Report Documentation Page

Form Approved
OMB No. 0704-0188

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

Agenda

- Background
- Current Demand Data
- Government Cost/Benefit Analysis
- Timeline

Equipping Our Soldiers in Iraq and Afghanistan

Up-Armored HMMWVs (M1114s)

Early OIF

Recent History

2004-2005 - GPK

Curb Wt: 10,300lbs
GVW: 12,100lbs

2006

“Iraqi Pope Glass”

- A jerry-rigged glass cocoon of (3) 2-inch thick bulletproof windshields welded around the top of the turret.
- Adds an additional 400 lbs to an already overweight vehicle.
- Soldiers have already added this cocoon to approximately 100 HMMWVs in Ramadi.

Future Transparent Gun Shields

- Requirement: Upgrade GPKS with transparent armor for enhanced situational awareness while maintaining soldier cover within armor envelope.

Baseline

AHI GS & GPK

Field Modified GS & APK

Initial

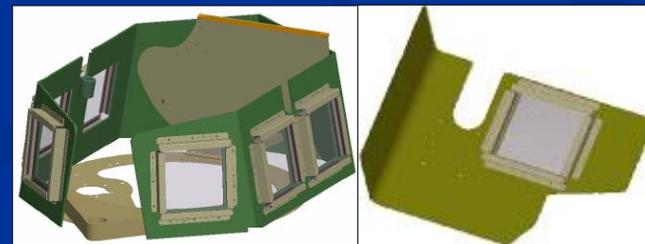

Upgraded Gunner Shield – Transparent Armored Gun Shield (TAGS)

Interim

Interim Solution – Marine Corps TAGS (MCTAGS)

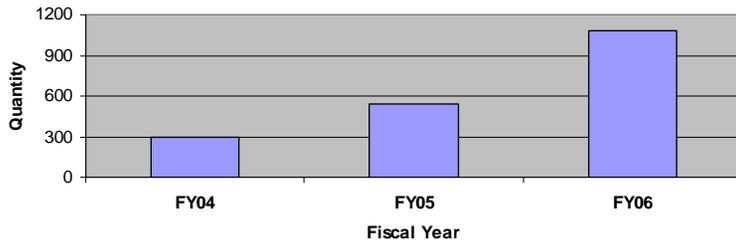

Objective

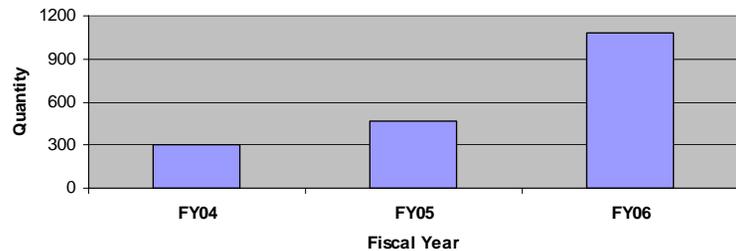

Future Solution – Modified Solution based upon theater recommendations

HMMWV M1114 Glass Demand

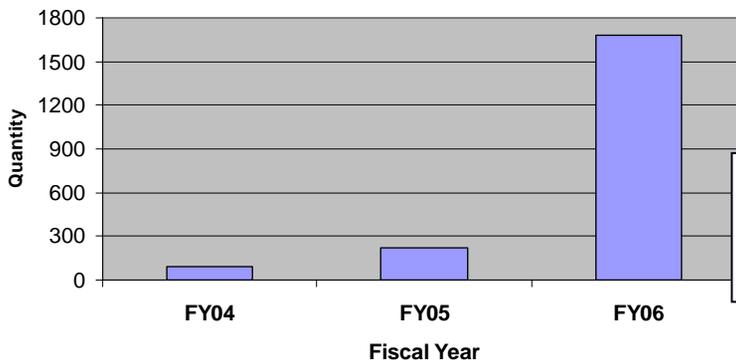

Left Windshield Average Monthly Demand

Right Windshield Average Monthly Demand

Door Window Average Monthly Demand

- Over \$5.2 Million was spent per month in FY05 for the Up-Armored HMMWV windshields and door windows.
- Demand for both right and left windshields increased 133% and 101% respectively from FY05 to FY06.
- Demand for door windows increased 658% from FY05 to FY06.

Bottom Line: Army needs a better Transparent Armor solution!

Increase In Door Glass Demand

- Soldiers are adding another piece of glass to each door for added protection.
- Adds additional weight to an already overweight vehicle and reduces payload capacity!

Causes Of Current Glass Failures

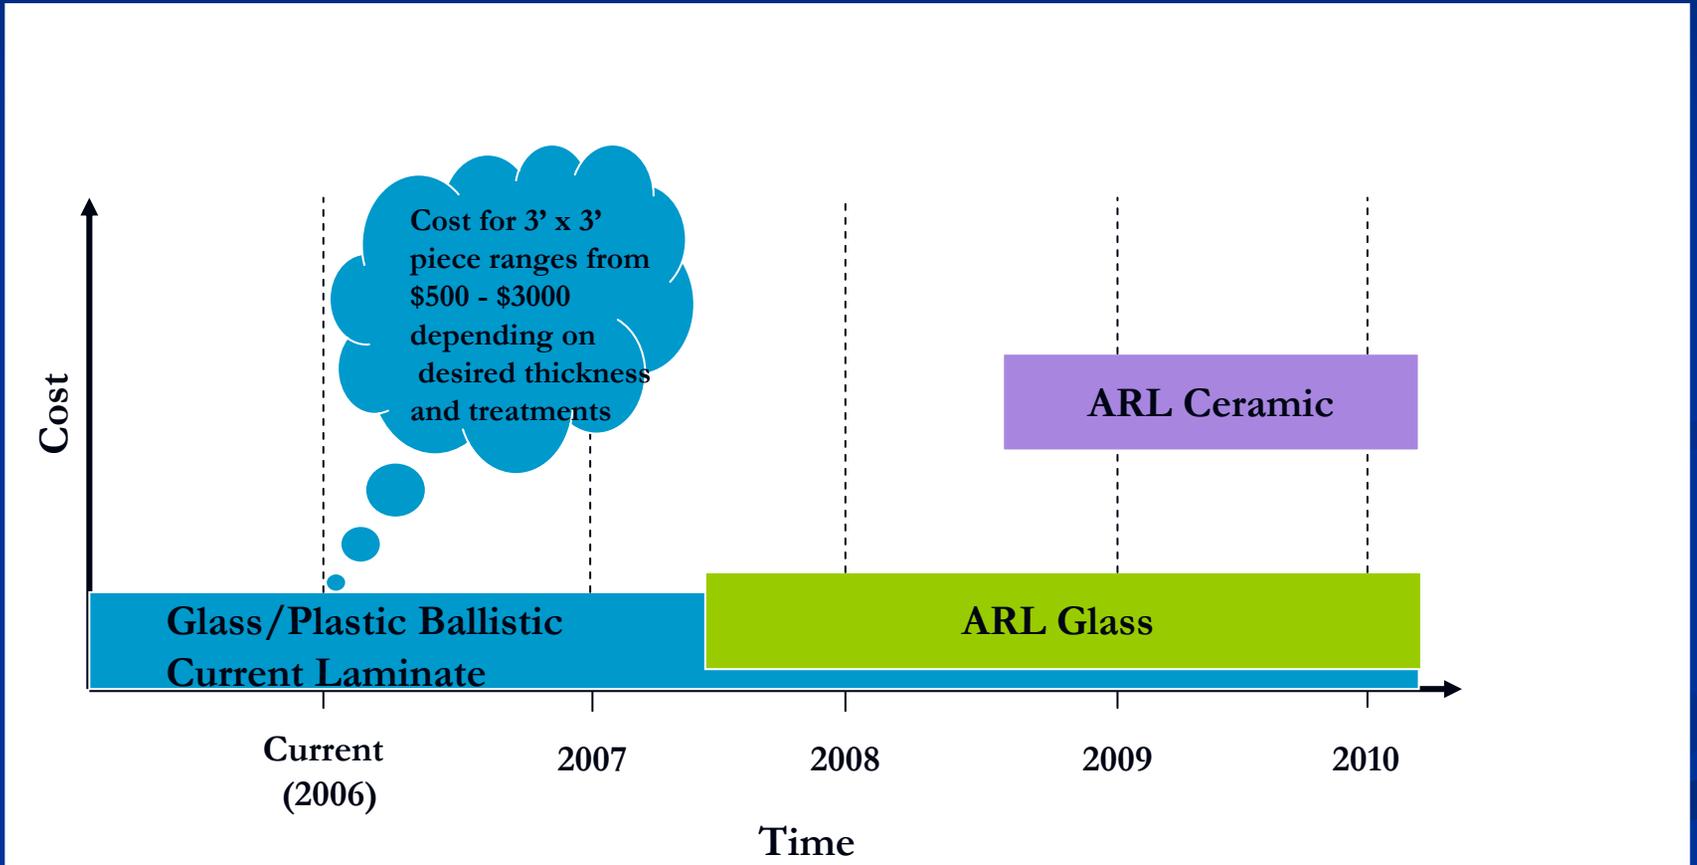

- Insurgent Attacks
(IEDs, RPGs, shrapnel, bullets)
- Sandstorm Damage
- Rock Strikes
- Improper removal and installation
- Clouding
 - Delamination caused by environmental degradation
 - Improper curing process
 - Improper cleaning techniques

Other Problems with Current Glass

- Weight
 - Weight of current glass adds significant weight to vehicle.
- Visibility
 - Thickness of glass can cause distortion and glare

Transparent Armor Solutions

ARL – Army Research Lab

Basic Research Effort

- GE Global Research and Nanocerox partnership
- Goal is to develop nano-structured ceramic bodies with a combination of high optical transmission and exceptional mechanical properties and capable of effective performance in an outstanding transparent armor system.
- Two Funding Opportunities of Effort:
 - FY05: Develop design rules from the system level armor requirements to the mechanical and optical properties of the ceramic body and then into the properties of the nanopowder. Objective is for a process to be in place for the fabrication of 2" x 2" x 0.375" samples.
 - FY06: Scale up the materials systems to a final dimension of 4" x 4" x 0.375". Characterize and deliver samples for ballistic testing.

Government Cost Benefit Study

Purpose: Determine break-even cost for new transparent armor solution based on expected reliability improvement and required investment.

- Use current fleet of Up-Armored HMMWV as the study platform for initial look.
- Approximately 11,000+ vehicles in Army inventory.
- NSN 2510-01-435-9693
 - Right Windshield \$2,759 (FY06\$)
- NSN 2510-01-435-9690
 - Left Windshield \$2,759 (FY06\$)
- NSN 2510-01-435-9692
 - Door Window \$1,025 (FY06\$)
- Expand analysis to include rest of TWV fleet.

Cost-Benefit Methodology

Obtain current demand data and cost data to determine operations cost for status quo.

✓ Completed

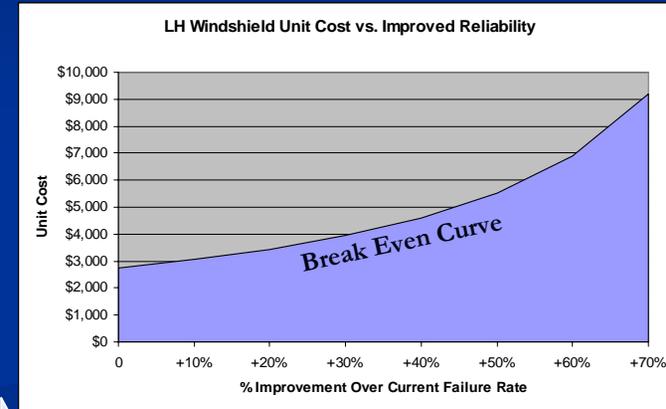

Obtain investment costs for new transparent armor.

Determine operations cost for transparent armor solution.

Determine savings between status quo and transparent armor alternative.

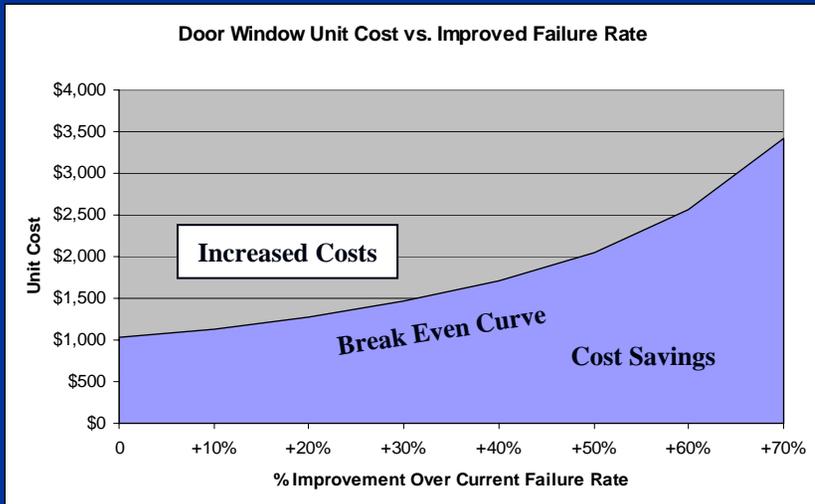

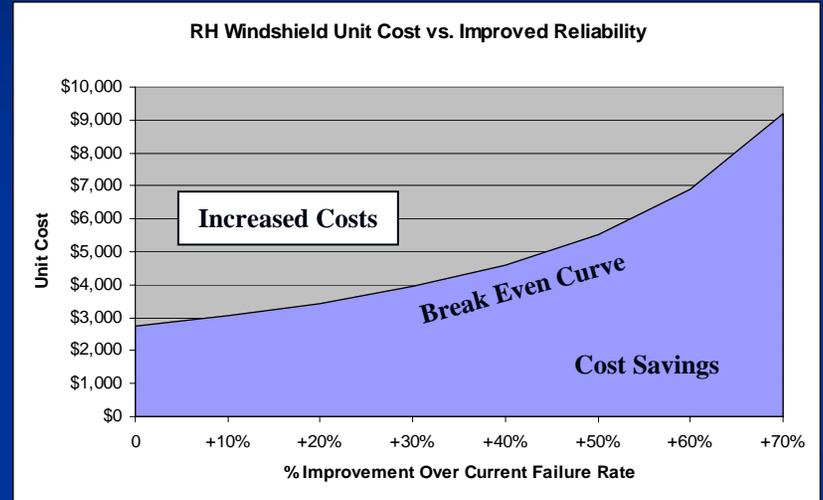

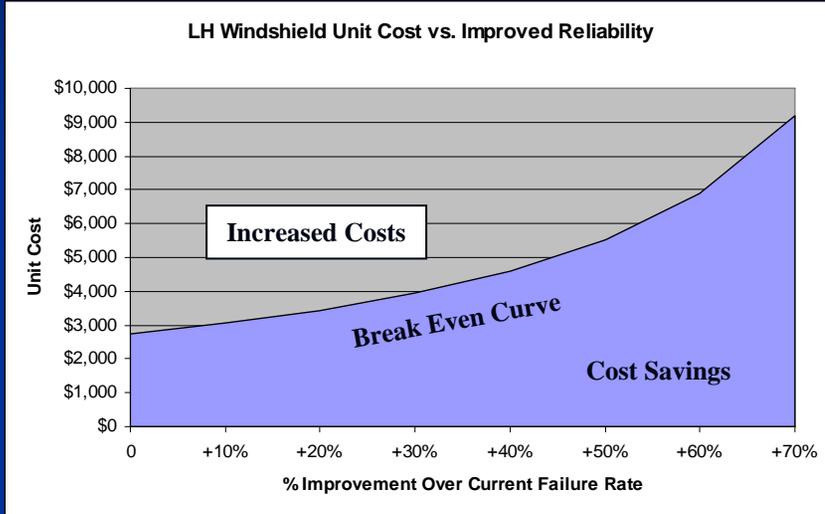

Calculate Net Present Value and Savings to Investment Ratio.

Parametric Analysis

Contractor provides reliability improvement factor estimate and estimated cost for transparent armor Material at end of Phase I.

Cost Benefit Parametric Analysis Up-Armored HMMWV Glass
