GRANT NUMBER DAMD17-96-1-6044

TITLE: Feasibility of Investigating Whether There is a Relationship Between Birth Defects and Service in the Gulf War

PRINCIPAL INVESTIGATOR: John A. Harris, M.D.

CONTRACTING ORGANIZATION: March of Dimes, California Birth Defects Sacramento, California 95813-3809

REPORT DATE: June 1998

TYPE OF REPORT: Annual

PREPARED FOR: U.S. Army Medical Research and Materiel Command Fort Detrick, Maryland 21702-5012

DISTRIBUTION STATEMENT: Approved for public release; distribution unlimited

The views, opinions and/or findings contained in this report are those of the author(s) and should not be construed as an official Department of the Army position, policy or decision unless so designated by other documentation.
## Abstract

Regarding CBDMP’s study to determine the feasibility of whether congenital anomalies can be identified among Gulf War veterans during the past year, little progress has been made. Specifically, in the past year, CBDMP obtained permission from the Army HSRRB but has gone back and forth with the Defense Data Manpower Center in Monterey, California to obtain the most current tapes needed to begin this project. It was not until the first part of June 1998 that the latest version of these tapes was received.
Opinions, interpretations, conclusions and recommendations are those of the author and are not necessarily endorsed by the U.S. Army.

Where copyrighted material is quoted, permission has been obtained to use such material.

Where material from documents designated for limited distribution is quoted, permission has been obtained to use the material.

Citations of commercial organizations and trade names in this report do not constitute an official Department of Army endorsement or approval of the products or services of these organizations.

In conducting research using animals, the investigator(s) adhered to the "Guide for the Care and Use of Laboratory Animals," prepared by the Committee on Care and Use of Laboratory Animals of the Institute of Laboratory Resources, National Research Council (NIH Publication No. 86-23, Revised 1985).

For the protection of human subjects, the investigator(s) adhered to policies of applicable Federal Law 45 CFR 46.

In conducting research utilizing recombinant DNA technology, the investigator(s) adhered to current guidelines promulgated by the National Institutes of Health.

In the conduct of research utilizing recombinant DNA, the investigator(s) adhered to the NIH Guidelines for Research Involving Recombinant DNA Molecules.

In the conduct of research involving hazardous organisms, the investigator(s) adhered to the CDC-NIH Guide for Biosafety in Microbiological and Biomedical Laboratories.

I. Introduction:

The California Birth Defects Monitoring Program (CBDMP) in collaboration with the Department of Veterans Affairs is doing a feasibility study to determine if all children born to Gulf War participants can be identified and if congenital anomalies diagnosed during the first year of life can be identified as well. It took the CBDMP one year, until June 1997, to obtain clearance from the Army HSRRB.

II. Body:

In the period between June 1, 1997 and May 31, 1998, The CBDMP obtained Army HSRRB approval and had gone back and forth with the Defense Data Manpower Center in Monterey, California in order to obtain the current tapes it needs to begin this project. The latest version of the tapes was received in early June, 1998.

CBDMP has no data to present.

III. Conclusions:

None yet

IV. Personnel on Project:

Susan Butler (project manager); Gary Shaw, Mary Jo Campodonica
