This report provides data on the amount of green space, length of roads, and amount of retail floor space in selected Soviet cities. Information on these subjects is fragmentary and in most cases not reported except for housing and retail floor space, which is reported for the oblast, republic, and national aggregates. Most of the information in this report is presented by city in alphabetical order. One table shows the retail floor space by Soviet republic. Data researched thus far do not indicate that there is a standard for green space, length of roads, or retail floor space for Soviet cities.
