INTRODUCTION

This bibliography was compiled at the request of the Department of History in support of the 20th biennial (previously biennial) Military History Symposium to be held at the United States Air Force Academy from 1 to 5 October 2003. The bibliography lists a selected portion of the McDermott (Cadet) Library's holdings on the American experience of manned powered flight during the twentieth century. Although military aviation has been a major component of that experience and is included, the majority of the materials listed here are not primarily military in focus. Furthermore, it was felt essential to include works of both European and American origin in the section on early aeronautics.

Excluded are newspaper articles, most pictorial works, works dealing with lighter-than-air flight, and studies of rotorcraft.

This bibliography, number 101 in the McDermott Library's Special Bibliography Series, was compiled by Mr. Elwood L. White, Social Sciences and Humanities Librarian. Questions and comments about this addition to the Special Bibliography Series may be addressed to Mr. White at:

HQ USAFA/DFLIB-REF
ATTN: Mr. Elwood L. White
2354 Fairchild Drive, Suite SC9
USAF Academy CO 80840-6214

For those libraries that are receiving this bibliography as a complimentary part of the McDermott Library's Gifts and Exchange Program, we hope that this publication will be beneficial to you and your patrons. Libraries wishing to be added to the McDermott Library's Gifts and Exchange Program may write to: Library Gifts and Exchange Program at the address shown above.

Finally, if you are not a member of the Air Force Academy community and are attending this year's Military History Symposium, welcome to the Air Force Academy. We hope your visit will be professionally rewarding and personally enjoyable.

Edward A. Scott, Ph.D.
Director of Academy Libraries
September 2003
