Software Engineering Education Directory

Edited by
Bill McSteen, Brian Gottler, and Mark Schmick
April 1990
Foreword

Each spring, the SEI Education Program publishes the *SEI Software Engineering Education Directory*, which summarizes undergraduate and graduate courses in software engineering taught at colleges and universities, primarily in the United States. This annual survey, the only one of its kind, serves as a directory for potential students seeking information about where they might study software engineering. The survey is useful to industry and government recruiters in evaluating the background of job candidates.

The teamwork and energy of Brian Gottier, Bill McSteen, and Mark Schmick, along with Allison Brunvand, Linda Levine, Mary Rose Serafini, and Barbara Zayas, were responsible for the successful completion of this edition. Gary Ford, Senior Computer Scientist, helped design this year's edition and spent much time editing entries into final form.

Software Engineering Education Directory

Abstract: This directory provides information about software engineering courses and software engineering degree programs offered by universities, primarily in the United States.

The Software Engineering Institute (SEI) is a federally funded research and development center, sponsored by the Department of Defense and operated by Carnegie Mellon University. The mission of the SEI is to serve the public interest by establishing the standard of excellence for the art and practice of software engineering and by accelerating the transition of software technology.

This directory has been compiled to provide information that will help students and their advisors make appropriate educational choices. It contains a detailed listing of available software engineering courses and software engineering degree programs.

Introduction

Compilation of entries for this directory began in the summer of 1986 with a questionnaire mailed to schools selected from Peterson's Graduate Programs in Engineering and Applied Sciences 1986. We contacted schools offering graduate degrees in computer engineering, computer science, information science, software engineering, and systems engineering because they seemed most likely to offer courses involving software engineering concepts. The first Software Engineering Education Directory was then published outlining these courses from the information provided on the questionnaires.

Since 1986 the directory has been published annually. Coverage has been expanded to include software engineering courses at the undergraduate level as these courses have become more common. Each year we have attempted to collect updated information from institutions previously represented in the directory. We have also attempted to contact institutions not previously included in the directory to make the publication more complete.

This year we have again included a listing of those institutions offering software engineering courses at both the graduate and undergraduate levels. This is the second section of the directory entitled Schools and Courses. In addition, we have added a new section profiling institutions that are currently offering master's degrees in software engineering. This is the first section of the directory entitled Graduate Degree Programs in Software Engineering.

To discuss any issues related to this report, please contact:

CMU/SEI-90-TR-4
Graduate Degree Programs in Software Engineering

Graduate degree programs first appeared in the late 1970s at Texas Christian University, Seattle University, and the Wang Institute of Graduate Studies. All three programs responded to significant needs from local industry in the Dallas/Fort Worth, Seattle, and Boston areas, respectively. In 1985, three additional programs were started: at the College of St. Thomas in St. Paul, Minnesota, at Imperial College of Science and Technology in London, and at the University of Stirling in Scotland. The last four years have seen a significant increase in the development of and interest in such programs. We know of at least a dozen programs that either have been initiated or are under development.

In this section, we survey the programs in the United States for which we were able to obtain information. Readers will note substantial variation among the programs. This can be attributed to a number of factors:

- Most of the programs were developed in the absence of any recognized model curriculum.
- Each school had a number of existing courses, mostly in computer science, that were incorporated into the new programs, and these courses differed greatly among schools.
- Software engineering is a new discipline, and the developers of these programs had differing perceptions of the scope of the discipline, and its principles and practices.
- Each school was responding to perceived needs that varied greatly from one community to another.

Another notable point of variation among these programs is the program title. Many of the programs were unable to use the word engineering in their titles because of legal or administrative restrictions. In one way, it is unfortunate that the term software engineering is so nearly universally accepted as an informal name for the discipline, because it has generated an inordinate amount of argument on the semantic issues of whether (or not) software engineering is really engineering.

Andrews University

Location Berrien Springs, Michigan

Program title Master of Science in Software Engineering

Degree requirements 48 quarter credits (typically 4 credits per course):
8 credits of projects, 16 credits core courses,
0-20 credits foundation courses,
4-24 credits electives

Foundation courses
Data Structures
Data Base Systems
Systems Analysis I
Systems Analysis II
Operating Systems

Core courses
Computer Architecture
Software Engineering I
Software Engineering II
Programming Project Management

Program initiation (unknown)

Source This information was reported to the SEI by Andrews University in April 1989.
Boston University

Location
Boston, Massachusetts

Program title
Master of Science in Software Systems Engineering

Degree requirements
Nine courses of four credits each: seven required courses including a project course, and two electives. Two of the required courses differ depending on whether the student's background is in hardware or software.

Required courses
- Applications of Formal Methods
- Software Project Management
- Software System Design
- Computer as System Component
- Software Engineering Project
- Advanced Data Structures (hardware background)
- Operating Systems (hardware background)
- Switching Theory and Logic Design (software background)
- Computer Architecture (software background)

Program initiation
Fall 1989 (The program has existed as a software engineering option in the Master of Science in Systems Engineering since spring 1980; the current curriculum was adopted in January 1988.)

Source

Boston University absorbed the Wang Institute's facilities in 1987 and was the beneficiary of some of the experience of the Wang Institute. This program incorporates the best features of the MSE curriculum of Wang and the MS in Systems Engineering from Boston University. The program emphasizes the understanding of both hardware and software issues in the design and implementation of software systems. Special emphasis is placed on the software engineering of two important classes of computer systems: embedded systems and networked systems.

Both full-time and part-time programs are available, and most of the program is available through the Boston University Corporate Classroom interactive television system. The program can be completed in twelve months by full-time students.

The university also has a doctoral program leading to the PhD in Engineering, with research specialization in software engineering.
Carnegie Mellon University

Location Pittsburgh, Pennsylvania

Program title Master of Software Engineering

Degree requirements Sixteen courses: six required courses and two Category I electives in the first year; a theory course, a business course, two Category II electives, two software engineering seminars, and a two-semester master's project in the second year.

Required courses
- Software Systems Engineering
- Formal Methods in Software Engineering
- Advanced System Design Principles
- Software Creation and Maintenance
- Analysis of Software
- Software Project Management

Elective courses
- Category I: Computer science courses at the senior undergraduate level
- Category II: Advanced graduate courses in computer science

Prerequisite note Prospective students must have at least two years of experience working in a sizable software project.

Program Initiation September 1989

Source This information was reported to the SEI by CMU in June 1989.

The objective of Carnegie Mellon University's MSE program is to produce a small number of highly skilled experts in software system development. It is designed to elevate the expertise of practicing professional software designers. The emphasis is on practical application of technical results from computer science; the nature of these technical results dictates a rigorous, often formal, orientation. The engineering setting requires responsiveness to the needs of end users in a variety of application settings, so the program covers resolution of conflicting requirements, careful analysis of tradeoffs, and evaluation of the resulting products. Since most software is now produced by teams in a competitive setting, the program also covers project organization, scheduling and estimation, and the legal and economic issues of software products.
College of St. Thomas

Location: St. Paul, Minnesota

Program title: Master of Software Design and Development

Degree requirements: Ten required courses, including a two-semester project course sequence, and four elective courses. All courses are three semester credits.

Required courses:
- Technical Communications
- Programming Methodologies
- DBMS and Design
- Systems Analysis and Design I
- Software Productivity Tools I
- Software Project Management
- Software Quality Assurance/Quality Control
- Legal Issues in Technology

Program initiation: February 1985

Source: This information was reported to the SEI by the College of St. Thomas in June 1989.

This program was developed through an advisory committee made up of technical managers from Twin Cities companies such as Honeywell, IBM, Sperry, 3M, NCR-Comten, and Control Data. Elective courses are added to the curriculum on the basis of need as expressed by technical managers in local industry or by students in the program.

The program is applied rather than research-oriented. Most instructors are from industry (14 of 23 in the spring 1989 semester). Instead of a thesis, students complete a two-semester software project for a local company; in many cases this company is their employer, but the project must not be part of their normal work responsibilities.

Classes are offered evenings, and 98% of students work full-time in addition to their studies. Students normally require three years to complete the degree. The program enrolled 252 students in spring 1989.
The program for the degree of Master of Science in Software Systems Engineering is concerned with engineering technology for developing and modifying software components in systems that incorporate digital computers. The program is concerned with both technical and managerial issues, but primary emphasis is placed on the technical aspects of building and modifying software systems.

In addition to the degree program, the university offers a graduate certificate program in software systems engineering. The certificate program is designed to provide knowledge, tools, and techniques to those who are working in, or plan to work in, the field of software systems engineering, but do not desire to complete all of the requirements for a master's degree. Students in the certificate program must already hold or be pursuing a master's degree in a science or engineering discipline. The requirements for the certificate are completion of the five required courses listed above.
Monmouth College

Location: West Long Branch, New Jersey

Program title: Master of Science in Software Engineering

Degree requirements: 30 credit hours, consisting of 6 core and 4 elective courses.

Core courses:
- Mathematical Foundations of Software Engineering I
- Programming-in-the-Large
- Project Management
- Computer Networks
- Software Engineering I
- System Project Implementation (Laboratory Practicum)

Elective courses:
- Mathematical Foundations of Computer Science II
- Programming-in-the-Small
- Protocol Engineering
- Selected Topics in Software Engineering
- Programming Languages
- Computer Architecture
- Operating System Implementation
- Database Management
- (additional electives are under development)

Program Initiation: 1986

Source: This information was reported to the SEI by Monmouth College. Further information was obtained from "Revised Graduate Software Engineering Curriculum at Monmouth College," Amoroso, S., Kuntz, R., Wheeler, T., and Graft, B. Software Engineering Education; SEI Conference 1988, Gary A. Ford, ed. New York: Springer-Verlag, 1988, 70-80.

The program is offered through the departments of computer science and electrical engineering. The current enrollment is more than 100, and to date 50 students have completed the degree requirements.
Rochester Institute of Technology

Location
Rochester, New York

Program title
Master of Science in Software Development and Management

Degree requirements
48 credits (quarter system; typical course is 4 credits)

Required courses
- Principles of Software Design
- Principles of Distributed Systems
- Principles of Data Management
- Software and System Engineering
- Project Management
- Organizational Behavior
- Analysis and Design Techniques, or
- Analysis & Design of Embedded Systems
- Software Verification and Validation
- Software Project Management
- Technology Management
- Software Tools Laboratory
- Software Engineering Project

Program initiation
Fall 1987

Source
This information was reported to the SEI by RIT in April 1989.

The program has approximately 100 students at the RIT campus and 15 students at Griffiss Air Force Base in Rome, New York. Approximately 90% of the students attend part-time.
Seattle University

Location: Seattle, Washington

Program title: Master of Software Engineering

Degree requirements: 45 credits (quarter system), including eight require core courses, four elective courses, and a three quarter project sequence.

Required courses:
- Technical Communication
- Software Systems Analysis
- System Design Methodology
- Programming Methodology
- Software Quality Assurance
- Software Metrics
- Software Project Management
- Formal Methods

Elective courses:
- System Procurement Contract Acquisition and Administration
- Database Systems
- Distributed Computing
- Artificial Intelligence
- Human Factors in Computing
- Data Security and Privacy
- Computer Graphics
- Real Time Systems
- Organization Behavior
- Organization Structure and Theory
- Decision Theory
  (other electives may be selected from the MBA program)

Prerequisite note: Prospective students must have at least two years of professional software experience.

Program initiation: 1978

Source:

Seattle University is an independent urban university committed to the concept of providing rigorous professional educational programs within a sound liberal arts background. In 1977, the university initiated a series of discussions with representatives from local business and industry, during which software engineering emerged as a critical area of need for specialized educational programs. Leading software professionals were invited to assist in the development of such a program, which was initiated the following year.

Normally, classes are held in the evenings and students are employed full-time in addition to their studies. The first students in the program graduated in 1982.
Texas Christian University

Location
Fort Worth, Texas

Program title
Master of Software Design and Development

Degree requirements
36 semester hours, including nine required courses and three electives; submission of a technical paper to a journal for publication.

Required courses
- Introduction to Software Design and Development
- Modern Software Requirements and Design Techniques
- Applied Design, Programming, and Testing Techniques
- Management of Software Development
- Economics of Software Development
- Computer Systems Architecture
- Database and Information Management Systems
- Software Implementation Project I
- Software Implementation Project II

Program initiation
Fall 1978

Source

The university established a graduate degree program in software engineering in 1978. Due to external pressure, prompted by the absence of an engineering college at TCU, the program was given its current name in 1980.

The program offers most of its courses in the evening, and all 50 students in the program are employed full-time in the Dallas/Fort Worth area.
University of Houston-Clear Lake

Location
Houston, Texas

Program title
Master of Science in Software Engineering Sciences

Degree requirements
36 credit hours, including 30 hours of required courses and 6 hours of electives.

Required courses
- Specification of Software Systems
- Principles and Applications of Software Design
- Software Generation and Maintenance
- Software Validation and Verification
- Software Project Management
- Master's Thesis Research
- Advanced Operating Systems
- Theory of Information and Coding
- Synthesis of Computer Networks

Elective courses
Must be chosen from courses in software engineering, computer science, computer systems design, or mathematical sciences.

Program initiation
Awaiting approval

Source
This information was reported to the SEI by the University of Houston-Clear Lake in March 1989.

The university has submitted a proposal to the Texas Coordinating Board for Higher Education to offer the master's degree. Approval is expected late in 1989 or early in 1990.
University of Pittsburgh

Location Pittsburgh, Pennsylvania

Program title Master of Science in Software Engineering

Degree requirements 33 credits: four required software engineering courses; additional required and optional courses in computer science

Required courses (these are not the official course titles)
- Software specification and design
- Conversion of software specifications into products
- Models of information systems
- Software engineering project

Elective courses Courses in areas such as:
- Theory of computation
- Design and analysis of algorithms
- Language design
- Advanced operating systems
- Computer architecture
- Modeling and simulation
- Principles of database systems
- User interface design and evaluation
- Artificial intelligence

Program Initiation 1989

Source This information was reported to the SEI by the University of Pittsburgh in the Fall 1989.

This program is project oriented, emphasizes a methodological approach to software development, and provides a more focused education than the traditional Master of Science in computer science. Applicants with professional experience may be given special consideration for admission, although such experience is not required. All students' programs are individually designed with the help of a faculty advisor. There is no thesis requirement.
The Wichita State University

Location Wichita, Kansas

Program title Master of Science in Software Engineering; Master of Computer Science in Software Engineering

Degree requirements 30 credit hours total: two required courses, six credit hours of software engineering electives, additional electives in software engineering or computer science, and practicum (3 hours) or thesis (6 hours) on a software engineering topic.

Required courses Software Requirements, Specification and Design
Software Testing and Validation

Elective courses Software Project Management
Ada and Software Engineering
Systems Analysis
Topics in Software Engineering (recent offerings have included Configuration Management, Formal Methods, Quality Assurance, Software Metrics, and Formal Verification of Software)

Program Initiation Spring 1989

Source This information was reported to the SEI by Wichita State in June 1989.

The Wichita State University Department of Computer Science has created a set of courses that can lead to a specialization in software engineering within the existing Master of Science and Master of Computer Science degree programs. These courses are taught in cooperation with the Software Engineering Institute's Software Engineering Curriculum Project and Video Dissemination Project.
Schools and Courses

This year, as in the past, we updated course entries by contacting those institutions appearing in the last publication of the directory and requesting that they revise their entries. In addition, we made an effort to increase our coverage of software engineering courses by sending a large number of questionnaires to institutions not represented in past editions. More than 30 institutions represented in this version of the directory appear here for the first time.

We have edited the directory entries for accuracy, completeness, and relevance to software engineering. We are limited in our ability to edit responses, however, and might have included courses in the listings that do not seem to be closely related to software engineering study. However, all such courses were cited as part of a software engineering sequence in the responses that we received. In addition, please be aware that some "Textbook" entries actually contain titles of articles, reports, or other published papers. In such cases, the papers shown are consistently used and considered to be required course reading.

Changes in the Schools and Courses Section

Changes we adopted this year include:

- **Electronic mail addresses for contacts.** In the questionnaire mailed out this year, we requested that the contact for an institution provide us with his/her electronic mail address. For individuals who provided us with this information, we have included it in their listings.

- **Merging of Information into new Tools field.** In previous versions of the directory, we have listed the compilers, computers, and languages used for each course in separate fields. In this edition, this information is merged into one field called Tools. This field also includes other software tools used in the course.

How to Use This Section

The directory is organized by state (in the U.S.), province (in Canada), or country (in other regions). Within each section, the directory entries are alphabetized by institution name. Each entry lists the following:

- **Degrees.** These are the degree programs that have software engineering courses as electives or requirements.

- **Contact.** This is the person you may contact for more information about the software engineering courses offered at the institution.

- **Update.** The month and year that a directory entry was last updated appear here.

- **Courses.** Software engineering and related (co-requisite, laboratory, or advanced elective) courses are listed under this title. Each Course has three sub-titles: Codes, Textbooks, and Tools. The Codes represent characteristics of the course and are explained in detail later in this section. Textbooks contains a listing of texts used for the course, and Tools contains a listing of software and hardware used.

Abbreviations of Degrees

Each degree entry has one or two parts. The first part is the degree; and the second part, if present, is the subject. For example, BCS means Bachelor of Computer Science, BS EE means Bachelor of Science in Electrical Engineering, MSE is Master of Software Engineering, and MA CE stands for Master of Arts in Computer Engineering. The abbreviations used appear on the following page.
<table>

Explanation of Course Codes

A complete Courses entry has five codes on the second line, arranged in order of course level, prerequisite, status, frequency, and the number of years that the course has been taught. The last code is self-explanatory. The other four codes are as follows:

Level:
- U Undergraduate
- G Graduate
- B Both
- O Other
- X No information supplied

Prerequisite:
- P The course has at least one prerequisite
- N None
- X No information supplied

Status:
- R Required
- E Elective
- B Both
- O Other
- X No information supplied

Frequency:
- B Biennial
- Y Once a year
- T Once a term
- A Alternate terms
- D On demand
- O Other
- X No information supplied

Following are examples of Courses entries containing these fields:

Information Systems Analysis, Design, and Evaluation (INF SC 272)
Codes: G P E O 6
          by Fitzgerald, Jerry and Fitzgerald, Arda
Tools: C
       IBM PC

Update:  January 1990

Courses:  Concurrency in Computation (CS 139)
          Codes:  B P E O 5
          Tools:  Message-passing concurrent computers
                  UNIX systems
                  C

          Computation, Computers & Programs (CS 20)
          Codes:  U P E T

          Computer Algorithms (CS 138)
          Codes:  B P E T

          Programming Laboratory (CS 140)
          Codes:  B P E O

Additional Information:
Concurrency in Computation is offered each Winter and Spring quarter.
Numerous related courses on Functional Programming, Computer Algorithms,
Computer Modeling and Data Analysis, Computer Graphics, Design and
Implementation of Programming Languages, Simulation, and Computer-Aided Design.
are also offered.

For an explanation of course codes, see page 19.
Foundation of Software Engineering (CSC 203)
Codes: GNRY5
by Pressman, Roger S.

Software Requirement Analysis and Design (CSC 210)
Codes: GPEY11
Textbooks: An Integrated Approach to Software Development
by Abbott, J.R.
Tools: IBM PCs
CASE tools

Software Engineering Economics (CSC 231)
Codes: GPEY15
Textbooks: Software Engineering Economics
by Boehm, Barry W.
Tools: IBM PCs
WICOMO or other PC-based cost analysis tools

Advanced Computer System Analysis (CSC 240)
Codes: GPEY11
Textbooks: Structured Development for Real-Time Systems
by Ward, P.T. and Mellor, S.J.

Introduction to System Engineering (Engr 130)
Codes: UPEYS
Textbooks: Systems Engineering: Methodology and Applications
by Sage, Andrew P. (ed.)

Additional Information:
Software Engineering Project Management is offered once every 1 or 1.5
years. Software Requirement Analysis and Design, Software Engineering
Economics, and Advanced Computer System Analysis are offered once every 3
semesters. Foundation of Software Engineering is required for a MS in Computer
Science if the student does not have an undergraduate foundation in software
engineering.

National University

       IBM 4381 with VM/CMS
       CMS

Software Engineering Project II (CS 627b)
Codes: G P R T 3
Textbooks: Information System Specification and Design Road Map
        by Connor, D.
Tools: TeleSoft Ada
       IBM 4381 with VM/CMS
       CMS

Software Engineering Project III (CS 627c)
Codes: G P R T 3
Textbooks: Information System Specification and Design Road Map
        by Connor, D.
Tools: TeleSoft Ada
       IBM 4381 with VM/CMS
       CMS

Additional Information:
This program is offered at all of the National University campuses. Dial-up facilities are offered on all campuses so that a student with a computer and a modem can work on the IBM mainframe from home. All classes are offered in a 1 class per month format, for a total of 48 contact hours in a 4 week period. The last 3 classes (CS 627a, CS 627b, and CS 627c) are capstone senior project classes where a major software package is designed and implemented using all of the software engineering techniques taught in the curriculum. Software engineering techniques are stressed throughout the Bachelor of Science in Computer Science degree program.

Courses:

**CS Design I (CS 480)**
- Codes: UPRT7
- Textbooks: *Software Engineering: A Practitioner's Approach* by Pressman, Roger S.
- Tools: HP workstations, IBM 4381
- IBM PC, VAX 11/780

**CS Design II (CS 481)**
- Codes: UPRT7
- Textbooks: *Software Engineering: A Practitioner's Approach* by Pressman, Roger S.
- Tools: HP workstations, IBM 4381
- IBM PC, VAX 11/780

**Software Engineering (CS 410/510)**
- Codes: BPEY7
- Textbooks: *Software Engineering: A Practitioner's Approach* by Pressman, Roger S.
- Tools: HP workstations
- IEW, TEAMWORK

**Software Metrics (CS 511)**
- Codes: GPRB4
- Textbooks: *Controlling Software Projects* by DeMarco, Tom
  *Software Engineering Metrics and Models* by Conte, S.D., Dunsmore, H.E., and Shen, V.Y.
- Tools: Metric extraction tools
  Cost estimation tools

**Software Quality Assurance and Testing (CS 404/504)**
- Codes: BPEY4
- Textbooks: *Software Quality Engineering* by Deutsch and Willis
  *Software Testing Techniques* by Beizer
- Tools: Turbo Pascal
  IBM PC

**Empirical Studies in Programming (CS 404/504)**
- Codes: BPEB
Additional Information:
CS Design I is an individual project with full documentation. CS Design II is a team project with full documentation.

Additional Information:
Software Engineering I (Systems Analysis) and Software Engineering II (Design and Development) are offered twice a year. We also offer a seminar about once a year or so on Ada. The book used is Software Engineering with Ada by Grady Booch. The software projects from CS 497-498 are actual projects selected by the students and each is approved by the professor. We are presently developing 2 courses which will be offered in parallel with CS 497-498. One will be in technical writing to be taught by the Department of English. The other will be in team-building and will be given by the Department of Psychological Science.

Software Engineering MCS emphasis was established in 1988. Its requirements are:
CS 580, 881, 882, internship, and practicum. The electives are: 6 hours such as
CS 611, 684, 886, and special topics. Special topics offered in 1987-88
were:
Software Configuration Management and Software Project Management and the special
topic in 1989-90 was Software Reuse.

CMU/SEI-90-TR-4 For an explanation of course codes, see page 19.
IBM PC
VAX 785
Workstations
Ada predominantly, but depends on project

Additional Information:
We also teach 2 courses, SC 465 and EK 215, that use the Ada programming
language to teach software engineering concepts.
All new courses (SC 504, SC 517, SC 518) were effective as of January 1988.
The master’s program in software engineering is MS SYSE with a Software
Engineering option. It will be renamed Software Systems Engineering effective
1989.
The PHD with research specialization in Software Engineering is offered, but
the degree is officially called “PHD in Engineering.”
In Software Project Management (SC 518), we use Super project on IBM PC, VAX
Project Manager on VAX, and WICOMO (a cost estimation tool on the IBM PC).

Tools: C, COBOL, FORTRAN, Pascal
IBM-PC/XT/AT
IBM PS/2
Macintosh
VAX/VMS
dBase

Additional information:
Software Systems Development uses real projects and is offered 3 times per year. Therefore, student teams work on a variety of machines and with a variety of languages and compilers. Each team of 4 to 5 students typically works on a different project. Documentation is required including: abstract, planning document, requirements document, preliminary design document, user's manual, and maintenance manual. Each team must make a one-hour presentation to the instructor, client, classmates, and invited guests during "presentation day," which takes place at the end of the semester.

Textbooks: Selected readings
Software Engineering, Planning for Change
by Lamb, David
Software Engineering with Ada (2nd Edition)
by Booch, Grady
Tools: Ada, Pascal
Design Notations: Jackson, Harel

Software Engineering II (CSCI 421-521)
Codes: B P E B 1
Textbooks: Selected readings
Software Engineering with Ada (2nd Edition)
by Booch, Grady

Software Engineering III (CSCI 422-522)
Codes: B P O B 1
Textbooks: Selected readings
Software Engineering, Planning for Change
by Lamb, David
Software Engineering with Ada (2nd Edition)
by Booch, Grady
Tools: Ada, Pascal
Design Notation: Jackson, Harel

Software Engineering Project (CSCI 430-530, 431-531, 431-532)
Codes: B P B B 1
Textbooks: Language reference manuals
Tools: Ada, Pascal
Minneapolis, MN 55455

**Degrees:** BS, MS, PHD

**Contact:**
Dr. David Fox  
Head, Computer Science  
(612) 625-0726

**Update:** June 1987

**Courses:**

| Software Engineering (I) (Csci 5180)       | B P E Y 6 | Abstraction and Specification in Program Development  
by Liskov, Barbara and Guttag, John | Ada  
Sun  
MSG |
| Software Engineering (II) (Csci 5181)      | B P E Y 6 | Software Engineering with Ada  
by Booch, Grady | Ada  
Sun  
MSG |
| Software Engineering (III) (Csci 5199)     | B P E Y 3 | Software Engineering with Ada  
by Booch, Grady  
Software Testing and Evaluation  
by DeMillo, R.A. et al.  
Software Validation: Inspection - Testing - Verification - Alternatives  
by Hausen, H.L.  
The Art of Software Testing  
by Myers, Glenford J. | Ada  
Sun  
MSG |
| Software Requirement, Design and Maintenance (Csci 5199/8199) | B P E B 3 | Handbook of Software Engineering  
by Vick, Charles R. and Ramamoorthy, C.V.  
Software Design Strategies  
by Bergland, Glenn D. and Gordon, Ronald D. |
| Software Verification and Validation, Metrics (Csci 5199/8199) | B P E B 3 | IEEE Tutorial: Software Testing and Validation Techniques  
by Miller, Edward and Howden, William E.  
Software Engineering Metrics and Models  
by Conte, S.D., Dunsmore, H.E., and Shen, V.Y.  
Software Testing and Evaluation  
by DeMillo, R.A. et al.  
Software Validation: Inspection - Testing - Verification - Alternatives  
by Hausen, H.L.  
The Art of Software Testing  
by Myers, Glenford J. |
| Software Engineering with Ada (Csci 5199/8199) | B P E Y 3 | Software Engineering with Ada |  
Software Engineering with Ada |

*For an explanation of course codes, see page 19.*
by Booch, Grady

Tools: Ada
Sun

Software Specification (Csci 5199/8199)
Codes: B P E Y 3
Textbooks: Software Specification Techniques
by Gehani, Narain and McGettrick, Andrew D.

Additional Information:
We also have weekly seminars on various aspects of software engineering.
Missouri

Washington University
Sever Institute of Technology
Department of Computer Science
St. Louis, MO 63130

Degrees: BS, MS, SCD

Contact: Dr. Gruia Catalin Roman
Associate Professor
(314) 889-6190
User ID: gcr@wucs2.wustl.edu

Update: February 1990

Courses: Distributed System Design (CS 576S)
Codes: G P E B 2

Modular Programming (CS 545S)
Codes: G P E B 5

Programming Systems and Language (CS 455)
Codes: B P R O 11
Textbooks: Coordinated Computing: Tools and Techniques for Distributed Software
by Filman, Robert E. and Friedman, Daniel P.
Programming Languages: Design and Implementation
by Pratt, Terrence W.
Tools: DEC Ada, Franz Lisp, Prolog
MicroVAX II

Research Seminar on Distributed System Design (CS 673.1 - CS 673.6)
Codes: G N E T 2

Software Engineering Workshop (CS 456)
Codes: B P R O 11
Textbooks: Programming in Ada
by Barnes, John Gilbert Presslie
Programming in Modula-2
by Wirth, Niklaus
Tools: DEC Ada, DECSRC Modula-2+
Micro VAX II
VAX 11/750
Module-2, Smalltalk

Additional Information:
Programming Systems and Languages and Software Engineering Workshop are
offered twice yearly.

CMU/SEI-90-TR-4 For an explanation of course codes, see page 19.

Update: February 1990

Courses:
Implementation (CS 543)
Codes: G P R Y 4
Textbooks: Selected readings

Requirements and Specifications (CS 541)
Codes: G N R Y 4
Textbooks: Modern Structured Analysis
by Yourdon, Edward N.
Tools: Excelerator
IBM AT

Design (CS 542)
Codes: G P R Y 4
Textbooks: Structural Design
by Yourdon, Edward N. and Constantine, Larry L.

Formal Semantics and Specification (CS 539)
Codes: G P O B 2
Textbooks: Program Construction & Verification
by Backhouse, R. C.
The Science of Programming
by Gries, David

Advanced Programming Languages - Object Oriented Design and Programming (CS 535)
Codes: G P E B 2
Textbooks: Object-Oriented Software Construction
by Meyer
Tools: Effel language
VAX 785 running ULTRIX
New Hampshire

Dartmouth College
Department of Mathematics and Computer Science
Hanover, NH 03755

Degrees: BA, MS, PHD

Contact: Samuel W. Bent
Associate Professor
(603) 646-2760
User ID: sam.bent@dartmouth.edu

Update: October 1988

Courses: Software Design and Implementation (CS 23)

Codes: U P R O 2

Textbooks: Programming Pearls
by Bentley, Jon Louis
Software Engineering Concepts
by Fairley, Richard E.

Tools: C, Lightspeed Pascal
CONVEX
Macsintosh
VAX 11/785
AWK, LEX

Additional Information:
Software Design and Implementation is offered 2 terms a year. We previously had one course with data structures and a large programming project. We have subdivided it. Software Design and Implementation will emphasize software tools.

Update: None

Courses:

**Software Design Laboratory (W3152)**
- Codes: UPRT5
- Tools: Standard Unix tools available on SunOS

**Software Engineering (W4156)**
- Codes: BPY5
- Textbooks: *Software Engineering, 3rd ed.* by Sommerville, Ian

**Programming Environments and Software Tools (E6123)**
- Codes: GPEB2

**Special Projects in Computer Science (W3998, E6901, others)**
- Codes: BPE05
- Tools: Tops 20
- Unix

Additional Information:
Various projects in software engineering and other areas can be negotiated between 1 or more students and a faculty member. Often the projects involve a small piece of a faculty member's research and may be supervised by a Ph.D. student or research staff member.

Human Factors in Computing (565)
Codes: GNEB2

Textbooks: An Introduction to Human-Computer Interaction
by Booth
Tools: Prototyper
Hypercard
Oasis

Cleveland State University
James J. Nance College of Business Administration
Department of Computer and Information Science
Cleveland, OH 44115

Degrees: BS CIS, MS CIS

Contact: Prof. Thomas S. Heines
Chairman
(216) 687-4760

Update: November 1987

Courses: Structured Systems Analysis (CIS 433)
Codes: UPEO6
Textbooks: Structured Analysis Methods for Computer Information Systems
by Teague, Lavette C. and Pidgeon, Christopher

Structured Systems Design (CIS 434)
Codes: UPEO6
Textbooks: The Practical Guide to Structured Systems Design
by Page-Jones, Meilir
Tools: IBM 3081
IBM PC
COBOL, PSL/PSA, Structured Architect, dBase III

Software Engineering (CIS 620)
Codes: GPRO6
Textbooks: System-370 Job-Control Language
by Brown, Gary D.
The C Programming Language
by Kernighan, Brian and Ritchie, Dennis
Tools: IBM 3081
VAX 11/750

Systems Analysis and Design (CIS 634)
Codes: GPEO6
Textbooks: The Practical Guide to Structured Systems Design
by Page-Jones, Meilir
Tools: IBM 3081
IBM PC
Additional Information:
Structured Systems Analysis and Structured Systems Design are offered 2-3 times per year. Software Engineering is offered 3 times per year. Systems Analysis and Design is offered 2 times per year.

Kent State University
School of Arts and Sciences
Department of Mathematical Sciences
Program in Mathematics/Computer Science
Kent, OH 44242

Degrees: BS, MS, PHD

Contact: Prof. Michael Rothstein
Assistant Professor
(216) 672-2430

Update: May 1987

Courses: Software Engineering (63251)
Codes: GPEY6
Textbooks: Software Engineering by Sommerville, Ian
Tools: C, Pascal VAX 750 (Unix)

Software Engineering Projects (43107)
Codes: UPED3
Textbooks: Software Engineering by Sommerville, Ian
Tools: UNIX

Ohio State University
Department of Computer and Information Science
Columbus, OH 43210

Degrees: BS CIS, MS CIS, PHD CIS

Contact: Dr. Stu Zweben
Associate Professor
(614) 292-9526
User ID: ZWEBEN@CIS.OHIO-STATE.EDU
Network: Internet

Update: February 1990

Courses: Software Engineering (CIS 757)
Codes: BPEO5
Textbooks: Software Engineering: A Practitioner's Approach, 2nd ed. by Pressman, Roger S.
Tools: Sun workstations IDE STP Pascal, C

Systems Programming (CIS 560)
Codes: UPRT5
Textbooks: Systems Software, 2nd ed. by Beck
Tools: Sun workstations
IDE STP
Pascal

Information Systems Analysis and Design (CIS 516)
Codes: UPBT4
Textbooks: Structured Analysis Methods for Computer Information Systems by Teague and Pidgeon
Tools: Sun workstations
IDE STP

Software Testing (CIS 788.D12)
Codes: GPEY2
Textbooks: Selected readings

User Interface Development (CIS 788.10F)
Codes: BPEB4
Textbooks: Readings in Human Computer Interaction by Baecker and Buxton
Tools: PC, Macintosh, Sun, HP

Revisable Software Research Project (CIS 888.Z12)
Codes: GNET4

Software Engineering Project (CIS 788.12)
Codes: BPEO

Additional Information:
CIS 757 is offered 2 of 3 quarters per academic year.

Wright State University
College of Engineering and Computer Science
Department of Computer Science and Engineering
Dayton, OH 45435

Degrees: BA, BS, BS CE, MS, MS CE, PHD

Contact: Prof. Howard V. Carson
Assistant to the Chair
(513) 873-2491
User ID: cse_dept@wright.edu
Network: CSNET

Update: October 1986

Courses: Software Engineering I (Software Engineering 760)
Codes: GPEY1
Textbooks: Software Engineering Concepts by Fairley, Richard E.
Tools: compiler suitable to project
computer suitable to project
language suitable to project

Software Engineering II (Software Engineering 761)
Codes: GPEY1
Textbooks: Approaches to Prototyping by Budde, Reinhard
Tutorial: Software Reusability
by Freeman, Peter

Tools: compiler suitable to project
      computer suitable to project
      language suitable to project

Introduction to Software Engineering (Computer Engineering 460/660)
Codes: B P R T 1
Textbooks: Software Engineering Concepts
           by Fairley, Richard E.
           Software Engineering with Ada, 2nd ed.
           by Booch, Grady
Tools: VAX Ada compiler
       DEC VAX 11/785 running VMS

Concurrent Software Design (Computer Engineering 434/634)
Codes: B P R T 1
Textbooks: Advanced Programmers Guide to Unix SYSTEM V
           by Thomas, Rebecca and Yates, Jean
           Operating Systems Concepts
           by Peterson, James L. and Silberschatz, Abraham
           The C Programming Language
           by Kernighan, Brian W. and Ritchie, Dennis M.
Tools: C
       NCR Tower 32/600 running Unix System V

Additional Information:
Data Structures and Software Design (unlisted) involves some software engineering. A local area network of 8 Sun-3 Unix workstations with high resolution terminals, including 1 color display, were available in 1987 to provide a powerful software development environment.
Oklahoma

Rogers State College
Computer Science Division
Claremore, OK 74017

Degrees: AAS CAD, AAS CET, AAS CP, AS CS

Contact: Prof. Clifford D. Layton

User ID: eliason@cs.uoregon.edu

Update: October 1988

Courses: Software Methodology I (CIS 422)
Codes: U P R T 5
Textbooks: Software Engineering
by Sommerville, Ian
Tools: Scheme, Smalltalk
Prototyper, RCS/Unix
Sun SPARC, Macintosh II, Tektronix 4300

Software Methodology II (CIS 423)
Codes: U P E O 51
Textbooks: Software Engineering Concepts
by Fairley, Richard E.
The Practical Guide to Structured Systems Design
by Page-Jones, Meilir
Writing Efficient Programs
by Bentley, Jon Louis
Tools: C, RAPID, Smalltalk
Sun SPARC, Macintosh II, Tektronix 4300

Software Engineering (CIS 510)
Codes: G N R Y 11
Textbooks: Interactive Programming Environments
by Barstow, David R., Shrobe, Howard E., and Sandewall, Erik
Software Specification Techniques
by Gehani, Narain and McGettrick, Andrew D.
Tools: C, RAPID
Sun SPARC, Macintosh II, Tektronix 4300

Additional Information:
Software Methodology II is offered 2 to 3 times a year.
Other courses are offered in Expert Systems and Database Management Systems
at the graduate level.

Update: February 1990

Courses:

Software Engineering I (N677)
Codes: U P R Y 6
Textbooks: Software Engineering: Planning for Change
by Lamb, David
Tools: Lightspeed Pascal, Prime C, Sun 2.1 Modula-2
Sun, Macintosh, PC/AT
VDM
Proxy

Software Engineering II (N678)
Codes: U P E Y 6
Textbooks: Software Engineering: Planning for Change
by Lamb, David
Tools: Lightspeed Pascal, Prime C, Sun 2.1 Modula-2
Proxy
Sun, Macintosh, PC/AT
VDM

Software Engineering I (M745)
Codes: G P E B 6
Textbooks: Software Engineering: A Practitioner's Approach
by Pressman, Roger S.
Tools: Lightspeed Pascal, Prime C, Sun 2.1 Modula-2
Proxy
Sun, Macintosh, PC/AT
VDM

Software Engineering II (M746)
Codes: G P E B 6
Textbooks: Software Engineering: A Practitioner's Approach
by Pressman, Roger S.
Tools: Lightspeed Pascal, Prime C, Sun 2.1 Modula-2
Proxy
Sun, Macintosh, PC/AT
VDM

Topics In Software Engineering (M748)
Codes: G P E D 6

Lehigh University
College of Engineering and Physical Sciences
Department of Electrical Engineering
Bethlehem, PA 18015

Update: February 1990

Courses: Theorem Proving and Program Verification (675)
Codes: GPEX1
Textbooks: An Introduction to the General Theory of Algorithms by Machtay, M. and Young, P.
The Design of Well-Structured and Correct Programs
by Alagic, Saud and Arbib, Michael A.

Software Engineering (690)
Codes: G N E X 3
Textbooks: *Software Engineering: A Practitioner's Approach*
by Pressman, Roger S.
Tools: OPS5
  Pascal
  VMS

Information Systems Analysis and Design (201)
Codes: U P R T 1
Textbooks: *Elements of Systems Analysis*
by Gore, Marvin and Stubbe, John

Project in Information Science (301)
Codes: U P R T 1
Tools: AT&T 3B2
  PCs

Software Design (338)
Codes: U P E Y 1
Textbooks: *Reliable Software Through Composite Design*
by Myers, Glenford J.
  *Software Engineering: A Practitioner's Approach*
by Pressman, Roger S.
  Structured Design
by Yourdon, Edward N. and Constantine, Larry L.
Tools: IBM 4381 PCs

Additional Information:
  Business Administration programs with concentration in Computer and Information Science are offered.

Update: June 1987

Courses: Information Systems Analysis, Design, and Evaluation (INF SC 272)
Codes: GPE06
by Fitzgerald, Jerry and Fitzgerald, Arda
Tools: C, COBOL, FORTRAN, Pascal
IBM PC
Mac
VAX 780
VAX 8650

Software Engineering and Software Tools (INF SC 276)
Codes: GPE05
by Pressman, Roger S.

Additional Information:
Here are the projected schedules for the courses:
Information Systems Analysis, Design, and Evaluation
1988-89: Winter Term
1989-90: Fall Term
1990-91: Fall Term
Software Engineering and Software Tools
1988-89: Fall and Spring Terms
1989-90: Winter Term
1990-91: Spring Term
Villanova University
College of Liberal Arts and Sciences
Mathematical Sciences Department
Villanova, PA 19085

Degrees: BS CS, BS M, MS CS, MA M

Contact: Dr. Daniel Joyce
(215) 645-7344
User ID: djoyce@uvaxcom
Network: BITNET

Update: January 1989

Courses:
- Software Engineering (CSC 4700)
  Codes: U P R Y 4
  Textbooks: Software Engineering Concepts by Fairley, Richard E.
  The Mythical Man-Month: Essays on Software Engineering by Brooks, Frederick P.
  Tools: Logitech Modula-2/86, Turbo Pascal
  Zenith 386 Modula-2

- Software Engineering (CSC 8540)
  Codes: G N E Y 4
  Textbooks: Software Engineering: A Practitioner's Approach by Pressman, Roger S.

Additional Information:
One of the requirements for the Master's degree in Computer Science is writing an independent study. This often assumes the form of a major project, sometimes a group project, embodying principles of software engineering.
South Carolina

Clemson University
College of Sciences
Department of Computer Science
Clemson, SC  29634-1906

Update:  October 1987

Courses:

Software Development Methodology (CpSc 472/672)
Codes:  BPBT5
Textbooks:  Software Engineering
by Sommerville, Ian
Tools:  VAX cluster with VMS & ULTRIX
C, Module-2, Ada, C++
VAXset, dbx

Design and Programming Methodology (CpSc 872)
Codes:  GPET3
Textbooks:  Abstraction & Specification in Program Development
by Liskov & Gutttag
Software Design: Methods and Techniques
by Peters, Lawrence J.
Tools:  some tools

Software Verification, Validation, and Measurement (CpSc 873)
Codes:  GPEY4
Textbooks:  Selected readings

Introduction to Software Development (CpSc 372)
Codes:  UPR T
Textbooks:  Software Engineering: A Practitioner's Approach
by Pressman, Roger S.
Tools:  VAX cluster with VMS & ULTRIX
C, Module-2, Ada
VAXset, dbx

Additional Information:
Software Development Methodology is offered once or twice per year. Software
Verification, Validation, and Measurement is offered every 2 years when
demand warrants.

Update: September 1988

Courses: Software Engineering (222-3250)

Codes: U P R A 4

Software Engineering: A Beginner's Guide
by Pressman, Roger S.

Tools: Cadre's Teamwork
IBM PS/2 50, 80 -- OS/2 and MS-DOS
WordPerfect

Software Design (222-5300)

Codes: G N B Y 3

Textbooks: Software Engineering: A Practitioner's Approach
by Pressman, Roger S.

Tools: IBM PS/2
Teamwork PCSA

Advanced Programming Techniques (222-3310)

Codes: U P R A

Textbooks: Modern Structured Analysis
by Youdorn, Edward N.
Structured Systems Design
by Page-Jones, Mellir

Tools: IBM PS/2 50's and 80's
Cadre's Teamwork
Ada

Software Specification (222-5210)

Codes: G P E Y

Textbooks: The Specification of Complex Systems
by Cohen, Harwood, and Jackson

Tools: IBM PC
Pascal

Software Verification and Validation (222-5220)

Codes: G N B Y

Textbooks: Software System Testing and Quality Assurance
by Beizer, Boris

Tools: none used

Software Project Management (222-5230)

Codes: G P O Y 2

Textbooks: Managing Programming People

For an explanation of course codes, see page 19.
by Metzger, P. W.
Selected readings
Tools: IBM PS/2 50's and 80's
Cadre's Teamwork
Miscellaneous estimation and scheduling software
WordPerfect

Ethical Issues in the Use of Computers (222-5450)
Codes: G N E Y 1
Textbooks: Computer Ethics
by Johnson, Deborah
Selected readings

Fisk University
Natural Science and Mathematics
Department of Mathematics and Computer Science
Computer Science
Nashville, TN 37208-3051

Degrees: BS CS, BS M

Software Testing (CS 5133)
Codes: G P E O 1
Textbooks: The Art of Software Testing
by Myers, Glenford J.
Tools: VAX 11/780 with VMS

Additional Information:
Programming Methodology is offered in Fall and Spring semesters. Software Design, Software Configuration Management, and Software Testing are offered together in regular semester rotation. The graduate courses (5103, 5133, 5143) comprise a depth area of study for graduate students, who must develop at least 3 such areas in their course of study.
Additional Information:

UH-CL has a strong emphasis on the engineering of computer automated systems, which includes the integration and trade-off studies of issues involving software, hardware, and people. Therefore, several research projects and these have a strong component of software engineering. In addition, two system-level courses offered annually that contain such a component are Computer Automated Systems (CTEC 4532) and Synthesis of Computer Networks (CTEC 6532).

Additional Information:

At Seattle University, Software Engineering is viewed as an academic/professional discipline, which has its principal academic basis in computer science. Thus, the following graduate courses in computer science are also offered as technical electives in the MSE program:

ESW 500 Information Structures and Algorithms
ESW 501 Computer Systems Principles
ESW 541 Database Systems
ESW 551 Distributed Computing
ESW 553 Artificial Intelligence
ESW 564 Computer Graphics
ESW 566 Real Time Systems

Software Engineering Management (COSC 684)
Codes: GPOB1
Textbooks: Managing the Software Process
by Humphrey, W.S.
Tools: Ada
VAX 8800

Software Engineering Laboratory (COSC 685)
Codes: BPOB1

Software Management Laboratory (COSC 885)
Codes: GPEB

Additional Information:
COSC 885 Software Management Laboratory is pending. It would be operated
jointly with the Software Engineering Laboratory; members of this class
would act as team leaders.

For an explanation of course codes, see page 19.
Australia

Victoria

Royal Melbourne Institute of Technology
Information Technology Division
Melbourne, VC 3001, Australia

Degrees: BS CS, MS CS

Contact: Prof. Anthony Y. Montgomery
Head
660-2943
User ID: aym%goanna.oz@uunet.uu.net

Update: March 1990

Courses:

- Software Engineering 1 (CS280)
  Codes: UXRX1

- Software Engineering 2 (CS381)
  Codes: UXEX1
  Textbooks: Models and Measurements for Quality Assessment of Software by Mohanty, S.N.

- Software Engineering 3 (CS 387)
  Codes: UXEX1
  Textbooks: The Mythical Man-Month: Essays on Software Engineering by Brooks, Frederick P.

For an explanation of course codes, see page 19.
Canada

Alberta

The University of Alberta
School of Science
Department of Computing Science
Edmonton, AB T6G 2H1 Canada

Degrees: BS, MS, PHD

Contact: Dr. Paul Sorenson
Chairman

Update: December 1989

Courses: Software Engineering (CMPUT 401)
Codes: U P R T 4
Textbooks: Software Engineering Concepts
by Fairley, Richard E.
Tools: Modula-2, Pascal
Macintosh
Sun workstations (Unix OS)

Interactive Programming Environments (CMPUT 652)
Codes: G P E B 3
Textbooks: Interactive Programming Environments
by Barstow, David R., Shrobe, Howard E., and Sandewall, Erik
Tools: Cornell program synthesizer generator, Smalltalk
VAX systems (Unix OS)

Software Testing (CMPUT 501)
Codes: G P E B 3
Textbooks: Computer Program Testing
by Chandrasekaran, B. and Radioci, Sergio
Software Testing Techniques
by Belzer, Boris
Tools: VAX systems (Unix OS)

Specification and Verification (CMPUT 508)
Codes: G P E Y 3
Textbooks: Communicating Sequential Processes
by Hoare, C.A.R.
The Logic of Programming
by Hehner, E.C.
The Science of Programming
by Gries, David
Tools: VAX computer systems (Unix OS)
Various specification languages

For an explanation of course codes, see page 19.
British Columbia

University of Victoria
School of Arts and Sciences
Department of Computer Science
Victoria, BC V8W 2Y2 Canada

Degrees: BS, MS

Contact: Dr. Daniel Hoffman
Assistant Professor
(604) 721-7222

Update: June 1987

Courses: Software Engineering (CSC 365)
Codes: U P R T 6
Textbooks: The Mythical Man-Month: Essays on Software Engineering
by Brooks, Frederick P.
Tools: C, Pascal on UNIX 4.2
Pyramid
VAX 11/780

Implementation of Software Engineering Methods
Codes: B P E Y 3
Tools: C
Pyramid
Sun
VAX

Additional Information:
Software Engineering/Education Cooperative Project is a joint project with
IBM Canada. Its aim is to advance the state of the art in educational software.
Nova Scotia

Acadia University
Jodrey School of Computer Science
Department of Computer Science
Wolfville, NS BOP 1XO Canada

Degrees: BCS, MS

Contact: Dr. Leslie H. Oliver
Professor and Director
(902) 542-2201 x331
User ID: oliver@acadiau.ca
Network: BITNET

Update: October 1988

Courses: Software Engineering (Comp 3653)
Codes: U P B Y 4
Textbooks: Software Engineering: A Practitioner's Approach
by Pressman, Roger S.
Tools: Turbo Pascal, Unix C
PC-Compatible
Sun
Excelerator

Additional Information:
Acadia University also offers degrees in BCSH, BCSS Software, and BCSS Business Data Processing.

For an explanation of course codes, see page 19.
Ontario

Queen's University
Faculty of Arts and Science
Department of Computing and Information Science
Kingston, ON K7L 3N6 Canada

Degrees: BS, MS

Contact:
Dr. David A. Lamb
Assistant Professor
(613) 545-6067
User ID: dalamb@qucis.wiscvm
Network: BITNET

Update: June 1987

Courses:
- Modules and Specifications (CISC 322)
  Codes: UPEY2

- Software Engineering (CISC 422/CISC 838)
  Codes: UPEY4

Textbooks:
- Software Engineering: Planning for Change
  by Lamb, David

Tools:
- IBM Pascal/VS
- IBM 3081 under VM/CMS

Additional Information:
As a senior thesis, computing majors take CISC-499, a course where
(working by themselves, supervised by a faculty member) they complete
a substantial programming project.

University of Ottawa
Faculty of Science
Department of Computer Science
Program in Computer Science
Ottawa, ON K1N 9B4 Canada

Degrees: BS, MCS

Contact: Dr. H. Ural
Associate Professor
(613) 564-5092
User ID: HURSL@UOTTAWA
Network: BITNET

Update: October 1988

Courses:
- Software Engineering I (CSI 3111)
  Codes: UPRY4

Textbooks:
- Software Engineering: A Practitioner's Approach
  by Pressman, Roger S.
- Software Engineering Concepts
  by Fairley, Richard E.

Tools: Pascal, Ada, Prolog

- Software Engineering II (CSI 4112)
Software Testing: Theory and Practice (CSI 5111)
Codes: G N E Y 7
Textbooks: Selected readings

Software Engineering (CSI 5112)
Codes: G N E Y 5
Textbooks: Selected readings
Tools: VAX 750
Modula II, Ada

Additional Information:
The University of Ottawa also offers the following programs:
B.Sc. Major and Honours with General Computer Science
B.Sc. Major and Honours with Information and Management System
Software Engineering (offered in the Winter and Summer terms)
Software Engineering I (offered twice a year)
courses in Ada (Ada Language Concepts, CSI 2161) and Modula-2
(Modula-2 Language Concepts, CSI 2169) are also offered.

University of Waterloo
Faculty of Mathematics
Department of Computer Science
Waterloo, ON N2L 3G1 Canada

Degrees: BM, MM, PHD

Contact: Dr. David Taylor
(519) 888-4432
User ID: dtaylor@saugeen.waterloo.edu

Update: October 1988

Courses: Applications Software Engineering (CS 430)
Codes: U P E Y 1
Textbooks: Software Engineering: A Practitioner’s Approach, 2nd ed.
by Pressman, Roger S.

Business System Analysis (CS 432)
Codes: U P E O 1
Textbooks: Information Systems Analysis: With an Intro to 4th Generation Technologies
by Hall, V.J. and J.W. Mosevich
Tools: IBM PC

Software System Design and Implementation (CS 446 and CS 646)
Codes: B P E T 1
Textbooks: Software Engineering: A Practitioner’s Approach, 2nd ed.
by Pressman, Roger S.

Techniques In Systems Analysis (CS 482)
Codes: U P E T 1
Textbooks: Information Systems Analysis: With an Intro to 4th Generation Technologies
by Hall, V.J. and J.W. Mosevich

Additional Information:
Applications Software Engineering and Techniques in Systems Analysis are offered in the Fall and Spring terms.
Quebec

Concordia University
Faculty of Engineering and Computer Science
Department of Computer Science
Montreal, PQ H3G 1M8 Canada

Degrees: BCS, MCS, PHD

Contact: Prof. Pankaj Goyal
Associate Professor
(514) 848-3018

Update: March 1990

Courses: Software Engineering (COMP 354)
Codes: UPRT2
Textbooks: Software Engineering Concepts
by Fairley, Richard E.
Tools: Sun-C, Sun-Pascal
Sun workstations (network)

Additional Information:
We offered an Ada-Language Laboratory during the 1987-88 academic year.
Several compilers were under evaluation.

McGill University
School of Computer Science
Montreal, PQ H3A 2K6 Canada

Degrees: MS, PHD

Contact: Prof. Nazim H. Madhavji
Professor
(514) 398-7073

Update: None

Courses: Advanced Topics (Software Engineering) (308-762A)
Codes: GPEY5
Textbooks: Software Development: A Rigorous Approach
by Jones, C.B.
Software Engineering
by Sommerville, Ian
Software Engineering Environments
by Hunke, H.
Software Engineering with Modula-2 and Ada
by Wiener, Richard and Sincovec, Richard
Tools: Cambridge Modula-2, Modula-2/68, Powell Modula-2
Sun 3
VAX 11/780

Advanced Topics (Programming Environments) (308-767B)
Codes: GPEY3
Textbooks: Interactive Programming Environments
by Barstow, David R., Shrobe, Howard E., and Sandewall, Erik
Tools: Cambridge Modula-2, Modula-2/68, Powell Modula-2

For an explanation of course codes, see page 19.
Additional Information:
The School offers research study (M.Sc. and Ph.D.) in software engineering as well as offering software engineering projects for masters students.

University of Quebec at Montreal

Update: October 1988

Courses: Business Information Systems (CS 270)
Codes: U P R T 11
Textbooks: *Elements of Systems Analysis, 4th ed.*
by Gore, Marvin and Stubbe, John W.
Tools: IBM PC AT
Excelerator InTech

Advanced Systems Analysis and Design (CS 372)
Codes: U P E Y 4
Textbooks: *Introduction to Systems Analysis and Design: A Structured Approach*
by Kendale, Penny A.
Tools: UNIX C
Berkeley 4.2 UNIX on VAX 750
C programming language

Project Management for Data Processing Applications (CS 373)
Codes: U P E T 5
Textbooks: *Managing Computer Resources, 2nd ed.*
by Hussain and Hussain

Advanced Topics in System Software (CS 430)
Codes: U P E O
Textbooks: *Distributed Databases, Principles & Systems*
by Stefano, Ceri, Giuseppe and Peilatti

Advanced Topics in Database Systems (CS 470)
Codes: U P E Y
Textbooks: *An Introduction to Database Systems, 3rd ed.*
by Date, C.J.
Tools: INGRES, DB2/SQL

Introduction to Database Systems and Document Storage and Retrieval (CS 375)
Codes: U P E T
Textbooks: *The Database Book*
by Loomis, Mary E.S.
Tools: INGRES

Additional Information:
CS 430 is offered every other year.

User ID: SCHEEL@TECMTYVM
Network: BITNET, Internet

Update: March 1990

Courses:

Software Engineering (SI-151)
Codes: GRY4
Textbooks: Software Engineering: A Practitioner's Approach
by Pressman, Roger S.
Software Engineering Concepts
by Fairley, Richard E.
Tools: Module-2, C, 4th Dimension
VAX, MICRO-VAX, IBM 4381
IBM PS/2 Model 50/80
ALTOS

Advanced Programming Techniques (SI-150)
Codes: GRY4
Textbooks: Fourth Generation Languages, vol. I-III
by Martin, James
Interactive Programming Environments
by Barstow and Shrobe
Tools: Oracle, Inc. IEW
VAX 3681, UNISYS A3, IBM 4381

Programming Design (CB-150)
Codes: GNRB4
Textbooks: Programming by Design
by Miller and Miller
Software Tools in Pascal
by Kernighan, Brian and Plauger
Tools: Pascal, C
IBM PS/2 Model 50/80
IBM 4381

Information Engineering (SI-154)
Codes: GRY1
Textbooks: Information Engineering
by Martin, J. and Finkelstein, C.
Strategic Data-Planning Methodologies
by Martin, J.
Tools: C, Pascal, Oracle
IBM 4381, IBM PS/2 Model 50/80
VAX

Stirling, SL FK9 4LA United Kingdom

Degrees: BS, MS

Contact: Dr. David Budgen
(44) 786 73171
User ID: db@uk.ac.stir.cs
Network: JANET

Update: March 1990

Courses:
Software Engineering (31W7)
Codes: UNBY7
Textbooks: Software Engineering, 3rd Edition
by Sommerville, Ian
The Craft of Software Engineering
by Macro, Allen and Buxton, John
The Mythical Man-Month: Essays on Software Engineering
by Brooks, Frederick P.
Tools: CASE Tools: Teamwork

Formal Specification (SE2)
Codes: G N R Y 3
Textbooks: Introduction to Discrete Mathematics for Software Engineering
by Denor, Tim
Tools: 3B15 Computer
HP Unix Workstations

Additional Information:
Our degree programmes are fairly structured, and so we can put a software
eering bias into many of the course units that are not specifically
concerned with software engineering themes (e.g., the course unit on
concurrency). The two course units listed are those that concentrate on
specific areas of software engineering itself.

University of Strathclyde
