Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX)

U.S. Army Engineer District, St. Louis,
Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (CEMS-PD-C)
1222 Spruce Street, St. Louis, MO 63103

U.S. Army Environmental Center, Environmental Compliance Division
(SFIM-AEC-ECN), Aberdeen Proving Ground, MD 21010-5401

This research was supported in part by an appointment to the Research Participation Program at the St Louis District, U.S. Army Corps of Engineers administered by the Oak Ridge Institute for Science and Education through an interagency agreement between the U.S. Department of Energy and the St Louis District, U.S. Army Corps of Engineers.

The U.S. Army Environmental Center tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting the Army in complying with the Native American Graves Protection and Repatriation Act (NAGPRA), P.L. 101-601. The MCX was asked to locate and assess archaeological collections derived from Army lands, to identify the Native American or Native Hawaiian organizations culturally affiliated with the collections, and to draft Section 6 summary letters for each installation. A two-stage process was used to identify, locate and assess the contents of the collections, consisting of archival research and telephone interviews with the repository personnel. This report conveys the results of the collection research completed for the compliance with Section 6 of NAGPRA.

OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Fort Gordon in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Fort Gordon began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at the Georgia State Site Files in Athens, Georgia. The records search was performed at the State Site Files in January 1995 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. A draft Section 6 Summary letter is enclosed for these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).
RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT FORT GORDON

The majority of the archaeological investigations performed on Fort Gordon were completed during 1982, 1985 through 1986, 1988, and 1991 through 1994 by the following contractors:

Southeastern Archeological Services, Athens, Georgia
New World Research, Ft. Walton Beach, Florida
New South Associates, Stone Mountain, Georgia.

Smaller projects were completed during 1990 by the U.S. Army Corps of Engineers, Savannah District, Savannah, Georgia, and in 1991 by Brockington and Associates, Charleston, South Carolina, and Law Environmental, Kennesaw, Georgia. A project also was completed by the Augusta Archaeological Society; however, no date for this project was listed on the site form, although the report associated with the site is from 1973.

SUMMARY OF ARCHAELOGICAL COLLECTIONS

Approximately 64 ft³ of boxed archaeological materials and associated documentation have been identified for Fort Gordon. All of the collections consist of flaked stone tools, ceramics, and historic materials. Several of the site forms listed bone and teeth as objects that were collected; however, after completing telephone interviews with installation and collections repository personnel, it was determined that all bone material was animal bone. Therefore, it appears that no human skeletal remains have been collected from Fort Gordon.

As of July 1995, the collections are located in the following four repositories:

Brockington and Associates, <1 ft³ of boxed materials
Charleston, South Carolina
Fort Gordon, Georgia 55 ft³ of boxed materials
New South Associates, 3 ft³ of boxed materials
Stone Mountain, Georgia
University of Georgia, Athens 5 ft³ of boxed materials
The attached Summary of Current Locations of Archaeological Collections from Fort Gordon (Appendix III) provides detailed information about each collection derived as a result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence) produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well.

Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

NAGPRA Related Materials

No human skeletal remains or funerary objects were identified in a thorough review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony (as defined by NAGPRA) may be established in consultation with culturally affiliated Native American tribes.

REFERENCES TO ARCHEOLOGICAL INVESTIGATIONS

Two sets of references regarding archaeological work conducted on Fort Gordon are attached: Appendix IV contains the list of references reviewed by the MCX during its archival research; and Appendix V is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH FORT GORDON

None of the archaeological site forms or reports suggested possible cultural affiliation for the artifactual material collected from Fort Gordon property. Further research, however, indicates that Fort Gordon is located in aboriginal Creek territory (Swanton 1922; Waldman 1988:74-76; Johnson 1993:44).

The Yuchi were a group of Creek who migrated from the southern Appalachians during the 17th and early 18th Centuries (Swanton 1922:289), and who, at the time of European contact,
occupied land area near the current Fort Gordon property (Peterson and Otter n.d.:6-12). The Yuchi moved from the Fort Gordon area after their defeat in a 1681 Yamasee uprising. Some of the Yuchi fled south into Florida where they aligned with the Seminole. Others aligned with the Creek and were removed to Indian Territory in Oklahoma in 1832 with the Creek Nation (Moore 1994:716). The Yuchi are seeking independent federal recognition.

Peterson and Otter (n.d.: 6-12) also identify the Apalachee and Chickasaw as having lived in the vicinity of Fort Gordon. Although the Apalachee originated in what is now northern Florida, a portion of the group was forcibly removed to Georgia by English settlers in the early 1700s. They joined the Yamasee in an uprising against the English in 1715, after which they joined the Lower Creek. A portion of the Apalachee returned to Florida (Swanton 1922:124-125; Waldman 1988:17).

The principal domain of the Chickasaw was in Tennessee and Mississippi (Clark 1994:104-105). However, Peterson and Otter (n.d.: 6-12) state that "the Chickasaw settlement of the Fort Gordon area extended from 1723 to 1776." The Chickasaw were removed from Tennessee and Mississippi to Oklahoma in 1832 (Clark 1994:104-105).

The Cherokee are said to have lived in the Fort Gordon area of Georgia (Waldman 1988:43-48; Yenne 1986:35-36). Additionally, the Hitchiti (Weisman 1990:136; Yenne 1986:73; Johnson 1993:45) and the Yamasee (Weisman 1990:136; Waldman 1988:255) were in the southeastern area of the United States, including areas in eastern Georgia. Historically, the Hitchiti were removed to Indian Territory in Oklahoma with the Creek (Yenne 1986:73), and the Yamasee merged with the Creek and Seminole tribes (Waldman 1988).

The Catawba, who were located primarily in South Carolina (Yenne 1986:33; Waldman 1988:40), also may share possible cultural affiliation with artifacts collected from Fort Gordon.
SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans from federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes (Appendix II) which may be culturally affiliated with the collections. Of the tribes referenced previously, only the Catawba, Cherokee, and Creek are federally recognized.

Three Native American groups have attained state recognition in Georgia via the Georgia Council on American Indian Concerns (telephone conversation, John Morgan, Historic Preservation Division, Georgia, 17 August 1995). These three groups, the Georgia Tribe of Eastern Cherokee, the Cherokee of Georgia Tribal Council, and the Lower Muskogee Creek Tribe are not federally recognized and therefore do not fit the legal description of tribe as defined for NAGPRA purposes.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER
FOR FORT GORDON, GEORGIA

[Installation Header]

[Tribal POC Name]
[Title]
[Address]
[City, State, Zip]

Dear [Name of POC]:

I am writing to inform you of collections held by Fort Gordon that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the [Tribe]. Fort Gordon has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Fort Gordon is responsible for collections that include approximately 64 cubic feet housed at four different repositories: Fort Gordon, University of Georgia-Athens, New South Associates in Stone Mountain, Georgia, and Brockington and Associates in Charleston, South Carolina. These archaeological collections were generated from surveys and/or excavations conducted from 1973 to the present. The collections consist of prehistoric stone tools, ceramics, animal bone fragments, and historic materials such as building materials, ceramics, and metal fragments, as well as associated documentation such as field notes, photographs, and correspondence. No human skeletal remains or associated funerary objects were identified in our review of the collection documentation.

We are notifying [Tribe] because some of these materials were found in, or around, the area thought to be part of the territory occupied or used aboriginally by the [Tribe]. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.
Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Fort Gordon and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

CF: TRADOC  Commander, U.S. Army Training and Doctrine Command

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM FORT GORDON, GEORGIA

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY: The current location in which the collection is stored, as of the date of this report.

REPOSITORY POC: The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.

TELEPHONE: The telephone number for the repository POC.

COLLECTION ID: The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.

SITE NUMBERS: The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.

FIELDWORK DATES: The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.

EXCAVATOR/COLLECTOR: The individual and/or organization that conducted the investigation.
COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX IV

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a database for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

<table>
<thead>
<tr>
<th>FIELD</th>

</table>
The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

<table>
<thead>

</tr>
</tbody>
</table>

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
