403 493
INTRODUCTION

This highly selective bibliography was prepared for use at the Eighth Military History Symposium on "Air Power and Warfare" held at the United States Air Force Academy, 18-20 October 1978.

In addition to the resources noted, the Library has several unique collections for historical research. Oral history tapes and transcripts from distinguished military and civilian leaders are on file in our Special Collections Branch. The Branch also has twenty-one manuscript collections (130 cubic feet of records) of former military leaders from World War I to the present which have been organized and had manuscript records written to assist researchers.

The Colonel Richard Gimbel Aeronautics History Collection contains approximately 20,000 items on the history of flight, including over 7,000 books cataloged for use. Other materials include prints, medals, philatelic items, china and glassware, original manuscripts and other media. The majority of the collection covers the era before the first powered flight of the Wright brothers in 1903.

This bibliography was compiled by Betsy C. Kysely, Chief, Reference Branch, United States Air Force Academy Library. The manuscript was prepared for the printer by Theresa Ramos and Yo Sneddon.

BENJAMIN C. GLIDDEN, Lt Colonel, USAF
Director of Academy Libraries
