DEFINITIONS

1. DoD Civilian Career Knowledge Test (DoD CCKT). A test to determine the extent of an individual's knowledge compared to information imparted through training received in a mandatory career training program. Passing the test establishes equivalency of training received by the individual as equal to such mandatory career training programs.

2. DoD Controlled Test Materials. All test materials and related materials which require special handling, storage, and disposal.

3. DoD Test Control Officer (TCO). The individual at an installation charged with responsibility for receipt, storage, control, administration, and if necessary, the disposal of all DoD controlled test material.

4. DoD Test Administrator (TA). The individual at an installation assigned to administer and monitor all DoD knowledge tests.
A. APPLICABILITY

The provisions of this manual apply to all DoD Components and all civilian positions and employees for which a DoD-wide career program has been established under the provisions of DoD Instruction 1430.10 (reference (a)).

B. ASSIGNMENTS AND RESPONSIBILITIES

1. The Secretary of the Army is the designated Executive Agent for the DoD Civilian Career Knowledge Testing Program, under authority contained in DoD Directive 1430.2 (reference (b)). Under the overall guidance of the Assistant Secretary of Defense (Manpower, Reserve Affairs and Logistics), the Executive Agent will:

   a. Assure that DoD tests, test administration manuals, supplemental instructions, and related materials are published and distributed.

   b. Utilize the technical assistance of the OSD Principal Staff Assistant or designated Career Management Board as provided for in DoD Instruction 1430.11 (reference (c)), in the development and evaluation of tests for DoD-wide use in career fields within their respective area of responsibility.

   c. Issue as a supplement to this manual a DoDCCKT catalog of equivalent examinations which will be reviewed annually.

   d. Assure evaluation of tests by coordinating with the DoD schools having proponent responsibility for the tests.

2. Each DoD Component will:

   a. Designate Test Control Officers (TCO's) (preferably for each servicing civilian personnel office and Test Administrators (TA's). An alternate capability would be to utilize the Defense Activity for Nontraditional Education Support (DANTES) TCO's.

   b. If TCO's are appointed, furnish the Executive Support Agent (Commandant, Army Logistics Management Center, ATTN: DRXMC-ACM-EE, Fort Lee, Virginia 23801) with a current listing of TCO organizational symbols and mailing addresses; updated as changes occur.

   c. Take such steps as may be necessary to assure the proper receipt, storage, control, and administration of DoDCCKTs, as directed by the Executive Support Agent.

3. Those DoD Components which already have TCOs and TAs may assign the same individuals as DoD TCOs and TAs, or utilize DANTES TCO's. DoD-DANTES Test Control Officers will:
a. Packages of DoDCCKT materials mailed to activities administering tests will be addressed to the attention of the Test Control Officer. Under no circumstances will shipping or mailing labels (including postal registry labels) or outside wrappings of a carton, bundle, or envelope indicate that the package contains DoDCCKT materials.

b. The sender may include numerical codes for his own information if he desires.

c. Enclose controlled items in two separately sealed envelopes or wrappings.

d. Inner envelope or wrapping must be marked plainly on all sides as follows: CONTROLLED ITEM - DO NOT OPEN - FOR TEST CONTROL OFFICER ONLY. Place stamping over tape or seal in such a manner as to expose any attempt to compromise contents.

4. Disposition of Damaged Test Materials

a. Damaged DoD controlled test materials will be returned to ALMC, ATTN: DRXMC-ACM-EE, with a statement (if known) as to how the materials were damaged.

b. The ALMC will destroy the materials in accordance with appropriate regulations.

5. Compromise or Loss of Controlled Materials

a. Careful control of all materials must be exercised at every point in handling, storage, use and disposition.

(1) Procedures should be locally developed to assure control during administration of test so that all controlled items are continuously accounted for.

(2) Field activities should conduct continuous surveillance to detect collusion to compromise tests.

b. If DoD controlled test materials are compromised or lost, the CPO shall notify the Executive Support Agent immediately, and provide the following information:

(1) Complete name and serial numbers of missing items;

(2) Amount of material lost or compromised (e.g., whole test or part of a test);
