11. SUPPLEMENTARY NOTES
This research was supported in part by an appointment to the Research Participation Program at the St Louis District, U.S. Army Corps of Engineers administered by the Oak Ridge Institute for Science and Education through an interagency agreement between the U.S. Department of Energy and the St. Louis District, U.S. Army Corps of Engineers.

Approved for public release - distribution unlimited

13. ABSTRACT (Maximum 200 words)
The U.S. Army Environmental Center tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting the Army in complying with the Native American Graves Protection and Repatriation Act (NAGPRA), P.L. 101-601. The MCX was asked to locate and assess archaeological collections derived from Army lands, to identify the Native American or Native Hawaiian organizations culturally affiliated with the collections, and to draft Section 6 summary letters for each installation. A two-stage process was used to identify, locate and assess the contents of the collections, consisting of archival research and telephone interviews with the repository personnel. This report conveys the results of the collection research completed for the compliance with Section 6 of NAGPRA.

OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Carlisle Barracks in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Carlisle Barracks began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Pennsylvania Historical and Museum Commission in Harrisburg, Pennsylvania. The records search was performed at the Pennsylvania Historical and Museum Commission in April 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. A draft Section 6 Summary letter is enclosed (Appendix I), as well as a listing of the current tribal chairpersons (Appendix II).
RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT CARLISLE BARRACKS

Archaeological work on Carlisle Barracks began in 1985. Archaeological investigations, which included collecting artifacts, have been conducted by the following organizations:

Archaeological and Historical Consultants, and
R. Christopher Goodwin and Associates

Investigations consisted of systematic surveys, test excavations, and excavations to mitigate adverse effects on sites where necessary for the installation's mission. Artifacts recovered include prehistoric lithics and historic materials such as pottery, buttons, and building materials. No human remains were excavated.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of an estimated 10,000 artifacts and approximately 3 linear feet of associated documentation have been identified for Carlisle Barracks. Collections are mainly historic materials such as pottery, buttons, and building debris. A small quantity of prehistoric material, consisting of 3 lithic flakes, was also collected. As of the date of this report collections are located in the following repositories:

Carlisle Barracks, Environmental Office: 10,000 artifacts and 1 linear foot of documentation
Archaeological and Historical Consultants, Centre Hall, Pennsylvania: 1 linear foot of documentation
R. Christopher Goodwin and Associates, Frederick, Maryland: 1 linear foot of documentation

The attached Summary of Current Locations of Archaeological Collections from Carlisle Barracks (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials,
artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence) produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

MCX research noted that R. Christopher Goodwin and Associates is in the process of completing a survey at Carlisle Barracks. Currently, they retain all the associated documentation and artifacts from this survey. Approximately 12 boxes of historic glass and nails are located in their storage facility during processing. No reports have been published concerning this current project.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Three sets of references regarding archaeological work conducted on Carlisle Barracks are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; Appendix V is the list of references contained in the National Archeological Data Base (NADB); and Appendix VI provides the references cited in the literature but not available for review by the MCX.

NATIVE AMERICAN TRIBES ASSOCIATED WITH CARLISLE BARRACKS

Several Native American groups were settled in Pennsylvania at the time of Euroamerican contact. The Delaware, Shawnee, and the Susquehannock were scattered throughout the general region that now encompasses Carlisle Barracks.

The Susquehannock are documented to have had a strong presence throughout central and eastern Pennsylvania (Johnson 1992). They were concentrated along the Susquehanna River, which flows north and east of Carlisle Barracks. According to Jennings (1978) disease and warfare in the 1800s left the tribe virtually extinct.

Peterson and Otter mention that the Tuscarora "passed through the Susquehanna Valley and stayed for some time (n.d..6-8)." According to Landy (1978:518) they left North Carolina in the early 1700s, settled along the Susquehanna and Juniata Rivers, then moved on in 1722 to join the Iroquois further north.
The Delaware inhabited much of eastern Pennsylvania (Goddard 1978; Miller 1994). Bands of Delaware eventually settled along the Susquehanna as well (Weslager 1972). In the late 17th to early 18th Centuries the Shawnee settled in this region before moving westward (Callender 1978).
SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes which may be culturally affiliated with the collections (Appendix II). Of the tribes referenced in the previous section, only the Absentee-Shawnee of Oklahoma, the Eastern Shawnee of Oklahoma, the Delaware of Western Oklahoma, and the Tuscarora Nation of New York are federally recognized.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER
FOR CARLISLE BARRACKS, PENNSYLVANIA

[Installation Header]

[Tribal POC Name]
[Title]
[Address]
[City, State, Zip]

Dear [Name of POC]:

I am writing to inform you of collections held by Carlisle Barracks that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the [Tribe]. Carlisle Barracks has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Carlisle Barracks is responsible for collections that include approximately 10,000 artifacts stored on the post. These archaeological collections were generated from surveys and/or excavations conducted from 1985 to the present. The collections consist of prehistoric stone flakes and historic materials such as pottery, buttons, and building materials, as well as associated documentation such as field notes, photographs, and correspondence. No human skeletal remains or associated funerary objects were identified in our review of the archaeological collections documentation.

We are notifying [Tribe] because some of these materials were found in, or near the area thought to be part of the territory occupied or used aboriginally by the [Tribe]. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].
To facilitate discussions between Carlisle Barracks and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM CARLISLE BARRACKS, PENNSYLVANIA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY: The current location in which the collection is stored, as of the date of this report.

REPOSITORY POC: The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.

TELEPHONE: The telephone number for the repository POC.

COLLECTION ID: The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.

SITE NUMBERS: The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.

FIELDWORK DATES: The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.
COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

<table>
<thead>
<tr>
<th>FIELD</th>
<th>DATA ENTERED</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subject Property</td>
<td>Army Installation name</td>
</tr>
<tr>
<td>Last Name</td>
<td>Primary author's last name</td>
</tr>
<tr>
<td>First Name</td>
<td>Primary author's first name</td>
</tr>
<tr>
<td>Middle Initial</td>
<td>Primary author's middle initial</td>
</tr>
<tr>
<td>Secondary Authors</td>
<td>Names of secondary authors, or in instances where the author is a company rather than an individual, the company name is listed here.</td>
</tr>
<tr>
<td>Title</td>
<td>Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.</td>
</tr>
<tr>
<td>Series</td>
<td>If the report is part of a publication series, the name and number are provided here.</td>

<td>Report length in pages</td>
</tr>
<tr>
<td>Contract Number</td>
<td>Contract number and delivery order number, if applicable</td>
</tr>
</tbody>
</table>
The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

<table>
<thead>
<tr>

<tr>
<td>Subcontractor</td>
<td>The agent subcontracted to perform the work</td>
</tr>
</tbody>
</table>

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.

APPENDIX V

NATIONAL ARCHEOLOGICAL DATA BASE REFERENCES FOR CARLISLE BARRACKS, PENNSYLVANIA

No attempt has been made to edit the National Archeological Data Base format or to correct obvious errors.

As of July 1995, no references for Carlisle Barracks are included in the National Archeological Data Base.
APPENDIX VI

OTHER REFERENCES TO CARLISLE BARRACKS

Attempts were made to obtain copies of references that were cited in NADB, on the site records, or in other publications but were not available at the Pennsylvania Historical and Museum Commission. From telephone conversations with various persons conversant with the archaeology of Carlisle Barracks, the MCX determined that no new collections are reported in these references.

CARLISLE BARRACKS REFERENCES NOT ON FILE AT THE PENNSYLVANIA HISTORICAL AND MUSEUM COMMISSION
