NOTE

JPRS publications contain information primarily from foreign newspapers, periodicals and books, but also from news agency transmissions and broadcasts. Materials from foreign-language sources are translated; those from English-language sources are transcribed or reprinted, with the original phrasing and other characteristics retained.

Headlines, editorial reports, and material enclosed in brackets [] are supplied by JPRS. Processing indicators such as [Text] or [Excerpt] in the first line of each item, or following the last line of a brief, indicate how the original information was processed. Where no processing indicator is given, the information was summarized or extracted.

Unfamiliar names rendered phonetically or transliterated are enclosed in parentheses. Words or names preceded by a question mark and enclosed in parentheses were not clear in the original but have been supplied as appropriate in context. Other unattributed parenthetical notes within the body of an item originate with the source. Times within items are as given by source.

The contents of this publication in no way represent the policies, views or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22151. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Indexes to this report (by keyword, author, personal names, title and series) are available through Bell & Howell, Old Mansfield Road, Wooster, Ohio, 44691.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.
TRANSLATIONS ON VIETNAM, No. 1941

The report contains information on military, political, sociological, economic, and technical developments in Vietnam, selected from Vietnamese and foreign newspapers and periodicals.

10,000 ASSAULT YOUTHS LEAVE HO CHI MINH CITY FOR SERVICE.

Ho Chi Minh City SAIGON GIAY PHONG in Vietnamese 18 Apr 77 pp 1,4

[Article by D.L.: "10,000 Assault Youths From 12 Urban Precincts Leave in a Group"]

[Text] SGP, 18 Apr--On the night of 17 April, 12 urban precincts held meetings to deliver recruits for induction into the Assault Youths. Large crowds of people from the precincts and representatives of the administration and from the precincts and representatives of the administration and from mass organizations and branches participated. Many cultural entertainment groups came to give support performances. In particular, the Central Play Group performed the plan "My Company Commander" at the Tao Dan Stage before more than 5,000 Assault Youths from the 1st, 3rd, and 4th Precincts.

On the morning of 18 April, 10,000 Assault Youths departed in a group. Among the Assault Youth forces that left this morning were many youths who yesterday were running successful businesses in the outdoor markets.

In the 3rd Precinct, 328 Assault Youths and large crowds of people expressed their determination to successfully achieve the Resolution of the second round congress of the Party Organization, specifically to send troops forward on the labor front to build new economic areas and the municipal food belt.

Reportedly, 7,000 of the Assault Youths dispatched this morning will supplement the new economic Assault Youth General Unit, and 3,000 will supplement the companies building water conservancy projects and engaging in production in rural areas of the city.

VIETNAMESE REFUGEES ARRIVE IN HONG KONG, JAPAN

Refugees Leave Philippines

Hong Kong AFP in English 0525 GMT 3 Jun 77 OW

[Text] Hong Kong, 3 Jun (AFP)--Thirty-eight Vietnamese refugees heading for the Philippines in a motorised junk arrived here today after running out of fuel.

There are in the group 16 men, 6 women and 16 children. They are now with the local police.

It is understood that the 38 left Danang for the Philippines 8 days ago but ran into fuel trouble. They changed course for Hong Kong after obtaining fuel from a passing fishing boat.

In Taniyama Harbor

Tokyo KYODO in English 1052 GMT 28 May 77 OW

[Excerpts] Kagoshima, 28 May KYODO--Thirty-seven Vietnamese refugees arrived in Taniyama Harbor, Kagoshima, Saturday morning aboard the Liberian freighter which had rescued them but were refused permission to land in Japan until it is decided how they will finally be accommodated.

The Vietnamese, including 14 men, 10 women and 13 children, were picked up by the Liberian freighter Los Andes Thursday morning floating on a lifeboat about 80 kilometers southwest of Ishigaki Island, in Okinawa Prefecture.

Kagoshima immigration officials said that the refugees, who had no other possessions aside from the clothes on their backs, were in good health. There are seven families in the group, including one 18-year-old girl who is 7 months pregnant.
The Justice Ministry Immigration Bureau said that it was holding talks with
the Tokyo office of the United Nations high commissioner for refugees to
determine temporary lodging of the refugees in Japan and the nations willing
to eventually take them in.

Until arrangements are made the Vietnamese will be forced to remain on the
ship, which is scheduled to leave for Aichi Prefecture next Tuesday.

The refugees said that they would like to join relatives in the United
States, Switzerland, France, Hong Kong and Canada.

Landing at Kobe Port

Tokyo KYODO in English 1057 GMT 3 Jun 77

[Text] Kobe, 3 Jun KYODO--Thirty Vietnamese refugees who were rescued by a
Japanese freighter in the South China Sea late last month landed at Kobe
Port Friday under special permission from the Justice Ministry.

The 16 male and 14 female Vietnamese, 13 of them children, were then admitted
to the Rokko Kakan, a place of shelter here affiliated with a Catholic
organization.

The latest arrivals are the third group of Vietnamese refugees allowed to
land here since the turn of this year. They brought to 93 the total number
of refugees landing at Kobe.

The 30 Vietnamese slipped out of a small southeastern Vietnamese port aboard
an 8-ton boat on 17 May. They were picked up by the Japanese freighter Alps
Maru some 500 kilometers northeast of Ho Chi Minh City (Saigon) 6 days later.

The Vietnamese arrived in Kobe Wednesday after the Taiwanese Government refused
to accept them at Keelung Port on 26 May.

Most of the Vietnamese, who include former soldiers, factory hands, and nurses,
have expressed the desire to emigrate to Australia, the United States or
Canada.

THEFT OF ALUMINUM FROM STATE EXPOSED

Hanoi NHAN DAN in Vietnamese 26 Apr 77 p 3

[Readers' Opinions column: "Safeguarding State Property"]

[Text] Recently, a number of trucks which make runs between Hue and Hanoi, in association with merchants, transported aluminum plates and aluminum sheets to sell in Nam Dinh Municipality and Phu Ly City. Most of this aluminum comes under material supplies managed by the state and was stolen by bad people who sold it to the merchants, causing a great loss in state property.

We recommend that the agencies and units which send out trucks teach the drivers not to lend a hand to bad people. The agencies and units which deal with aluminum goods should adopt measures to closely manage these types of goods. The public security, tax, militia and self-defense checkpoints should organize tight controls, recover material supplies and commodities for the state and take stern measures in dealing with those who encroach upon socialist property.

PARTY ACTIVITIES AND GOVERNMENT

END TO BUREAUCRACY, OFFICIALDOM URGED

Hanoi Domestic Service in Vietnamese 2300 GMT 26 May 77 BK

[NHAN DAN 27 May editorial: "Step Up the Campaign Against Bureaucracy and Officialdom"]

[Text] The Premier's Directive No 159/TTG has been implemented for over a year now. The campaign against the ills of bureaucracy, red tape and officialdom to reduce trouble for the people—which has been conducted first of all at the grassroots level and in the various sectors having daily contact with the people—has brought about some concrete results. The security, trade, banking and public health sectors have made improvements concerning their work procedures and methods, which are welcomed by the public. In many grassroots units the phenomena of officialdom and arrogance and complicated paperwork procedures have been reduced. A number of leaders of administrative organs, including those who are chairmen of provincial or municipal people's committees, have maintained direct and regular contact with the people and have promptly settled all the legitimate demands raised by them.

These are but limited initial results. The campaign against bureaucracy and officialdom to reduce trouble for the people has developed unevenly and unsteadily. Thanh Hoa, Vinh Phu, Ha Son Binh, Hanoi, the Ministry of War Invalids and Social Welfare and the People's Supreme Procuratorate have carefully studied and broadly propagated Directive No 159/TTG, and have worked out realistic plans to steadily conduct the campaign against bureaucracy and officialdom. However, some sectors and localities have not strictly carried out the Premier's Directive No 159/TTG. They have only superficially studied this directive and failed to devise concrete plans for carrying it out. Some localities have tried to combat bureaucracy and officialdom and have corrected some wrongdoings, but relapses have occurred; and this has weakened the masses' confidence. These shortcomings are due to the fact that the local party committee echelons have not yet truly paid attention to leading the campaign, that leaders of the various sectors and administrative echelons have not upheld a sense of responsibility and have failed to provide concentrated, continuous and concrete guidance; that close coordination has not
been effected among the various party organizations, administrative organs and mass organizations, among the various sectors and echelons and between the higher and lower echelons; and that appropriate attention has not been given to supervisory and inspection work.

The ills of bureaucracy and officialdom constitute a danger to the ruling party, for they produce harmful consequences. They render us unable to do our work and, isolated from the people, slow down the operation of the state machinery and gradually destroy the revolutionary nature of cadres and party members. Therefore, the resolution of our party's Fourth Congress points out: We must make all activities of state organs strictly consistent with the set statutes, truly respect the people's right to collective ownership and guarantee their interests, and at the same time must demand that all citizens fulfill their obligations and comply with the law. Cadres and state personnel must uphold the spirit of unconditional service to the people and must struggle against corruption, waste, arrogance, officialdom and irresponsibility. It is necessary to prevent a number of cadres and state personnel from becoming a class of people with special rights and interests.

The struggle against bureaucracy and officialdom is an important aspect of the undertaking to strengthen the socialist legal system and build the collective ownership system. Resolutions No 159/TTG and 472/TTG must be strictly implemented in all sectors and echelons of the state machinery.

To satisfactorily conduct the campaign against bureaucracy and officialdom, all sectors and echelons must fully assess the situation and the results already achieved, and must clearly recognize both strong points and shortcomings and the causes of both success and failure so as to work out plans to further step up the campaign. Bureaucracy stems from many causes. To overcome it we must stage a multi-sided, comprehensive and profound struggle and must have time. In drafting plans for the near future, all sectors and echelons should review the various problems, with attention given to those causing much trouble to the people so that efforts will be concentrated on overcoming them on a feasible scale and to a feasible degree. It is important that we be resolved to carry out correctional work and resolutely do away with cumbersome organizations and systems while promptly establishing suitable new organizations and systems. Along with this it is necessary to satisfactorily set up an information network to firmly grasp and promptly analyze the situation, and to adopt a system which enables cadres to closely follow the actual development of the campaign at the lower echelons and in grassroots units.

With regard to officialdom--the very product of the viewpoint whose advocates hold the people in contempt and want everything easy for them but hard for others--we sternly condemn it and are determined to combat and eliminate it. As far as their behavior and attitude are concerned, cadres and personnel of state organs must prove themselves to be servants of the people. Attentive leadership of the party committee echelons and the sense of responsibility of leaders of the various sectors and echelons constitute a factor guaranteeing the satisfactory conduct of the campaign against bureaucracy and officialdom. On the other hand, to satisfactorily conduct the campaign it is required
that a mass movement be launched in state organs as well as in society to develop the right to collective ownership, supervise services to the people and correct all practices of bureaucracy, red tape and officialdom thereof.

Supervisory and control work is important. Along with tightening the control exerted by the various party committee echelons and leaders of the various sectors and echelons, it is necessary to step up inspection activities of the State Inspection Commission and of both the specialized and people's inspection networks.

Let all of us develop the right to collective ownership and step up the struggle against bureaucracy and officialdom in order to build a new, good regime for ourselves!

OSO: 4909
WHEAT BEING SOLD ON BLACK MARKET

Ho Chi Minh City SAIGON GIAI PHONG in Vietnamese 19 Apr 77 p 2

[Article by V.K.: "Tale of the Market Place"]

[Text] SGP--Yesterday, having nothing else to do, I strolled through Truong Tan Buu Market to see how business was. I had just stopped to watch a youth pursue an old lady, basket in hand, begging to bargain, when I suddenly saw two or three children pick up their baskets and converge on some push carts that a moment ago had been parked there, sweeping and scooping continuously. Curious, I strolled after them until I could see that what they had was wheat...

The bags of wheat were then carried into house number 5, Xom Voi Street, to be dumped into piles of wheat there. Seeing me trying to find out about the boys following the push carts, one youth thought he had a customer and asked me, "How many quintals do you want to buy?" Before I could answer he added, "I can 'find' you however much you want, at only 38 Ngan (76 Dong) a quintal!" I felt very strange because wheat is a State controlled commodity, and needless to say is not for sale to people, but how did these people get it and get it in amounts... "As much as you want?" How did they get so skillful at "finding?"

In my worried and tormented condition, I hope that the responsible agencies and management sectors will investigate and research to see from what back alley those grains of wheat "leaked."

KEROSENE DISTRIBUTED TO RURAL DISTRICTS OF HO CHI MINH CITY

Ho Chi Minh City SAIGON GIAI PHONG in Vietnamese 18 Apr 77 pp 1, 4

[Article by C.P.: "Continuing To Take Kerosene to Rural Districts and New Economic Areas; Each Household Bought Nine Liters for Three Months Use"]

[Text] SGP--In the first quarter of 1977, people in the five districts of Cu Chi, Hoc Mon, Thu Duc, Nha Be and Binh Chanh were allowed to purchase kerosene in local areas. Using container trucks and barrels, the Fuel Corporation transported the fuel to villages in each district to guarantee that the fuel reached the consumers. Each household could make one purchase of nine liters for 3 months.

At the same time as delivering the fuel to the rural districts, responding to the needs of the local authorities that have people going to new economic areas, the Corporation's fuel distribution teams delivered fuel for distribution to nearly 2,000 households in the three villages of Ta Chot, Tha La 1 and Dong Pan, Tan Bien District (Tay Ninh) and to more than 600 households in Tan Uyen District (Song Be). The Corporation is continuing to deliver fuel for sale to the people.

ECONOMIC PLANNING, TRADE AND FINANCE

BRIEFS

AGRICULTURAL TAX--By 20 May, peasants in Kien Giang Province had turned over 93,000 tons of paddy as agricultural tax payment and surplus paddy sales to the state. An Bien District has taken the lead in the emulation movement to pay agricultural taxes and sell surplus paddy to the state with 21,664 tons. [Ho Chi Minh City Domestic Service in Vietnamese 0245 GMT 30 May 77 BK]

SUPPLY OF RICE SEEDS--Thanh Hoa Province has prepared 11,000 tons of rice seeds of different varieties. Of these, 9,000 tons were prepared by agricultural cooperatives and 2,000 tons by the Provincial Seeds Supply Corporation. Thanh Hoa now needs 4,000 tons more to sow the entire 10th-month rice area totaling 150,000 hectares. This is 8,000 hectares more than the plan. The Provincial Agricultural Service has sent cadres to help cooperatives in redistributing rice seeds by transporting rice seeds from areas where there is a surplus to areas where there is a shortage. [Hanoi Domestic Service in Vietnamese 0400 GMT 1 Jun 77 BK]

PADDY SALE TO STATE--Since early this year, the peasants in Dong Thap Province have sold 55,000 tons of paddy to the state, representing 43 percent of the year's quota. Thanks to its effective purchase and collection network, during April and May the province succeeded in collecting and purchasing almost as much paddy as it collected and purchased in the first quarter of 1977. [Hanoi Domestic Service in Vietnamese 1100 GMT 1 Jun 77 BK]

WATER CONSERVANCY CONFERENCE--The Ministry of Water Conservancy held a conference in Ho Chi Minh City from 25 to 28 May 1977, to disseminate a draft of its Five-Year Water Conservancy Plan, under which efforts must be made to get sufficient water for the southern provinces to increase their two-crop-a-year rice area from the existing 200,000 hectares to 1.1 million hectares and to reclaim an additional 400,000 hectares of land by 1980. As an immediate task, the water conservancy sector must insure sufficient water for 490,000 hectares of winter-spring rice and 400,000 hectares of summer-fall rice in the Mekong Delta. [Ho Chi Minh City Domestic Service in Vietnamese 0245 GMT 30 May 77 BK]

CSO: 4909
PROGRESS REPORTED IN ANTIFLOOD CONTROL

Hanoi Domestic Service in Vietnamese 0900 GMT 28 May 77 PK

[Text] In recent days, along with stepping up caring for and preparing to harvest 5th-month spring rice, various localities have tried to urgently complete construction of antiflood dams before the arrival of the rainy season. In the northern provinces some 400,000 people work at various dam-building worksites every day, striving to speedily fulfill the task of repairing or building dams, protective dikes and sluices in accordance with the actual situation and the directive of the premier of the government.

To date Hai Hung Province and three districts of Ha Nam Minh Province—Vu Ban, Binh Luc and Nam Minh—have completely fulfilled their dam-building plans for the whole year. Hai Hung Province fulfilled the dam-building plan assigned by the state and completed construction of seven protective dikes before 14 May. Nearly 20,000 militiamen and water-conservancy workers were mobilized daily by the province to build dams and protective dikes. Learning from the experience of the Song Ly large-scale manual labor worksite in Thanh Hoa, Kim Dong District regulated the distribution of manpower throughout the district and rationally organized the labor force engaged in digging and building, thereby exceeding the labor productivity set norm by 60 percent and fulfilling its dam-building plan 18 days ahead of schedule. At present, Hai Hung is still using more than 20,000 laborers daily to finish remaining work on the various dams such as building protective dikes and breakwaters.

Ha Nam Minh Province has sent more than 20,000 people to various worksites to build protective dikes and dredge sluices. All the districts, cities and towns have concentrated efforts on achieving self-sufficiency in grain, food and work tools, striving to completely fulfill their plans for building dams and protective dikes and dredging sluices before 30 June. Owing to their concentrated labor force and effective leadership, Nam Minh, Hai Hau, Nghia Hung, Vu Ban and Binh Loc districts fulfilled the Day River dam-building plan as of 25 April. The districts massed a sizable labor force to repair and elevate the dams on the Red River, the Dao River and the Dinh Co River and those in the coastal areas.
In Ha Son Binh Province various districts and cities have basically fulfilled their first-phase dam-building plans on the Da River, Red River and Day River dams, achieving 99.5 percent of the planned norms. Along with its dam-building activities the province has fulfilled the plan for building the three protective dikes of Quang Lam, Pho De and Lien Tri.

In recent days several army units stationed in various localities and entrusted with dam-building tasks have quickly moved into the designated areas and promptly begun their work. Assigned to build dams in Gia Vien District, Ha Nam Minh Province, units of the Quyet Thang Army Corps, by carrying out several innovations to increase labor productivity, were able to complete their work 15 days ahead of schedule after having moved nearly 40,000 cubic meters of earth in their digging and building activities.

Along with building dams to prevent and control storms and floods, the localities throughout the country have actively dredged canals and ditches and strengthened various drainage and irrigational projects to support production activities. Vinh Phu Province has devoted tens of thousands of man-days to dredging more than 155,000 cubic meters of earth, clearing the (Chay Ngoi) and (Luong Chieu) rivers and repairing sluices, thus taking the initiative in preventing and controlling waterlogging to save rice. The provincial water-conservancy service urgently repaired more than 100 power pumps to support anti-waterlogging activities and assigned people to keep a 24-hour watch over sluices in order to remove any debris hindering the water flow in case of heavy rain.

In Cam Loc District, Nghe Tinh Province, more than 10,000 people have participated daily in the "concerted uprising" campaign to build water-conservancy projects. Over the past 3 months the entire district has moved 450,000 cubic meters of earth in its digging and building work, equaling the total amount of earth moved in the previous 3 years, and quickly and efficiently completed and put into operation several projects to support production.

In Binh Tri Thien nearly 200,000 youth union members are enthusiastically laboring at various local water-conservancy worksites. In addition to the various campaigns of collective work, youths have contributed 65,000 communist labor man-days, moving 74,000 cubic meters of earth in their digging and building activities.

The southern provinces and cities from Quang Nam-Danang southward have used nearly 35 million man-days to move 40 million cubic meters of earth in their digging and building work, and have promptly restored, repaired or built several medium and small-scale water-conservancy projects to support production. Participating in the 1976-1977 dry season water-conservancy campaign, from mid-December to date, Ho Chi Minh City alone has used 25 million man-days to move 4 million cubic meters of earth in its digging and building activities.

CSO: 4909
REAPING 5TH-MONTH RICE WHILE PLANTING 10TH-MONTH CROP URGED

Hanoi Domestic Service in Vietnamese 2300 GMT 25 May 77 BK

[THAN DAN 26 May editorial: "Satisfactorily Organize Labor To Reap the 5th-Month Spring Crop and Plant the 10th-Month Crop"]

[Text] This year the northern provinces will reap the 5th-month spring rice much later than in past years. The 5th-month-spring rice harvest will come at the time when the 10th-month rice is being planted; and this will place a very heavy strain on the agricultural work force.

To satisfactorily carry out both tasks mentioned above, the various agricultural cooperatives must adopt plans and measures to satisfactorily organize and employ labor, mobilize all their labor potentials and increase labor productivity. It is necessary to insure a balance between labor and the workload in each period of time, each work operation and each production season. The basic production teams--which are responsible chiefly for fulfilling the cooperative's production plan--must carry out their functions satisfactorily without waiting for or relying on assistance. Nevertheless, when there is a labor shortage, labor must be deployed not only in each production team but on an all-cooperative scale, with close coordination and cooperation of labor effected among the various production units and laborers in a cooperative and among the various cooperatives in order to successfully carry out tasks throughout the district.

The labor plan must set forth measures to mobilize all labor potentials of the cooperative and encourage cooperative members to work enthusiastically, put in more time and strive to increase labor productivity. We must closely carry out and broadly apply the piece-work system. Basic production teams and specialized teams, based on their workload, are responsible for organizing and assigning work to hastily organized labor groups. When assigning piece work we must clearly specify the quantity and quality of work, the required time for its completion and the amount of work credit to be given; it is also necessary to check the results after the work has been done.
Each laborer can be given work assignments which neither require collective labor nor obstruct the collective production process. The basis of the piece-work system consists of the various production processes, labor norms and economic-technical norms. If this basis is ignored or neglected, a situation will arise in which production is performed irresponsibly, distribution is not carried out justly and rationally and the cultivation schedule is upset.

Along with strengthening labor management we must prepare enough good-quality tools, care for and protect workers' health, and consolidate and develop nursery, kindergarten, food supply, lunch-catering and other activities to help cooperative members reduce their preoccupation with family affairs and devote more time to production.

Labor management must be closely linked with the emulation movement for productive labor and the development of cooperative members' sense of collective ownership for the immediate purpose of concentrating efforts on rapidly reaping the 5th-month spring crop and planting the 10th-month crop on the entire area in accordance with the cultivation schedule.

CSO: 4909
Kien Giang Province prepares for summer-autumn rice crop

Hanoi NHAN DAN in Vietnamese 26 Apr 77 p 2

[Article: "Kien Giang Prepares Sufficient Seeds for More than 85,000 Hectares of Summer-Autumn Rice"]

[Text] VNA--In addition to seeds prepared by the farmers, Kien Giang Province has purchased 9,000 metric tons of the Nong Nghiep 73-2, Nong Nghiep 30 and Nong Nghiep 28 rice strains and has distributed nearly 7,000 metric tons. To date, throughout the province, there are sufficient good seeds to sow and transplant 85,000 hectares of summer-autumn rice.

Kien Giang Province has urgently supplied additional fertilizers, insecticides and herbicides to the farmers, ensuring that each hectare of summer-autumn rice has 100 kilograms of chemical fertilizers and 20 to 30 kilograms of insecticides and herbicides. The province has improved the method of distributing seeds, fertilizers and insecticides to ensure that they are distributed for the correct objectives.
NORTHERN PROVINCES INCREASE WEEDING, WATER CONSERVANCY WORK

Hanoi NHAN DAN in Vietnamese 26 Apr 77 p 1

[Article: "As of 20 April, the North Carried Out One Weeding on 88 Percent, and Two Weedings on 48 Percent of the Fifth Month-Spring Rice Area. Seventeen Thousand Hectares Affected by Insects Were Saved and are Green and Strong Again. Two Hundred Twenty-Four Thousand People Work Daily on Farm-land Water Conservancy Improvements"]

[Text] According to the General Department of Statistics, as of 20 April the North had performed one weeding on 726,000 hectares of fifth month-spring rice, 88 percent of the sown and transplanted area. Of this, the area where two weedings were carried out was 397,000 hectares, 48 percent of the sown and transplanted area, equaling 54.6 percent of the area where one weeding was carried out.

Hanoi Municipality and the provinces of Hai Hung, Thai Binh and Ha Nam Ninh performed one weeding on 90.2 to 95 percent of the area. Almost all the districts of Binh Tri Thien and the [following] districts completed one weeding: Nam Ninh, Nghia Hung, Hai Hau and Xuan Thuy, Ha Nam Ninh; Ha Hoa, Vinh Phu; Gia Loc, Hai Hung; Tho Xuan, Thanh Hoa; Mai Chau, Dan Phuong and Thanh Oai, Ha Son Binh.

The various provinces are promoting two weedings and some places have switched to carrying out three weedings on some rice areas. Three weedings were carried out in Ha Nam Ninh on 18,600 hectares, in Thai Binh on 7,300 hectares and in Thanh Hoa on 1,700 hectares. In addition to weeding and fertilizing, the various localities sprayed insecticides on and saved 17,000 hectares of rice being destroyed by insects, making the crop green and strong again.

An estimated 22 percent of the rice area in Binh Tri Thien Province is growing and developing quite well.

Also as of 20 April, the five provinces of Vinh Phu, Ha Boc, Hai Phong, Ha Son Binh and Thanh Hoa sowed an estimated 1,900 metric tons of rice seeds and transplanted 3,000 hectares of summer rice, of which Ha Boc and Thanh Hoa transplanted 2,500 hectares.
According to the Water Conservancy Ministry, during the past week the North mobilized 224,000 people daily to work on farmland water conservancy improvements. Among those, 104,000 repaired and dredged canals and ditches to use the water to fight drought and nourish the fifth month—spring rice, conserving water to serve a number of summer rice transplanting areas.

The provinces of Bac Thai, Quang Ninh, Cao Lang and Hoang Lien Son each mobilized tens of thousands of people to work on farmland water conservancy improvements at projects which irrigate large fields. Nghe Tinh Province mobilized 24,000 people to endeavor to complete the remaining tasks of the three-year plan, transferring, managing and operating those projects which have been improved.

The provinces of Ha Nam Ninh, Ha Boc, Hai Hung, Thai Binh, Vinh Phu, Bac Thai...effectively organized "big handicraft work sites;" effectively managed the labor, capital, material supplies, the construction pace and technical supervision and endeavored to quickly and effectively carry out waterlogging drainage projects. Thanh Hoa Province, home of the "big handicraft work site" of Song Ly, is effectively organizing the Thung Bang and Lach Bang water conservancy work sites and preparing to carry out the Muc River project...At the Lach Bang work site (a big project whose principal tasks have been assigned to the district), cadres and combatants of the 14th Regiment, Thanh Hoa local forces, together with cadres of the water conservancy sector and local youths, laid wagon tracks to move dirt, attained high labor productivity, quickly cleared flat surfaces, dug culvert foundations, built dikes and regulated overflow, saving the state tens of thousands of dong. At the Song Ly work site, cadres and workers of the Thanh Hoa Water Conservancy Building Corporation together with youths and the militia accelerated the construction pace, completing the digging of a pit for the foundations of the Ngoc Giap culvert before the deadline.

The provinces of Thai Binh, Hai Hung and Ha Boc are also urgently completing the An Tho and Tra Linh 2 drainage ditches and the Boa Son project. Hai Hung Province is starting work on the construction of 20 pumping stations to support waterlogging drainage, timely serving the tenth-month [rice] crop.

The corporations which manage farmland water conservancy work in the provinces of Thanh Hoa, Nghe Tinh, Ha Son Binh and Ha Boc are making an investigation to fully know about the summer rice transplanting area, ensuring the operation of the various systems to supply water to timely serve the summer rice crop.

FUNCTION OF WORK EXCHANGE, PRODUCTION SOLIDARITY TEAMS IN SOUTH OUTLINED

Hanoi NHAN DAN in Vietnamese 26 Apr 77 p 2

[Column: "Understanding Policies and Matters Concerning Management"]

[Text] Question: Please let us know about the work exchange teams and production solidarity teams which the radio and newspapers frequently mention regarding farmers in the southern provinces.

Answer: The farmers of southern provinces have organized various forms of mutual help in promoting agricultural and forestry production. These are called production solidarity teams, work exchange teams, etc. Although the names differ, these organizations were all voluntarily established by the farmers under the leadership of the basic party organization and received guidance from the farmers association and the village people's committee in order for the farmers to have the conditions to help one another in production and livelihood and motivate one another to satisfactorily fulfill their obligations to the state. These are the basic forms on the road to collective life. The difference between a production solidarity team and a work exchange team is that, in a work exchange team, the principal matter is the farmers helping one another by exchanging work with one another, possibly exchanging one task at a time or many tasks. A production solidarity team also exchanges work with one another but they may also employ one another, when necessary, by agreement among the various households in the team, or else they may organize to jointly purchase material supplies when the state distributes them. The important points to ensure that these organization forms are well built and operate efficiently are: they must have specific rules; the residences of the households must be relatively near to one another to facilitate production and activities; and democratic discussions must be held when deciding on affairs of the team.

HANOI REVIEWS LIVESTOCK BREEDING PROCESS FOR MAY

Hanoi Domestic Service in Vietnamese 0400 GMT 4 Jun 77 BK

[Text]  Dear friends, despite many difficulties, many localities have recently tried to maintain and develop livestock breeding. According to figures released by the General Statistics Department, as of 1 April 1977, while the total number of buffaloes throughout the country dropped by 1 percent as compared with 1 October 1976, the number of oxen increased by 1.5 percent. The number of hogs decreased by 7.7 percent in a national count but increased by 8 percent in the southern provinces. In the northern provinces, the number of hogs dropped by 13.7 percent as compared with 1 October 1976 and 6 percent as compared with the same period of last year.  

The number of hogs bred by some localities--most of them mountainous provinces--have shown fair increases over the same period of last year. For example, the number of hogs in Lai Chau Province has increased by 7.6 percent, that of Son La Province by 6.2 percent, that of Ha Tuyen by 2.2 percent and that of Cao Lang by 0.1 percent. Meanwhile, the biggest drops in the numbers of hogs have been reported in such localities as Quang Ninh, Haiphong, Hanoi and Thai Binh.

In May, many localities applied active measures to resolve the feed problem and prevent and control epizootics in order to maintain and increase the number of hogs. Ha Nam Minh Province has guided the cooperatives in planting more vegetables and subsidiary crops and making full use of agricultural byproducts for livestock breeding. The provincial agricultural commission, working in coordination with the women's union, has guided family livestock breeding cells in breeding more hogs in time for the 5th-month and spring crop harvest; and 2,000 livestock breeding cells have each raised from 40 to 60 more hogs.

In Hai Hung, the agricultural service has sent more technical cadres, materials and capital to Gia Loc and Khoai Chau districts, which have been chosen by the province as major livestock breeding districts; and 10 cooperatives from each district have been selected to become livestock breeding models. The leading comrades of various villages and selected cooperatives
have been sent by the agricultural service on an observation tour to study the experience of various intensive cultivation and hog breeding models in Dong Hung District, Thai Binh. After the observation tour, each selected cooperative has revised its livestock breeding plan for 1977 and 1978, which is aimed at improving management over livestock breeding, strengthening its material and technical bases and striving to further advance livestock breeding.

In Ha Son Binh Province, the Agricultural Commission of Thach That District has worked out a plan to guide the local cooperatives in organizing teams specializing in feed production and in reserving 5 percent of the cultivated land to produce more feed of better quality for the collective hog herds.

Thanks to the success in resolving the feed problem, by 1 April 1977 the number of hogs in Guynh Phu District, Thai Binh Province, increased by 13 percent as compared with the same period of last year, with the collective hog herd scoring an increase of 2,000 head over 1 October 1976.

Meanwhile, the Agricultural Service of Binh Tri Thien Province has stepped up its activities to guide, consolidate and strengthen Phuc Ly Cooperative, Bo Trach District, in an effort to turn it into a technical station for research and experimentation and for the propagation of livestock breeding science and technology to other cooperatives.

Vinh Phu, Thanh Hoa, Hanoi, Haiphong and Quang Ninh are now striving to maintain and increase their hog herds both before and since the 5th-month and spring rice harvest. The Agricultural Service of Thanh Hoa Province is guiding the construction of a mechanical food processing network covering various districts.

To promote the plan to harvest the 5th-month crop and grow the 10th-month crop, efforts are being exerted in various localities to care for water buffaloes and oxen and to fatten them. In many districts of Nghe Tinh Province, attention has been paid to maintaining natural grasslands and to cutting grass and preserving it for further use as fodder for water buffaloes and oxen. Thanh Hoa and many mountainous provinces are urging cooperatives to intensify the breeding of water buffaloes and oxen.

The various provinces have also paid attention to guiding the breeding of poultry. Throughout the country there are now 63 centers where chickens are bred according to industrial methods. Almost all of these breeding centers have correctly implemented production regulations and technical standards and have thus fulfilled or overfulfilled the economic and technical norms set by the poultry breeding sector.

Owing to the aid of the Ha Nam Ninh Agricultural Service, the Minh Phong Cooperative in Gia Khanh District has produced the first batch of more than 7,000 chickens bred according to industrial methods. After 56 days of growth, these chickens weigh 1.24 kg each on the average.
Proper care has been taken of ducks in many provinces. As of early May, Thanh Hoa obtained 2.1 million eggs and distributed 51,000 ducklings to duck-breeding cooperatives. In Phu Khanh Province, the current number of ducks is double that in the corresponding period of last year.

In the sea fishing field, Phu Khanh, Kien Giang, Thuan Hai, Quang Nam-Danang and Nghia Binh provinces have mobilized many means and boats which can go to sea for a couple of days in order to catch fish to sell to the state beyond the planned norms. In 40 days at the beginning of the "Nam" fish catching period, Nghia Binh Province caught 7,500 tons of fish. Though underfulfilling the planned norms, Thuan Hai Province managed to sell to the state 72.6 percent of the catch.

Like the grain production task, the animal husbandry task requires the various localities and peasantry to exert greater efforts. Following are the immediate tasks which must be properly carried out according to the Livestock General Department:

Each province and district must try to observe the norms indicated in the 1977 animal husbandry plan: to achieve a balance between the present number of domestic animals and the number of those put on sale and to accurately determine the additional number of domestic animals to be bred in the forthcoming months.

The agricultural sector must cooperate with the food sector to properly manage and regulate the number of little breeding hogs between areas where they are in excess and areas where their number is insufficient, so that cooperatives and peasant households may have enough breeding hogs to raise before and after the 5th month-spring rice crop harvest. While harvesting this crop, it is necessary to provide close guidance to insure balance between the quantity of domestic animal fodder and that of grain for human consumption. In addition to grain plans, it is necessary to draw up adequate plans concerning fodder for collective livestock breeding farms.

Efforts must be exerted to take care of water buffaloes and oxen, to fatten them, to intensively grow grass, to rearrange pastures and to reclassify water buffaloes and oxen, in order to formulate rational methods to raise them and use them during the rush period in the cultivation of the 10th-month rice crop. It is necessary to organize duck egg hatching and provide a sufficient number of breeding ducks to state farms and cooperatives to enable them to develop duck raising according to season and to delimit duck breeding areas after rice harvesting has been completed in each field.

Veterinarian cadres and medicines must be mobilized to immediately eliminate epizootic hotbeds to protect domestic animals from summer diseases. Each province and district must review the animal husbandry situation in the first 6 months of this year and take measures to develop livestock raising in the last 6 months of the year in order to fulfill and overfulfill the 1977 animal husbandry plan.
AGRICULTURE

BRIEFS

NORTHERN RICE PLANTING--According to the General Statistics Department and the Agriculture Ministry, 5th-month spring rice plants in the northern provinces are heading unevenly and slowly due to drought. The area where rice is heading is only half of that in the same period last year. The slow development of rice plants may affect the cultivation of the 10th-month rice crop. Hot sunshine and high temperatures have caused the drought-stricken rice area covering 13.4 percent of the total rice area to expand. Localities have motivated tens of thousands of people to go to the fields to dig irrigation ditches, dredge canals and utilize water baskets or pumps to water ricefields so that rice plants can grow ears quickly. Efforts to control insects harmful to rice plants are also being made in various northern provinces. As for summer rice, northern provinces have basically completed the transplanting, with 21,389 hectares sown as of 15 May. Vinh Phu, Ha Bac, Ha Son Binh and Thanh Hoa are provinces having the largest summer rice areas in the north. [Hanoi Domestic Service in Vietnamese 0530 GMT 21 May 77 BK]

SOUTHERN RICE PLANTING--So far, southern provinces have sown summer-fall rice by using both transplanting and direct-sowing methods on 100,000 hectares or approximately 20 percent of the planned acreage. Taking advantage of early season rains, localities have stepped up rice planting. However, the pace of planting rice remains slow as a result of prolonged drought and the infiltration of salty water into ricefields, forcing peasants to wash salinity away from the soil before they can start sowing rice. [Ho Chi Minh City Domestic Service in Vietnamese 0500 GMT 22 May 77 BK]

QUYET THANG CORPS CULTIVATION--Units of the Quyet Thang Corps are actively fertilizing the 5th-month spring rice crop. Soldiers of the Tien Phong Division are consolidating the network of ditches and pumping stations to provide sufficient water for the ricefields at Trung Hoa. The Dong Bang Division and the 241st Antiaircraft Brigade have achieved high labor productivity in weeding ricefields. The 299th Engineer Brigade, the 203rd Armored Brigade and the 140th Signal Regiment have made full use of transportation means to carry fertilizer to ricefields. The Tat Thang Artillery Brigade
and the Rang Dong Economic Unit of the corps' Rear Service Department have completed the first fertilizing phase. Up to now the entire Quyet Thang Corps has fertilized and weeded more than 243 hectares of the 5th-month spring rice crop. [Hanoi QUAN DOI NHAN DAN in Vietnamese 4 May 77 p 1 BK]

HAMPERING DROUGHT--Due to failure to overcome difficulties arising from drought, Long An, Hau Giang, Ben Tre, Cuu Long and Dong Thap provinces have to date been able to sow summer-fall rice on only 10 to 20 percent of the planned acreage. For instance, Ben Tre has sown approximately 10,000 hectares or one-fifth of the planned acreage, and Hau Giang has sown about 4,000 out of the planned 130,000 hectares. [Ho Chi Minh City Domestic Service in Vietnamese 0500 GMT 22 May 77 BK]

AN GIANG AGRICULTURAL TAX--Peasants in An Giang Province paid nearly 4,770 tons of paddy as agricultural tax to the state in April along with the sale of another 25,590 tons, bringing the total volume of paddy sold to the state since early this year to over 87,000 tons and fulfilling some 48.6 percent of the annual grain obligation norms. [Hanoi Domestic Service in Vietnamese 12 May 77]

AN GIANG RICE--An Giang Province is determined to transplant 60,000 hectares of the summer-fall rice this year. The provincial agricultural service has sent cadres to villages and hamlets to help local peasants fulfill the transplanting plan early in May. [Ho Chi Minh City Domestic Service in Vietnamese 0245 GMT 5 May 77 BK] In the first 20 days of May, peasants in An Giang Province successfully sowed summer-fall rice on 26,100 hectares, thus bringing the total rice area sown so far to 34,000 hectares or more than half of the planned acreage. All the area reserved for sowing summer-fall rice has been plowed. [Ho Chi Minh City Domestic Service in Vietnamese 2345 GMT 24 May 77 BK]

BEN TRE RICE CULTIVATION--Ben Tre Province is speeding up earthwork in districts where fresh water is available in an effort to complete transplanting 50,000 hectares of the summer-fall rice on schedule. [Ho Chi Minh City Domestic Service in Vietnamese 0245 GMT 12 May 77 BK]

BINH TRI THIEN SECONDARY CROPS--Binh Tri Thien Province has thus far planted secondary crops including manioc, corn and sweet potatoes on 60,000 hectares, exceeding the planned area by 17.6 percent. Districts in the southern part of the province continue the planting of sweet potatoes on the high-lying areas where 3-month rice has just been harvested. [Hanoi Domestic Service in Vietnamese 0900 GMT 23 May 77 BK]

CUU LONG RICE--Since late April various districts in the freshwater area of Cuu Long Province have sown 14,800 additional hectares of above-crop rice, thus bringing the above-crop rice area of the year 1977 to 55,176 hectares, or nearly 50 percent of the criteria prescribed by higher echelons. Tra On is the district sowing the largest area of summer-fall rice in the province--3,839 hectares. [Ho Chi Minh City Domestic Service in Vietnamese 2345 GMT 22 May 77 BK]

23
DAC LAC WHEAT--This year Dac Lac Province plans to sow wheat on 15,000 hectares, a fourfold increase over last year. The province has launched an emulation drive under which each person is urged to sow 300 wheat plants: each village, 40-100 hectares of wheat; and each district, 500-2,000 hectares. The province has thus far plowed 10,500 hectares and expects to finish planting wheat on the entire planned acreage. [Hanoi Domestic Service in Vietnamese 2300 GMT 16 May 77 BK]

DONG NAI CULTIVATION--In an effort to solve the grain problem, Dong Nai Province in 1977-1978 will reclaim and put into production 60,000 hectares of wasteland along with expanding its additional rice acreage by 35,000 hectares and its secondary crop acreage to some 100,000 hectares. [Ho Chi Minh City Domestic Service in Vietnamese 1240 GMT 4 May 77 BK]

DONG THAP RICE HARVEST--By 20 May, Dong Thap Province had completed harvesting winter-spring rice on the entire 44,651 hectares, with an average yield of 4 tons per hectare. Although representing only 67 percent of the planned area, the winter-spring rice acreage in the province this year increased by 46 percent over last year. [Ho Chi Minh City Domestic Service in Vietnamese 0245 24 May 77 BK]

DONG THAP PADDY PURCHASE--Dong Thap Province in April purchased 10,550 tons of paddy, bringing the total volume of paddy already purchased since early this year to 38,550 tons--equivalent to that of the entire year in 1976. [Ho Chi Minh City Domestic Service in Vietnamese 2345 GMT 5 May 77 BK]

GIA LAI-CONG TUM MANIOC--Gia Lai-Cong Tum Province has planted manioc on more than 25,000 hectares and is trying to finish planting 30,000 hectares before the end of May. This will be twice as much as in the same period last year. The provincial Agricultural Machinery Corporation has used two-thirds of its tractors to reclaim wasteland in the major manioc-growing areas such as Mang Yang Dakto and An Khe. Various responsible sectors in the province have made early preparations for the processing of manioc and are trying to make manioc a staple food in daily consumption in order to be self-sufficient in grain. [Hanoi Domestic Service in Vietnamese 2300 GMT 16 May 77 BK]

HA NAM NINH DROUGHT--Ha Nam Ninh Province now has 24,300 hectares of 5th-month spring rice seriously affected by drought. The provincial agricultural material supply sector has supplied 600 tons of diesel oil to cooperatives to operate 526 diesel-powered pumps. Each day some 7,000-10,000 cooperative members in Ha Hau and Xuan Thuy districts have gone to the fields, carrying with them 3,500-4,200 water wheels and water baskets, to irrigate their ricefields. More than 7,000 hectares of 5th-month spring rice were reportedly saved from drought during the period 10 to 13 May. [Hanoi Domestic Service in Vietnamese 1100 GMT 19 May 77 BK]
HA NAN MINH INSECTS--Some 29,000 hectares of 5th-month spring rice in Ha Nan Minh Province are being ravaged by leaf rollers, grey leafhoppers and helminthosporium oryzae. More than 400 vegetation protection teams belonging to various agricultural cooperatives have taken turns to check ricefields and spray insecticide to prevent insects from spreading. In addition to spraying insecticide, peasants in Hai Hau, Xuan Thuy, Binh Luc, Yen Khanh, Kom Son and Nam Minh districts have gone to the fields to catch insects and destroy leaf roller nests. [Excerpt] [Hanoi Domestic Service in Vietnamese 2300 GMT 22 May 77 BK]

HAI HUNG CROPS--So far, Hai Hung Province has had over 50 percent of cooperatives plant oleaginous crops. Binh Minh, Khoa Chau, Tuyen Quang and other cooperatives are noted for having large areas of oleaginous crops. The output of essential oil produced in Hai Hung has increased markedly over the past few years, with 2,600 kilos in 1975 and 11,211.7 kilos in 1976. Hai Hung is more than able to overfulfill the 15-ton quota assigned by the state for 1977. It is expected that the province can produce 25 tons of essential oil this year. [Hanoi Domestic Service in Vietnamese 0400 GMT 18 May 77 BK]

HAU GIANG PADDY PROCUREMENT--In April, peasants in Hau Giang Province turned over to the state an additional 10,000 tons of paddy as agricultural tax and surplus sale, bringing the total volume of paddy delivered to the state granary since the beginning of the 10th-month rice crop to 156,632 tons. [Ho Chi Minh City Domestic Service in Vietnamese 1200 GMT 6 May 77 BK]

HAI HUNG RICE--In this year's 10th-month rice crop, Hai Hung Province plans to sow 118,000 hectares, 40 percent of which will be directly sown rice. Cooperatives have thus far prepared more than 11,000 tons of rice seeds. They still need another 2,000 tons to sow early 10th-month rice. The province has instructed the agricultural material supply sector, the communications and transportation sector and all districts within the province to tackle the problem of rice seedlings for cooperatives. [Hanoi Domestic Service in Vietnamese 2300 GMT 17 May 77 BK]

LONG AN RICE HARVEST--Peasants in Long An Province have completed harvesting the remaining 11,000 hectares of the total 45,682-hectare area of this year's winter-spring rice. They are accelerating earthwork to promptly sow and transplant the summer-fall rice. [Ho Chi Minh City Domestic Service in Vietnamese 2345 GMT 17 May 77 BK]

MEKONG DELTA RICE CULTIVATION--Thanks to the acceleration of the water conservancy task, provinces in the Mekong River Delta region have so far sown and transplanted the summer-fall rice on more than 60,000 hectares, achieving some 10 percent of the planned area. These provinces are now intensively doing earthwork to finish transplanting the remaining acreage. [Ho Chi Minh City Domestic Service in Vietnamese 1200 GMT 12 May 77 BK]
NGHE TINH CORN HARVEST--Various corn-growing cooperatives in Nghe Tinh Province are intensively preparing their manpower, facilities and tools to harvest 12,481 hectares of spring corn within 15 days. This is 2,347 hectares more than last year. There is a possibility that this year the spring corn will yield 18 to 20 quintals per hectare. [Hanoi Domestic Service in Vietnamese 1300 GMT 23 May 77 BK]

NGHE TINH DROUGHT--More than 17,000 hectares of rice in Nghe Tinh Province have suffered from drought. A number of areas where rice plants are growing ears have been severely hit by drought, causing rice plants to become withered. The provincial people's committee and the agricultural and water-conservancy sectors have sent many cadres to examine the drought-stricken areas and to seek ways to combat drought. Several public organs in Vinh City and Hung Nguyen, Nam Dan, Do Luong, Duc Tho and Thanh Chuong districts have volunteered not to use electricity or have economized on the use of electricity in order to save it for drought-control purposes. Duc Tho, Cam Loc and Nam Dan districts have succeeded in irrigating 10,000 hectares of rice, thus saving them from being destroyed by drought. [Hanoi Domestic Service in Vietnamese 0400 GMT 24 May 77 BK]

NGHE TINH MANIOC, CORN--Nguyen Luong Dan, chairman of the Cam Loc District People's Committee, Nghe Tinh Province, has disclosed that this year Cam Loc District planted 2,000 hectares of manioc, four times more than in 1976. Last year the district produced 34,800 tons of grain and 6,600 tons of manioc and other non-rice cereals. Phan Van De, secretary of the Huong Khe District party committee in the same province, has revealed that Huong Khe District is trying to increase its production of secondary crops, especially corn. This year the district has planted 2,000 hectares of corn, double that of the same period last year. [Hanoi Domestic Service in Vietnamese 2300 GMT 20 May 77 BK]

NGHE TINH RICE--In this year's autumn and 10th-month growing seasons Nghe Tinh plans to sow rice and secondary crops on 211,000 hectares, an increase of more than 40,000 hectares. Of the 40,000 hectare increase, the secondary crop area will constitute 18,000 hectares, or 2.5 times more than that of the previous 10th-month growing season. Nghe Tinh Province is trying to reclaim 15,000 hectares of wasteland and hilly land to supply cooperatives with sufficient nong nghiệp-22 new rice varieties to sow on schedule. [Hanoi Domestic Service in Vietnamese 0400 GMT 20 May 77 BK]

NGHE TINH SWEET POTATOES--In this year's summer season Nghe Tinh Province plans to sow 20,000 hectares of sweet potatoes, a threefold increase over the same period last year. The experienced sweet-potato-growing districts of Cam Xuyen, Thach Ha, Cam Loc, Huong Khe and Thanh Chuong are concentrating on preparing the soil to sow sweet potato seedlings as soon as it rains. [Hanoi Domestic Service in Vietnamese 0900 GMT 21 May 77 BK]
NGHE TINH SUBSIDIARY CROPS--Nghe Tinh Province has planted 85,900 hectares of this year's 5th-month spring subsidiary crops, recording an increase of 19,444 hectares over last year. Manioc has been planted beyond the planned norms by 48 percent, with an increase of 12,000 hectares over last year. The sweet potato area has been expanded by 17 percent, with an increase of more than 10,000 hectares over last year. The corn-planting norms have been fulfilled, recording an increase of 5,400 hectares. [Hanoi Domestic Service in Vietnamese 2300 GMT 15 May 77 BK]

NGHIA BINH GRAIN PRODUCTION--According to Vo Hoang, secretary of the Nghia Binh provincial party committee, Nghia Binh Province is making every effort to increase its grain production in the hope of being able to produce 800,000 tons of grain by 1980. Despite difficulties arising from the re-construction of its 189 villages heavily damaged during the war, Nghia Binh succeeded in cultivating 226,000 hectares and producing 440,000 tons of grain in 1976. [Hanoi Domestic Service in Vietnamese 1100 GMT 20 May 77 BK]

SONG BE LAND RECLAMATION--This year Song Be Province will strive to reclaim 4,000 hectares of wasteland in the new economic areas and put into production some 30,000 hectares in an effort to gradually stabilize the livelihood and solve the grain problem for more than 140,000 new settlers in the province. [Ho Chi Minh City Domestic Service in Vietnamese 0500 GMT 5 May 77 BK]

THAI BINH DROUGHT--Thai Binh Province has successfully saved 25,000 out of 40,000 hectares of spring rice from drought. The province is urging agricultural cooperatives to concentrate on combating drought and eradicating insects to protect riceplants toward the end of the 5th-month spring growing season. The provincial Agricultural Material Supply Corporation has provided cooperatives with 610 tons of diesel oil to insure the continuous operation of more than 1,000 diesel-powered pumps. Meanwhile the northern and southern Thai Binh farmland irrigation corporations have sent more workers to 300 electric pumping stations to maintain their round-the-clock operation. Cooperatives in the province have also sprayed insecticide on 3,000 hectares of rice, thereby saving them from being destroyed by stem borers, leaf rollers and "brown spot" blight. [Hanoi Domestic Service in Vietnamese 1300 GMT 19 May 77 BK]

THANH HOA DROUGHT--Because of a prolonged dry spell since early May, 39,000 hectares of the rice crop in Thanh Hoa have been affected by drought. A total of 800 mechanical pumps have been used to irrigate the rice paddies. The Thanh Hoa water-conservancy sector has also provided the districts of the province with dozens of mechanical pumps with an output of 1,000 cubic meters per hour. The provincial agricultural sector has provided the districts with 650 tons of diesel oil and assigned mechanical workers to various cooperatives to help farmers control the drought. Besides using mechanical pumps, many cooperatives in the seriously affected districts of Quang Xung, Nong Cong, Yen Dinh, Ha Chung and Ngoc Lac have mobilized from 400 to 500 workers daily to irrigate rice paddies with water buckets and
water wheels. The Thanh Hoa power plant has repaired generators to provide more power used in irrigation. Thanks to these efforts, 10,000 hectares of rice crop have been saved. In addition to drought control, agricultural cooperatives in Thanh Hoa have spread insecticide to save more than 8,000 hectares of rice crop ravaged by insects and plant diseases. [Hanoi Domestic Service in Vietnamese 1430 GMT 28 May 77 W]

TAY NINH BANKING OPERATIONS--The Tay Ninh provincial bank collected a credit of 98,700 dong from individuals and approximately 2.4 million dong from state-run establishments in April 1977. The amount of money deposited in the bank by private individuals during the same period amounted to 107,775 dong, an increase of more than 23,000 dong over March 1977. Thanks to its satisfactory management of cash, in this year's summer-fall growing season the bank gave 584,086 dong of loans to peasants. It also arranged a transfer of funds to loan the peasants 62 tons of fertilizer, 1,655 liters of fuel, 9 pumps, 1 plow, 425 head of draft cattle and 3,465 hoes. [Ho Chi Minh City Domestic Service in Vietnamese 2345 GMT 22 May 77 BK]

VINH PHU RICE--In this year's 10th-month rice season, Vinh Phu Province plans to sow 90,000 hectares, an increase of 2,700 hectares over the same period last year. Kim Anh District will have the largest 10th-month rice area in the province--8,000 hectares. The provincial agricultural material supply sector has provided cooperatives with more than 8,100 tons of apatite, 6,100 tons of lime, approximately 4,000 tons of phosphate and 1,400 tons of nitrogenous fertilizer. [Hanoi Domestic Service in Vietnamese 0400 GMT 17 May 77 BK]

HAI HUNG 10TH-MONTH RICE--This year agricultural cooperatives in Hai Hung Province plan to sow early 10th-month rice on approximately 36,000 hectares, representing 30 percent of the 10th-month rice acreage. This is to create conditions to increase the winter rice acreage by 50 percent over last year. These cooperatives are preparing manpower and Nong Nghiep-1 and Nong Nghiep-23 new rice varieties to sow early 10th-month rice on schedule. [Hanoi Domestic Service in Vietnamese 1100 GMT 28 May 77 BK]

SOUTHERN RICE--So far, 17 southern provinces and cities have sown summer-fall rice in 141,000 hectares, representing 19.6 percent of the planned acreage. This figure includes 107,000 hectares sown in the Mekong Delta. Provinces with the largest rice areas sown so far are An Giang, Tien Giang, Lam Dong and Thu Thien. [Ho Chi Minh City Domestic Service in Vietnamese 0500 GMT 28 May 77 BK]

HAIPHONG 10TH-MONTH RICE--This year Haiphong plans to sow 10th-month rice on 45,000 hectares, an increase of 1,000 hectares over last year. Agricultural cooperatives in Haiphong have thus far prepared 4,000 tons of rice seeds of different varieties. An Hai, An Thuy and Thuy Nguyen districts are striving to redistribute rice seedlings among cooperatives by transporting rice seedlings from areas with surpluses to areas with shortages. [Hanoi Domestic Service in Vietnamese 0530 GMT 1 Jun 77 BK]
HA NAM NINH HOG BREEDING--Last month Ha Nam Ninh Province raised approximately 10,000 additional hogs, bringing the present number of hogs in the province to 597,000. This figure proves that Ha Nam Ninh has made considerable efforts in expanding its herd of hogs, despite difficulties arising from a shortage of grain. However, compared with the current demands, the number of hogs mentioned above is unremarkable. Along with increasing the number of hogs, Ha Nam Ninh has succeeded in planting more than 2,600 hectares of spring corn; 6,500 hectares of 5th-month sweet potatoes and 4,700 hectares of vegetables for use as feed. [Hanoi Domestic Service in Vietnamese 0400 GMT 2 Jun 77 EK]

BEN TRE HOG BREEDING--By late May 1977, Ben Tre Province had 80,000 slaughter hogs and 14,000 sows—an increase of 50 percent over the same period last year. The province is building a hog breeding station and a feed processing plant. It has also guided peasants in pushing ahead hog breeding in order to gradually make hog breeding a major production sector. [Ho Chi Minh City Domestic Service in Vietnamese 0245 GMT 3 Jun 77 EK]

BEN TRE RICE--Despite numerous difficulties, Ben Tre Province plans to sow summer-fall rice on the entire 45,000 hectares. By late May 1977, the province had sown summer-fall rice on more than 13,000 hectares, or one-third of the planned acreage. [Ho Chi Minh City Domestic Service in Vietnamese 0500 GMT 3 Jun 77 EK]

VINH PHU DROUGHT--After only a short period of time, Vinh Phu Province has succeeded in getting sufficient water to save 10,000 hectares of rice from being destroyed by drought. Districts in the province have economized on the use of electricity to operate water pumps against drought. In addition, the province has successfully saved 2,000 hectares of rice from destruction by insects. [Hanoi Domestic Service in Vietnamese 2300 GMT 3 Jun 77 EK]

HA SON BINH SECONDARY CROPS--In order to achieve the goal that by 1980 secondary-crops output should constitute 17 to 20 percent of the grain output, Ha Son Binh Province has urged various districts to prepare sufficient potato seedlings to sow in the forthcoming winter growing season. Approximately 10,000 hectares of land have been zoned off to sow corn along the Red, Da, Dey and Boi rivers. Concentrated manioc growing areas have already been set up in mountainous and midland districts. The province was reported to have overfulfilled criteria for planting manioc in the current growing season by 10,000 hectares. [Hanoi Domestic Service in Vietnamese 0400 GMT 4 Jun 77 EK]

TAY NHINH SECONDARY CROPS--In this summer-fall season, Tay Ninh Province plans to sow secondary crops and short-term industrial crops—including manioc, corn, sweet potatoes, kaoliang, peanuts and sugarcane—on 46,000 hectares. In the first 20 days of May, the province succeeded in sowing secondary crops on approximately 5,000 hectares—more than 1,500 hectares of sugarcane; 1,500 hectares of manioc; 1,000 hectares of corn and 1,400 hectares of peanuts. [Ho Chi Minh City Domestic Service in Vietnamese 1200 GMT 30 May 77 EK]
THAI BINH Hog BREEDING—Thai Binh Province is guiding a number of agricultural cooperatives in breeding hogs according to industrial methods. Along with showing cooperatives how to produce combined feed, in 1976 the province successfully guided six agricultural cooperatives in Dong Hung District in mass breeding hogs according to industrial methods. These cooperatives have built pigpens according to technical standards and are breeding hogs with many kinds of combined feedstuffs supplied by the provincial feed supply corporation. This year Thai Binh has had 30 agricultural cooperatives which are experimenting with the breeding of 969 hogs. This figure does not include 4,257 hogs in regular herds. Experience shows that the application of industrial methods in hog breeding has helped cooperatives in quickly increasing their herds of hogs as well as the weight of marketable hogs. The province is striving to increase the number of hogs to between 800,000 and 1 million by 1980 with each marketable hog weighing 60 kilos or more. [Hanoi Domestic Service in Vietnamese 0530 GMT 30 May 77 BK]

NGHE TINH CATTLE—In order to make animal husbandry a major production sector, agricultural cooperatives in Nghe Tinh Province have set aside from 10 to 15 percent of their manpower to set up professional animal husbandry teams. By 30 April, Nghe Tinh had raised nearly 370,000 head of cattle and buffalo, an increase of more than 2,500 over the same period last year. [Hanoi Domestic Service in Vietnamese 0400 GMT 30 May 77 BK]

VINH PHU HOGS—In order to quickly expand the number of hogs following the 5th-month spring rice harvest, cooperatives in Vinh Phu Province have thus far prepared 85,725 breeding piglets despite difficulties arising from a grain shortage. Since early May 1977, districts in the province have distributed 23,300 breeding piglets to cooperatives. [Hanoi Domestic Service in Vietnamese 0400 GMT 30 May 77 BK]

NORTHERN PROVINCES DROUGHT—Due to prolonged drought, by 20 May drought-stricken ricefields in the north constituted 32.8 percent of the rice acreage. Provinces hardest hit by drought are Thai Binh, Thanh Hoa, Hai Hung, Ha Nam Minh and Vinh Phu. The number of drought-stricken ricefields in Hai Hung Province amounts to 30,000 hectares. So far, Thai Binh, Ha Nam Minh, Thanh Hoa and Hai Hung provinces have respectively saved 30,000 hectares; 19,000 hectares; 8,000 hectares and 20,000 hectares of rice from drought. Along with fighting drought, northern provinces have used lanterns to trap moths and have sprayed insecticide to protect ricefields. They have also activated 4,860 professional irrigation units with approximately 308,300 members. [Hanoi Domestic Service in Vietnamese 1300 GMT 29 May 77 BK]

NEW ECONOMIC AREAS—More than 60,000 people in Quang Nam-Danang Province have gone to build various new economic areas within the province. Those resettling in the mountainous area of Hoa Vang District have succeeded in reclaiming thousands of hectares of wasteland and planting tens of thousands of manioc plants and hundreds of hectares of rice and secondary crops. [Hanoi Domestic Service in Vietnamese 0530 GMT 3 Jun 77 BK]
NGHIA BINH DROUGHT--Due to prolonged drought, Nghe An Province now has 6,000 hectares of rice and thousands of hectares of secondary crops which are in need of water. Hardest hit by drought are Phu My, Phu Cat, (Tay Son), Binh Son, Son Tinh and Duc Pho districts, where peasants have focused their efforts on fighting drought to protect rice from destruction. While combating drought, Nghe An Province has sown 3,600 more hectares of summer-fall rice. [Hanoi Domestic Service in Vietnamese 1100 GMT 4 Jun 77 BK]

Binh Tri Thien Crops--Binh Tri Thien Province has thus far planted secondary crops on more than 59,800 hectares or 109 percent of the planned acreage. This is an increase of 19,500 hectares over last year's winter-spring crops. Many areas of secondary crops in the province are now suffering from drought and are being ravaged by insects. The Provincial People's Committee has coordinated with related sectors in helping local peasants irrigate rice-fields to protect them from drought. [Hanoi Domestic Service in Vietnamese 1100 GMT 1 Jun 77 BK]

Dong Nai Land Reclamation--Hanoi, Jun 16--People in Dong Nai Province, north of Ho Chi Minh City, have this year reclaimed 20,000 hectares of land, more than 15,000 of which are now under cultivation. Almost 8,000 hectares have been reclaimed and tilled at 10 state farms in the province. [Excerpt] [Hanoi VNA in English 0300 GMT 16 Jun 77 OW]

READERS COMPLAIN ABOUT ELECTRIC POWER OUTAGES

Hanoi Hanoi MOI in Vietnamese 8 Apr 77 p 4

√Readers' Opinions column: "The Situation Regarding Very Extended Electric Power Outages"

√Text√ We, the cadres, workers, and students in the collective zones of the Tran Hung Dao Machine Works, Hong Ha Office Supplies Factory, Office of the Ministry of Light Industry, Institute of Sanitation and Epidemiology, College of Pharmacology, and so on subordinate to the Tho Lao subregion, wish to discuss the following situation with the Zone 1 Electricity Management and Distribution Service:

For a month now in this zone, there have frequently been electric power outages. Every day from 1700 to 2100 hours, the most essential period of time for activities, the electricity has gone off. Sometimes, the outages have lasted an entire day or even an entire week. The extended electric power outages as above cause many difficulties for the lives of the cadres and workers and the studies of the children. We propose that the service urgently have measures to overcome this. -- Mai Huy (and a number of readers in the collective zones of the Tran Hung Dao Machine Works, Hong Ha Office Supplies Factory, College of Pharmacology, and Institute of Sanitation and Epidemiology).

TRANSPORTATION AND COMMUNICATIONS

BRIEFS

WIRED RADIO STATION--The Quang Nam-Danang Provincial Information and Cultural Service recently inaugurated a 1,200-watt wired radio station and the Hoi An Heritage Pavilion. This radio station is the second to have been built by the province this year. The Heritage Pavilion is designed to display hundreds of objects and pictures reflecting the Hoi An city dwellers' reputation of fighting indomitably under the party leadership in the past two wars of resistance. [Hanoi Domestic Service in Vietnamese 1100 GMT 22 May 77 BK]

TELEX FACILITIES--The post and telegraph sector has installed a Telex system of teletypewriters using a telephone dial to establish connections at 64 public organs in Hanoi, Haiphong and Ho Chi Minh City in order to facilitate communications. This is an experimental project of the post and telegraph sector aimed at more effectively serving the requirements for radio communications and long-distance communications for economic purposes. OVER 400 GO TO BUILD NEW ECONOMIC AREAS IN SONG BE, TAY NINH

Ho Chi Minh City SAIGON GIAI PHONG in Vietnamese 19 Apr 77 pp 1, 4

[Article by M.V.: "More Than 400 Municipal Compatriots Continue To Leave To Build New Economic Areas"]

[Text] SGP--Today, 19 April, the new economic areas of the two provinces of Song Be and Tay Ninh continue to welcome over 400 more municipal compatriots who came there to establish new livelihoods.

This is the fourth departure phase of city people during April.

In Tan Binh Urban Ward, 41 families, consisting of 154 people, went to establish livelihoods in Van Lieh village (Tan Bien district, Tay Ninh Province) a village directly built by the people of the ward and inaugurated at the end of last year.

During this phase, Cay Truong 2 New Economic Village (Ben Cat district, Song Be Province) received 29 more families, consisting of 126 people from the 1st Precinct, who went to set up livelihoods. Since the beginning of 1977, the 1st Precinct has sent approximately 1,500 people to establish livelihoods and nearly 2,000 other people to return to their old homes to make a living.

In this phase Song Be Province is still receiving 76 people from Binh Chang district who have gone to establish livelihoods in Long Binh village (Ben Cat district) and 37 people from the 6th Precinct who went to build Lai Uyen village (Chon Thanh district).
SMALL BUSINESS FAMILIES RETURN TO VILLAGES, BUILD NEW ECONOMIC AREAS

Ho Chi Minh City SAIGON GIAI PHONG in Vietnamese 18 Apr 77 p 1

[Article by T.Q.T.: "6th Precinct: Nearly 200 Families of Small Merchants Return to Villages and Go To Build New Economic Areas; 30 Small Merchants from Binh Tay Market Pool Capital To Set Up A Cattle Farm"]

[Text] SGP--Responding to an appeal to municipal women on 8 March from Vo Van Kiet, chairman of the Municipal People's Committee, many women merchants in the 6th Precinct have transferred to production, achieving excellent results.

In only 3 months, in spite of many difficulties the 6th Precinct had 20 small merchant families return to their villages and 45 families went to build new economic areas. Altogether in the first quarter of 1977, 118 small merchant families (313 people) returned to their villages and 69 other families (153 people) went to establish livelihoods in new economic areas.

That does not include the many small merchant families from such market areas as Benh Tay, Phu Lam, Binh Tien, and so on, who had many people go into agricultural work or to new economic areas.

Besides this, 30 women grocers from Binh Tay Market pooled capital to set up a farm to raise pigs in Binh Chanh district, completely abandoning their former professions. In addition dozens of other small merchants who received direct motivation and assistance from the Women's Union Chapter also registered and gathered together sewing machines and established a ready-made clothing section.
CHARACTERISTICS OF SOVIET AN-30 PHOTOGRAPHY AIRCRAFT DESCRIBED

Hanoi KHOA HOC VA DOI SONG in Vietnamese 16 Apr 77 pp 6, 16

Article by Le Quy Thuc, MS in Photosurveying: "The AN-30 Photography Aircraft"

Our country's air photography sector was recently equipped with a special-use Soviet AN-30 photography aircraft (see picture below).

The best altitude for taking pictures is 6,000 meters above sea level and the most suitable speed is 430 kilometers/hour; with the capacity to hold 5,500 kilograms of fuel and 580 kilograms of reserve fuel, the operating range of the aircraft is 2,600 kilometers; it needs a runway at least 1,800 meters long in order to take off and land.

The navigation room was designed at the front of the aircraft with transparent glass in front and on both sides and on the floor below the seat there are four telescopic lenses to ensure broad and good observation for the navigator.

Thanks to the automatic pilot systems with automatic circling elements and the instrument systems, it is possible to maintain accuracy for the direction of flight and angle of inclination and turn around in approximately ± 0.5 degrees with a stable aircraft elevation within approximately ± 20 meters.

On the aircraft, an AFA-41-7.5 camera has been installed, with the largest pictures being 18 X 18 centimeters and with 75 millimeter negatives, an image angle /goc truong anh/ of 119 degrees, and a lens having a maximum distortion error of 0.02 millimeters. There is a perfectly square grid on the pictures in order to check the degree of distortion and the degree of pressure of the film. The AFA-41 camera is installed on a stable TAU-M rotor balance mount, ensuring a picture inclination within ± 15 minutes of arc.
Besides this, a set of three A54/50-FK cameras has been installed, with 500 millimeter negatives, 30 X 30 centimeter pictures; one camera has a perpendicular optical axis and the two side cameras have an optical axis joined to the plumb line at an angle of 28 degrees.

After inspecting and accepting the aircraft, we organized taking text photographs at an altitude of 700 meters with a ratio of 1:10,000 over a 1,200 square kilometer lowlands region and fulfilled the technical requirements well. The automatic pilot system was maintained on 50-kilometer portions of the flight and the error concerning the degree of horizontal curvature [do phu ngang] of the pictures did not exceed 5 percent as compared with the design.

It can temporarily be concluded that the AN-30 photography aircraft well satisfies the needs of taking pictures in the present stage of building the economy and national defense.

The special-use AN-30 photography aircraft.

August 16 – September 15, 1976

AUGUST

17 — At the Colombo Non-Aligned Summit Conference Prime Minister Pham Van Dong said: "We are resolved to be self-reliant, win back sovereignty over our economy, carry out democratic and social reforms in order to bring the latent capacity of the people into play in national construction."

20 — President Ton Duc Thang of the Socialist Republic of Viet Nam sent a message of sympathy to the earthquake victims in the Republic of the Philippines.

21 — The SRVN Embassy in Cuba held a ceremony to decorate Cuban cadres and workers who have shown merit in helping the Vietnamese people build their country.

22 — VNA: The State Commission for Science and Technology of the SRVN published the 1975 list of 1,598 State standards and 866 norms for various branches of production.

23 — The first Ambassador Extraordinary and Plenipotentiary of the Federal Republic of Germany to the SRVN presented his credentials...

24 — Tea planted on 40,000 hectares in the SRVN represents a three-fold increase as compared to the period before the August Revolution. Nearly 50 State farms and hundreds of cooperatives are specialized in tea planting and trading.

25 — The Inspection Committee of the Government of the SRVN organized 2,912 people’s inspection committees at grassroots level with a total of 20,000 inspectors.

The Light Industry College held a graduation ceremony for 87 students of the 6th intake, bringing the number of engineers trained by the College to 1,326, 41% of them women.
26 — The spokesman of the SRVN Foreign Ministry denounced acts of terrorism against Vietnamese residents in Thailand and demanded that the Bangkok administration take immediate measures to stop these acts.

27 — Decoration with orders of 71 localities and units which worked well in building President Ho Chi Minh Mausoleum. So far, 1.7 million people, including 1,518 delegations of foreign guests, have come to pay tribute to President Ho Chi Minh at the Mausoleum.

— Inauguration of An Loc bridge, the longest bridge in Binh Tri Thien province, crossing the Bo river.

— On the occasion of his visit to Con Dao (Poulo Condor) Comrade Le Duan, First Secretary of the Central Committee of the Viet Nam Workers’ Party, who spent several years in prison there himself, reminded the cadres, soldiers and people there to “promote the tradition of heroism of Con Dao island and strive to build the island into a prosperous and beautiful region, a precious pearl of the Viet Nam Fatherland”.

28 — VNA: Nine kindergartens with the best achievements in child-care in northern Viet Nam were awarded Labour Orders by the National Assembly.

— Arrival in Hanoi of a Kampuchean Women’s delegation led by Mrs. Leng Say, member of the Assembly of the People’s Representatives, member of the Executive Committee of the Kampuchean Democratic Women’s Union of Phnom Penh City, on a friendship visit to Viet Nam.

— A delegation of the Viet Nam—Soviet Union Friendship Association led by Hoang Minh Giam, member of the Presidium of the Central Committee of the Viet Nam Fatherland Front left Hanoi for a friendship visit to the Soviet Union and to participate in activities in celebration of the 31st National Day of Viet Nam in the Soviet Union.

— Hoang Van Tien, Vice-Minister for Foreign Affairs, envoy of the President of the SRVN, ended his friendship visit to a number of African countries, including the Republic of Cape Verde, the Republic of Congo and Nigeria.

29 — VNA: 15 cities and towns in southern Viet Nam have harvested 166,830 ha. of summer-autumn rice crops and finished transplanting 1,073,640 ha. of winter rice.

31 — The President of the SRVN made public an order granting amnesty to those convicts or inmates of re-education camps who had made progress during their re-education.

— Hanoi: Premier Pham Van Dong received Cardinal Trinh Nhu Khue who had recently returned from his consecration in Vatican.

— Signing in Moscow of a plan for cultural and scientific cooperation for 1976 between the SRVN and the USSR.
SEPTEMBER

1 — An SRVN Government delegation, led by Vice-Premier Le Thanh Nghi, member of the Political Bureau of the Viet Nam Workers' Party Central Committee, ended its friendship visit to the Lao People's Democratic Republic which began on August 29. During the visit the two countries have signed a number of agreements on cooperation and mutual assistance, such as an agreement on gratuitous aid and interest-free loans granted to Laos by Viet Nam in 1976 and 1977; an agreement on economic, cultural, scientific and technical cooperation; an agreement on the formation of the Viet Nam — Laos Commission for Economic, Cultural, Scientific and Technical Cooperation; an agreement on trade and an agreement on transit freight between the two countries.

2 — The Minister of Radio Giay Phong and the Voice of Viet Nam Radio. Radio Giay Phong was turned into a regional section of the Voice of Viet Nam Radio in Ho Chi Minh City.

3 — Universities and colleges in northern Viet Nam opened for the new school year.

4 — Premier Pham Van Dong received Archbishop Nguyen Kim Diem of Hue.

5 — 31st National Day of the SRVN. Premier Pham Van Dong delivered a speech on the occasion. (see text in this issue).

6 — One of the main streets in the capital city of Mozambique was renamed Ho Chi Minh.

7 — The Thai Nguyen Non-ferrous Metallurgical Plant (Bac Thai province) officially put its anti-mony workshop into operation.

8 — Sven Andersson, Swedish Foreign Minister, declared: "Sweden will do all it can to gain Viet Nam her rightful place in the UN."

9 — All public offices in Ho Chi Minh City adopted statutory working hours: from 8 a.m. to 4:30 p.m. ...

10 — Chinese specialists who have helped Viet Nam in building a Film Processing Factory were decorated with Labour Orders and Friendship Medals.

11 — VNA: So far southern Viet Nam has set up 50 State farms, some of them old plantations which have been transformed.

12 — VNA: Northern Viet Nam has established 36 work-and-study third level general education schools with a total of 8,600 pupils.

13 — Signing in Vientiane of a civil aviation agreement between Viet Nam and Laos.

14 — Signing in Hanoi of an agreement on cultural cooperation for 1976-77 between Viet Nam and Poland.

15 — A delegation of the SRVN Ministry of culture led by Minister Nguyen Van Hieu left for Ulan Bator (Mongolia) to attend the Conference of Ministers of Culture of the socialist countries.

16 — Founding of the Viet Nam Committee for Solidarity with the Chilcan People with Ha Xuan Truong, Vice-Minister of Culture, as Chairman.

17 — New York: the Co-ordinating Bureau of Non-Aligned Countries called on its member countries to support Viet Nam's application for UN membership. "Any opposition to Viet Nam's application for UN membership is contrary to law, morals and the UN charter.

18 — Hanoi: The Viet Nam Journalists' Association held a meeting to celebrate the 30th founding anniversary of the International Journalists' Organization.

19 — Premier Pham Van Dong received representatives of the Viet Nam Unified Association of Buddhists.

20 — The Central Committee of the Viet Nam Workers' Party, the Standing Committee of the National Assembly and the Government of the SRVN sent a message of condolences on the demise of Chairman Mao Tsetung, Chairman of the Central Committee of the Communist Party of China, Chairman of the Military Commission of the CPC Central Committee, Honorary Chairman of the National Committee of the Chinese People's Political Consultative Conference. In Hanoi, leaders of the Party and Government of the SRVN called on the Embassy of the People's Republic of China to convey their sympathies and condolences. The SRVN Government decided that flags would be flown at half-mast on September 18 in mourning of Chairman Mao Tsetung.

22 — The spokesman of the SRVN Foreign Ministry issued a statement revealing US manoeuvres in hampering the negotiations between Viet Nam and the US on the implementation of Article 8 (b) (concerning US MIAs) and Article 21 (concerning the US obligation to contribute to healing the wounds of war in Viet Nam) of the Paris Agreement.

23 — Premier Pham Van Dong sent a message of sympathy to victims of the recent floods in Japan.

24 — On the proposal of the French UN delegate, the Security Council of the UN decided to postpone considering the SRVN application for UN membership until November 1976.

25 — Tokyo: Signing of an agreement on gratuitous aid from Japan to the SRVN in 1976.

26 — 12 million pupils of 20,000 secondary schools began the 1976-1977 academic year, the first school-year of the SRVN. On this occasion President Ton Duc Thang sent a letter to all teachers and pupils in the whole country. The Ministry of Education supplied the schools with 900,000 school materials.

27 — The Executive Committee of the International Monetary Fund decided to recognize SRVN membership in spite of US protests.

28 — The Hanoi — Hue civil air-route was opened.

29 — BBC: Senator M. Mansfield, leader of the Democratic Party at the US Senate, said that the US should establish normal diplomatic relations with Viet Nam and Kampuchea, because the quicker these relations were established the sooner the US would know about the fate of missing Americans.
SEPTEMBER

16. — Vice-Premier Le Thanh Nghi received a Soviet delegation headed by Director Smirnov of the Leningrad Institute of Urbanism, on a visit in connection with Soviet cooperation with Viet Nam on transformation and construction of the capital of Hanoi.

— Up to now, Ho Chi Minh City has restored and put into operation 6,000 small industrial and handicraft enterprises.

— The Teachers' Training College in Hanoi enrolled 400 demobilised soldiers as students for the school year 1976-1977.

17. — A two-year plan of Cultural Co-operation (1976-1977) between the SRVN and the SR of Czechoslovakia was signed in Hanoi.

— Inauguration of the Tien An bridge crossing the Ben Hai river (Binh Tri Thien province). It is 120 metres long and is an important link on the Salung— Dong Ha section of the "Reunification" railway.

— VNA: the Cogivina paper mill (Dong Na) has carried out a successful experiment using ordinary wood instead of pine-wood for the production of newsprint.

— Mr. Knut Frydenland, Foreign Minister of Norway, received Dinh Duc Thien, Minister for Petroleum and Gas Affairs of the SRVN Government.

18. — Arrival in Hanoi of a Lao Women’s delegation headed by Mrs. Kham Pheng Boupha, member of the Standing Committee of the Lao Supreme People’s Council, and chairman of the Lao Patriotic Women’s Association.

— Hoang Luong, Vice-Minister for Foreign Affairs, Envoy of the Prime Minister of the SRVN Government, ended his friendship visit to the United States of Mexico begun on September 10, 1976.

— Closing session of the 9th Congress of the International Union of Prehistory and Protohistory Science (IUPPS) of UNESCO. The SRVN was admitted as a member, and four seats were reserved for Vietnamese archeologists. Professor Pham Huy Thong, Director of the Viet Nam Archeological Institute, attended the congress and was elected member of the IUPPS Standing Committee.

19. — Inauguration of the Co Loa Film Processing Workshop (Hanoi) built with Chinese assistance.

— Prime Minister Pham Van Dong sent a message of congratulations to the 8th Congress of the International Organization of Journalists (I.O.J.) held in Helsinki (Finland).

— Arrival in Hanoi of the Cultural Delegation of the L.P.D.R. headed by Mr. Ounheuane Phoumsavat, Vice-Minister of Information, Propaganda, Culture and Tourism, on a visit to Viet Nam.

— Prime Minister Pham Van Dong received a Cuban delegation headed by Ramon Castro Ruz, Director of the Vendeda Ficadura Catle Breeding Centre.

— Merging of youth organizations throughout the country under the name of Viet Nam Youth Federation headed by Professor Le Quang Vinh.

— IURD admitted the SRVN as member.

— Opening of the 31st session of the UN General Assembly. Mr. Amerasinghe, Chairman of the session, said that the reunification of Viet Nam is an unprecedented historical event after World War II; and that Viet Nam is fully entitled to become member of the UN.

— Inauguration of the Hanoi— Ho Chi Minh City— Phnom Penh civil aviation route.

— A delegation of the Ministry of Labour headed by Minister Nguyen Tho Chan left for Warsaw (Poland) to attend the conference of ministers of socialist countries on apprenticeship.

— A delegation of the SRVN headed by Tran Cong Tuong, Director of the Government legislative committee, left Hanoi for the conference of socialist ministers of justice held in Sofia (Bulgaria).

— Opening in Berlin of a conference of socialist countries on theoretical studies of art and literature. The Vietnamese delegation was headed by Nguyen Kanh Toan, alternate member of the VNWP Central Committee, Director of the Social Sciences Committee.

— The Government of the DPR of Korea issued a statement condemning the hostile policy of the USA toward Viet Nam.

— A meteorological delegation of the SRVN headed by Nguyen Xien, Director of the Meteorological Department, attended a conference of directors of meteorological departments of socialist countries held in Bulgaria.

20. — Up to now, the industrial enterprises and cooperatives in the North have opened 235 schools and 1,000 classes for professional training of 100,000 skilled workers of 300 different trades every year.

— The Asian Development Bank (ADB) recognized the membership of the SRVN.

— Signing in Hanoi of a two-year plan of medical cooperation (1976—1977) between the SR of Viet Nam and the DPR of Korea.

25.—Arrival in Hanoi of a Soviet film delegation.

26.—A delegation of the SRVN Foreign Ministry headed by Vice-Minister for Foreign Affairs Hoang Luong ended its friendship visit to Cuba.

27.—VNA: The International Organization of Journalists (IOJ) conferred a Julius Fucek Medal on the Cuban Committee for Solidarity with Viet Nam, Kampuchea and Laos.

28.—The Constitution Drafting Committee held its 2nd plenary session.

—The UN delegations of the Soviet Union, Yugoslavia and Costa Rica demanded the admission of the SRVN to this international forum.

29.—Arrival in Hanoi of a Portuguese T.U. delegation for a friendship visit to Viet Nam.

—The Cuban Institute of Books handed to the SRVN Embassy in Havana the first of 15,000 copies of "Prose and Poems" by President Ho Chi Minh, published in Spanish by the Cuban Literature and Art Publishing House.

—The Canadian Ministry of External Affairs issued a statement supporting SRVN application for UN membership.

OCTOBER

1.—Signing in Ulan Bator of a programme of cultural cooperation for 1976-1977 between the SRVN and the People's Republic of Mongolia.

—Participation of the SRVN in the 13th Baghdad Fair held in the Republic of Iraq.
