Among the higher aeronautical colleges and schools under the Third Ministry of Machine Building, there are three key national institutions of higher learning: Beijing Aeronautical Engineering College, Northwest Industrial University and Nanjing Aeronautical Engineering College. In addition, there are three general schools of higher learning: Shenyang Aircraft Industry College, Nanchang Aircraft Industry College and Zhengzhou Professional School of Aircraft Industry Management. In 1981, these six schools will take part in the national unified student enrollment in 25 provinces, municipalities and autonomous regions. The aircraft industry higher colleges and schools are polytechnic, majoring in aviation industry occupations; these schools help students to advance in moral, intellectual and physical culture in training superior engineering, technology and science personnel. After graduation, the former students are assigned to aircraft industry centers for scientific research, design and production as well as higher institutes for scientific research, engineering technology or teaching positions.

In order to meet the requests and expectations of general readers and students applying to enroll in aircraft colleges and schools, the article will briefly introduce specialties, curricula and training goals of aircraft industry colleges.
and schools which accept student applications for enrollment in 1981. In addition, numbers of students to be enrolled are listed by provinces, municipalities and autonomous regions.

BEIJING AERONAUTICAL ENGINEERING COLLEGE (SITE: BEIJING MUNICIPALITY)

The Beijing Aeronautical Engineering College was the first combined aeronautical engineering and scientific research college established after Liberation. The college is growing into a university as a center of teaching as well as of science and technology. In the engineering college, there are eight departments and two divisions of fundamental courses, divided into 12 curriculum categories and 30 specialties. In addition, there are four research laboratories, six applied research sections, an electronic computer station, and 45 experimental laboratories. There are 39 professors, 166 associate professors and 1175 lecturers.

In 1981, the Beijing Aeronautical Engineering College will enroll students from 25 provinces, municipalities and autonomous regions - 850 students (four-year curriculum) and 170 graduate students for doctoral and master degrees. The following specialties are open for student enrollment this year:

Electrical Engineering Specialty.

NORTHWEST INDUSTRIAL UNIVERSITY (SITE: XI'AN MUNICIPALITY)

The Northwest Industrial University is a polytechnic university of science and technology, majoring in aeronautical engineering; the university is gradually developing into a center of teaching and scientific research. The industrial university has eight departments and a division of fundamental courses with 33 specialties. Already organized or in planning are 12 research laboratories, a computer station, and 49 experimental laboratories in the university. There are 37 professors, 135 associate professors, and 855 lecturers.

In 1981, the Northwest Industrial University will enroll students from 21 provinces, municipalities and autonomous regions - 780 students (four-year curriculum) and 130 graduate students for doctoral and master's degrees. There are the following specialties open for student enrollment this year:

2. Department of Aircraft Engine - Aircraft Engine Specialty.

NANJING AERONAUTICAL ENGINEERING COLLEGE (SITE: NANJING MUNICIPALITY)

The Nanjing Aeronautical Engineering College is a school of aeronautical engineering and scientific research; the college is gradually developing into a center of teaching and scientific research. There are six departments and one division of fundamental courses with 17 specialties. In addition, there are five research laboratories and more than 40 experimental laboratories. The college has 19 professors, 36 associate professors, and 675 lecturers.
In 1981 the Nanjing College of Aeronautical Engineering catered to 21 provinces, cities and autonomous regions throughout the country and enrolled 600 undergraduate students (4 year education system) and trained 100 research students at the Master and Doctorate degree level.

The specialities of the enrolled students were:

SHENYANG AIRCRAFT INDUSTRY COLLEGE (SITE: SHENYANG MUNICIPALITY)

The Shenyang Aircraft Industry College is a school for training high-level engineering, technical personnel for the aircraft industry with a four-year curriculum. There are three departments, six specialties and 25 experimental laboratories. The college is well known for a specialty of cold working techniques, which is widely adaptable and in demand by organizations engaging in production and scientific research. In the college, there are 1500 teachers, support staff and workers as well as 1000 students.

In 1981, the Shenyang Aircraft Industry College will enroll 300 students from 13 provinces, municipalities and autonomous regions. The following departments are open for student enrollment:

1. Department of Aeronautical Engineering - Aircraft Engine Specialty, and Aircraft Manufacture Specialty.

2. Department of Mechanical Engineering - Specialty of Aircraft Machining Techniques, and Specialty of Designing and Manufacturing Aircraft Machines.

NANCHANG AIRCRAFT INDUSTRY COLLEGE (SITE: NANCHANG MUNICIPALITY)

The Nanchang Aircraft Industry College is a school for training high-level engineering, technical personnel for the aircraft industry with a four-year curriculum. There are four departments, seven specialties, and 30 experimental laboratories. The college is well known for its specialty of aircraft heat treatment techniques, which is demanded by organizations engaging in production and scientific research. In the school, there are 1500 teachers, support staff, and workers as well as more than 1200 students.

In 1981, the Nanchang Aircraft Industry College will enroll 150 students from 12 provinces, municipalities and autonomous regions. The following departments are open for student enrollment:

2. Department of Aircraft Chemical Engineering - Specialty of Aircraft Materials and Protection.

3. Department of Aircraft Machines - Specialty of Aircraft Machining.

ZHENGZHOU PROFESSIONAL SCHOOL OF AIRCRAFT INDUSTRY MANAGEMENT (SITE: ZHENGZHOU MUNICIPALITY)

The Zhengzhou Professional School of Aircraft Industry Management is a school for training management, engineering and technical personnel in the aircraft industry with a three-year curriculum.

In the school, there are four departments and four specialties. At the present time, the aircraft industry management level should be quickly upgraded; this demand shows the importance of training aircraft industry personnel. In the professional school, there are now more than 1000 teachers, support staff, and workers as well as nearly 1000 students.
In 1981, the Zhengzhou Professional School will enroll 200 students from 12 provinces and municipalities. The following departments are open for student enrollment:

1. Department of Finance Management - Specialty of Industrial Finance Accounting.

2. Department of Organization Management - Planned Management Specialty.

(Diagrams in the article were drawn by Wang Xiuchang.)

APPENDIX [See Next Page.]
