Army field commands
Army field commands are defined as all of DA, exclusive of that part defined HQDA. Army field commands include all field headquarters, forces, reserve components, installations, activities, and functions under the control of the Army.

Department of the Army
Department of the Army is defined as the
executive part of DA at the seat of the Government, and all field headquarters, forces, reserve components, installations, activities, and functions under the control or supervision of the Secretary of the Army (section 101(5), title 10, United States Code (10 USC 101(5)).

Executive Agent
A Department of the Army component which has been designated by the Secretary of the Army to act for the Secretary as the sole agency to perform a function or service for others in the Department of Defense or in Federal or State Governments. Other terms used to express executive agency responsibility include single manager and management agent.

Field operating agency
A field operating agency is an agency under the supervision of HQDA, but not a MACOM or part of a MACOM, which has the primary mission of executing policy.

Headquarters, Department of the Army
HQDA is the executive part of DA at the seat of Government. It is the highest level headquarters in DA and exercises directive and supervisory control over DA. HQDA is composed of the Office of the Secretary of the Army; Office of the Chief of Staff, Army; the Army Staff; and specifically designated staff support agencies. It is not restricted to agencies and personnel located in the Washington, DC metropolitan area, but includes dispersed agencies and personnel performing "national headquarters" functions, as distinguished from "field" or "local" functions. Within Army regulations, those support and reporting responsibilities set aside for MACOMs generally apply to HQDA unless otherwise specified.

Major Army Command
A MACOM is a command directly subordinate to, established by authority of, and specifically designated by HQDA. Army component commands of unified and specified commands are MACOMs.
