attack of targets by the most efficient weapon depending on the terrain, nature of target, and effect desired.

Finally, one fire direction officer can centrally control the fire of either weapons system.

b. Disadvantages:

First, a greater number of helicopter sorties is required to establish the fire support base due to the weight and bulk of the howitzers and separate loading ammunition of the 155mm platoon. An increased number of sorties is also required for resupply purpose.

Second, the possibilities of gunnery errors are increased due to the production of both 105mm and 155mm range and deflection from the same firing chart. Additional training for placing the 105mm deflection indices onto the firing charts and to gain proficiency in processing simultaneously the firing data for both calibers is desired.
(c) RECOMMENDATION: That the Field Artillery School evaluate the employment of the composite battery for inclusion in the program of instruction relating to stability operations.

(4) Air Delivery of Napalm.

(a) Observation: A new concept was sought to improve the area coverage of CH47 delivered Napalm drops.

(b) Evaluation: The method used to drop napalm from a CH47 was to sling load one or two cargo nets containing five to eight 55 gallon drums of napalm each and drop the drums from the cargo nets on the target area with an air speed of 60-65 knots. The slings were the same height from the aircraft and when dropped from the cargo hook of the CH47 tended to fall in the same area giving a coverage of about 35-40 meters in diameter. A method of improving the area coverage was desired. The solution chosen to accomplish better coverage was to sling two cargo nets one approximately five feet above the other. The first cargo net was rigged with six foot slings with one ten foot sling which is attached to the inside of the aircraft. The second cargo net is rigged with 12 foot slings with one 16 foot sling which is attached to the inside of the aircraft. Each set of slings was attached to the cargo hook of the CH47 with the longer slings being attached to the inside of the aircraft so the nets could be pulled inside the aircraft after the drums were dropped. The bottom of the net rigged with six foot slings will hang approximately seven and one half feet beneath the aircraft. The second net rigged with 12 foot slings will hang approximately 14 feet beneath the aircraft. This method of slinging and dropping napalm in 55 gallon drums resulted in an increase of approximately 80-85% in area coverage. The resulting target coverage using 10 drums of napalm, five in each net, was 40 by 75 meters.

(c) RECOMMENDATION: The method described above should be adopted when dropping 55 gallon drums of napalm from a CH47.

(5) Resources Control Check points:

(a) OBSERVATION: Resources control checkpoints are only as effective as the communications link between check points.

(b) EVALUATION: In any resources control program the effectiveness of the individual checkpoints will be directly dependent upon the amount of
coordination and communication that takes place between two adjacent checkpoints. The vehicles should be searched and their contents radioed ahead so that any difference in the cargo will be readily noted. It is all too easy to stop along side a road and throw off supplies then destroy the bill of lading for those supplies. If there is no communication link between checkpoints, there will be no discrepancies noted for an operation such as that.

(c) RECOMMENDATION: That there be more coordination between US and ARVN checkpoints and especially between checkpoints of adjacent districts or provinces.

(6) Use of ARVN Troops trained and formed into aerorifle platoons for Air Cavalry missions.

(a) OBSERVATION: ARVN Platoons, called "Browns," were employed to replace Air Cav aerorifle platoons (Mieu) as quick reaction forces (QRF) in cross border operations. The Browns were employed without a US advisor, and resulting language problems caused confusion during maneuver and inhibited effective fire support.

(b) EVALUATION: ARVN Platoons from the Intelligence Reconnaissance Company of maneuver battalions were trained to operate as aerorifle platoons. To compensate for the absence of an American advisor with the "Browns," the Air Cav commander and an ARVN command representative controlled the operations from a command and control of the "Browns."

(c) RECOMMENDATION: An ARVN command representative should be OPCON to the Cav commander to assist in command and control of the Browns.

d. Training

(e) Logistic

(1) Processing of Enemy Documents and Material.

(a) OBSERVATION: Discrepancies in amounts of captured enemy documents and material have been noted at forward collection and analysis points.

(b) EVALUATION: Captured enemy documents and material reported, and the amount actually received by the Saigon Support Command collection agency differ greatly. Field leaders are poorly equipped and not trained to evaluate and estimate weights and measures of captured items.

(c) RECOMMENDATIONS:

1. Detailed procedures and responsibilities for document and material
evacuation must be set down in standing operating procedures and dis- 
seminated through respective S2/S4 staff sections at all levels.

2 Transportation of captured documents and material from the field 
must be given immediate priority.

2 All items, once received by the battalion S2 and S4, must be 
revalued for nomenclature, size, age, and weight. Corrections to 
reports must follow through channels to the most senior staff level. 
This enables immediate dissemination of corrections to other commands 
and agencies.

4 Equip field commanders with devices such as weight scales to fa- 
cilitate more accurate reporting. The scale for measurement should be 
to the quarter ounce.

2) Hangar Bearing Failure.

(a) OBSERVATION: An unusually large number of hangar bearing 
failures was being experienced with Division helicopters.

(b) EVALUATION: Investigation revealed that units involved had 
recently been issued steam cleaning units. Improper use of steam clean- 
ers was responsible for the premature failure of the hangar bearings. 
The high temperature and pressure forced cleaning material and foreign 
matter past the seals into the bearing causing contamination and lubri- 
cation breakdown.

(c) RECOMMENDATION: All aircraft maintenance personnel be trained 
in the techniques and materials to be used in cleaning aircraft. 
Techniques and materials are outlined in Chapter 3, TM. 55-1500-204-25/1.

3) Emergency Medical Teams.

(a) OBSERVATION: Two emergency medical teams were deployed to 
cover Divisional operations. The composition of these consisted of one 
doctor, three medical aidsmen, and one radio-telephone operator.

(b) EVALUATION: In the event of mass casualties the size of this 
team would not be adequate.

(c) RECOMMENDATION: The composition of an emergency medical team 
should consist of two doctors, six medical aidsmen and one radio-tele- 
phone operator.
CONFIDENTIAL

APPROVED: T
SUBJECT: OPR. BBD Report for 3 May 1971 Period Ending 30 April 1971

(4) **Forward Refuel Point.**

(a) **Observation:** A substantial amount of time is required to assemble valves, hoses, nozzles, tools, etc., necessary to establish a refuel point and palletize them for shipment aboard fixed-wing aircraft.

(b) **Evaluation:** The metal boxes used to transport 10,000 gallon collapsible fuel tanks make an ideal shipping container for these small items required for a refuel point. Two of these boxes can be banded on the same pallet to facilitate loading aboard aircraft.

(c) **Recommendation:** That organizations engaged in transporting equipment for forward refuel points utilize this technique.

(5) **Consolidation of Unit Supply at Battalion Level.**

(a) **Observation:** It was evident that there existed a more efficient method of conducting resupply operations which would release personnel with MOS 11B to serve in the field.

(b) **Evaluation:** Previously, resupply operations were conducted at company level, necessitating a supply sergeant, armor, and supply clerk in the rear and a supply representative for each company at the Forward FSB in addition to the regularly assigned personnel. The consolidation of supply at battalion level eliminated unnecessary duplication of effort, decreasing the chances of administrative error, handling of equipment and laundry loss. The company supply sergeant now communicates directly with the units from the Forward FSB and coordinates directly with the Service Platoon leader, establishing a closer report with the soldier in the field and his company supply sergeant.

(c) **Recommendation:** This program be considered for adoption by other units.

(f) **Communications. Use of Log Periodic Antenna, AS-2169/G.**

(1) **Observation:** Long-range HF radio communication over hilly or heavily forested terrain very often has been required for tactical operations. In these cases the distances over which communications must be established may considerably exceed the normal specified range of the radio equipment.

(2) **Evaluation:** One technique used to overcome the distance problem is the utilization of the log periodic antenna AS-2169/G. This antenna is normally used with the AN/GFC-163 multi-channel radio and would be available for employment on a limited basis down to battalion level. The log periodic antenna is directional and concentrates the

CONFIDENTIAL
RF output in one direction thus allowing a coverage of greater distances. One problem of using this system is that the omni-directional capability would be eliminated.

(3) **RECOMMENDATION**: The log periodic antenna AS-2169/0 should be controlled at brigade or division level and a contingency package should be set aside for employment between headquarters when long-range FM radio is required.

**G. Material**

(1) **Damage to Slings**.

(a) **OBSERVATION**: Damage to three foot slings used in conjunction with the Type IV connector link has been observed while externally transporting CONEX containers and downed aircraft by CH-47.

(b) **EVALUATION**: The most probable cause of sling damage is the instability of this type of load. The oscillation and rotation of the load twists the sling around the Type IV connector link causing the sling to be cut and/or burned.

(c) **RECOMMENDATION**: A cover be fabricated utilizing unserviceable POL hose four inches in diameter and 1/2 inch tubular nylon webbing. The sling is inserted through a ten-inch section of POL hose prior to closing the Type IV connector link. After the link is closed, the POL hose is secured over the link utilizing the tubular nylon webbing.

(2) **Health Indicator Test System (HITS)**.

(a) **OBSERVATION**: A test was made on the new Health Indicator Test System (HITS) engine testing procedures for helicopters.

(b) **EVALUATION**: HITS proved to be more safe, simple, and accurate than other tests.

(c) **RECOMMENDATION**: HITS be adopted universally to predict imminent engine failure on helicopters.

h. **Other. CS Munition E158R2/P3 Canister**.

(1) **OBSERVATION**: A CS mission on 13 February 1971 using E158R2/P3 CS Canisters, one functioned inside the aircraft, filling the aircraft cabin with CS, smoke, and a flash fire. As a result three people were burned and one was lost from the aircraft.
(2) EVALUATION: An accident investigation was conducted and determined the possible cause of the EL58R2/R3 munition functioning inside the aircraft to be that the safety ring and pin assembly had been removed from all munitions before arriving at the target area and the arming wires of two munitions became entangled. As the first EL58 was jettisoned from the aircraft, it removed the arming wire from a second EL58 which was not observed by the bombardier/handler and the second munition functioned inside the aircraft. The EL58R2/R3 CS Canister will not function if either the safety ring and pin assembly or the arming wire has not been removed. The operating procedures are to remove the safety ring pin assembly on the munition immediately prior to its being jettisoned from the aircraft. This procedure has been redefined in writing to all units and a detailed check list provided on handling, storage and employment of this munition.

(3) RECOMMENDATION: That the safety ring and pin assembly be removed from the EL58 CS Canister as it is jettisoned from the aircraft and the arming wire be removed by the weight of the munition as the EL58 falls away from the aircraft.

a. War Trophy Registration

(1) OBSERVATION: As the Division began standing down, war trophy registration increased considerably. This caused severe administrative problems and overwhelmed available registration facilities.

(2) EVALUATION: Many units failed to immediately initiate applications as the trophies were acquired. Other units due to the tactical situation elected to delay the processing of war trophies until their units actually moved to the designated standdown site. In addition, many weapons were not obtained until standdown had commenced.

(3) RECOMMENDATIONS:

(a) Major units nearing standdown should enlarge their registration facilities to handle unexpected influxes of war trophy registration applications.

(b) Major subordinate units should stress registration as trophies are acquired by their men.

b. Decentralization of Control of Personnel.

(1) OBSERVATION: Loss of control occurred where individuals, who had already been cleared, processed through Division outprocessing points, were released or ordered to return to their former parent unit because transportation for shipment to their next unit was temporarily unavailable.
AVDAGT-IT

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

13 May 1971

(2) EVALUATION: Unauthorized or ill-informed processing cadre often instructed personnel awaiting shipment, or had not fully processed to return to their former units. The parent unit, was often unaware that these personnel had returned to the unit area, and the shipping point lost control as well. This resulted in many enlisted men missing shipment to their next duty assignment while being beyond formal military control.

(3) RECOMMENDATIONS:

(a) Each company/detachment should assign one officer to head a team of process controllers, with one NCO controller assigned to supervise 6-10 processes. This NCO would be responsible for knowing the status of all his personnel until they had physically shipped out.

(b) Close liaison should be established between the unit standing down and the processing agency. The unit should be provided with a shipping roster and a roster of those men who are cleared but are not scheduled to ship. Those men in the latter category must be controlled by the processing agency until the individuals are turned over to a designated unit representative.

(c) Those men cleared and requiring billets until shipment should be placed in a separate transient barracks and restricted to the limits of the billet area until shipment time.

c. Thievery

(1) OBSERVATION: The incident rate for thievery increases prior to and during standdown.

(2) EVALUATION: The explanation for the increase in thievery is two fold: First, there is an apparent feeling by thieves that the inherent confusion of standdown increases their chances of success, while decreasing their chances of being apprehended. Second, there is a tendency by some individuals and units to compensate for equipment shortages by "midnight requisitions."

(3) RECOMMENDATIONS:

(a) Security precautions must be taken during the standdown period. The use of interior guards, dismounted military police patrols, and roving jeep patrols should be emphasized.

(b) Safes, when available, should be used for securing wallets, cameras, watches, and other valuables.
AVDAG 1DT
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

(c) Additional storage containers/conexes should be provided with sufficient locks to insure that supply items are secured.

(d) Weapons should be cleaned and turned in at the earliest possible time.

(e) Security reminders to officers and men should continuously be incorporated into daily formations and briefings.

d. **Over Classification of Standdown/Inactivation OPORD.**

(1) **OBSERVATION:** The redeployment order was over classified thereby prohibiting subordinate units from making detailed plans and adequately briefing all personnel on the various phases of standdown/inactivation/redeployment.

(2) **EVALUATION:** The classification restriction imposed on the 1st CAV DIV (AM) required the order to remain "SECRET" until nearly all the units were well into standdown. Quite often key personnel were denied information needed to prepare the unit for standdown because they lacked a secret clearance.

(3) **RECOMMENDATION:** Units standing down or redeploying should be permitted to either classify their own standdown order as "Confidential" or be permitted to downgrade the order to "Confidential" once standdown has commenced.

e. **Stockpiling Awards and Decorations.**

(1) **OBSERVATION:** A great shortage of decorations and citations developed during standdown. Many individuals departing the Division left without having been physically presented with their earned decoration.

(2) **EVALUATION:** As the Division neared standdown a stockpiling of common decorations was initiated, so as to insure that an adequate number of awards would be available for presentation to departing personnel. However, the Division never received an adequate number of decorations.

(3) **RECOMMENDATION:** That those units singled out for standdown be given priority on requisitioning decorations.

MACSTR-GJPT (13 May 71) 1st Ind

SUBJECT: Operational Report - Lessons Learned, 1st Cavalry Division (Airmobile), Period Ending 30 April 1971, RCS CSFOR-65 (R3) (U)

HQ, Third Regional Assistance Command, APO San Francisco 96266 16 JUN 71

THRU: Commanding General, US Army Vietnam, ATTN: AVHD-MO, APO 96375

Commander-In-Chief, US Army Pacific, ATTN: GPOP-DT, APO 96538

TO: Assistant Chief of Staff for Force Development, Department of the Army, Washington, D.C. 20310

1. (U) This headquarters has reviewed the Operational Report - Lessons Learned for the period ending 30 April 1971 from Headquarters, 1st Cavalry Division (Airmobile).

2. (C) Comments follow:

   a. Reference item concerning Control of Woodcutters; page 48, para 2c (1). The recommended method of controlling woodcutters is appropriate for small scale logging operations. In other cases a more effective system has been to establish checkpoints on access routes at the outskirts of logging villages. Workers and vehicles are then required to pass through these checkpoints as they depart for and return from work. In any system the weak link is the vulnerability of indigenous personnel manning the checkpoints to bribery and graft.

   b. Reference item concerning Employment of a Composite 105/155mm Battery, page 49, para 2c. The decision to use split batteries is directly related to the nature of the enemy threat. When the enemy operates in small, dispersed formations, the necessity to mass artillery is largely negated. To increase artillery coverage without unnecessary moves in such an environment, the split battery concept is valid. Against large scale regular forces the concept is not applicable.

   c. Reference item concerning Air Delivery of Napalm, page 51, para 2c (4); concur. This method is the most effective method when drums must be sling loaded. Internal loading and single drum dropping, as mentioned in II FFV ORLL, will yield a larger dispersion pattern but a less intense fire. When internal loading is not used or an intense flame is desired, the varied sling method is highly effective.

   d. Reference item concerning Resources Control Check Point, page 51, para 2c (5); concur. This recommendation was offered to the National Police and implemented during November 1970. The problem then as it is now is ineffectiveness of communications. Another problem results from personnel that lack integrity using these communications. Resource Control Check Points are only as effective as the integrity of the personnel manning them.

CONFIDENTIAL

61
e. Reference item concerning Health Indicator Test System (HITS), page 55, para 2g (1); concurs. Recognising the man-hour savings and the increased safety resulting from its use, representatives of AVCO-Lycoming and Allison turbine engine divisions are closely monitoring the use of HITS. Reports on field experience with the system are being submitted to USAVNC, Fort Rucker, Alabama, and to the manufacturers for further evaluation. Conversation with the aircraft maintenance representatives of the 3d Bde (Sep), 1st Cav Div (AM), revealed that action is being contemplated to brief all major units on the use and value of the HITS system. TRAC will monitor and take necessary action to insure the widest distribution of this information.

f. Reference items concerning G5 Munition M158 R2/R3 Canister, page 55, para 2h; concurs. The 1st Cav Div (AM) published an updated SOP emphasising the safety requirements for munition employment to include when the safety pins are removed from the munitions. The new SOP is in agreement with TM 3-1325-237-12. Because this is the first incident of its kind with the M158 munition, no further action is necessary as long as the procedures in the TM are followed.

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971
TAB: Weather and Terrain

1. Terrain - The terrain in the FIRST TEAM AO is generally flat. Binh Duong Province has rice paddies and marsh lands to the south rising to the west and a mountain range dominating the northeast. The Province is heavily vegetated, primarily with multi-canopied forest. The northern portion of Long Khanh Province is for the most part heavily forested and steep, while in the south, the Province is relatively flat with scattered rubber plantations. Binh Tuy Province is lightly vegetated and is highlighted by the 1302 meter high Nui Ong and the Rice Bowl, both located in the north central portion of the province. Three rivers - the Song Be, the Dong Nai, and the La Nga flow through the FIRST TEAM AO and present an obstacle to ground movement due to their depth and steep banks. Three mountains are prominent in the area: Nui Ba Ra, Nui Chau, and Nui Ong.

2. Weather

   a. Weather during November 1970 was somewhat more severe than usual. The best weather of the month occurred during the period 1 - 8 November, the worst problem during this time being occasional occurrences of dense fog during the early morning hours. Fog was particularly prevalent on 7 November. During these eight days, the wind flow was from the north northeast and the air was relatively dry. After 8 November, the wind shifted more to the east, the moisture content of the air increased, and the monsoonal trough moved north of its usual position. These factors caused an increase in the amount of cloudiness and the amount of shower activity throughout the remainder of the month with the exception of the period 19-23 November, when almost no shower activity developed.

   Even though the weather during the month was somewhat worse than expected, the detrimental effect of weather on operations was minimal. Morning fog did not usually cover a majority of the AO and was generally gone by 0900H. Shower activity was light for the most part, was seldom accompanied by low ceilings, and was generally a late afternoon or early nighttime feature. Thus, the majority of hours during the month were characterized by good weather.

   b. During the month of December 1970, Military Region 3 was under the influence of the northeast monsoonal flow. The month can be divided into two distinct parts, wet and dry. During the first half of the month, the equatorial trough was north of its usual position for December. Even though it was 300 miles south of RVN, it still produced the instability needed to cause daily late-afternoon and early evening showers in the 1st Cav AO. By the middle of the month, this trough had moved further south towards the equator, thus depriving our area of any significant shower activity. Cloudiness was mainly scattered cumuliform with a thin cirrus shield covering most of the AO during the day time hours.
13 May 1971

CONFIDENTIAL

SUBJECT: Operational report for S. l-annual Period Ending 30 April 1971

T & B Dr. Weather and Terrain (cont)

Occurrences of fog were related to the rainfall pattern. During the first half of the month, the northern portion of the AO experienced patchy areas of early morning fog, while the southern portion usually had widespread dense fog. During the second half of the month, the northern half of the AO rarely had fog, while the southern portion had patchy areas of fog almost every day. The time of fog breakup in the first half of the month was 1000H-1100H, while the time in the last part of the month was 0900-1000H.

On 26 December, a surge pushed down from the north, creating an area of 30-40 knot winds just off the coast of I H-3. This area of strong winds maintained itself through the end of December and as a result, much of the CVF AO experienced gusty surface winds and frequent turbulence aloft during hours of daylight.

c. The weather during January was generally very good. The most significant weather problem during the month was the occurrence of early morning fog, mainly in Binh Tuy and Long Khanh Provinces. Heat and smoke were trapped in a layer between 1000 and 5000 feet, restricting inflight visibilities to occasionally less than three miles during daylight hours. Surface winds during the first ten days of the month were relatively strong and occasionally gusty, particularly on 5 and 6 January. Strong, occasionally gusty southerly winds were observed on 26-30 January between 1900 and 2200H. These southerly winds were the result of the sea-breeze and are common during this time of year. Clouds were mainly scattered during the month. On 15-21 January, stratuscumulus ceilings were observed during the early morning, but only lasted until 0900-1000H each day. On several days, a cirrus shield developed, thus inhibiting the formation of lower clouds.

d. Mostly favorable weather conditions prevailed over the AO during February. Skies were generally fair to partly cloudy with cirrus clouds, based at 30,000 feet being the predominant sky cover. Scattered cumulus clouds, usually formed during the morning, occasionally became broken ceilings with bases 3000 to 4000 feet during the afternoon and dissipated by 2000H. Restricted visibility due to fog and haze continued to be a major weather problem. The visibility during daylight hours was usually three to seven miles with haze. Patchy conditions of visibility one half to three miles in fog and haze occurred during the early morning hours. During the period 14-17 February, there was increased cloudiness over the AO with broken overcast ceilings generally based from 9000 to 13000 feet. From the 23rd to the 27th, unseasonable southeasterly flow at all levels up to 20,000 feet carried moist unstable air over the AO. This caused thunderstorms and rainshowers during the afternoon and evening and increased fog and stratus during the early morning. Winds were generally light and variable, becoming southerly with occasional
gusts to 17 knots during the afternoon. Gusting surface winds occurred in the vicinity of thunderstorms and rainshowers.

e. During March little day-to-day change occurred in the weather. Poor visibility in fog and haze continued to be the main weather problem over the AO. Skies were generally fair to partly cloudy with ceilings of 3000 feet or greater, except for low ceilings in patchy stratus between 0500H and 1000H and in isolated thunderstorms and rainshowers during the late afternoon and evening. Winds were variable at 5-15 knots during the month with variable gusts to 25 knots vicinity thunderstorms. Northeasterly winds gusting 20-30 knots occurred between 7 and 15 March.

a. Maximum Temperatures:

- November: 93
- December: 93
- January: 92

Subject: Operational Report for Semi-annual Period Ending 30 April 1971

1. Division Training

   a. The FIRST TEAM Academy conducted individual training for all incoming replacements. A total of 14,201 United States officers and men underwent training during the reporting period in such diverse courses of instruction as Replacement Training, Sniper School, Combat Leadership Course, and Mines and Booby Trap Training. In addition, the Academy presented various types of instruction to 355 ARVN soldiers to include Kit Carson, airborne, and leadership training.

      (1) Sniper School: 14
      (2) Combat Leadership Course: 308
      (3) Kit Carson Scouts: 42

   b. The Replacement Training Detachment trained 324 USARV troops and 8473 troops assigned to the FIRST TEAM.

   c. Three classes of Popular Force (PF) troops attended the PFP/CO School established on 1 February 1971. The courses terminated 1 March with 150 Vietnamese successfully completing the training.

   d. A Mines and Booby Trap Training Course was initiated on 22 February 1971. Training was conducted for rifle/reconnaissance platoons of the 1st Bde, 3rd Bde and 2nd Sqdn 11th ACR. The training consisted of a 3 hour block of instruction, including 2 hours of practical work, designed to familiarize Skytroopers with methods of detecting and avoiding enemy mines and booby traps. A total of 2064 troops received this training.

   e. A short replacement training cycle was initiated by the FIRST TEAM for those soldiers assigned to the 1st Cav Div (AM) from redeploying units. Over 2973 replacements from the 4th, 9th, and 25th Infantry Divisions as well as men from the 199th Light Infantry Brigade received the short cycle training before final assignment within the FIRST TEAM.

2. Non-Divisional Training Programs and Schools. Utilization of USARV schools by the FIRST TEAM is as follows:

   a. UH-1 IP/SIP: 24
   b. CH-6A IP/SIP: 15
   c. AH-1G IP/SIP: 13
   d. Radar Operator: 27
   e. Radar Maintenance: 7
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

3. Combat Development: During the reporting period the only equipment under evaluation was the LORAN Retransmission System, Phase II (LORES II). This system is a composition of electronic equipment using retransmitted LORAN signals. It provides a means for a commander to locate friendly personnel positions in a standard grid system (UTM Coordinates) and to provide navigational assistance to helicopters. The airborne equipment is designed for installation in a Light Observation Helicopter (LOR). It selectively provides instantaneous UTM Coordinates of the helicopter, or steering data to enable the pilot to fly to a designated location. Equipment consists of a LOR air unit to retransmit LORAN to base station, a UHF data link to receive coordinates or steering information, and in the cockpit, a control panel and a display panel. The retransmission system was originally installed in Nui Chua Chan with the LORE sets installed on Scout Aircraft of B Troop, 1st Squadron 9th Air Cavalry. The system has proven to be quite effective.

b. Narrative: 1st Cav Special Services has the mission of providing for the welfare and enhancing the morale of "Skytroopers" throughout the Division. To accomplish this mission, the Special Services Officer relies on activities in four major areas: live entertainment, 16mm free motion pictures, post, camp and station facilities, and special issue items of supply. Each of these activities has been highly successful. For example, during the reporting period Special Services has scheduled for the Division the following: nearly 200 live performances by USO Shows, Command Touring Shows, and Special Services Touring Shows; has daily distributed 15 different motion pictures; has had an average weekly attendance of 5,000 at its two service clubs; and has issued a complete authorization of athletic and recreation equipment to every unit in the division.

2. **Media Liaison Activities:** Ninety-five accredited press representatives of news media visited the Division during the period 1 Nov 1970 to 10 Apr 1971. They represented the following media:

- Baltimore Sun
- Washington Post
- STAR
- Newsweek Magazine
- CBS
- New York Times
- New York Daily News
- USARPAIC
- NBC
- 16th Photo Detachment
- ABC
- Fama News
- Jacksonville Times
- Atlantic Monthly
- Cox Newspapers
- Stars & Stripes
- AP

4. Command Information Guidance. The Command Information section provided information for three mandatory subjects and one mandatory Officers' Call on subjects prescribed by MACV. It also provided information for three subjects suggested by USAFRV, nine subjects suggested by the 1st Cavalry, and one subject suggested by MACV for Officers' Call. Fact sheets were prepared on the following subjects: Safety Consciousness, The Red Cross, Human Relations, The Montagnards of South Vietnam, Venereal Disease, Hold Baggage, VA Benefits, Tax Benefits, and Why Drugs.

5. Division Publications. The CAVALAIR, the Division newspaper, was prepared at Camp Gorvad and sent to Stars & Stripes in Japan for printing once each week except for the week of 18 Mar 71. That week, a special souvenir issue, double in size and content and utilizing full color, was prepared. The FIRST TEAM Magazine, the Division quarterly, was prepared at Camp Gorvad and taken to Taipei, Taiwan for printing. A stand-down program and a press kit were also prepared during this period. A special supplement to the history of the 1st Cavalry Division (AM) in Vietnam was also sent to Taipei. This was in the same format as the FIRST TEAM Magazine but twice the size.

6. Audio/Visual Releases. Due to the lack of equipment, this section was closed in February.

7. Photographic Laboratory Activities. The photo section received 571 work orders, of which 534 have been processed. Work orders are broken down as follows:

a. Information Office and Protocol 376
b. General Staff 44
c. Aircraft Accidents 4
d. Passports, Naturalization, and DTOC passes 132
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

T&D K: Information Activities (cont)

8. Miscellaneous Activities.

a. The Information Office prepared a newsletter twice daily compiled from AFVN News broadcasts for distribution to various mess halls at the Division headquarters.

b. The Command Information Specialist accompanied the Division Inspector General inspection teams on annual and courtesy inspections to critique information programs and 1st Cavalry Division Association programs.
AVDAGL-DT

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

TABLE LI: Provost Marshal Activities

1. During the period 1 November 1970 through 31 March 1971, the Office
   of the Provost Marshal processed a total of 1,527 offenses.

   Crimes of violence and crimes against property .... 344
   Miscellaneous offenses .................................. 532
   Traffic law enforcement ................................. 651
   Total ...................................................... 1,527

2. Breakdown of offense statistics:

   a. Crimes of Violence and Crimes Against Property, 344: Murder, 1; 
      Forcible Rape, 1; Aggravated Assault, 21; Burglary and House-
      breaking, 12; Larceny (over $50.00), 269; Auto theft, 36; and Robbery 
      4.

   b. Miscellaneous Offenses, 532: Simple assault, 25; Larceny 
      (under $50.00), 62; Wrongful Appropriation, 9; Fraud, 7; Narcotics, 
      4; Dangerous Drugs, 15; Marijuana, 169; Blackmarketing, 3; Counter-
     feiting and Currency Manipulations, 37; AWOL (Reported), 59; and AWOL 
      (Apprehended), 4.

   c. Traffic Law Enforcement, 651: Speeding, 283; Reckless Driving, 
      5; Fleeing the scene of a Traffic Accident, 0; Parking Violations 
      (Unattended/Unsecured), 77; and Miscellaneous Violations, 386.

3. As of the last reporting period ending 31 Oct 70, there has been a 
   noticeable increase in cases involving narcotics, dangerous drugs, and 
   marijuana. This increase is believed attributed primarily to the 
   intensive drug awareness program which educated commanders in the 
   identification of dangerous drugs and the seriousness of the drug abuse 
   problems within the 1st Cavalry Division.
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

TAB M: Surgeon Activities

1. Malaria. The Division Surgeon continued a program of reporting those diseased with malaria. Two daily reports and one weekly were distributed to all commanders reflecting the number of cases, the patient's name and unit, and the classification of each type of malaria. Those singled out are identified in the Command Health Report as well. The following are the malaria statistics for the reporting period:

<table>

2. Drug Abuse.

a. There were constant influxes of heroin addicts with a slight increase during the months of February and March. A drug abuse lecture team was appointed. It visited the fire support bases describing amnesty, prevention, rehabilitation, and abuse. The FIRST TEAM Academy continued "Drug Abuse" as a mandatory subject, which is given to all incoming junior grade officers and enlisted men. Enlisted men and rehabilitated addicts were also utilized to discuss drug problems with enlisted men from the various units.
CONFIDENTIAL

AVDAC-DB

13 May 1971

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

TAB N: Surgeon Activities (cont)

b. Approximately 250 alleged addicts sought assistance, of which 13% were classified as successfully rehabilitated and 19% rehabilitation failures. 20 patients returned for rehabilitation as repeaters but were not treated under amnesty.

c. Experience indicates that a less lenient approach to the program is required. A new program incorporating the following will therefore be instituted:

(1) Hospitalization for abusers will be for a fixed period of time (seven days).

(2) Patients will enter rehabilitation, not amnesty, if repeaters.

(3) Patients are required to return for a fixed number of follow-up sessions.

3. New Assignments. The Division had nine Medical Corps officers, three Medical Service Corps officers, and seventy-seven medical service enlisted men newly assigned.

4. Administration.

a. There were 25 patients referred to the Division Surgeon for final disposition. An additional twelve patients were referred by the office of the Inspector General.

b. 29 Presidential, Congressional, or Special Medical inquiries were processed on Division personnel. These inquiries included Congressional medical correspondence addressed to both the Office of the Adjutant General and the Office of the Division Surgeon from USARV Surgeon, USARPAC Surgeon, and the Surgeon General.

5. Preventive Medicine.

a. Selected teams conducted sample checks of urine specimens from all units in the Division.

b. Photodosimetry checks were maintained monthly from all X-ray facilities to insure safety.

c. Intensive monthly inspections were made of 11 mess halls, unit areas, clubs, barber shops, and sanitary fills to insure proper health and sanitary standards.

d. Chemical and biological purity checks were made of all water drawn within the FIRST TEAM AO.
AVDAGT-DT

13 May 1971

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971

TAB N: Logistics Operations

Significant Activities

1. During the period 1 November 1970 to 9 April 1971, the Division Support Command (DISCOM) continued to support the 1st Cavalry Division (AM) in all operations. Combat service support provided by DISCOM to the FIRST TEAM included all classes of supply, maintenance (to include aircraft), medical services, evacuation of captured enemy material, technical assistance visits, and retrograde of excess equipment. In addition, training was provided to elements of the FIRST TEAM in rigging and slingout procedures, high velocity drop procedures, aeromedical evacuation, and jungle penetrator, and Class I resupply. Combat service support coordinated by the DISCOM of the FIRST TEAM included bath, laundry, explosive ordnance disposal, and transportation. Weather had no impact on the support provided by DISCOM. A finale to the support provided by DISCOM was the organizing, manning, and equipping of the Composite Service Support Battalion (CSSB), which provides the same service support above to the 3d Brigade (Separate), 1st Cavalry Division (AM). DISCOM's mission was assumed by the CSSB on 10 April 1971.

   a. The 1st Forward Service Support Element (FSSE) provided logistical support to the elements of the 1st Brigade through 24 March 1971. Classes of supply I, II, III, IV, V, and IX, as well as direct support maintenance, medical service, and transportation were provided by DISCOM elements from the 1st Brigade base camp at Bien Hoa. Support was terminated on 24 March 1971 when the 1st Bde entered standdown.

      (1) Sling-out operations were conducted from Grizzly Pad at Phuoc Vinh and Sandy Pad at Bien Hoa. These operations were controlled by personnel from the 1st FSSE into 24 March when responsibility passed to the FSSE assigned to the Composite Service Support Battalion.

      (2) During the period 4 - 8 February, "D" Detachment, 27th Maint Bn, was absorbed into the Headquarters and A Company. After 8 February direct support maintenance (ground) was provided by Headquarters and A Company.

   b. The 2d FSSE continued to provide supply, maintenance, and medical support to elements of the 2d Brigade and attached units based at, and operating out of, FSB Buttons. DISCOM elements also coordinated all transportation requests generated by elements of the 2d Brigade. Combat service support was terminated on 11 March when all elements of the 2d Brigade were moved from FSB Buttons to Bien Hoa.

      (1) The forward supply points maintained at FSB Snuffy (Bu Gia Map) and LZ Caldwell (Duc Phong) were closed during February. Each location had a 300,000 gallon capacity JP-4 refuel point and an aircraft rearm facility.

N-94

CONFIDENTIAL
SUBJECT: Operational Report for Semi-Annual Period Ending 30 April 1971

TABLE: Logistics Operations (cont)

(2) During the movement of the 3d Bde and attached units from FSB Buttons to Bien Hoa over 25 S&F loads were backhauled and over 2,000 passengers moved by fixed wing. This move occurred during the period 1-11 March 1971.

c. The 3d FSSE continued to support the 3d Brigade and attached units from FSB Mace. Classes I, II, III, IV, and V supplies as well as maintenance and medical support were provided. In addition, the 3d FSSE coordinated the requirements for wheeled vehicles, fixed wing, and rotary wing aircraft needed for various troop and fire base moves.

(1) In addition to the FSSE operations at Ft. Mace the 3d FSSE monitored the support functions at two forward locations, Tanh Linh and Phuong Lam. Support at these locations consisted of rearm and refuel points.

(2) The refuel and rearm points were closed at Phuong Lam and refuel and rearm points opened at La Nga.

d. The Division Band performed at 23 change-of-command and 13 award ceremonies for both the FIRST TEAM and non-divisional units. The band played over 50 hours of music for the Skytroopers at every fire base in the Division's area of operations. The band enhanced Vietnamese-American relation by playing for the ARVN Training School during the Tet holidays. Over 4,000 ARVN soldiers and their families were entertained. During the period 1 March through 11 April the band played for 20 redeployment/inactivation award ceremonies for the 1st Cavalry Division (Airmobile) and the 2d Brigade, 25th Infantry Division. The highlight of all activities was on 26 March when the band played in the FIRST TEAM Farewell Ceremony.

e. The Division Transportation Office recorded a total of 75,210 passengers moved by fixed wing aircraft. A total of 38,832 passengers were moved by common user aircraft (C-130 and C-123) and 36,378 passengers were moved by the seven dedicated C-7A (Caribou) aircraft.

(1) CH-47 sorties for the period totaled 15,991 and were employed in the movement of passengers and cargo. CH-47s (based on a figure of 5000 lbs per sortie) accounted for movement of 39,928 short tons. Cargo tonnage moved by C-1-3 and C-130 aircraft was 6,005 short tons while 4,471 tons were moved by committed C-7A aircraft. Total tonnage moved by fixed wing aircraft was 10,476 short tons.

(2) The use of ground lines of communication (LOC) was a particularly significant aspect of moving supplies, retrograding cargo, and moving units. A total of 83,061 short tons of supplies, retrograde cargo, and unit equipment was moved by wheeled vehicle and convoy. This accounted for the majority of transportation provided by the Division Transportation Office during the period.
AVNACT-DT
13 May 1971
SUBJECT: Operational Report for Fiscal Year Ending 30 April 1971
TAB II: Logistics Operations (Cont)

f. OPERATION SCRUB, a USAFR program, was instituted on 26 September 1970 in the 21ST TAN and completed on 1 February 1971. This project was designed to facilitate the systematic elimination of excess supplies and equipment and TOE/TOQ equipment not required by the Division's units and DSUs. One of the prime characteristics of OPERATION SCRUB was the relaxation of paperwork to accomplish turn-in. The internal procedures adopted eased the administrative requirements even further on incoming units by placing much of the burden on DISCOM receiving activities. Hence, owning units were given the incentive to turn-in excess and unneeded equipment which had only served to burden maintenance and transportation capabilities. Collection points were established at Bien Hoa, Camp Govan, FoB Buton, and FoB Loh at separate battalion/company rear areas. These collection points were so located to facilitate the use of backhaul aircraft and vehicles to the main collection point at Bien Hoa. Initially the 27th Maintenance Battalion received all items and operated the collection point at Bien Hoa. On 25 November 1970, the mission was transferred to the 15th Supply & Service Battalion. Free turn-in started on 6 October 1970, and the steady growth in accumulations was quite encouraging. On 23 December 1970, receiving facilities were closed at all collection points and OPERATION SCRUB terminated. When OPERATION SCRUB was completed there were 595 vehicles, 396 trailers, 514 generators, and some 24,600 miscellaneous items of Class II, Class VII, and Class IX supply processed and retrograded to CCAS, Depot, or PDO. It resulted in some 11.8 million dollars (acquisition cost) of equipment put back into the supply system. In addition, 583 items worth $296,000 were redistributed within the Division. OPERATION SCRUB was a success. It enhanced the readiness posture of the Division and simplified and expedited standdown activities.

g. Changes in demand criteria for stockage of supply items at all Division Supply DSUs, the deletion of retention levels in categories stockage, and the employment of an artificial Order and Ship Time (15 days) in the computation of Requisitioning Objectives were among the more significant constraints placed upon supply operations in-country during the reporting period. All were aimed at reducing stock levels maintained in-country while maximizing the employment of assets already here. Inferior in these actions were the attendant requirements for supply retailers to validate inventories, purify stocks and locations, and cross-level or retrograde excesses. In early October, DISCOM DSUs embarked upon an intensive program of upgrading supply operations and stock control activities. Over 3000 lines were deleted from the ASL and over 10,394 lines of serviceable excess, worth some 1.8 million dollars, was retrograded by the 27th Maintenance Battalion. Over 5000 lines were deleted (Aircraft Maintenance & Supply), and 22,590 lines worth 4.7 million dollars were retrograded. The 15th Supply & Service Battalion reduced its ASL to 1031 lines, a 40% reduction, and retrograded over 900 lines of serviceable excess worth 1.1 million dollars. Net upward inventory adjustments and reduced warehouse refreshals have been peripheral benefits realized as a result of the effort. Benefits obtained from the institution of this new criteria were to some extent offset by higher zero balances and shortages in high demand.

replenishment type items.

h. The Division Ammunition Office placed emphasis on the retrograde of recoverable brass and steel. During this period a total 1,1 million pounds of steel and 34,804 pounds of brass were retrograded. This is significant as the retrograde of recoverable brass and steel prior to October 1970 was negligible.

2. During the period 1 November 1970 through 2 April 1971, the 27th Maintenance Battalion continued to provide direct support maintenance and repair parts supply for all ground equipment (less medical and cryptographic) of the 1ST TEAM. Direct support maintenance and repair parts supply for all ground equipment was provided by the Maintenance Company of the reserve Brigade after 2 April 1971. Support rendered by the 27th Maintenance Battalion was evident in the fact that the following percentages of equipment were operational at the end of the period.

b. The 27th Maintenance Battalion was given the mission of gaging all of the Division's H-16 rifles for muzzle bore erosion and replacing barrels, as required. Although the project required considerable time and personal resources, it was completed.

c. At the start of the Division Drug Amnesty Program DISCOM received the mission of fabricating 100 amnesty boxes. The 27th Maintenance Battalion was given this project and in four weeks, 102 amnesty boxes were fabricated, painted, and turned over to the 15th Supply and Service Battalion for issue to Division units.

d. The 27th Maintenance Battalion assembled over 1,000 M203s (a

40mm grenade launcher/16-16 rifle) and returned them to the 15th Supply and Service Battalion for issue to Division units.

3. The 15th Supply and Service Battalion continued to provide Class I through IV, Class VII, Limited Class V, and aerial equipment support to the 15th Task Force through 1 April 1971. Support was provided after 1 April 1971 by the Supply and Transport Company of the residual Brigade.

a. New refuel points were opened at Loi Ninh, Katum, and La Ngai in support of operations in those areas.

b. Refuel points closed during the period were Han Tan, Dong Xoa, Bu Gia Ma, Song Bo, Duc Phong, and Phuong Lam.

c. The 15th Supply and Service Battalion used 6,757 sorties to sling-out 34,016 short tons of supplies.

c. The AES Company rigged 125 drums of POL in 32 A-22 bags for air drop from C-130 aircraft into an unknown drop zone. Thirty-two (32) cargo parachutes (G-12) were provided by the depot in Can Ranh Bay.

4. The 15th Transportation Battalion (Aircraft Maintenance and Supply) continued to provide direct support and direct back-up maintenance for all aircraft, avionics equipment, and aircraft ammunition while also maintaining the ASL for aircraft repair parts.

a. Maintenance operations:

(1) Number of aircraft released: 544

(2) 1st Cavalry Division (AM) availability: High, 85%; Low, 76%; Average, 81.2%.

b. Stock Control:

(1) Lines on ASL: 7,214

(2) Zero balance lines: 1,317

(3) Percent zero balance: 18.3%

(4) Total requests received: 41,905

(5) Demand accommodation: 87.3%

(6) Demand satisfaction: 83.2%

N-98
5. The 15th Medical Battalion continued to provide emergency medical and dental treatment, MEDEVAC of casualties, both to its own clearing stations and uniquely, to field army Casualty and Medical Facilities. Medical supply, limited maintenance of medical equipment, and limited orthopedic and psychiatric service were provided for the FIRST TEAM through the period 1 November 1970 to 25 March 1971. Continued support was provided by "C" Company, 15th Medical Battalion after 25 March 1971.

a. On 26 December 1970, a temporary MEDEVAC helicopter field location was established at Tay Ninh in support of "C" Troop, 1st Squadron, 9th Cavalry. A second field MEDEVAC helicopter static location was established at Tay Ninh on 22 February 1971.

b. On 31 December 1970, an emergency medical team was deployed to Da Nang, in support of a FIRST TEAM operation. This team treated a total of 22 casualties.

c. The Air Ambulance Platoon flew 2,217 MEDEVAC missions, accrued 2626 hours flying time, and evacuated 2,705 patients. Of those a total of 334 were hostile patients. Four helicopters were damaged by hostile fire, one of which had to be returned. Two pilots and two crewmen were wounded by hostile fire. On 1 January 1971, the Air Ambulance Platoon was relieved of the mission of providing MEDEVAC support to the 5th ARVN Division.

c. The 15th Medical Battalion participated in 26 MEDCAPS treating a total of 697 patients and six DENTCAPS treating a total of 30 patients.

6. The DISCOM of the FIRST TEAM provided instruction in the following areas to elements of the 1st Cavalry Division (AirMobile):

<table>

CONFIDENTIAL
1. Civic Action: In compliance with current Vietnamization objectives, FIRST TEAM assets in direct support of civic action projects were significantly reduced during the reporting period. Guidance for assistance as directed by MACV (515-1) provides that help will be rendered if (1) all attempts from GVN sources fail and (2) the project will fail without assistance. There were no major projects remaining to be accomplished nor were any new projects started. In response to a request by the Pham Long Province Chief, the FIRST TEAM provided four (4) dump trucks and one (1) scraper in the ground preparation for a market place in Song Be. Approximately 125 MEDCARS were conducted because GVN medical personnel were not available.

2. Vietnamization/Resources Control. The newly activated Resources Control Vietnamization/Pacification Section, G5, had all vacancies filled by 15 November. The FIRST TEAM Civic Action Fund was dissolved as were the US/FWMF Civic Action and PSYWAR funds during standdown.

   a. Vietnamization/on-the-job training and formal instruction given ARVN soldiers continued. 10 Combat Advisory Teams were deployed in the AO to upgrade RF, PF, FSDF performances. Added emphasis was stressed on mobile checkpoints along QL-1, QL-14, and QL-20. Eagle Flights were increased to approximately five (5) a week from the latter part of January through the month of February.

   b. PF Training. In January 1971 the FIRST TEAM was directed by IIFPV to conduct PF NCO refresher training utilizing the facilities and personnel of the First Team Academy. The 10-day course terminated in February 1971 with the graduation of 150 PF NCOs from 10 Provinces. Under the auspices of the "Dedicated Company Program," the Division was directed to provide four (4) companies to implement the expanded on-site PF training. The training was broken down into 2 phases: Phase I, 18 January - 14 February 1971, and Phase II, 15 February - 15 March 1971. 1st Bde was responsible for control over B/1-27 Inf and C/1-5 Cav; 2nd Bde, E/2-12 Cav; and Prov 3rd Bde, C/2-8 Cav; and DIVARTY, D/2-7 Cav. AVDACT-0T 13 May 1971
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971
TAB P: Civil Affairs

Combined totals: Phase I & II: 371 units, 8588 personnel.

- Miscellaneous Regional Forces: 200 personnel
- PSDF: 440 personnel
- Hamlet/Village Officials: 50 personnel

Total: 690 personnel
SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971
TAB Q: Psychological Operations

1. (U) General: PSYOPS, as during the last reporting period, continued to support the 1st Cavalry Division (Airmobile) tactical operations by exploiting enemy vulnerabilities. Division aircraft flew 122 hours of broadcast time and dropped 5,513,000 leaflets while the 9th Special Operations Squadron supported the FIR/T TEAM with 757 hours of broadcast time and dropped 78,266,000 leaflets.

2. (C) The overall PSYOPS effort remained the same for this reporting period. All brigades continued to exploit the enemy units under the concepts set during the last reporting period until 28 February 1971. Beginning 1 March, a campaign to encourage and promote confidence in the armed forces of Vietnam accelerated. Redeployment, as a step towards peace and proof of United States friendship, became increasingly accented.

3. (C) Enemy Units targeted:
   a. SR-5
   b. 81st RSG
   c. 86th RSG
   d. K-28 Bn
   e. K-29 Bn
   f. K-14 Bn

SUBJECT: Operational Report for Semi-annual Period Ending 30 April 1971
TAB R: LUOC LOUNG 66 (Kit Carson Scouts)

1. (U) The FIRST TEAM had 256 Kit Carson Scouts assigned upon the termination of the reporting period. 11 scouts had transferred from the 11th Armored Cavalry Regiment, 26 from the 2d Bde, 25th Infantry Division, and 79 from miscellaneous units undergoing standdown.

2. (U) 113 KCSs terminated service based upon release requests and substandard performances.

3. (U) One KCS was killed in action during ground operations.
1. General: During the period 1 November 1970 - 10 April 1971, Division Chemical Section, 26th Chemical Detachment, and 184th Chemical Platoon (DS), continued chemical support activities for the 1st Cavalry Division (AD). FIRST TEAM Chemical Personnel continued to support the Division in the following area: Airborne Personnel Detection, CS employment, Crop Destruction, Plane Employment, Chemical Subjects Training, and Inspections.

2. Operational Highlights.

   a. In addition to their normal intelligence gathering process, Airborne Personnel Detector (Sniffer) missions resulted in the discovery of several heavily used trails, thirty-one enemy soldiers, one enemy truck, and numerous bunkers, hoochies, and rafts.

   b. Persistent CS Drum Drops were continued throughout the FIRST TEAM AO. On 26-28 January 1971, CH-47 aircraft were used to drop persistent CS on trails used by NVA/VC. This operation greatly reduced enemy movement around the target area.

   c. During November approval was granted to conduct crop destruction operations in certain section of Binh Tuy Province. Four sorties using C-123K (Provider) aircraft were flown in November and the remainder of the crops in the approved areas were destroyed on 8-10 December 1970 using helicopters to spray herbicide. A total of 1259 gallons of 30% aqueous solution of agent BLUE were sprayed on enemy garden plots covering a total of 71 acres. The primary crops destroyed were rice, mandoc, vegetables, and corn.

   d. The combination of an active psychological operations and napalm crop destruction program during 1 November 1970 to 10 January 1971 resulted in approximately 140 Ho Chi Minh from the War Zone D.

   e. On 8 December 1970 a new technique was used to drop napalm from a CH-47 aircraft which improved the coverage by approximately 85%. The method developed was to sling two cargo nets of napalm external on the CH-47 cargo drop mechanism and have the slings separated by a height of approximately five feet. This method proved to be very helpful in achieving larger area coverage and reducing the number of sorties needed to destroy the target area.

3. Operational Totals: Totals given for the reporting period include most, but not all of the wide variety of chemical support given the FIRST TEAM.

   a. Airborne Personnel Detection (Sniffer) missions: 559

   b. CS Drum Drops: 29 missions, 870 drums (69,000 lbs of persistent CS)
Operational Report for Semi-annual Period Ending 30 April 1971

TAB S: Chemical Activities (Cont)

a. E158 CS Clusters Dropped: 225
b. Mini-Burbs Produced: 2055
c. Rush Flares/Fougasse inspected: 30/354 (replaced 19 Fougasse charges)
d. Installed Fougasse: 12 55-gallon drums of napalm
f. Instilled Fougasse, 256 sorties, 1965 drums (108,075 gallons)

h. Helicopter Crop Destruction: 71 acres (1259 gal 30% aqueous solution of BLUE Herbicide sprayed)
i. FIRST TEAM Academy replacement personnel trained: 425
j. Gas Chamber exercise: 5 exercises/690 personnel
k. Protective mask inspected: 8,645/650 repaired
l. Vector Control:
   (1) 742 gallons of Diazinon sprayed
   (2) 1588 gallons of 5% Malathion sprayed
