AN ARCHAEOLOGICAL COLLECTIONS SUMMARY
FOR
FORT JACKSON, SOUTH CAROLINA

Information Provided for Compliance with the
Native American Graves Protection and Repatriation Act
Section 6 Summary

Prepared for the
U.S. Army Environmental Center,
Environmental Compliance Division
Aberdeen Proving Ground, Maryland

By
U.S. Army Corps of Engineers,
St. Louis District,
Mandatory Center of Expertise for the
Curation and Management of Archaeological Collections,
U.S. Army NAGPRA Compliance Project,
Technical Report No. 2

June 1995
OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Jackson in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Fort Jackson began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the South Carolina Institute of Archaeology and Anthropology in Columbia, South Carolina. The records search was performed in January 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current chairperson for each tribe (Appendix II).
RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT JACKSON

Most of the surveys of the Fort Jackson Military Reservation occurred during the 1980s and early 1990s and have examined more than eighty percent (80%) of the entire installation. Several major contract firms have conducted various types of investigations on Fort Jackson property. These firms include:

- Gulf Engineers & Consultants, Baton Rouge, LA
- Southeastern Archaeological Services, Athens, GA
- Brockington & Associates, Charleston, SC
- Panamerican Consultants, Tuscaloosa, AL
- University of Alabama, Division of Archaeology, Moundville, AL
- U.S. Army Corps of Engineers, Savannah District, Savannah, GA
- South Carolina Department of Highways and Public Transportation, Columbia, SC
- South Carolina Institute of Archaeology and Anthropology (SCIAA), Columbia, SC

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of approximately 45 ft$^3$ of artifacts and more than seven linear feet of records have been identified for Fort Jackson. As of the date of this report, these collections are located in the following three repositories.

- SCIAA, Columbia, South Carolina
  - 42 ft$^3$ of boxed materials
- Brockington & Associates, Charleston, SC
  - 2 ft$^3$ of boxed materials
- Panamerican Consultants, Tuscaloosa, AL
  - 1223 artifacts

The collections consist of prehistoric stone tools, ceramics, and historic materials such as glass, building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. No human skeletal remains or associated funerary objects were identified in our review of the collections and collection documentation.
The attached Summary of Current Locations of Archaeological Collections from Fort Jackson (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Fort Jackson are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB); and Appendix VI provides the references cited in the literature but not available for review by the MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT JACKSON

The chronological periods of the archaeological collections from Fort Jackson, as recorded on the site forms, range from unknown prehistoric to Mississippian to 20th Century historic.

The geographical location of Fort Jackson, based on the 1978 Indian Lands Judicially Established (U.S.G.S. n.d.), is within the lands claimed by the Catawba as their aboriginal territory. The Catawba Indian Nation of South Carolina is centered on a reservation in eastern York County, South Carolina. The Catawba Indian Nation of South Carolina was federally recognized in October 1993 (Davis 1994:91-94). The draft historic preservation plan for the Fort (Poplin et. al. 1993) also identifies the Catawba Tribe from York and Lancaster Counties as the tribes to be notified in the event of future archaeological finds on post.

In an undated report prepared for TRADOC (Beidleman n.d.:6-15), Creek and Cherokee were listed as the federally recognized tribes located closest to the Fort. However, with the 1993 federal recognition of the Catawba Nation, this tribe is more closely related to the aboriginal lands presently occupied by Fort Jackson.
SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons (Appendix II) from the federally recognized tribes which may be culturally affiliated with the collections.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR FORT JACKSON, SOUTH CAROLINA

[Installation Header]

Mr. Gilbert Blue, Chief
Catawba Indian Nation
P.O. Box 11106
Rock Hill, South Carolina 29731

Dear Mr. Blue:

I am writing to inform you of collections held by Fort Jackson that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the Catawba Indian Nation. Fort Jackson has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Jackson is responsible for collections that include approximately 42 cubic feet housed at the South Carolina Institute of Archaeology and Anthropology in Columbia, South Carolina, two cubic feet of material at Brockington & Associates in Charleston, South Carolina, and 1223 artifacts recovered from 14 test sites and presently stored at Panamerican Consultants in Tuscaloosa, Alabama. These archaeological collections were generated from surveys and/or excavations conducted from 1971 to the present. The collections consist of prehistoric stone tools, ceramics, and historic materials such as glass, building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. No sacred objects, objects of cultural patrimony, human skeletal remains or funerary objects were identified in our review of the collections and collection documentation.

We are notifying the Catawba Indian Nation because some of these materials were found in, or around, the area thought to be part of the territory occupied or used aboriginally by the Catawba Indian Nation. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.
Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Jackson and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF
ARCHAEOLOGICAL COLLECTIONS FROM
FORT JACKSON, SOUTH CAROLINA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY: The current location in which the collection is stored, as of the date of this report.

REPOSITORY POC: The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.

TELEPHONE: The telephone number for the repository POC.

COLLECTION ID: The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.

SITE NUMBERS: The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.

FIELDWORK DATES: The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.
COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

<table>
<thead>
<tr>
<th>FIELD</th>
<th>DATA ENTERED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject Property</td>
<td>Army Installation name</td>
</tr>
<tr>
<td>Last Name</td>
<td>Primary author's last name</td>
</tr>
<tr>
<td>First Name</td>
<td>Primary author's first name</td>
</tr>
<tr>
<td>Middle Initial</td>
<td>Primary author's middle initial</td>
</tr>
<tr>
<td>Secondary Authors</td>
<td>Names of secondary authors, or in instances where the author is a company rather than an individual, the company name is listed here</td>
</tr>
<tr>
<td>Title</td>
<td>Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.</td>
</tr>
<tr>
<td>Series</td>
<td>If the report is part of a publication series, the name and number are provided here.</td>
</tr>
<tr>
<td>Date</td>
<td>Date of publication or submission</td>
</tr>
<tr>
<td>Length</td>
<td>Report length in pages</td>
</tr>
<tr>
<td>Contract Number</td>
<td>Contract number and delivery order number, if applicable</td>
</tr>
</tbody>
</table>
The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

- **Sponsoring Agency**: Agency for which the report was prepared
- **Contractor**: The agent contracted to perform the work
- **Subcontractor**: The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.

OTHER REFERENCES TO FORT JACKSON

Attempts were made to obtain copies of references that were cited in NADB, on the site records, or in other publications but were not available at the South Carolina Institute of Archaeology and Anthropology. From telephone conversations with various persons conversant with the archaeology of Fort Jackson, the MCX determined that no new collections are reported in these references.
