DFSC HANDBOOK
NO. 4120.1

1 Dec 86

FOREWORD
(Supplementation is prohibited.)

This handbook provides a single reference for commodities procured by DFSC and those specifications (SPECS) and standards (STDs) utilized in the procurement of these commodities. It does not list all supporting SPECS referenced in any specific petroleum product SPEC or STD covering equipment used in connection with petroleum products.

A copy of this handbook is distributed to each company on the Solicitation Mailing List. Additional copies may be obtained from:

Defense Fuel Supply Center
ATTN: DFSC-DU
Cameron Station
Alexandria, VA 22304-6160
Telephone: AUTOVON: 284-7428
Commercial: Area Code 202-274-7428

Copies of Military (MIL) SPECS and STDs listed herein and in the DoD Index of Specifications and Standards (DoDISS) may be obtained by direct request from:

Commander
Naval Publications and Forms Center (NPFC)
5801 Tabor Avenue
Philadelphia, PA 19120-5002

NOTE: DFSC DOES NOT STOCK SPECS AND STDs.

Prospective suppliers are cautioned that all bids must be submitted strictly on the basis of those SPECS cited in the DFSC Invitation for Bid (IFB) or Request for Proposal (RFP). Prospective suppliers should review this list to ensure that the company file of SPECS and STDs is complete so that suitable bids may be submitted upon receipt of IFBs or RFPs.

In certain instances petroleum product SPECS and the Federal Acquisition Regulation (FAR) require that the applicable products be qualified by passing specified tests prior to the award of a contract to a supplier. Consequently, prospective suppliers of those products are encouraged to obtain the required qualification(s) as soon as possible for inclusion in the published Qualified Products List (QPL). DFSC can consider awarding a contract for products requiring qualification only to bidders who offer items that have been tested and qualified prior to the time of the bid

DFSCH 4120.1

opening. Those SPECS requiring product qualification are identified by a coded symbol shown in a separate column. Section X identifies the Military activity to which inquiry concerning qualification requirements should be addressed.

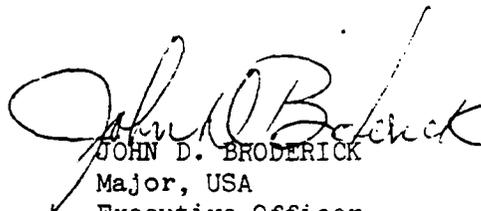

In order to maintain technological progress and effect economies and standardization, SPECS utilized by DoD are constantly changing. Every effort is made to have this handbook complete and current as of the date of publication. Revisions will be issued periodically as required.

This handbook will not be used as a substitute for departmental handbooks, technical-use instructions, or other documents specifying the application of petroleum and related products.

SIGNIFICANT CHANGES. There are many changes to listed SPECS and STDs, new items have been added, and some deletions have occurred.

Users of this publication are encouraged to submit recommended changes and comments to improve the publication to HQ DFSC, ATTN: DFSC-DU.

BY ORDER OF THE COMMANDER

JOHN D. BRODERICK
Major, USA
Executive Officer

SECTION I
INFORMATION ON DFSC

I. The primary mission of DFSC is to procure refined petroleum products and related services for the Military Services and Government agencies worldwide.

II. There are several buying divisions that handle acquisitions. General descriptions of the types of supplies and services bought by these divisions are listed below. Contacts for procurement should be made to DFSC, Cameron Station, Alexandria, VA 22304-6160. Attention lines and telephone numbers for each Division are also listed below.

A. BULK FUELS

Bulk fuels are purchased on an origin or destination basis and are shipped by tanker, barge, pipeline, rail tankcar, and road tanktrucks. This Division has four sections, three that handle the domestic requirements which are generally purchased from U.S. suppliers, and one that handles the overseas requirements which are usually purchased from foreign sources. These are very large programs and the contracts are generally negotiated.

PRODUCTS:

Jet Fuel
Propellant Kerosene
Aviation Gasoline (AVGAS)
Motor Gasoline (MOGAS)
Diesel Fuel Oil
Navy Special Fuel Oil
Fuel Oils

CONTACT:

ATTN: DFSC-PZ
Telephone: AUTOVON: 284-7453
Commercial: Area Code 202-274-7453

B. GROUND FUELS

This Division buys ground products for the Military Services and Federal agencies located in the continental United States (CONUS) and overseas. Most of the deliveries are made in contractor-furnished vehicles to applicable installations. Generally, the IFB is used for the domestic requirements and the RFP is used for the overseas items.

PRODUCTS:

Diesel
Gasoline
Heating Fuel
Residual

DFSCH 4120.1

CONTACT: ATTN: DFSC-PE
Telephone: AUTOVON: 284-7840
 Commercial: Area Code 202-274-7840

C. SPECIALTY FUELS

This Division is responsible for providing product and refueling services at commercial airports and ship bunkering at various customer ports. They also buy bulk lubricants (lube oils) for ship and aircraft engines, fuel system icing inhibitors (FSII), and U.S. coal for direct delivery to our domestic and overseas (Germany) installations.

CONTACT: ATTN: DFSC-PH
Telephone: AUTOVON: 284-7411
 Commercial: Area Code 202-274-7411

D. SPECIAL ACQUISITIONS

This Division is responsible for worldwide contracting for aircraft refueling and defueling at Military bases, commercial petroleum storage, quality surveillance representative (QSR) services for the re-refining of off-specification products, operation of Government-owned terminals, petroleum drumming and related services, laboratory testing of Government-owned petroleum products, and petroleum blending. This Division also has responsibility for contracting for commercial activities, special studies, and base contracting support for HQ DLA, the DLA Administrative Support Center (DASC), and DASC supported activities.

CONTACT: ATTN: DFSC-PS
Telephone: AUTOVON: 284-8362
 Commercial: Area Code (202) 274-8362

E. SYNTHETIC FUELS

DFSC has recently been assigned the responsibility for integrating synthetic fuels (SYNFUELS) into the logistics system, procuring test fuels for the Military departments, and assisting DoD and the Synthetic Fuels Corporation in developing an industrial base for the production of DoD SYNFUELS. DFSC is actively pursuing SYNFUELS goals as a customer for this developing industry. A broad range of products meeting SYNFUELS SPECS are encouraged from many sources including shale, coal, tar sands, heavy oil, and biomass.

III. A solicitation mailing list is used by DFSC to automatically notify all potential suppliers of new requirements being solicited in their area of interest. This mailing list is comprised of contractors who have expressed an interest in furnishing Government requirements. The first step to being considered as a potential supplier is to completely fill out and submit to DFSC, a Standard Form (SF) 129, Solicitation Mailing List Application. Applications for placing your company's name on the DFSC Solicitation Mailing List may be obtained by requesting the SF 129 from:

SECTION IIGENERAL INFORMATION

The Small Business Administration (SBA), General Services Administration (GSA), Department of Labor (DOL), and the Department of Commerce (DOC) have field offices in many cities which are equipped to assist business firms in locating opportunities to participate in Federal procurement. In addition to these offices, there are a number of publications available which set forth guidelines for doing business with the Government and provide the locations of Military procuring activities. One of these publications is entitled, "Selling to the Military." This pamphlet is intended to provide business firms, which have little or no experience in selling their products or services to DoD, with basic steps and initial contacts for locating sales opportunities.

Copies of this publication may be obtained for \$1.80 per copy (price subject to change) from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-4231, or from any field office of DOC.

I. Commerce Business Daily

A. An important source of information in identifying Federal procurement is the "Commerce Business Daily," which is published daily, Monday through Friday. This publication lists proposed procurements of Federal agencies, subcontracting opportunities offered by Defense prime contractors, recent contract awards which provide leads for additional subcontracting opportunities, surplus sales information, and other pertinent information on Federal procurement activities.

B. This publication is available by subscription for \$160.00 per year for first-class mail and \$81.00 per year for second-class mail (prices subject to change). To order, send remittance with full name and address to the nearest DOC field office or the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-4231.

II. SPECS/STDs Used by DoD

Automatic distribution of SPECS/STDs to DFSC bidders will be made by NPFC. NPFC has been designated as the DoD single stocking point (DoD-SSP) for all documents listed in the DoDISS.

III. Packaging, Packing, and Marking of Petroleum and Related Products

A. Packaging, packing, and marking of petroleum products must be accomplished as specified in MIL STD 290, Packaging, Packing, and Marking of Petroleum and Related Products. The packaging and packing level will be as required in individual solicitations.

B. NPFC has assumed this function and will continue automatically distributing petroleum and related product SPECS to DFSC bidders of record. Requests for individual SPECS or changes in the number or category of SPECS should be made to the following address: Commander, NPFC, 5801 Tabor Avenue, Philadelphia, PA 19120-5002.

IV. Quality Requirements

A. **Qualified Products:** Certain items procured by DFSC are termed, "qualified products." A qualified product is one that is governed by SPECS containing certain STDs of performance for which a manufacturer's product must be tested and approved prior to bid opening. Since only those products which have been tested and qualify for inclusion on the QPL prior to bid opening are considered for award, you are urged to qualify your products as soon as possible. Those SPECS which require product qualifications and the qualifying activity are listed in section X of this book.

B. **Quality Assurance:** Quality assurance in accordance with contractual requirements is the responsibility of the supplier. The Government reserves the right to inspect all products prior to final delivery and acceptance. Inspection may be made at source or destination. QSRs are available worldwide for assistance with quality problems.

V. Set-Aside for Small Business Firms

DoD and other Federal agency regulations provide that procurements, either total or partial, may be set-aside exclusively for small business concerns. To be classified as a small business concern the following criteria are applied: The firm must be independently owned and operated, the firm is not dominant in the field of operation in which it is bidding, and can qualify under other criteria established by the SBA. The SBA's determination of contractor classification generally is based on its number of employees and other factors pertinent to the industry.* DFSC along with other procuring activities has a small business specialist, who will provide counselling and guidance in this area. The address for the DFSC Small Business Specialist is:

Defense Fuel Supply Center
ATTN: DFSC-DU
Cameron Station
Alexandria, Virginia 22304-6160
Telephone: AUTOVON: 284-7428
Commercial: Area Code 202-274-7428

VI. Set-Aside for Firms in Labor Surplus Areas

It is the policy of DoD to aid labor surplus areas. In order to carry out this policy, a portion of a procurement may be set-aside for negotiations of contracts with concerns which will perform (or cause to be performed) in a labor surplus area. This Center's participation in set-asides for firms in labor surplus areas is limited to the procurement of coal only.

*The size standard for each procurement is cited in the solicitation.

SECTION VIILISTING OF SPECs FOR PACKAGING, PACKING, AND MARKING

<u>SPEC/STD NUMBER</u>	<u>TITLE OF SPEC/STD</u>
PPP-D-723	DRUMS, FIBER
PPP-D-729	DRUMS, METAL, 55-GAL (FOR SHIPMENT OF NONCORROSIVE MATERIAL)
PPP-D-1152	DRUMS, STEEL, 55-GAL, (24- AND 21-GAGE), REINFORCED
PPP-F-320	FIBERBOARD, CORRUGATED AND SOLIDS, SHEET STOCK (CONTAINER GRADE) AND CUT SHAPES
PPP-P-420	PLUGS AND FLANGES (FOR DRUM CLOSURES)
PPP-P-704	PAILS, METAL (SHIPPING, STEEL, 1- THRU 12-GALLON)
PPP-T-60	TAPE, PACKAGING, WATERPROOF
PP-T-97	TAPE, PRESSURE-SENSITIVE, ADHESIVE, FILAMENT, REINFORCED
PPP-T-1637	TUBES, SHIPPING, COLLAPSIBLE
QQ-S-781	STEEL STRAPPING, FLAT
TT-E-485	ENAMEL, SEMI-GLOSS, RUST-INHIBITING
TT-E-489	ENAMEL, ALKYD, GLOSS (FOR EXTERIOR AND INTERIOR SURFACES)
TT-E-515	ENAMEL, ALKYD, LUSTERLESS, QUICK-DRYING
TT-I-1795	INK, MARKING STENCIL, OPAQUE, FOR NON-POROUS SURFACES (METALS, GLASS, ETC.)
TT-L-26	LACQUER, CELLULOSE NITRATE, BRUSHING GLOSS
TT-L-40	LACQUER, LUSTERLESS, OBLITERATING
TT-V-121	VARNISH, SPAR, WATER-RESISTING
UU-T-81	TAGS, SHIPPING AND STOCK

SECTION VIIILISTING OF PUBLICATIONS OF SPECIAL INTEREST

<u>PUBLICATION IDENTITY</u>	<u>TITLE OF PUBLICATION</u>
