<td>The Relationships of Stress Exposures to Health in Gulf War Veterans study of 10,000 Operation Desert Shield/Storm (ODS/S) veterans (including 5,000 females) uses a national probability-based clustered design in which the mail survey units are a proportional-to-size probability sample of metropolitan areas and county groups from the mailing addresses of veterans who were deployed to the Persian Gulf during ODS/S. The mail survey will provide information on physical health outcomes, exposure to traumatic stressors, psychological functioning, and some basic socioeconomic characteristics. A second systematic sample of over 2,000 male and female veterans will be selected in equal proportions from two groups (Gulf War veterans who reported symptoms of Gulf War Illness and those who did not). This sample will be administered a computer-assisted telephone interview (CATI) that focuses on collecting more in-depth information on preilitary trauma exposure; military-Gulf War trauma and other stress exposures; psychiatric symptoms and disorder, including posttraumatic stress disorder (PTSD), major depression, dysthymia, and substance dependence; social support during the Gulf War and upon homecoming; and socioeconomic outcomes, including labor market functioning and health care service utilization. The mail survey questionnaire has been compiled and formatted for pilot testing and the Desert Shield/Storm (DS/S) and the Comprehensive Clinical Evaluation Program (CCEP) databases are being prepared for selecting the study sample. INTRODUCTION: Brief Narrative of Subject, Purpose and Scope of the Research

Research on Gulf War (GW) illnesses leaves many questions unanswered about diagnostic syndromes of GW illnesses, dimensions of stress and stress exposures encountered by GW veterans, relationships of stressors and GW health syndromes, and factors that may mediate relationships. The proposed study has five key aims that will begin to address these gaps and enhance understanding of undefined GW illnesses:

(a) To identify and examine dimensions of illnesses and health problems commonly reported by GW veterans;

(b) To assess exposures to stress comprehensively and to identify the dimensions of stress;

(c) To examine the extent to which exposures to multiple dimensions of stress during deployment and participation in Operations Desert Shield and Desert Storm (ODS) are associated with the commonly-reported and undefined post-war health problems of GW veterans;

(d) To clarify how relationships of stressors and GW illnesses are influenced by premilitary and predeployment adversities, risk factors, and protective factors;

(e) To examine the role of post-ODS factors (e.g., instrumental and emotional social support, general psychological functioning, specific comorbid psychiatric disorders, such as post-traumatic stress disorder and major depressive disorder), as mediators of relationships among GW stressors and GW illnesses.

These aims will be achieved by obtaining in-depth data from a national sample of GW veterans, including both men and women in active and reserve components. The design for this survey is a clustered two-stage sample of military personnel who were deployed to the Persian Gulf during the Gulf War era. There are two phases to this design. Phase 1 is comprised of a mailed Gulf War Veterans Health Survey to identify veterans in the sample currently experiencing symptoms of Gulf War Illness (GWI). Phase 2 is an exposure and risk interview consisting of an in-depth Computer Assisted Telephone Interview (CATI) survey of a subsample of Phase 1 respondents with and without medically unexplained physical symptoms characteristic of GWI.

BODY

This section describes the research activities and accomplishments for the Year 1 tasks outlined in the approved statement of work. Plans for Year 2 are also described for each task.

Sampling

Year 1 Activities

* Refined and revised the sampling design based on study objectives and a more
complete understanding of available data for use in the sampling. A summary of the revised sampling design appears in Attachment A;

* Searched DoD files to determine the most appropriate files for use in developing the sampling frame and selecting the sample for the study. Determined that Defense Manpower Data Center (DMDC) had the most relevant files;

* Have requested and obtained support from DMDC for constructing the sampling frame using the Desert Shield/Storm (DS/S) and the Comprehensive Clinical Evaluation Program (CCEP) databases;

* Have received county level databases with personnel counts by strata identified for the study from the DS/S and the CCEP databases, the latter of which will be used to identify personnel in high risk strata. Will use county level data to form primary sampling units (PSU) by collapsing across counties. We will next select a sample proportional to the number of personnel in the PSU;

* Developed preliminary allocation scheme to assign sample sizes across the sampling strata;

* The current files that we have received have missing addresses for 19% of the personnel such that these personnel cannot be associated with a county as needed for the frame. We are currently working with DMDC to see if they can find additional information to resolve this problem.

Year 2 Plans

* Complete the frame construction as soon as address problem is resolved;

* Select primary sampling units and submit to DMDC with instructions about how to select names and addresses of sampled personnel for the study;

* Compute sampling weights which reflect the selection probabilities at each stage of sample selection.

Mail Survey Questionnaire Development

Year 1 Activities

* Searched literature to identify key constructs and assessment domains for instrument;

* Obtained and reviewed instruments from other key Gulf War studies, including CDC’s Iowa study and DVA’s National Health Survey of Persian Gulf Veterans and their Family Members;
Selected key constructs and scales for inclusion in the Phase 1 Questionnaire from the literature and major Gulf War veterans studies to insure comparability with other national databases;

Adapted and revised questions from interview protocols to structure suitable for mail survey;

Compiled and formatted draft questionnaire for the Phase 1 mail survey for testing in the pilot study. Copy of draft survey questionnaire is enclosed in Appendix B: Gulf War Veterans Health Survey.

Year 2 Plans

Finalize Phase 1 mail survey instrument based on data obtained from pilot test;

Develop instrument for the phase 2 CATI survey;

Program and test the instrument for the Phase 2 CATI survey.

Data Collection

Year 1 Activities

Coordinated logistics to conduct pilot test scheduled for November 2, 1999;

Began recruiting subjects for pilot test scheduled November 2, 1999;

Coordinated preparations for tracing of missing addresses.

Year 2 Plans

Conduct pilot test of the Phase 1 questionnaire;

Conduct tracing operations to obtain missing addresses

Coordinate with National Computer Systems for the mail survey

Collect data for the mail survey

Clearances

Year 1 Activities

Obtained initial study clearance by Duke and RTI IRBs;
* Received clearance from Duke and RTI IRB for advertisement to recruit participants for pilot test;

* Obtained IRB clearances for pilot test;

* Submitted a written request to the National Institute for Occupational Safety and Health (NIOSH), through USAMRMC, for access to address data files obtained by NIOSH from the Internal Revenue Service through an Interagency Agreement under Internal Revenue Code (IRC) Section 6103 (m)(3). The addresses received will be used to locate individuals for the survey.

Year 2 Plans

* Obtain IRB and USAMRMC clearance for mail survey;

* Obtain Report Control Symbol from DMDC for Phase 1 questionnaire.

Project Schedule

Year 1 Activities

* The Year 1 project schedule experienced a significant delay at the beginning of Month 8. On May 10, 1999, the federal Office for Protection from Research Risks (OPRR) suspended the Multiple Project Assurance (MPA) of Duke University Medical Center (DUMC) that authorizes DUMC faculty to conduct IRB-approved research involving human subjects. All research activities were suspended for the nearly 2,000 DUMC studies involving human subjects, including our project. A component of the resolution by OPRR and DUMC mandated DUMC review of all DUMC research projects involving subcontracts to ensure compliance with federal requirements. Project tasks could not be resumed until these reviews were completed. This aspect of the resolution involved review of the human subjects compliance of hundreds of DUMC subcontracts and resulted in a two-month delay to the study (May 10 – July 12, 1999). Project activities resumed on July 13, 1999. The project GPO was informed immediately of the suspension and delays imposed by the OPRR action.

* The two-month suspension had little impact on the study budget as there were no time charges for task activities during this period. Costs incurred during this period were limited to study management and activities involving IRB clearance tasks. Review of the current budget indicates that funds are sufficient for completion of all approved study tasks.

* We have revised our task time line to take account of the delay imposed on our study by the DUMC-OPRR resolution of the MPA suspension. The pilot test of the Gulf War Veterans Health Survey questionnaire was scheduled for Year 1 in the approved Statement of Work. Planning and preparations for the pilot study were
completed in Year 1 and the pilot study is scheduled to begin early in Year 2 (November 2, 1999).

Year 2 Plans

* Review of the approved overall four-year schedule of tasks indicates that there is sufficient time in Year 2 to make up time lost to the Year 1 delay. All study activities will be completed within the four years of the project and within budget;

* The major impact of the Year 1 delay on the schedule for Year 2 is that the Gulf War Veterans Health Survey will be fielded from months 13 - 18, rather than months 10 - 15 as planned.

KEY RESEARCH ACCOMPLISHMENTS

This section of the report focuses on "key research accomplishments emanating from the research." This project is in the implementation phase at the end of Year 1 and does not yet have accomplishments emanating from the research to report.

REPORTABLE OUTCOMES

This section of the report summarizes the results of the completed research. There are no reportable outcomes given that this project is in the implementation phase.

APPENDICES

The report includes two appendices: Appendix A: Sample Design Summary, and Appendix B: Gulf War Veterans Health Survey Draft.
APPENDIX A: Relationships of Stress Exposures to Health in Gulf War Veterans Sample Design Summary

The target population is defined as the active-duty military personnel and reservists who were deployed to the Persian Gulf during the Gulf War era. More specifically, the active duty members must have served in-theater between 2 August 1990 and 31 July 1991. The Reserve and National Guard members must have been activated/federalized between 2 August 1990 and 31 January 1992.

The sampling design for this survey is a clustered two-stage sample of zip code areas or county-sized units and military personnel who were deployed to the Persian Gulf during the Gulf War era. There are two phases to this design. Phase 1 is comprised of a mailed Health Status Survey to identify veterans in the population currently experiencing symptoms of Gulf War Illness (GWI). Phase 2 is an exposure and risk interview consisting of an in-depth Computer Assisted Telephone Interview (CATI) survey of military personnel who were deployed to the Persian Gulf region during the conflict.

The Phase 1 sampling frame will be the Desert Shield/Storm (DS/S) database from the Defense Manpower Data Center (DMDC). This database contains participation and tracking information on more than 855,000 DoD and Coast Guard service members who served in Operation Desert Shield/Storm. This file includes all 11 components of the military services and the two components of the Coast Guard (Active and Reserve). The database contains one record per participant per component. Those who participated in more than one component are represented by more than one record on the file.

A first-stage-sampling frame of zip code areas or county-size units will be created from addresses in the DS/S database. This file will enable us to build a file of primary sampling units (PSUs) comprised of groups of zip code areas or groups of county equivalents that have 100 or more personnel. The units containing fewer than 100 personnel will be combined with an adjacent zip code area or county-size unit until the minimum is reached.

Using the total number of personnel in the PSU as the size measure, a sample of 100 PSUs will be selected with-replacement probability proportional to size from the total PSUs on the first-stage-sampling frame. Interviewing will be restricted to a sample of personnel who have mailing addresses within these PSUs.

In response to the need to meet study objectives, within each PSU, we will define 12 levels of explicit design strata based on a combination of military status (Active/Reserve), gender, and medical activity. The veterans' medical activity relates to whether or not any medical concerns were reported to the Comprehensive Clinical Evaluation Program (CCEP).

In addition to the DS/S database, the CCEP file will be used to define possible high exposure or at-risk explicit strata. This file contains demographic and clinical information on approximately 20,000 Gulf War veterans. Each medical evaluation consisted of a general physical examination, an exposure questionnaire, and basic laboratory tests conducted by local medical treatment facilities. Those Active Duty veterans on the CCEP file will be placed in two high-risk strata, 1 and 2 (males and females, respectively).

Other active duty veterans will be placed in explicit strata denoting differential levels of risk. The Unit Identification Numbers (UICs) of all personnel in Strata 1 and 2 will be used to define two additional risk stratum levels. Active Duty personnel from these UICs will be matched by UIC with the DS/S database and placed in the next two risk strata (Stratum 3 for males, Stratum 4 for females). Although these
personnel may not have reports of sickness, they are likely to have been exposed to the same stressful conditions as those who reported health concerns. So, all personnel veterans from these same military units may also be at a higher risk than other Gulf War-era-participants. All remaining Active Duty veterans not on the CCEP and not assigned to either of Strata 1-4 will be place in Strata 5 (males) and 6 (females). Similarly, corresponding Reserve and Coast Guard personnel will be placed in Strata 7 through 12.

A sample of 10,000 will be proportionally allocated over the 100 PSUs. Personnel in the high-risk strata will be over-sampled relative the GW veteran population within the stratum. A systematic sample of personnel will be selected within each stratum to participate in the Phase I Health Status Mail Survey. A sample file containing name and address information is needed so that the selected personnel may be contacted to participate. Approximately, 7,078 of these are expected to participate and approximately 15% or 1,062 of the respondents are expected to fall into the group of likely cases of Gulf War illness. From the sample of likely non-cases, a sub-sample of approximately 1,062 personnel plus the 1,062 likely Gulf War illness cases will be selected to participate in the Phase II Exposure and Risk Interview. This is an in-depth CATI survey just with persons deployed to the Gulf War region, half of whom reported Gulf War illness symptoms during the Phase I interview, and half who did not.
APPENDIX B: GULF WAR VETERANS HEALTH SURVEY (DRAFT)

Front cover:

minimal instructions

The purpose of this questionnaire is to find out more about the health of people who were deployed to the Persian Gulf Theater from August 1990 through July 1991.

If you were not deployed to the Persian Gulf Theater at all during that time period, please place an “X” in the box below and return the questionnaire in the postage-paid return envelope provided. We do not need you to answer any of the questions, but it is very important that you return the questionnaire to us so that we will know that you were not deployed during that time.

I was not deployed to the Persian Gulf Theater at any time from August 1990 through July 1991.

Questionnaire:

1. We would like to know in which area(s) of the Persian Gulf Theater you served from August 1990 through July 1991. From August 1990 through July 1991, in which area(s) did you serve? (Please choose “Yes” or “No” for each area).
   - IRAQ
   - SAUDI ARABIA
   - KUWAIT
   - TURKEY
   - OMAN
   - BAHRAIN
   - QATAR
   - THE UNITED ARAB EMIRATES
   - THE RED SEA
   - THE GULF OF OMAN
   - THE GULF OF ADEN
   - THE ARABIAN SEA
   - OTHER

2. From August 1990 through July 1991, about how much time did you spend in the Persian Gulf Theater? The total time from August 1990 through July 1991 is twelve months. (Please choose the best answer).
   - LESS THAN THREE MONTHS
   - THREE MONTHS BUT LESS THAN SIX MONTHS
   - SIX MONTHS BUT LESS THAN NINE MONTHS
   - MORE THAN NINE MONTHS

3. From August 1990 through July 1991, was the time that you served in the Persian Gulf Theater extended unexpectedly?
   - YES
   - NO
4. From August 1990 through July 1991, in which area of the Persian Gulf Theater did you spend most of your time? (Please choose the best answer).

- Iraq
- Saudi Arabia
- Kuwait
- Turkey
- Oman
- Bahrain
- Qatar
- The United Arab Emirates
- The Red Sea
- The Gulf of Oman
- The Gulf of Aden
- The Arabian Sea
- Other

5. From August 1990 through July 1991, about how long did you spend in the area of the Persian Gulf Theater in which you spent the most time (that is, the area you chose in question #4)? The total time from August 1990 through July 1991 is twelve months. (Please choose the best answer).

- Less than three months
- Three months but less than six months
- Six months but less than nine months
- More than nine months

6. While serving in the military (that is, during the entire time you have served on Active-Duty, in the Reserves, or the National Guard), about how much time in total have you spent in the Persian Gulf Theater? (Please choose the best answer).

- Less than three months
- Three months but less than six months
- Six months but less than nine months
- Nine months but less than one year
- One year but less than two years
- More than two years

7. From August 1990 through July 1991, in which component of the Military did you serve? (Please choose the best answer).

- Active Army (USA)
- Army National Guard (ARNG)
- Army Reserve (USAR)
- Active Navy
- Naval Reserve (USNR)
- Active Air Force (USAF)
- Air National Guard (ANG)
- Air Force Reserve (USAFR)
- Active Marine Corp
- Marine Corps Reserve (USMCR)
8. What date did you first begin serving in the Persian Gulf Theater, even if it was before August 1990?
   (month) (year)

9. What date did you stop serving in the Persian Gulf Theater, even if it was after July 1991, (that is, what was the end date of your last deployment to the Persian Gulf)?
   (month) (year)

Think of the first time you were deployed to the Persian Gulf Theater within the time period from August 1990 through July 1991. The next several questions refer to the time of that deployment, which will be called “the time of your first deployment”. Please remember that if you were deployed to the Persian Gulf Theater prior to August 1990 or after July 1991 we do not want you to answer regarding that time period.

10. At the time of your first deployment (that is, during the period from August 1990 through July 1991), what was your pay grade? A Warrant Officer should be considered an officer. (Please choose the best answer).

13. At the time of your first deployment (that is, during the period from August 1990 through July 1991), what was your marital situation? (Please choose the best answer).

NOT MARRIED, BUT LIVING AS MARRIED
MARRIED
SEPARATED AND NOT LIVING AS MARRIED
DIVORCED AND NOT LIVING AS MARRIED
WIDOWED AND NOT LIVING AS MARRIED
SINGLE, NEVER MARRIED, AND NOT LIVING AS MARRIED

14. At the time of your first deployment (that is, during the period from August 1990 through July 1991), do you feel that you were prepared to deal with the combination of challenges associated with your military service?

Yes
No

Now we would like to know about your health in the past 6 months. Then next group of questions are about a number of health problems or concerns a person might have.

15. In the past 6 months, have you experienced any of these health problems? (Please choose "Yes" or "No" for each health problem).

SEVERE ARTHRITIS, RHEUMATISM, OR OTHER BONE OR JOINT DISEASES

16. In the past 6 months, have you had persistent or recurring problems with...
(Please choose “Yes” or “No” for each health problem).

- Hot or cold spells, fever, sweats at night, or shaking chills
- Mouth sores
- Inflammation or redness of your eyes (pink eyes)
- Unexpected hair loss
- Sore throat or irritation
- Pain or aches in more than one joint
- Back pain
- Joint stiffness
- Muscle stiffness, aches, soreness, or stiffness
- Feeling weak in parts of your body
- Tender or painful lymph glands under your arms or in your neck
- A feeling of bodily discomfort after exertion
- Numbness or tingling in parts of your body
- Loss of hearing or ringing in your ears
- Tremors or shaking
- Double vision, when you see 2 images, not correctable by glasses
- Seizures or convulsions
- Any headaches
- Heart palpitations, pounding or racing
- Pains in your heart or chest
- Faintness, light-headedness or dizziness
- Trouble swallowing
- Nausea or an upset stomach (other than during pregnancy)
- Reflux, heartburn, or indigestion (other than during pregnancy)
- Vomiting (other than during pregnancy)
- Frequent diarrhea (more than 3 watery stools per day)
- Abdominal pain (other than when menstruating)
- Constipation
- Frequent or painful urination
- Any tendency to bruise or bleed easily (including nose bleeding)
- Skin redness or a skin rash
- Dryness or scaling of your skin
- Blisters, open sores, or skin ulcers
- Eruptions of hives or welts on your skin
- Persistent sensations of itching on your skin
- Wounds that are slow to heal
- Swelling of both feet or both ankles
17. In the past 6 months...
(Please choose "Yes" or "No" for each question).

A. Have you had problems with feeling tired? Yes/No
B. Have you needed to rest more? Yes/No
C. Have you been feeling unusually sleepy or drowsy? Yes/No
D. Have you had problems starting things? Yes/No
E. Were you lacking in energy? Yes/No
F. Have you had less strength in your muscles? Yes/No
G. Have you been feeling weak? Yes/No
H. Have you had problems thinking clearly? Yes/No
I. Have you been making slips of the tongue when speaking? Yes/No

YES
NO

97. Before you were age 16, did a relative or anyone who was five or more years older than you ever have any other type of sexual contact with you? By sexual contact, we mean any sexual contact between someone else and your sexual parts or between you and someone else's sexual parts.

YES
NO
For the next set of questions, we will be asking you about some experiences you may have had during two different time periods while you were in the military, reserves, or National Guard.

First, we want to know if you had any of these experiences (and how frequently) during the time period from the date that you first entered the military, reserves, or National Guard until August 1990. If you have served in the reserves or National Guard and also been active duty military, please answer regarding the time period from your earliest date of entry until August 1990. (For example: If you entered the army in June 1970 and the reserves in September 1980, you would answer regarding the time period from June 1970 until August 1990.)

Second, we want to know if you had any of these experiences (and how frequently) from the time of your first deployment to the Persian Gulf until July 1991. Please remember that "the time of your first deployment" refers to the first time that you were deployed to the Persian Gulf within the time period from August 1990 to July 1991.
