13. ABSTRACT (Maximum 200 words)
Interactive visualization allows scientists and engineers to analyze massive data sets in new ways. They can prune useless data, identify important features, and see the science behind the data. We address computational tasks of image generation, dynamical visualization, and interactive manipulation and quantitative querying. The data sets comprise of scalar fields (volumetric histological scans of spinal cord injuries), vector fields (numerical simulation of turbulent flows) and tensor fields (Reynolds stresses produced by vortices in the flow). Image generation is the core of visualization. Dynamical visualization brings out time dependent features that are hard to recognize in static images. Interactive manipulation and querying allows users to focus and quantify key features in large datasets.
1. Principal Investigator Name: Chandrajit Bajaj
2. Institution: Purdue University
3. Full Address: Computer Science Dept., 1398 CS Bldg.,
   West Lafayette, IN 47907-1398
4. Current Phone: 765-494-6531
5. Current Fax: 765-496-2567
6. E-mail: bajaj@cs.purdue.edu
7. Project Title: Visualization and Querying of Scalar, Vector and Tensor Field Data
8. Grant No.: F49620-97-1-0278
9. Web pages that provide project descriptions:
   URL: http://www.cs.purdue.edu/research/shastra/projects/visualization/shaviz.html
10. Objectives:
    Interactive visualization allows scientists and engineers to analyze
    massive data sets in new ways. They can prune useless data, identify
    important features, and see the science behind the data. We
    address computational tasks of image generation, dynamical visualization,
    and interactive manipulation and quantitative querying. The data sets
    comprise of scalar fields (volumetric histological scans of spinal cord
    injuries), vector fields (numerical simulation of turbulent flows) and
    tensor fields (Reynolds stresses produced by vortices in the flow).
    Image generation is the core of visualization.
    Dynamical visualization brings out time dependent features that are
    hard to recognize in static images. Interactive
    manipulation and querying allows users to focus and quantify
    key features in large datasets.
11. Project Status:
    Visualization research has been
    considerably enhanced with the acquisition of the high performance
    of spinal cord injuries, paper [6] with macromolecular visualization,
    paper [10] with a novel graphical user interface for both scalar and
    vector data visualization and paper [11] on soon to be completed work
    on collaborative interfaces and computational steering of turbulent
    flow simulations on the Intel Paragon supercomputer.
12. a. Number of AFOSR supported:
    i. Papers published or accepted for publication in refereed journals: _3
    ii. Papers published or accepted for publication in refereed conferences: _4
    iii. Books or book chapters published or in press: _3
12. b. Trainee Data: Total 8 Female 2 Male 6
    Minority 0 Non Us Citizen 5
    i. No. of Grad Students 6
    ii. No. of Postdoctorals 0
    iii. No. of Undergraduates 1
12. c. Number, cost and description of equipment items costing
    more than $1000 that were purchased on your AFOSR grant.
    Silicon Graphics Onyx2 Rack System with 2xR10K processors, Infinite
    Reality Graphics Board with 2 Raster Managers with 64MB Texture memory,
    256MB RAM, 9.1.GB disk.
12. e. Awards/Honors to PI and/or members of PI's research
    group (please describe).
Awarded Visualization Chair, University of Texas at Austin
Austin, TX.

Appointed Director of the Visualization Research Center with the Texas
Institute of Computational and Applied Mathematics (TICAM), The
University of Texas at Austin.

f. Brief description of all transitions (or intended
transitions) of your ideas or techniques to industry, to military
laboratories or to military application.

Transition of Dynamic Mesh Simplification, Compression and
Visualization Techniques to the Institute of Defense Analysis,
Arlington, VA.

h. List of Invited Presentations

Dagstuhl-Seminar on Scientific Visualization, Schloss Dagstuhl, West Germany, May 1997.

IMACS conference on Problem Solving Environments Berlin, Germany, August 1997.

Invited Speaker at the Laredo Course on Applications of Symbolic Computing, Laredo, Spain, September 1997.

Invited Speaker for the Conference on New Themes in Computer Aided Geometric Modeling, Tel-Aviv, Israel, February 1998

Invited Speaker at the Mathematisches Forschungsinstitut Oberwolfach Seminar on Free-Form Curves and Surfaces, West Germany, June 1998.

i. List of Program Committees Served

Pacific Graphics '97, Korea, 1997

Program Committee Member of the IEEE Visualization Conference '97, Phoenix, Arizona, October 1997.

Program Committee Member of Fifth International Conference on Computer-Aided Design and Computer Graphics, Shenzhen, China, December 1997.

Program Committee Member of the ACM symposium on Computational Geometry (Theory) Minneapolis, MN, June 1998.

Program Committee Member of IMA Math of Surfaces VIII, Birmingham, UK, August 1998.
