10. DESCRIPTION OF PROPOSED CONSTRUCTION								
Reinforced concrete pile supported concrete pier providing berthing for six Patrol Coastal (PC) ships, concrete launching and recovery ramp for small craft, demolition of pier 15, dredging to navigable depths; rock revetment; pier hotel utilities including electrical power, potable water, telephone, and oily waste. Air conditioning: 0 tons								
11. REQUIREMENTS: 1,260 FB ADEQUATE: 354 FB SUBSTANDARD: 508 FB								
<b>PROJECT:</b> Provide berthing pier for PC ships including launching, recovery and repair space to support small craft.								
<b>REQUIREMENT:</b> Six PC ships will be assigned to Special Boat Squadron One at NAB Coronado. Berthing pier must provide all utility requirements to ships when ship engines are shut down including electrical, telephone, sewage, potable water and oily waste. Accessory small boat ramp is needed to support existing small craft operations.								
<b>CURRENT SITUATION:</b> There is no pier at NAB Coronado with adequate capacity to support PC ships. Existing piers were built for small craft. PC ships cannot be supported due to shallow depth of water, small size of piers and inadequate utility services. Ships will be temporarily berthed across the bay.

10. DESCRIPTION OF PROPOSED CONSTRUCTION								
<p>All labor, materials, and equipment necessary to provide medium load Portland cement concrete over aggregate base pavement, tie-downs, grounding, drainage, area lighting, security lines, and related pavement markings. Project includes demolition and replacement/relocation of TACAN facilities/equipment and their related utilities. Demolition includes asbestos survey, removal and disposal. Project includes wetlands remediation/mitigation. Air Conditioning: 10 tons</p>								
11. REQUIREMENTS: 549,011 SY ADEQUATE: 463,011 SY SUBSTANDARD: 0								
PROJECT: Construct parking apron for currently assigned and future relocated aircraft.								
REQUIREMENT: Provide parking and taxi areas for currently assigned and future relocated aircraft. Space is required for parking, loading, unloading, servicing, and fueling.								
CURRENT SITUATION: Aircraft parking is inadequate for currently assigned aircraft and will be further impacted by the projected increase in aircraft. Current apron space is operated under waivers to provide parking for the assigned AC-130, MC-130, and MH-53 aircraft. Additional parking ramp does not exist for the MH-60G aircraft recently relocated from Eglin to Hurlburt and future HC-130 aircraft. The MH-60G aircraft were relocated due to the adverse impact on mission preparation and execution created by their								

1. COMPONENT USSCOM	FY1995 MILITARY CONSTRUCTION PROJECT DATA	2. DATE FEB 1994																						
3. INSTALLATION AND LOCATION  EGLIN AUX FIELD 9, FLORIDA																								
4. PROJECT TITLE SOF AIRCRAFT PARKING		7. PROJECT NUMBER PTEV953005																						
<p>physical separation from Hurlburt. Commanders and other personnel had to commute daily between Hurlburt and Eglin to resolve problems associated with operations planning, supply support, and vehicle/aircraft maintenance. While only 15 miles, the trip normally takes 40-45 minutes and includes traversing a portion of both bases and county roads. Project includes removal of asbestos from demolished TACAN facility.</p> <p><b>IMPACT IF NOT PROVIDED:</b> Current assigned aircraft will continue to lack adequate space to park. Hurlburt will be unable to accept future aircraft. Physical separation of aircraft from Hurlburt will continue to adversely affect mission preparation and execution because of impacts to communications and logistic support. Insufficient parking space affects safety and creates a hazardous situation. The lack of adequate parking for aircraft equates to high accident potential resulting from crowded conditions. Increased financial loss could occur during an accident if multiple closely parked aircraft are involved. Operational Security (OPSEC) will continue to be compromised because mobilization at two locations increases the public's awareness of real world deployments and operations.</p> <p><b>ADDITIONAL:</b> There is no criteria/scope for this project in Part II of Military Handbook 1190; "Facility Planning and Design Guide." Furthermore, there is no criteria/scope specified in Air Force Manual 86-2, "Standard Facility Requirements."</p>

10. DESCRIPTION OF PROPOSED CONSTRUCTION								
Reinforced concrete foundation and floor slab, masonry walls and pitched roof system. Area includes space for secure and unsecure classrooms, secure auditorium, administration, and three high bays for simulators. Also included are fire detection and suppression system, utilities, relocation of ballfield, partial demolition and alteration of existing buildings and other necessary support. Air conditioning: 500 tons.								
11. REQUIREMENTS: 180,453 SF ADEQUATE: 81,213 SF SUBSTANDARD: 24,909 SF								
PROJECT: Construct an aircrew training facility.								
REQUIREMENT: Adequate academic training space is required to provide initial qualification and refresher training for special operations and conventional combat rescue aircraft (UH-1N, TH-53A, MH-53J, MH/HH-60G, HC-130P/N, and MC-130E/H). Space is required to house and support two motion simulators, four part task trainers, classrooms and offices. Simulator training, vice inflight training, is required to provide a safer and more cost effective training environment.

<p><b>SUPPORTING FACILITIES (continued)</b></p> <table border="0"> <tr> <td>UTILITIES</td> <td>LS</td> <td></td> <td></td> <td>(267)</td> </tr> <tr> <td>PAVEMENTS</td> <td>SY</td> <td>3,150</td> <td>37</td> <td>(117)</td> </tr> <tr> <td>SITE IMPROVEMENTS</td> <td>LS</td> <td></td> <td></td> <td>(75)</td> </tr> <tr> <td>COMMUNICATION SUPPORT</td> <td>LS</td> <td></td> <td></td> <td>(214)</td> </tr> <tr> <td>ASBESTOS ABATEMENT</td> <td>LS</td> <td></td> <td></td> <td>(230)</td> </tr> <tr> <td>DEMOLITION/ALTER EXISTING BLDG</td> <td>LS</td> <td></td> <td></td> <td>(246)</td> </tr> <tr> <td>PREWIRED WORKSTATIONS</td> <td>LS</td> <td></td> <td></td> <td>(187)</td> </tr> <tr> <td>RELOCATE BALLFIELD</td> <td>LS</td> <td></td> <td></td> <td>(64)</td> </tr> </table> <p><b>CURRENT SITUATION:</b> Aircrew training currently occurs in five facilities, two of which are substandard and unable to support simulator training operations for the following reasons. Major electrical problems exist in the two substandard facilities. Fire hazards, OSHA, life safety violations and HVAC problems also exist. Less costly, but still serious mechanical and electrical failures are occurring with increasing frequency rendering the situation unacceptable. One of the substandard facilities has had two additions. The two substandard facilities are to be torn down and the two additions are to remain. The remaining space deficit is for non-SOF aircraft and will be satisfied by the Air Force in out-year programs. In FY95, training of SOF MC-130E/H will transfer from Hurlburt Field, FL to Kirtland. A substantial ramp up of the ACC combat rescue MH/HH-60G aircraft program is similarly scheduled. While the overall student load at Kirtland only increases by 350 students, the SOF training requirement will increase from 1400 students in FY92 to 2250 by FY95. This increase requires additional space for two simulators to meet formal school and continuation training needs. Present commitments of base facilities preclude meeting this need with existing buildings. Additionally, no other base buildings are available to meet the simulator mission requirements without displacing other missions.</p> <p><b>IMPACT IF NOT PROVIDED:</b> The special operations and combat rescue training missions will be jeopardized. Without this facility, the formal school at Kirtland will be unable to accept the flight simulators, which are already under contract. Formal training for aircrews is based on a higher simulator to flying hour ratio than other weapon systems. If this facility is not constructed, the 542 CTW must increase its costly flying hours to ensure properly trained aircrews. Absence of new facility will result in penalty costs of as much as \$300,000 per month for housing and operating the flight simulators at the factory vice the school.</p>			UTILITIES	LS			(267)	PAVEMENTS	SY	3,150	37	(117)	SITE IMPROVEMENTS	LS			(75)	COMMUNICATION SUPPORT	LS			(214)	ASBESTOS ABATEMENT	LS			(230)	DEMOLITION/ALTER EXISTING BLDG	LS			(246)	PREWIRED WORKSTATIONS	LS			(187)	RELOCATE BALLFIELD	LS			(64)

ITEM					U/M	QUANTITY	UNIT COST	COST (\$000)
UNSPECIFIED MINOR CONSTRUCTION					LS	-	-	4,020
10. DESCRIPTION OF PROPOSED CONSTRUCTION Budget Subactivity: Unspecified Minor Construction  Title 10 USC 2805 provides statutory authority to carry out military construction projects not otherwise authorized by law. A minor military construction project is a military construction project (1) that is for a single undertaking at a military installation, and (2) that has an approved cost equal to or less than the amount specified by law as the maximum amount of a minor construction project, currently \$1,500,000 per project.								
11. REQUIREMENTS: The amount requested is considered a very conservative estimate to provide the capability to react to requirements for construction, alteration, or modification of facilities resulting from (1) unforeseen situations affecting mission performance or safety of life or property, and (2) opportunities to attain greater efficiency of operation whereby investment costs are rapidly offset through savings in maintenance and operation costs.								
12. SUPPLEMENTAL DATA: a. Estimated Design Data: Not applicable. b. Equipment Provided From Other Appropriations: Not applicable.

PLANNING AND DESIGN				LS	-	-	5,713
10. DESCRIPTION OF PROPOSED CONSTRUCTION Funds are to be utilized for advance planning and preparation of final plans and specifications for construction requirements of the U.S. Special Operations Command including, when required, land appraisals, overall engineering investigations and feasibility studies.							
11. REQUIREMENTS: The estimated costs for projects do not include any amounts for preliminary engineering or final plans and specifications. The accomplishment of the planning and design effort required to develop and execute the construction program for the U.S. Special Operations Command is dependent on the provision of funds proposed by this item.
