GOVERNMENT DISCLOSURE FORM

PART I

Principal Author:
Mr. Alan R. Cunningham

Other Author(s):
Mr. Mark Schairbaum

Principal Author's Organization:
US Army TRADOC Analysis Center - Fort Lee

Complete mailing address:
401 FIRST STREET, SUITE 401
FORT LEE, VA 23801-1511

Title of Presentation:
CS-CSS Unit Integration into ARFORGEN

This presentation is believed to be:  
☐ SECRET  ☑ CONFIDENTIAL  ☑ UNCLASSIFIED  
and will be presented in:
☐ Special Session  ☐ Tutorial  ☐ Demo  ☐ CG: A-B-C-D-E-F  
(Circle one)  ☑ List all WG(s) #: 20, 21, 22, 27

PART II

The Releasing Official, with the understanding that MORS Symposia are supervised by the OCNO N81, that all attendees have current security clearances of at least SECRET and that no foreign nationals will be present confirms that the overall classification of the presentation is:

☐ SECRET  ☐ CONFIDENTIAL  ☑ UNCLASSIFIED  ☐ OTHER: 
and authorizes disclosure at the meeting.

Classified by:  
Declassified by:  
Downgrade to:  

Distribution statement A:

☑ This presentation/paper is unclassified, approved for public release, distribution unlimited, and is exempt from U.S. export licensing and other export approvals under the International Traffic in Arms Regulations (22 CFR 120 et seq.).

Released Officials title: Chief, Functional Operations

Improving CS/CSS Unit Integration into ARFORGEN

US Army Reserve Studies

Information Brief to MORSS

9-13 June 2008
Introduction

• Study Purpose:
  To compare Army Reserve (AR) training strategy (ARTS) alternatives for the year 2011, while evaluating impacts on resources and on the availability of AR forces to Combatant Commanders under the Army Force Generation (ARFORGEN) concept.

• Scope:
  Focus of the analysis is on operational training changes required at AR echelons above brigade (EAB) Combat Support (CS)/Combat Service Support (CSS) units based on the new Office of the Secretary of Defense (OSD) mobilization policy.

• Background:
  – Mobilization policy memos.
  19 JAN 07, the Secretary of Defense (SECDEF) issued the Utilization of the Total Force memorandum limiting Reserve force individual mobilization to one year, excluding individual skill training and post-mob leave (at service discretion).
  15 MAR 07, the Under Secretary of Defense for Personnel and Readiness issued follow-up guidance on implementation of the SECDEF memo.
  – Other details.
  Mobilization of units will be managed on a unit basis (minimizing cross-leveling).
  The SECDEF requires authorization for exceptions based on operational tempo.
Constraints, Limitations, and Assumptions

• Constraints:
  – Office of the Chief of the Army Reserve (OCAR) required draft analysis results by DEC 07.

• Limitations:
  – The AR does not have a drafted 6-year training strategy. Final draft of current 5-year Army Reserve Training Strategy (ARTS) was signed in Dec 07.
  – The OSD policy as it relates to the AR was not clear.
  – The Army Combined Arms Training Strategy (CATS) does not cover EAB CS/CSS units.
  – Changes in collective training due to Combat Support Training Center (CSTC)/Regional Training Centers (RTC) standup occurred Fall 07.
  – Changes in projected trainee populations and validation methods due to Army Initiative (AI) #4, and Post- to Pre-Mob Training (PPMT) initiatives occurred during Fall 07.
  – Current OPTEMPO data represents “IRAQFORGEN” not 5-yr ARFORGEN.

• Assumptions:
  – By FY 2010 forces will be operating under a Presidential Reserve Call-Up (steady state ARFORGEN) rather than partial mobilization.
  – Any approved training strategy would be resourced and implemented to provide deployment validated AR force packages.
  – AR training support equipment and personnel are adequate to meet deployment validation requirements.
  – Institutional individual training requirements will not change across alternatives.
  – AR force structure will remain the same regardless of alternative.
Methodology Phases

Research

CATS, ARTS, 5-yr TNG Plan
- Identify Requirements
- Assess Adequacy
- Verified MOMs/ MOEs

ARTS, 5-yr TNG Plan
- Decompose Army Campaign Plan Requirements
- Requirements, Capabilities, Shortfalls

ARTS, 5-yr Plan
- Develop Alternative
- Develop 6-year strategy

Analysis

5- & 6-yr TNG Plans
- Compare training strategies & capabilities
- Operational Outcomes Comparison

5- & 6-yr TNG Plans
- Link Op Outcome to Resources
- Cost Analysis of Alternatives
- Resource Cost Comparison

Findings

Research/Analysis
- Emerging Results
- Sponsor insights/comments

Integrate/present findings

Final Report

Key Participants
- TRAC-LEE/TRAC-WSMR
- HQDA G3/5/7
- AR PA&E
- AR G7

- Output / Result

MOMs: Measures of Merit; MOEs: Measures of Effectiveness

10 June 2008
CS/CSS Unit Integration into ARFORGEN
Current Five-Year ARTS

- Existing 5-year training plan reflects general expectations for commanders to execute Mission Essential Task List (METL)-based, increasingly collective training per command discretion.
- Major collective CS/CSS training events in Ready years occur at CSTC/RTC locations.
- Army training gate definitions are not “mandatory.” Discretion means main unit training gate is validation to AVAILABLE.
- Final version (DEC 2007) changes “Ready-1” to replace “R/T-3.” ARTS Ready definition is not necessarily aligned with ARFORGEN Ready.

Existing ARTS and Command Training Guidance (CTG) have now been published.
- 5-year cycle is generally well-defined, but specific events are not mandated.
- Follow-on project with AR G-7 was begun, to outline specific training menu requirements by Standard Requirements Code (SRC).
Adding a Sixth Year (1 of 2)
Forces Provided to the Combatant Commander

- Adding a year without adding end strength and without improving Mission Responsibility Time (MRT) will stretch the same forces across more time, resulting in fewer (16.7%) forces provided to the combatant commander or force packages extended above 12 months.

130K PAX / 5 YR = 26K PAX / YR

Impact of package stretch varies by SRC.

- The main effect of going to a sixth year is that “dividing by six” is functionally equivalent to reducing operational tempo.
Adding a Sixth Year (2 of 2)

*Training Impacts of Adding R/T or READY Year*

- Moving from 5 to 6 years adds more training “time,” but not training “infrastructure.”
- Student population decreases 17% in most years, but increases 69% in the duplicated year.
- If 5-year plan is adequate, adding a sixth year creates a need for sustainment of skills.
- Same training takes place earlier in the cycle. If the year is added four years before available phase, some training is perishable.
- All-volunteer Force (AVF) may require annual training AT regardless of requirement for pay purposes.
- Additional ARFORGEN ready year adds (by definition of Ready) requirements to take extra measures to account for regular attrition of personnel and skill perishability.
- The National Guard (NG) 6-year rotational model includes two READY years. Moving to 6-year plan to match NG would conflict with current NG movement to 5-year cycle.
- Final ARTS signed DEC 07 has two R/T years and two Ready years.

```
<table>
<thead>
<tr>
<th>R/T</th>
<th>R/T</th>
<th>READY 1</th>
<th>READY 2</th>
<th>AVAIL</th>
</tr>
</thead>
</table>

5 YEAR “BASELINE” PLAN

6 YEAR “PLUS READY YR”
```

- Same 3 years of Training, but earlier.
- Skills must be held for two years.

- Infrastructure is impacted differently depending on which year is duplicated.
- Key 6-year concerns: skill perishability, PAX attrition, and need for AT event.
Post to Pre-Mobilization Training (PPMT) Initiative

- PPMT process shifts additional training workload to Ready phases to expand the MRT window.
- Movement will shift impacts to pre-mob training facilities (USAR).
- Current infrastructure may not necessarily support additional PPMT requirement.

- Upon mobilization, First Army validates Deployment Expeditionary Force (DEF) units on 160 theater tasks.
- Currently, separate training certification/validation occurs with both OCAR and First Army, in some cases certifying/validating the same skill twice. PPMT changes have sought to eliminate separate validation of some tasks.
  - Contentious terms defined.
  - Further change guidance is anticipated 3QFY08.

- PPMT improves force provision... if you have pre-mob tng resources for it.
- Distinguish between PPMT impacts and extra year impacts.
Findings and **Recommendations**

- **Benefits of PPMT strategy are promising, but still largely unmeasured.**
  - Continue to measure impact of PPMT on training and force provision.
- **Measurement and quantification of specific Reserve training requirements are made more complex by lack of mandatory events, by failure to fully integrate Reserve and Active training strategy language, and by changing requirements, such as addition of the PPMT strategy.**
  - Continue to establish relationship between training resources and training cycle, especially as operational tempo fluctuates. Reserve training strategy requirements (i.e., ARTS) must be coherently and specifically defined and translated, either implicitly or explicitly, into an integrated CS/CSS training strategy (in CATS) in order to generate funding requirements.
- **Understanding of PPMT is not widespread at action officer level.**
  - Maximize PPMT implementation.
- **Progress has been made in integrating common definition of terms, but potential for improvement remains.**
  - Be clear about what AR “Ready” means versus ARFORGEN definition of Ready.
What did this study affect?

- Identified key considerations in 5-year ARTS implementation decisions. Identified mandatory gates between training years.
- Pushed AR G-7 implementation of detailed menu training options with mandatory collective gated events listed by SRC.
- Identified key training costing efforts and status of each.
  - Helped identify status of CACI-led Training Resource Model (TRM) “bottom up” cost estimate process that will employ CATS templates.
  - Total Army Training Capability (TATC) estimate with AR G-7 inputs.
  - Army Initiative #4 POM Submission.
  - CAA CS/CSS costing efforts.
- Identified and gathered disparate current information on the state of AR Integration, Training, and Transformation to integrate future analyses.
  - Identified sources of guidance and expertise and created “compendium” of relevant information.
  - Coordinated with Consortium of ARFORGEN Analysis, Modeling, and Simulation (CAAMS) to gauge extent of AR participation in the ARFORGEN Synchronization Tool (AST).
  - Identified other Knowledge Management tools and data repositories.

Increased Readiness for Global Commitment 1 year in every 5 or 6 years

Increased Readiness for Global Commitment 1 year in every 3 years

- Manage readiness and availability of forces.
- Maneuver resources based on rotation sequences. Rotate idle equipment to needed locations to maximize employment and readiness.
Study Issues / EEAs

Issue 1 – What is the impact of the OSD imposed mobilization and dwell times on operational training?

Issue 2 – What is the impact of each alternative on the force capabilities provided to Combatant Commanders?

EEA 1 – Is the current 5-year training strategy adequate to support the Army Campaign Plan?

EEA 2 – What resources are required to execute the 5-year training strategy?

EEA 3 – What are the force capabilities provided by a 5-year operational force?

EEA 4 – What resources are required to execute the 6-year training strategy?

EEA 5 – What are the force capabilities provided by a 6-year operational force?

EEA 6 – What changes are necessary to convert the 5-year training strategy to a 6-year training strategy?

Information gathered will inform, not answer EEA.
PPMT: Post- to Pre-Mob training

• 1A memo lists 160 tasks proposed for move to pre-mob.
• Shift “expands the MRT window.”
• Post-Mob training time may vary by SRC.
• Assume 9-month MRT in lieu of data.
• Movement will shift impacts to pre-mob training facilities (USAR).
Training and Validation Details

• PPMT process shifts unquantified additional training workload to RESET/TRAIN and READY phases.
• Separate validation occurs by both OCAR and First Army, in some cases validation of the same skill by two different organizations.
  – Post- to Pre- mob training changes have sought to change separate validation of some tasks.
  – Several IPRs between 1A and OCAR mandated intent to minimize this duplication.
  – Legal precedent exists for pre-mob validation to be conducted by 1A.
• Training resources.
  – Current CTC sites (NTC, JRTC, JMRC, BCTP) have limited O/C and other capability to meet Reserve CS/CSS unit demand for gated training events (WAREX and CTC-like training), especially for EAB units.
  – Several initiatives exist to provide CTC-like capability (CSTC, ETC) and other capability for CS/CSS units.
  – Training resources may change by 2011 due to BRAC, ARC2, and other initiatives.
• Currently there are several sources for data on training, training resources, validation, and force packaging information.
  – Existing CACI-led budgeting and training resource modeling (TRM) process appears to incorporate mechanisms for ensuring that training capability is identified and resources allocated to meet these requirements, but these processes are not mature enough to produce useable data.

There is vehement disagreement about this slide. Do you add a major collective training event, or not?
Validation/Certification: Time-based vs. Event-based

Dual validation

Separate validation

FORSCOM/1ST ARMY VALIDATION

USAR VALIDATION

18 MO VALIDATION PERISHABILITY
Levels of Mobilization

- **Presidential Reserve Call-up (PRC).**
  The President has the authority to involuntarily augment the active forces by a call-up of up to 200,000 members of the selected reserve for a period up to 270 days to meet mission requirements within the continental United States (CONUS) or overseas. The President must notify Congress within 24 hours and state the reason for his action.

- **Partial Mobilization.**
  The President has the authority to mobilize no more than 1,000,000 reservists (units and individuals from all services), for 24 months or less, and the resources needed for their support to meet the requirements of war or other national emergency involving an external threat to national security.

- **Full Mobilization.**
  Congress must declare that a state of national emergency exists to call up all forces, including Army Reserve and Army National Guard units, Individual Ready Reserve, Standby Reserve, and members of the Retired Reserve, and the resources required for their support. The duration is the length of the emergency plus six months.

- **Total Mobilization.**
  Once a state of national emergency exists, Congress can extend full mobilization by activating and organizing additional units beyond the currently approved force structure. Total mobilization brings the industrial base up to full capacity to provide the additional resources, equipment and production facilities needed to support the armed forces of the nation, as done in World War II.

More Information on Related Study Specific Initiatives

• One Year Mob memos.
  – Limits USAR involuntary deployments to 1:5.
  – Excludes individual skill training for deployment.
  – Excludes post-mob leave.
  – Excludes voluntary tours.
  – Managed ‘primarily’ on unit basis.

• CSTC standup.
  – Validation resources being added at Reserve centers.
  – May be used by other components or services requiring CTC-like CS/CSS-focused events.
  – GAO report re: explicit training requirements.

• Reduction of Post-Mob training (RPMT).
  – Now called PPMT Post- to Pre-Mob Training.
  – 160 METL (GENTEXT).
  – Training gates shifting.
  – MRT expanding.
  – Training occurs at RTC with 1Army in supporting role prior to validation.

• AI # 4 Transition the RC to an Operational Force.
  – 2011 end strength being added above and beyond TAA levels.
  – What number to use as end strength (130K).
  – AI 4 team struggled to define “Operationalize.”
Recent Data, Resources, and Document Changes

- DoD “1:5” Memos – JAN/MAR 07.
- AR 350-1 – AUG 07.
- Army Strategic Guidance JUN 07.
- 2007 Army Reserve Posture Statement.
- Draft 13 of Army Reserve Training Strategy (ARTS).
- 2006 QDR (1-4-2-1?).
- ARC2 realignment by 2011.
- FORSCOM OIF Training Guidance.
  - GENTEXT v9 ...
  - FORSCOM Training Guidance For Follow-on Forces Deploying ISO Operations In Southwest Asia (SWA).

Assume 2011 force under “Steady State ARFORGEN” with planned BRAC and other TRANSFORMATION modifications to include CSTCs.
