Final Report

Approved for public release; distribution is unlimited.
Abstract: As part of its mission, the Sustainable Painting Operations for the Total Army (SPOTA) working group evaluated solvents that will not impact the environment while cleaning armament equipment, in particular ground vehicles. ERDC-CERL researchers, in support of the SPOTA program, were tasked with conducting a preliminary study and develop a methodology to evaluate environmentally friendly cleaners that would be effective in cleaning road tar on military vehicles. The study involved an extensive literature review of commercial environmentally friendly tar removers (both products and methodologies). Twenty six commercial tar removal products were identified as possible solvents for removing the tar stains from ground vehicles. In addition, laboratory coupon evaluations were conducted using three select commercial products. This report presents the results of the search for commercial tar removal solvent systems, and a laboratory evaluation of select solvent systems for removing tar from steel coupons.

Preface

This study was conducted for the Army Research Laboratory (ARL) under “Sustainable Painting Operations for the Total Army (SPOTA) program.” ERDC-CERL conducted the study under a reimbursable work order (MIPR8DDBPBW160). The technical monitor was Mr. Wayne Ziegler, Army Research Laboratory.

The work was managed and executed by the Environmental Processes Branch (CN-E) of the Environmental Division (CN), Engineer Research and Development Center/Construction Engineering Research Laboratory (ERDC/CERL). The CERL investigators were Dr. Veera Boddu and Joyce Baird. Deborah Curtin is Chief, CEERD-CN-E, and Dr. John Bandy is Chief, CEERD-CN. The associated Technical Director was Dr. William Severinghaus, CEERD-CV-T. The Director of ERDC-CERL is Dr. Ilker R. Adiguzel.

CERL is an element of the U.S. Army Engineer Research and Development Center (ERDC), U.S. Army Corps of Engineers. The Commander and Executive Director of ERDC is COL Gary E. Johnston, and the Director of ERDC is Dr. James R. Houston.
1 Introduction

Background

One of the main objectives of the Sustainable Painting Operations for the Total Army (SPOTA) Program is to implement Hazardous Air Pollutants (HAP) free and compliant surface coating materials in surface treatment and protection of Defense Land Systems and Miscellaneous Equipment (DLSME) while meeting the National Emissions Standard for Hazardous Air Pollutants (NESHAP) regulations. The SPOTA Program’s mission is to guarantee continued operations at Army facilities, regardless of the institution of new NESHAP regulations throughout the Department of Defense (DOD) and industrial community. To realize the objectives, SPOTA would develop or provide alternatives, while maintaining combat readiness for thrust areas; coordinate with affected sites and all end users; and concurrently work with the U.S. Environmental Protection Agency (USEPA).

As part of the SPOTA mission ERDC-CERL researchers are tasked to investigate environmentally friendly cleaners and processes for removing road tar/asphalt from Army ground vehicles. It is a standard practice at Army facilities to remove tar from ground vehicles during general maintenance and repainting of any ground vehicle. Currently, the preferred Army practice to remove tar is to use 40,000 pounds per square inch (psi) waterjet. Vehicles are washed using wash racks, waterjets, hand wipes, and limited chemical usage, in heated sheds. Commercial products such as Bio Pro (from Biosystems, Inc.) and Teksol (from Inland Technologies, Inc.) are also used. The requirements include the use of solvents compatible with wastewater treatment plants that handle phosphate type solutions.

The terms used by commercial vendors such as environmentally friendly, all natural, green, and nontoxic, when associated with cleaners or degreasers, are generic, qualitative and may be misleading to the end user. Some suggestions to help the consumer in selecting products that are effective and will not be detrimental to the environment are included in the article “Six Sins of Greenwashing™” (TerraChoice Environmental Marketing, Inc. 2007). The article identifies some uncertainties as: Hidden Tradeoff, No Proof, Vagueness, Irrelevance, Fibbing, and Lesser of Two Evils. The Hid-
den Tradeoff is based on one environmental attribute and ignores other more important environmental issues. Often the supporting evidence is not available or that the claims cannot be substantiated. To avoid these uncertainties or problems, a critical review of the vendor information and/or field testing is required.

**Approach**

An extensive search was conducted for commercial environmentally friendly cleaners that would remove tar from metal surfaces. These commercial cleaners were carefully reviewed and ranked based on scientific criteria. Three of these cleaners were selected and laboratory tested for their cleaning efficiency and validation. Based on this literature review and experimental study, a test protocol and a guidance document for selecting a cleaner for removal of tar/asphalt from ground vehicles was developed.

**Objectives**

The objective of the study was to provide recommendations on the selection of commercially available, environmentally friendly cleaners for removing road tar/asphalt from Army ground vehicles.

**Mode of technology transfer**

The results will be presented at a Joint Services Environmental Management (JSEM) Conference. And an ERDC-CERL Technical Report will be published and it will also be accessible through the World Wide Web (WWW) URL: [http://www.cecer.army.mil](http://www.cecer.army.mil)
2 Properties of Asphalt

Information on thermophysical properties of tar and asphalt are important for its removal when it is stuck to surfaces. The raw material used in most modern asphalt manufacturing is petroleum. This is a naturally occurring liquid bitumen, a mixture of black, sticky, viscous organic liquids that are entirely soluble in carbon disulfide and composed primarily of highly condensed polycyclic aromatic hydrocarbons. Crude bitumen must be heated or diluted before it will flow. Refined bitumen is the residual (bottom) fraction resulting from fractional distillation of petroleum during refining process. It is the heaviest fraction with the highest boiling point of 525 °C (977 °F) (WAPA 2003).

Chemical composition and properties of bitumen

Bitumen consists of polar and nonpolar compounds, and the interactions of the polar compounds determine its mechanical properties. Two main parameters govern the chemistry of bitumen: the crude source and the manufacturing process. Table 1 lists an elemental analysis of several asphalts. Asphalts are mainly carbon and hydrogen, but most of the molecules contain at least one hetero (S, N, O) atom (Holleran et al. 2005). The general types of molecules in bitumen include: hexane (C₆H₁₄), cyclohexane (C₆H₁₂), and benzene (C₆H₆) (Holleran et al. 2005). Molecular weights of constituent compounds vary from hundreds to many thousands. The compounds are classified as asphaltenes (high molecular weight and insoluble in hexane or heptane) or maltenes (lower molecular weight and soluble in hexane and heptane). Asphalts usually contain from 5 to 25 percent by weight of asphaltenes (Freemantle 1999).

| Table 1. Elemental analysis of select bitumen (Holleran et al. 2005). |
|-----------------------------|-----------------------------|-----------------------------|-----------------------------|-----------------------------|
| Element                  | Weight percent otherwise as mentioned* |
|                           | Mexican | Arkansas | Boscan (Venezuela) | California |
| Carbon (C)                | 83.77   | 85.78    | 82.9             | 86.77        |
| Hydrogen (H)              | 9.91    | 10.19    | 10.45            | 10.94        |
| Nitrogen (N)              | 0.26    | 0.26     | 0.78             | 1.10         |
| Sulfur (S)                | 5.25    | 3.41     | 5.43             | 0.99         |
| Oxygen (O)                | 0.77    | 0.36     | 0.29             | 0.20         |

| ppm = parts per million by weight |
Physical properties of asphalt

The most important physical properties of asphalt are:

- **Durability.** This is a measure of the amount an asphalt binder changes over time. As the asphalt binder ages, the viscosity increases and it becomes stiff and brittle.

- **Rheology.** This is the study of deformation and the flow of matter. Hot Mix Asphalt (HMA) pavements that deform and flow too much may have a tendency toward rutting and bleeding, whereas those that are too stiff may be prone to fatigue cracking.

- **Safety.** Asphalt volatilizes when heated. At very high temperatures (well above those used in the manufacture and construction of HMA) the asphalt cement may release enough vapor so that the volatile concentration immediately above the asphalt may ignite if exposed to a spark or open flame. This is the flash point, which is tested and controlled for asphalt in cement applications.

- **Purity.** Asphalt as used in HMA paving should use almost pure bitumen, as impurities may undermine asphalt performance (WAPA Asphalt Pavement Guide 2002).

Table 2 summarizes the physical properties of a typical asphalt from the Material Safety Data Sheet (MSDS) for Marathon Petroleum Asphalt (http://www.mapllc.com/MSDS/).

Forms of asphalt used in paving

- Asphalt (already mentioned above) is prepared for use in HMA and other paving applications.
- Emulsified asphalt consists of a suspension of small asphalt cement globules in water, assisted by an emulsifying agent (e.g., soap). Emulsions have lower viscosities than neat asphalts and can be used in low temperature applications. After applying the emulsion, the water evaporates and leaves the asphalt cement.
- Cutback asphalt is a combination of asphalt cement and petroleum solvent. These also have lower viscosities than neat asphalt and can be used in low temperatures. When the solvent evaporates, the asphalt cement remains.
- Foamed asphalt is a combination of hot asphalt binder and small amounts of water. The cold water turns to steam when it comes in contact with the hot asphalt binder. The steam becomes trapped in tiny asphalt binder bubbles, resulting in high volume asphalt foam. The foam lasts only a few minutes and then the asphalt binder resumes its original properties. Foamed asphalt is used as a binder in soil or base course stabilization (WAPA Asphalt Pavement Guide 2002).

The following information was included as a guide in the selection of suitable commercially available solvents for removing tar from Army ground vehicles. Due to environmental protection requirements, most state and Federal agencies are now required to use biodegradable solvents instead of diesel fuel or other hydrocarbon solvents.
3 **Summary of Commercial Tar Removers**

Under the SPOTA program, the Army is leading an effort to develop and demonstrate pollution prevention technologies to reduce hazardous air pollutants and other volatile organic emissions at surface cleaning and painting operations at DOD facilities. This effort focuses on evaluation of solvents for removal of tar from ground vehicle surfaces. Rhee et. al (1995) conducted a survey of DOD facilities, and listed some desired general properties of cleaning solvents (Table 1), which also provide guidance for identifying a cleaner for application to surfaces of tactical and transport vehicles. The general guidance was considered while developing this report’s recommendations for solvents and methods to remove tar from metal surfaces prior to painting and as part of general maintenance.

The following criteria were considered for selecting a solvent for removing tar from vehicle surfaces:

1. Effectiveness in removing the tar and fast drying
2. Shall have low VOCs
3. Shall have no or low content of HAPs
4. Shall have low toxicity
5. Shall have high flash point
6. Shall have low flammability
7. The ability to recycle the solvent
8. The cleaner residues must be biodegradable and easily treatable along with regular wastewater streams
9. Material compatibility, use of the solvent should not lead to corrosion or erosion, if possible provide corrosion protection layer,
10. The cost of the solvent and the solvent requirement should be minimal.

Before establishing the criteria for selection of solvents, the following information regarding current practice to remove tar was also obtained from the U.S. Army Tank Automotive Research, Development and Engineering Center (TARDEC). The currently practiced method uses a 40,000 psi waterjet to mechanically remove tar. Other commercial formulations such as Biopro and Teskol from Inland Technologies are used for spot cleaning. The tar removal is done prior to regular maintenance and re-induction of any vehicle. Currently visual inspection and sometimes accompanied by a
water-break test are the only methods of evaluating the cleanliness of the tar removal step.

A literature survey of commercially available solvents was performed. The intention was to select solvents that were free from hazardous chemicals and hence safe for users, and that leftover waste that could be disposed of simply. Table 3 includes the results of the survey. Appendix A to this report lists additional information on these tar-removing solvent systems. The Material Safety Data Sheets (MSDSs) and properties of each solvent (included in Appendix B) were reviewed. Table 3 includes the chemical composition of the solvents.

4 Review of Experimental Protocols for Evaluation of Tar Removers from Metal Surfaces

Introduction

Laboratory standard testing protocols available in literature for tar removal from metal surfaces were reviewed. Search was conducted on multiple databases comprising of Scopus, Academic Search Premier (Ebsco), Academic Onefile (Gale), Web of Science-including Social Sciences, Medicine, Humanities, and Engineering. The most pertinent results are listed in the following section. Tar removal experiments were designed and conducted using a total of three commercial solvents. The three solvents were tested on metal coupons simulating the metal surfaces of military tactical and transport vehicles.

Literature review of solvents and processes

Kulkarni et al. (2003) found a variety of environmentally friendly and safe asphalt-removing solvents available in the market. However, they noted there is no quantitative standardized procedure to compare the efficacy of these solvents. Their goal was to develop a standardized procedure that would yield quantitative and repeatable results. After evaluating various alternatives like metal and glass plates, ceramic tiles, and aluminum foils, the aluminum dish was found most suitable for the study. Test results obtained for solvent comparison were found to be consistent and repeatable, with the coefficient of variation for asphalt removed less than 10 percent for most solvents. Further, this study provides an outline for cost-effective analysis of solvents used in relation to diesel fuel, and the procedure can also rank solvents quantitatively. Sacco (2004) has studied the blending of two plant-derived solvents to clean asphalt from trucks, shovels, and other equipment used to handle paving operations. One of the solvents was ethyl lactate, made from ethanol and lactic acid made by fermenting corn sugars. The other was methyl soyate, a mixture of methyl esters of the fatty acids found in triglycerides from soybean oil. The new solvent, called Agri-Solve, cleans without leaving a residue and proved to perform better than diesel fuel and several other solvents currently used for the job. Bryant and
Cannon (1996) have found a substitute, 3 percent hydrogen peroxide (H\textsubscript{2}O\textsubscript{2}) to effectively clean tenacious residues off glass surfaces. They evaluated the solvent both at moderately elevated pH conditions and iron-based catalysts. Results revealed that 100 percent of an asphalt residue could be removed from glass surfaces within 105 min when it was submerged in a 3 percent H\textsubscript{2}O\textsubscript{2} solution at pH 9.5 and ambient temperature. Furthermore, the asphalt residue could be completely removed within 45-60 min if the H\textsubscript{2}O\textsubscript{2} solution also included 10\textsuperscript{-3} M FeCl\textsubscript{3}.

Lahib (2003) also found 3 percent hydrogen peroxide H\textsubscript{2}O\textsubscript{2} in water effectively removed residues from glass surfaces. To simulate industrial cleaning conditions, asphalt was employed as a representative surrogate for tough-to-clean residues. Asphalt cleaning was dramatically enhanced by mild heating: whereas 3 percent H\textsubscript{2}O\textsubscript{2} at pH 9.5 and 23°C removed 100 percent of a fresh asphalt residue within 60 minutes, heating to 53°C achieved full removal within 2 minutes. As asphalt became aged or dried by exposure to air, longer cleaning durations were required. Nevertheless, all of the asphalt could still be removed with 3 percent H\textsubscript{2}O\textsubscript{2} at pH 9.5 and 70°C within 2 to 60 minutes, even after the asphalt had dried onto glass for a week. H\textsubscript{2}O\textsubscript{2} removed asphalt even when visible light was not present. When the H\textsubscript{2}O\textsubscript{2} was excluded, a pH 9.5 bath at 70°C removed only a small fraction of this asphalt, if any.

The IceMaster process (Kipp 2007) has penetrated many areas of industry where coatings must be gently removed from surfaces. In the IceMaster process, a mixed stream of dry ice particles and compressed air is emitted from a nozzle on to the surface being cleaned. The strong refrigeration effect of the dry ice embrittles materials such as oils, waxes, greases, paints, and bitumens. The coating cracks and the dry ice particles convert to carbon dioxide gas and leave. The surfaces themselves being cleaned are not attacked or embrittled by the cold. Therefore, it is not necessary to remove seals and rubber parts when using IceMaster process. After cleaning, only residues of the coatings have to be removed. To supply the handheld IceMaster device, a carbon dioxide flask with feed pipe or tank and a high performance compressor are needed. The need for compressed air is small, at a rate of 0.75-8.00 m\textsuperscript{3}/min (depending on facility size). IceMaster can run at 4.5 bar, is almost maintenance-free, and is simple to use.
A countercurrent continuous washing apparatus for tar removal under ultrasonic irradiation has been developed by Kopparal et al. (2005). Tar was dissolved in dimethylformamide (DMF) and sand was soaked into the resulting tar solution to prepare samples of tar-contaminated sand. Tar contents in DMF were determined by a UV-spectrophotometer from absorbance at 336.5 nm. The removal rate of tar content from this tar-contaminated sand was measured in two different conditions, one under the condition of mechanical stirring and the other with ultrasonically induced agitation. The removal rate was described in terms of a first order reaction equation, which enables us to calculate the residue fraction in continuous washing at a steady state. Comparison of tar-removal with mechanical stirring and ultrasonically induced agitation has demonstrated that the ultrasound is more effective than the simple mechanical stirring.

Sheldon (2005) found a nontoxic, nonhazardous, environmentally safe composition provides an effective, fast-acting cleaning solution for removal of tar, oils, asphalt and other bituminous materials from industrial equipment surfaces. The composition is a mixture of a carrier monocyclic monoterpene and a nonionic surfactant such as an alkylphenol ethoxylate. The mixture is applied directly to surfaces to be cleaned, and rinsed with water in the absence of mechanical intervention.

Zaki and Troxler (2005) found that water-soluble solvent compositions removed petroleum residue from a substrate, including:

- from about 10 to about 60 percent by weight of an aromatic ester
- from about 30 to about 60 percent by weight of an aliphatic ester
- from 0 to about 15 percent by weight of a co-solvent
- from 0 to about 20 percent of one of a cyclic terpene and a terpenoid
- from 0 to about 1 percent by weight of an odor-masking agent
- from 0 to about 20 percent by weight of a nonionic surfactant.

The composition can further comprise water. The method for removing petroleum residue from a substrate can further comprise recycling the solvent by using a countercurrent separation column charged with compressed ammonia and/or carbon dioxide and a spinning band distillation column to separate the solvent from the petroleum residue.
5 Discussion of Literature and Experimental Protocol

From the review of the literature it appears that the best performing solvents all have an appreciable ability to dissolve asphalt and asphalt compounds. Both terpene-based compounds and vegetable oil esters appear to be especially favored due to their perceived environmental friendliness. The inclusion of surfactants appears to aid the process. This may explain the differences in effectiveness along with other compounding differences for the widely different cleaning efficacies of a number of apparently terpene based cleaners (Kulkarni et al. 2003). It appears that dioctylsulfosuccinate could be particularly useful (based on Phieffer et al. 2003).

The use of \( \text{H}_2\text{O}_2 \) (Lahib 2003) is intriguing, but the results were obtained on glass surfaces. Whether such an approach will work on metal surfaces remains to be studied.

The physical approach of cryogenic blasting may also be particularly useful as no chemicals are involved and such processes have a history of use within the DOD.

Only two of the above cited papers (Kulkarni et al. 2003; Brant and Canon 1996) are of direct relevance to adoption of an experimental protocol to evaluate solvent effectiveness for removal of asphalt. The protocol as discussed by Kulkarni et al. (2003) was also used in Zaki and Troxler (2005) and is summarized in the following section.

Protocol 1

Steps

1. Number each aluminum dish and determine its weight. The dishes used are FISHERBRANDTM Aluminum Weighing Dishes (Fisher Scientific, Pittsburgh, PA). The catalog number is 08-732 and the capacity of each dish is 42 mL.
2. Apply 1.5 g of emulsified asphalt (CRS-2) into the standard aluminum dish, ensuring that asphalt emulsion fully covers the bottom surface area of the dish.
3. Heat the aluminum dish, with asphalt emulsion, for 24 hours at the temperature of 140°F (60°C).
4. Remove the dish after 24 hours and cool it to room temperature. Determine the weight of the dish and calculate the weight of residual asphalt.
5. Apply 0.5 g of solvent into the dish by dropper. Make sure that the asphalt remains completely submerged in the solvent for 5 minutes.
6. Let the dish drain for 5 minutes by putting it upside down.
7. Rinse the dish thoroughly for 5 minutes under running water.
8. Heat the dish at 140°F (60°C) for 15 hours to remove the traces of water completely.
9. Weigh the dish to calculate asphalt removed.

**Strengths and weakness**

This protocol is clearly defined, easily carried out and allows quantitative comparisons of the different solvents. However, it suffers from the restriction of using a fixed substrate (aluminum). This raises the possibility that the results obtained with this test may not be applicable to other surfaces, especially to painted surfaces. Another drawback in this method is that it measures the relative effectiveness of the dissolution powers of the solvent alone. In normal practice, additional form of energy input may be present from activities such as wiping or spraying. Finally, a water rinsing step is also employed in this protocol. As explained in Zaki and Troxler (2005), this step simulates the practice among asphalt paving workers of applying a cleaning solvent to the truck beds followed by water rinsing to minimize residual solvent. Apparently, an excessive residual causes poor quality asphalt by leaching binders from the mix. This consideration may not be relevant for the present application of cleaning vehicles prior to rebuilding.

A second protocol, obtained from Sheldon (2005), is detailed in the following section.
Protocol 2

Preparation of test strips

The assay uses test strips of stainless steel with dimensions 1.5 in. x 2.0 in. x 1/32 in. Immersions in solvents were carried out by placing the strips in clamps and immersing two thirds of the total area of the strip. This provides a total uniform area of exposure of 2.0 sq in. (the 1/32-in. thickness of the strip was disregarded. The strips were desiccated and weighed with the clamp assembly, so that the strip itself would not be handled.

The asphalt used in these experiments was a standard commercially available material containing latex polymers called CRS28 manufactured by Patterson Oil Company, Sullivan, Mo. On procurement, each batch was cured by heating in a conventional laboratory oven for 7 days at 200 °F.

A bath of the cured latex polymer-containing SuperPave asphalt was heated to 175-180 °F. The strips were immersed in the molten asphalt to provide 2.0 sq in. of exposure. Exposure time was 2-3 seconds. The strips were cooled to room temperature and desiccated for 24 hours, and weighed. Each data point is the arithmetic average of 10 strips treated identically.

Assay

The strips were immersed in the test solvents so that the entire asphalt coated areas were exposed to the solvent. The strips were withdrawn from the solution after 60 seconds and drained for 2 minutes. They were again immersed for 60 seconds and withdrawn. The strips were allowed to dry at room temperature for 2 hours and desiccated overnight. Dissections were performed in an ordinary bell jar in the presence of a standard commercial desiccant. The test strips were then reweighed. The data expressed in percent by weight of removal was calculated by subtracting the weight of the treated strip from the weight of the untreated strip and dividing by the weight of the untreated strip.

Strengths and weakness

This too is a clearly defined protocol that allows replications, and quantitative evaluations. While the coating of the strips by immersion may lead to
variations in the individual weight, this can be minimized by simultaneous dip coating, temperature control, and simultaneous withdrawal. The effect of such variations can also be accounted for by normalizing the residual amount with respect to the initial coat weight. This protocol also follows a more rigorous and, in our opinion, a realistic aging of the asphalt contaminants that are likely to adhere to military vehicles. Finally, the protocol allows flexibility in the choice of coupons. One drawback in this method is that it measures the relative effectiveness of the dissolution powers of the solvent alone. In normal practice, additional form of energy input may be present from activities such as wiping, or spraying. While this protocol does not explicitly include a water rinsing step, reading of the reference clearly indicates that such a step is usually carried out.
6 Experimental Study

Based on the literature review of the protocols presented in the previous section, a modified protocol as described below was followed for this experimental study.

Preparation of Test Strips

The assay uses test strips of stainless steel with dimensions 4 in. x 6.0 in. x 1/50 in. Immersions in solvents were carried out by placing the strips in clamps and immersing two thirds of the total area of the strip. This provides a total uniform area of exposure of 12.0 sq in. (The 1/50-in. thickness of the strip was disregarded.) The strips were desiccated and weighed with the clamp assembly so that the strip itself would not be handled.

The asphalt used in these experiments was a standard commercially available material labeled CRS-2. The strips were dried in an oven for 24 hours at 60 °C. At the end of the drying period, the strips were cooled to room temperature and weighed. A thin edge from the bottom of the strip where lip formation was seen was removed manually.

Assay

The strips were immersed in the test solvents so that the entire asphalt coated areas were exposed to the solvent. The strips were withdrawn from the solution after 60 seconds and drained for 2 minutes. This was repeated two more times for a total of three solvent rinses. Following this the strips were washed in water. The strips were allowed to dry at room temperature for 2 hours and were desiccated overnight. The test strips were then reweighed. The data expressed in percent by weight of removal was calculated by subtracting the weight of the treated strip from the weight of the untreated strip and dividing by the weight of the untreated strip.

The removal of a thin edge and the addition of a solvent and water rinse eliminated the lip formation and residues.
Evaluation of solvents

Four solvents were chosen (Table 4): (1) Diesel, (2) Bioclean, (3) Bio T Max, and (4) Axarel 32. Diesel was a reference solvent. Bioclean, Bio T Max, and Axarel 32 were selected as test solvents. Axarel 32 represented a different class of solvents without terpenes that is rinsable with water, from which it separates quite easily so that it can be recycled. It can be applied by a number of methods including immersion, pressure washing, and operated in an ultrasonic bath.

A few other solvents including ethyl lactate, dibasic esters, and X-Force were tested with little success. An aqueous solution formulated with dioctylsulfosuccinate was also not effective.

Table 4. Cost and characteristics of solvents selected for testing.

Data analysis and interpretation

Table 5 lists the raw data for the four solvents tested. Note that the residual amounts of asphalt for both diesel and Bioclean were much improved compared to the trial results. This is attributable to the elimination of the lip formation observed previously.

An Analysis of Variance (ANOVA) analysis (Table 6) reveals a significant difference between Bioclean and Diesel at the 0.05 level, but not between Diesel and BioTMax. The results between Diesel and Axarel 32 were not subject to statistical analysis as the diesel samples were few. Appendix C includes photographs of the coupons.

7 Conclusions and Recommendation

This study revealed that at least two broad categories of solvent blends (terpene based solvents/esters, and blends of aliphatic hydrocarbons and esters assisted by surfactants) can remove asphalt from metal. Of the solvents tested, Axarel 32, appears to combine both functionality and desirable environmental characteristics. However, the feasibility of using these solvents for routine large scale cleaning will have to be demonstrated in the overall framework of economics, environment, and health.

It is recommended that follow-on studies be conducted within a constraining set of environmental and health criteria and price. Given such constraints, it should be possible to formulate a custom solvent system and cleaning protocol within the constraints.

**Health Hazards (Acute and Chronic)**

Dizziness, nausea, headaches, vomiting, dryness of the skin, irritation to the eyes and skin.

**Carcinogenicity:**

- NTP?: N/A
- IARC Monographs?: N/A
- OSHA Regulated?: N/A

**Signs and Symptoms of Exposure**

**Medical Conditions Generally Aggravated by Exposure**

N/A

**Emergency and First Aid Procedure**

Do not induce vomiting, move to fresh air, resuscitate if necessary, wash thoroughly, flush eyes for 15 minutes.

### Section VII - Precautions for Safe Handling and Use

**Steps to be Taken in Case Material is Released or Spilled**

Contain spill; provide adequate ventilation; keep people away; extinguish all ignition sources; keep material out of public waters; use dry absorbent on small spills.

**Waste Disposal Method**

Incorporate according to all federal, state, and local regulations.

**Precautions to be Taken in Handling and Storage**

Store in dry, cool area, keep containers closed; use adequate ventilation; wash thoroughly after handling; use protective clothing; no ignition sources present;

**Other Precautions**

Can ignite when ignition source is present.

### Section VIII - Control Measures

**Respiratory Protection (Specify Type)**

NIOSH approved organic vapor cartridge.

**Ventilation**

- Local Exhaust: preferred
- Mechanical (General): acceptable
- Other: N/A

**Protective Gloves**

- Rubber or neoprene
- Other Protective Clothing or Equipment

- Eye Protection
- Safety glasses or goggles

- Work/Hygienic Practices

N/A

All information contained in this data sheet is believed to be true and accurate at this time. However, there is no guarantee expressed or implied.

Forms by WindChem Software (707)864-2645
MATERIAL SAFETY DATA SHEET

Product: BIO T MAX
Date: May 1, 1995
Revision Date: April 2, 2007

SECTION I. MATERIAL IDENTIFICATION

Trade/Material Name: Bio T Max

Manufacturer: BioChem Systems, Inc.
3511 N. Ohio
Wichita, KS 67219

Phone: 800-777-7870 (Business)
800-633-8253 (Emergency)

Cage Number: 0XYG0

SECTION II. INGREDIENTS AND HAZARDS

Ingredient Name: Exposure Limits: CAS #
D-limonene N/D 5989-27-5

All components that comprise Bio T Max are registered on the TSCA inventory.

SECTION III. PHYSICAL DATA

Appearance & Odor: Clear yellow liquid; citrus odor.
Boiling Point: 334°F
Evaporation Rate (H₂O = 1): <1
Vapor Pressure: <2 mm Hg (Primary Constituent)
Specific Gravity (H₂O = 1): 0.863 @ 25°C
Melting Point: Liquid @ 25°C
Vapor Density (air = 1): >1
pH (10% in water): 7.5-8.5
Solubility in Water: Dispersible
VOC Content (g/l): 780

SECTION IV. FIRE AND EXPLOSION DATA

Flash Point (method): 130°F (PMCC)
Limits: LEL %: N/D UEL %: N/D
Extinguishing Media: Dry chemical, carbon dioxide or halon.
Unusual Fire or Explosion Hazards: Guard against spontaneous combustion of improperly discarded oily rags.
Special Fire Fighting Procedures: Use self-contained breathing apparatus.
Do not use water.

SECTION V. REACTIVITY DATA

Chemical Stability: Hazardous polymerization will not occur.
Chemical Incompatibilities: Avoid contact with strong oxidizing agents.
Conditions To Avoid: Avoid use of any ignition sources near spill.
Hazardous Decomposition Products: Carbon monoxide.

SECTION VI. HEALTH HAZARD INFORMATION

Carcinogenicity: This product is not considered a carcinogen.
Medical conditions which may be aggravated by contact: Predisposition to allergic contact dermatitis.
Primary entry route(s): Inhalation, skin contact, eye contact, ingestion.
SECTION VI. HEALTH HAZARD INFORMATION (cont.)

Signs and symptoms of overexposure:

Eye Contact: Causes irritation
Skin Contact: Causes irritation
Inhalation: Prolonged inhalation of aerosol/vapor may result in drowsiness, headache and uncoordination if used extensively in absence of general ventilation.

First Aid:

Eye Contact: Flush eyes with copious amounts of water; see physician.
Skin Contact: Wash skin with mild soap and water.
Inhalation: Move victim to fresh air.
Ingestion: Do not induce vomiting. Rinse mouth with water then drink one glass of water. Contact physician immediately. Never give anything by mouth if victim is unconscious, is rapidly losing consciousness, or is convulsing.

SECTION VII. SPILL, LEAK AND DISPOSAL PROCEDURES

Spill/Leak Procedures: Avoid use of any ignition source near spill. Contain product with inert material or absorbent medium such as activated carbon or kitty litter.

Waste Management/Disposal: Hazardous substances cleaned with this product may be considered hazardous waste. Unused portions of this product must be disposed of as ignitable waste. Dispose of hazardous waste in accordance with all local, state and federal regulations.

SECTION VIII. SPECIAL PROTECTION INFORMATION

Personal Protective Equipment:

Eye Protection: Goggles
Gloves: Impermeable gloves (Nitrile)
Respirator: Not required in presence of good general ventilation. If conditions warrant, use NIOSH approved respirator.
Other: Avoid wearing clothes saturated with cleaner.

Workplace Considerations:

Ventilation: General mechanical ventilation.
Safety Stations: Emergency eye wash and shower stations.

SECTION IX. SPECIAL PRECAUTIONS

Special Handling/Storage: Store in original container in well-ventilated areas at temperatures below 140°F. Store in closed containers away from heat or sources of ignition and oxidizing materials. Protect against physical damage to containers.

Other Precautions: Avoid contact with skin, eyes and mucous membranes.

Hazard Class: UN 2319 (Flammable Liquid when shipped by air, internationally, or in bulk quantities. Combustible Liquid and unregulated by DOT when shipped domestically by land in non-bulk quantities.)

CAS Number: Proprietary Blend
R.C.R.A. Hazard Class: Ignitable

The information contained in the above MSDS is intended for the exclusive use of BioChem Systems, Inc. The above data have been compiled primarily from the MSDS supplied to BioChem Systems, Inc. by the manufacturer and/or supplier. While the information is believed to be pertinent and current, no warranty expressed or implied is given as to its accuracy. This MSDS is to be used as a guideline for safe work practices and emergency response. Any questions regarding the safe use of this material not outlined above should be directed to the BioChem Systems, Inc. Technical Services Department.
Material Safety Data Sheet
May be used to comply with OSHA's Hazard Communication Standard. Standard must be consulted for specific requirements.

SECTION II - Hazardous Ingredients/Identity Information

Hazardous Components (Specific Chemical Identity, Common Name(s))

d-Limonene

neutral surfactant

OSHA PEL

ACGIH TLV

Other Limits

Recommended

% (optional)

SECTION III - Physical/Chemical Characteristics

Boiling Point
175.5-176.5°C

Specific Gravity (H2O = 1)
0.85

Vapor Pressure (mm Hg.)

Melting Point

N/A

Vapor Density (AIR = 1)
4.7

Evaporation Rate
(Benzyl Acetate = 1)
Less than 1

Solubility in Water

No

Appearance and Odor
Orange color with characteristic citrus odor

SECTION IV - Fire and Explosion Hazard Data

Flash Point (Method Used)
(Closed Cup) >122°F

Extinguishing Media
Dry Chemical, CO2, Foam

Special Fire Fighting Procedures
Water may be used to cool closed containers of product exposed to heat.

Unusual Fire and Explosion Hazards
Avoid heat, sparks and open flames. Explosive vapor-air mixtures may be formed at elevated temperatures. Closed containers present possible pressure build up and explosion due to heat exposure.
SECTION V - Reactivity Data

<table>
<thead>
<tr>
<th>Stability</th>
<th>Unstable</th>
<th>Conditions to Avoid</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Stable</td>
<td>Excessive heat</td>
</tr>
</tbody>
</table>

Incompatibility (Materials to Avoid):

Strong oxidizing agents, mineral acids, and acidic clays.

Hazardous Decomposition or Byproducts:

None

Hazardous polymerization:

None

Will not Occur:

X

SECTION VI - Health Hazard Data

Route(s) of Exposure:

Inhalation

Absorption of 2,4-Dimethoxyphenol can occur following oral, skin, eye or inhalation exposure.

Health Hazards (Acute and Chronic):

Acute health hazards are primarily irritation of exposed areas. Nausea and vomiting may follow ingestion of large amounts.

Carcinogenicity:

NTP? IARC Monograph? OSHA Regulated?

No   No   No

Signs and Symptoms of Exposure:

Inhalation: Prolonged inhalation may produce respiratory tract irritation, nausea, and dizziness. Exposure may produce minor irritation.

Medical Conditions:

Generalized disorder caused by exposure.

Emergency and First Aid Procedures:

Remove from contaminated area using appropriate respiratory protection. Upon eye contact, flush with water. Upon skin contact, wash exposed area with soap and water.

SECTION VII - Precautions for Safe Handling and Use

Steps to be Taken in Case Material is Released or Spilled:

Collect and place in a suitable container. Prevent from reaching waterways. Sediments may be used. Keep away from ignition sources.

Waste Disposal Method:

To be performed in compliance with all regulations. Do not landfill. Incineration preferred.

Precautions to be Taken in Handling and Storage:

Store in properly labeled, tightly closed containers in cool, dry, well-ventilated areas. Avoid skin and eye contact and prolonged inhalation exposure. Do not ingest.

Other Precautions:

Remove and clean contaminated clothing and footwear before reuse.

SECTION VIII - Control Measures

Respiratory Protection (Specify Type):

Use type approved for organic vapors by NIOSH for exposure to vapors.

Ventilation:

Local Exhaust

Provide closed systems and local exhaust to control vapors.

Mechanical (General):

General room dilution acceptable. No mechanical ventilation required.

Protective Gloves:

Chemical protection or PPE.

Eye Protection:

Chemical protection or PPE.

Other Protective Clothing or Equipment:

Provide and use appropriate personal protective equipment such as respiratory protection, chemical protection, or PPE.

Work/Hygienic Practices:

Normal

MATERIAL SAFETY DATA SHEET

PRODUCT NAME: TARVA SOL
PRODUCT CODE: #243

VI - HEALTH AND HAZARD DATA

ROUTES OF ENTRY: INHALATION? YES  SKIN? NO  DERMAL LD 50 5g/Kg  INGESTION? ORAL LD50 (Rat) 1g/Kg

EFFECTS OF OVEREXPOSURE
IF IN EYES: MAY CAUSE IRRITATION
IF ON SKIN: MAY CAUSE IRRITATION TO OPEN CUTS & SORES
IF SWALLOWED:
IF INHALED:

EMERGENCY AND FIRST AID PROCEDURES
IF IN EYES: FLUSH WITH FLOWING WATER FOR 15 MINUTES & SEE PHYSICIAN
IF ON SKIN: FLUSH WITH FLOWING WATER FOR 15 MINUTES. SEE A PHYSICIAN IF IRRITATION PERSISTS
IF SWALLOWED: GIVE MILK OR WATER TO DILUTE MATERIAL & DO NOT INDUCE VOMITING. SEE PHYSICIAN
NEVER GIVE ANYTHING BY MOUTH TO ANY UNCONSCIOUS PERSON.
IF INHALED: REMOVE TO AREA OF FRESH AIR.

VII - SPILL AND LEAK PROTECTION

STEPS TO BE TAKEN IF MATERIAL IS RELEASED OR SPILLED: SQUEEZE UP, MOP UP AND FLUSH TO SEWER
WITH WATER.

WASTE DISPOSAL METHOD: DISPOSE OF IN ACCORDANCE WITH APPLICABLE FEDERAL, STATE & LOCAL
REGULATIONS

VIII - SPECIAL PROTECTION INFORMATION

VENTILATION: Local Exhaust: PREFERRED Mechanical ACCEPTABLE AT POINT OF VAPOR RELEASE Special: N/A
RESPIRATORY PROTECTION: NONE REQUIRED WITH ADEQUATE VENTILATION

PROTECTIVE GLOVES: IMPERVIOUS RUBBER, SOLVENT RESISTANT
EYE PROTECTION: CHEMICAL GOGGLES OR FACE SHIELD
OTHER PROTECTIVE EQUIPMENT: EYEWASH FACILITIES

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: STORE AWAY FROM HEAT OR OPEN FLAME. KEEP CONTAINER CLOSED WHEN NOT IN USE. DO NOT CONTAMINATE WATER, FOOD OR FEED
OTHER PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. DO NOT GET IN EYES, ON SKIN OR CLOTHING

WORK/Hygienic Practices: PRACTICE GOOD PERSONAL HYGIENE. WASH AFTER HANDLING

REVISION DATE: January 01, 2005
Prepared By
DATE OF ISSUE: January 01, 2005
Prepared By

This information contained herein is based on data considered accurate. However, no warranty is expressed or implied regarding the accuracy of this data or the results to be obtained from its use. Chemical Industries assumes no responsibility for personal injury or property damage to the user, users or third parties caused by the manual, and users or users assume all risks associated with the use of this material.
MATERIAL SAFETY DATA SHEET

SECTION ONE – GENERAL INFORMATION
Primary Trade Name:
Citrus Blast

GENERIC DESCRIPTION:
Grease Tar and Adhesive Remover

MANUFACTURER’S NAME AND ADDRESS:
Cleanline Products, Inc.
2621 Reserve Drive
Canton, TX 75103

EMERGENCY TELEPHONE NUMBER: 888/536-5185

SECTION TWO – HAZARDOUS INGREDIENTS/HEALTH HAZARD DATA
This product has not been tested as a whole for health effects on animals or humans. Hazardous ingredients as defined in 29 CFR 1910.1200 if any are not present at regulated levels.
Ingredients: CA# OSHA/PEL ACGIH/TLV
Isoparaaffins 68551-19-9 400 ppm 400ppm

SECTION THREE – PHYSICAL DATA
BOILING POINT (F): over 300 F
pH: Neutral
VAPOR PRESSURE (mm Hg): Same as water
SOLUBILITY IN WATER: Miscible
EVAPORATION RATE (ETHYL ETHER=1): 1
APPEARANCE AND ODOR: Clear to yellow liquid with citral odor. Natural ingredient content may cause color to vary.

SECTION FOUR – FIRE & EXPLOSION HAZARD DATA
FLASH POINT (METHOD): N/D
AUTOIGNITION TEMPERATURE: N/D
LEL: 1.1% XYL
UEL: 3.4% COIL

EXTINGUISHING MEDIA:
Dry chemical, foam or CO2. Do not use water.

SPECIAL FIRE FIGHTING PROCEDURES: Remove unignited material from area of fire. Cool closed containers with water spray.

UNUSUAL FIRE AND EXPLOSION HAZARDS: UFC/OSHA Class II combustible liquid.

SECTION FIVE – HEALTH HAZARD DATA
CARCINOGENICITY: NTP: No IARC: No OSHA: No

PRIMARY ROUTE OF ENTRY: Inhalation

SYMPTOMS OF HEAVY ACUTE AND/OR PROLONGED EXPOSURE: Redness of eyes and/or skin.
SKIN: Prolonged exposure may cause defatting or redness. EYE: Is an irritant. INGESTION: Small amounts are not likely to cause injury. Large amounts can be unwholesome to eat and medical attention should be sought promptly.

MEDICAL CONDITIONS AGGRAVATED BY EXPOSURE: Preexisting contact-site disorders.

Emergency First Aid: For Eyes and Skin: Flush with water for 15 minutes. Get medical attention if necessary.
INGESTION: Give 2 glasses of water and summon medical attention.
SECTION SIX - REACTIVITY DATA

STABILITY: STABLE
CONDITIONS TO AVOID: NONE

INCOMPATIBLE MATERIALS TO AVOID: Alkaline materials, oxidizers or oxidizing materials and strong acids.

HAZARDOUS POLYMERIZATION: Will not occur.
CONDITIONS TO AVOID: None

HAZARDOUS DECOMPOSITION: From combustion: Smoke, carbon dioxide, unknown organic compounds.

SECTION SEVEN - ENVIRONMENTAL PROTECTION PROCEDURES

SPILL RESPONSE: Small spill pick up with absorbent media. Store as INDUSTRIAL waste. Large Spills: Contain with dikes, pick up with vacuum or absorbent and transfer to clean container for disposal. Handle as INDUSTRIAL waste. Notify proper local, state and federal authorities.

WASTE DISPOSAL METHOD: Dispose of in accordance with Local, State and Federal regulations.

SECTION EIGHT - SPECIAL PROTECTION INFORMATION

EYE PROTECTION: CHEMICAL GOGGLES OR FULL FACE SHIELD. SKIN PROTECTION: RUBBER OR VINYL GLOVES

RESPIRATORY PROTECTION: Not normally needed if used in accordance to label directions.
VENTILATION RECOMMENDATION: Local Exhaust: Not normally indicated. Special: Not necessary. Mechanical: Not normally indicated. Other: Normal indoor ventilation
OTHER PRECAUTIONS: Long pants and sleeves. Always consider an apron

SECTION NINE - SPECIAL PRECAUTIONS

HANDLING AND STORAGE: Store in cool, ventilated area, away from ignition sources. Store away from oxidizers or materials being a yellow “D.O.T” label. Store away from acids.
OTHER PRECAUTIONS: Clean up leaks/spills immediately to prevent soil or water contamination.

SECTION TEN - TRANSPORTATION INFORMATION

D.O.T Shipping Name: Cleaning Liquid-Flammable
D.O.T hazard Class: 3 Flammable

UN/IDENTIFICATION NUMBER: NA1993 PGIII
D.O.T Label: Non-regulated in non-bulk quantity

ENVIRONMENTAL NOTES: Sara 313 – reportable ingredients are not present.

The exact composition of this material is a trade secret.

DISCLAIMER OF LIABILITY:
The manufacturer and seller warrants that this product conforms to its standard specifications when used according to directions. As the conditions or methods of use are beyond our control, we do not assume any responsibility and expressly disclaim any liability for use of this product. Information contained hereinafter is believed to be true and accurate but all statements or suggestions are made without any warranty, expressed or implied, regarding accuracy of the information, the hazards connected with the use of the material and the results to be obtained from the use thereof.
MATERIAL SAFETY DATA SHEET
Complies with ANSI Z400.1 Format

SECTION 1: PRODUCT IDENTIFICATION

Product: ORANGE WATERLESS™
MSDS CODE: CL3470.0700

SECTION 2: COMPOSITION AND INFORMATION ON INGREDIENTS

Components*% by Wt. CAS # Exposure Limit
Nonionic Surfactant 05-10 26027-38-3 None
Beta-Pinene 08-12 12172-67-3 None
Citrus Distillate 80-90 5989-54-8 None

*There are no components in this product that are currently reportable in either SARA Title III: Sections 313, 40 CFR part 372 or the California Proposition 65 requirements. NA = Not applicable, NSR = No Special Requirements, ND = Not Determined, PEL = OSHA, TLV-TWA = ACGIH

SECTION 3: HAZARD IDENTIFICATION

Primary Entry Routes: Skin and eyes. Signs & Symptoms of Exposure: INHALATION: Prolonged exposure to vapors may cause mucous membrane irritation. EYE CONTACT: Liquid and mist may irritate the eyes. SKIN CONTACT: May dry out the skin. Prolonged contact may irritate the skin. INGESTION: Large quantities may cause stomach pain, irritation of mouth and throat. Swallowing may cause vomiting. Effects of Overexposure: Headaches and vomiting.

SECTION 4: FIRST AID MEASURES

Emergency First Aid Procedures: INHALATION: Remove to fresh air. Get medical attention. Give artificial respiration if not breathing. EYE CONTACT: Immediately flush eyes with water for 15 minutes, lifting eyelids occasionally. Get immediate medical attention. SKIN CONTACT: Immediately wash skin with soap and water. Remove contaminated clothing and shoes. Wash before reuse. INGESTION: Do not induce vomiting. Get immediate medical attention. 24-HR MEDICAL EMERGENCY PHONE: 800-808-4691

SECTION 5: FIRE FIGHTING MEASURES

Flash Point: 169°F. SCFM. Flammable Limits: ND Extinguishing Media: Foam, CO2. Dry Chemical. Water Fog. Special Fire Fighting Procedures: Fire fighters should wear self contained breathing apparatus (SCUBA) and full protective clothing. Use water spray to cool nearby containers and structures exposed to fire. Unusual Fire and Explosion Hazards: Container may burst in the heat of fire.

SECTION 6: ACCIDENTAL RELEASE MEASURES

Release or Spill: Absorb with diatomaceous earth or similar inert material. Sweep or scrape up and containerize. Rinse affected area thoroughly with water. Wear or use appropriate protective equipment. All Federal, State and Local regulations should be carefully followed.

SECTION 7: HANDLING AND STORAGE

Keep out of reach of children. Store in a cool, dry place with adequate ventilation. Keep from freezing. Wash thoroughly after handling. Empty container may contain small amounts of undiluted product. Be certain to dispose of according to all regulations.
SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

Respiratory Protection: No special requirements under normal use conditions. Maintain adequate ventilation when using in confined areas.
Protective Gloves: No special requirements for normal use conditions.
Eye Protection: Wear splash-proof goggles for undiluted product. No special requirements for normal use conditions. However, it is a good safety practice to wear eye protection when using any chemical product.
Other Protective Measures: Use good personal hygiene practices. Launder contaminated clothing/equipment.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance/Odor: Clear liquid, citrus odor
Bolling Point: 212°F
Evap. Rate: NA
pH: NA
Vapor Density: ND
Vapor Pressure: NA
Specific Gravity: 0.930
Solubility in Water: Nil
%Volatile: 100

SECTION 10: STABILITY AND REACTIVITY

Stability: Stable
Conditions to Avoid: None known to COASTWIDE
Incompatibility: None known to COASTWIDE
Hazardous Decomposition Products: None known to COASTWIDE.
Hazardous Polymerization: Will not occur.
Conditions to Avoid: None known to COASTWIDE.

SECTION 11: TOXICOLOGICAL INFORMATION

Oral Toxicity: Non-toxic based upon current information available to COASTWIDE.

SECTION 12: ECOLOGICAL INFORMATION

Contains no phosphates. Contains no water.

SECTION 13: DISPOSAL CONSIDERATIONS

Waste Disposal Information: No special method. Observe all applicable Federal, State and Local regulations, rules and/or ordinances regarding disposal of non-hazardous materials.

SECTION 14: TRANSPORT INFORMATION

DOT EMERGENCY 24-HR: (800) 424-9300
DOT Class: Not Regulated

SECTION 15: REGULATORY INFORMATION

SARA Title III Section 313 and 40 CFR Part 372 Notification:
No ingredients in this product are currently listed as carcinogens by NTP, IARC or OSHA. All components of this product are listed or are excluded from listing on the U.S. Toxic Substances Control Act (TSCA) Chemical Substance Inventory.

SECTION 16: OTHER INFORMATION

Always follow label directions carefully when using this or any other chemical product. If information about this product is required, please contact COASTWIDE Laboratories at 503-410-0300. Keep MSDSs filed and organized in an area accessible to workers according to the Hazard Communication Standards.

All information appearing herein is given in good faith. No warranty is made, expressed or implied including merchantability or fitness for a particular purpose. All conditions of use are beyond the control of COASTWIDE Laboratories. Therefore, users are responsible for verifying the data under their own operating conditions to determine whether the product is suitable for their particular purposes. The data contained herein is confidential and intended solely for the user's internal use.

3.0 HEALTH HAZARDS IDENTIFICATION

Calculated Oral LD₅₀: 12526 mg/kg
Calculated Dermal LD₅₀: >2000 mg/kg

Route of Entry: Eye, Skin contact, Ingestion
Effects of Acute Exposure:
Eye: Direct contact may cause mild irritation.
Ingestion: Ingestion of large amounts may cause stomach distress, nausea or vomiting.

Effects of Chronic Exposure:
Skin: None known to us at this time.
Respiratory: Non-hazardous by WHMIS/OSHA criteria.
Carcinogenicity: Non-hazardous by WHMIS/OSHA criteria.
Teratogenicity, Mutagenicity, Reproductive Effects: No data available.
Synergistic Materials: Not available.

4.0 FIRST AID MEASURES

Eye: Flush with water. Remove contact lenses, if applicable, and continue flushing for 15 minutes. Obtain medical attention if irritation persists.
Skin: Not a normal route of harmful exposure. Flush with water. Wash with soap and water. Obtain medical attention if irritation persists.
Inhalation: Not a normal route of exposure. If symptoms develop, move victim to fresh air. If symptoms persist, obtain medical attention.
Ingestion: Do not induce vomiting. Rinse mouth with water, then drink one glass of water. Obtain medical attention or call a poison-control center immediately. Never give anything by mouth if victim is unconscious, is rapidly losing consciousness or is convulsing.

5.0 FIRE FIGHTING MEASURES

Flammability: Not flammable
Flash Point (deg F/C, TCC): None
LEL: Not applicable
UEL: Not applicable
Hazardous Combustion Products: May include and are not limited to oxides of carbon.
Means of Extinction: Treat for surrounding material.
Special Fire Hazards: Fire fighters should wear self-contained breathing apparatus.

6.0 ACCIDENTAL RELEASE MEASURES

Leak and Spill Procedure: Before attempting cleanup, refer to hazard data given above. Flush into sewage system in accordance with local regulations.
7.0 HANDLING AND STORAGE

Storage and Handling Requirements: Keep out of reach of children. Store in a closed container away from incompatible materials.

8.0 EXPOSURE CONTROLS/PERSOANL PROTECTION

Gloves: Although not considered a skin irritant under WHMIS, rubber gloves may be advisable.
Eye Protection: Safety glasses.
Respiratory Protection: Not normally required.
Other Protective Equipment: As required by employer code.
Engineering Controls: General ventilation normally adequate.

Telephone: 519-927-3793
MSDS Prepared by: Updated by: Cogent Environmental Solutions

Disclaimer
Information for this material safety data sheet was obtained from sources considered technically accurate and reliable. While every effort has been made to ensure full disclosure of product hazards, in some cases data is not available and is so stated. Since conditions of actual product use are beyond control of the supplier, it is assumed that users of this material have been fully trained. No warranty, expressed or implied, is made and supplier will not be liable for any losses, injuries or consequential damages which may result from the use of or reliance on any information contained in this form. If user requires independent information on ingredients in this or any other material, we recommend contact with the Canadian Centre for Occupational Health and Safety (CCOHS) in Hamilton, Ontario (1-800-263-3466) or CSST in Montreal, Quebec (514/873-3000).

THIS PRODUCT CONTAINS NO OTHER COMPONENT CONSIDERED HAZARDOUS ACCORDING TO THE CRITERIA OF 29 CFR 1910.1200.
3.0 PHYSICAL DATA/
3.1 APPEARANCE AND ODOR: RED POWDER WITH EB ODOR
3.2 SOLUBILITY IN WATER: COMPLETE
3.3 PH: 100% = 10.5 TO 11.5
3.4 BOILING POINT: UNK SPECIFIC GRAVITY: 7.94 LBS PER GAL.
3.5 VAPOR DENSITY: UNK EVAPORATION RATE: UNK

4.0 FIRE AND EXPLOSION DATA/
4.1 SPECIAL FIRE HAZARDS: NONE
4.2 FIRE FIGHTING METHODS: STANDARD AGENTS
4.3 FLASH POINT: UNK
4.4 FLAMMABLE LIMITS: LOWER: UNK UPPER: UNK

5.0 REACTIVITY DATA/
5.1 STABILITY: STABLE UNDER NORMAL CONDITIONS OF HANDLING
5.2 CONDITIONS TO AVOID: HIGH MOISTURE WILL HARZEN COMPOUND

6.0 SPILL OR LEAK PROCEDURES/
USE PROPER PROTECTIVE EQUIPMENT

6.1 CLEANUP:
MAXIMIZE VENTILATION. DIKE OR DAM LARGE SPILLS. RECOVER IF POSSIBLE. ADD ABSORBENT MATERIAL TO SOAK UP LIQUID. RINSE AREA THOROUGHLY WITH WATER.

6.2 WASTE DISPOSAL:
CONSULT STATE AND LOCAL AUTHORITIES FOR RESTRICTIONS ON DISPOSAL OF CHEMICAL WASTE.

7.0 HEALTH HAZARD DATA/ DANGER
7.1 EFFECTS OF OVEREXPOSURE:
EYES:
CAUSES IRRITATION, LOSS OF NATURAL LUBRICATION.

SKIN:
PROLONGED CONTACT MAY DEFAT SKIN, LEADING TO IRRITATION AND DERMATITIS.

IF SWALLOWED:
HARMFUL IF SWALLOWED.

IF INHALED:
MAY IRRITATE MUCOSAL MEMBRANES. UNDER RECOMMENDED CONDITIONS, VAPOR LEVEL WILL BE TOO LOW TO PRESENT INHALATION HAZARD.

8.0 FIRST AID/
8.1 EYES:
FLUSH EYES IMMEDIATELY WITH PLENTY OF COOL RUNNING WATER. REMOVE CONTACT LENSES. CONTINUE FLUSHING FOR 15 MINUTES HOLDING EYE LIDS OPEN.

8.2 SKIN:
FLUSH SKIN WITH PLENTY OF COOL RUNNING WATER. WASH THOROUGHLY WITH SOAP AND WATER.

8.3 IF SWALLOWED:
RINSE MOUTH; THEN DRINK 1 OR 2 LARGE GLASSES OF WATER. DO NOT INDUCE VOMITING. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.
9.0 SPECIAL PROTECTION INFORMATION /

9.1 EYES: SPLASHPROOF GLASSES.
9.2 SKIN: RUBBER GLOVES RECOMMENDED.

10.0 ADDITIONAL INFORMATION/PRECAUTIONS /

10.0 DOT CLASS: 55 NOT REGULATED

KEEP OUT OF REACH OF CHILDREN

Material Safety Data Sheet

ELECTRON

Environmentally Preferred Dielectric Solvent

Rev: 06/06/2007

Section I: Product Identification

Product name: ELECTRON
Synonym: Proprietary Blend
Molecular Formula: Proprietary Blend

The “Plain English” Section

Material Safety Data Sheets can be confusing. Federal law requires us to print a great deal of technical information, which probably won’t help the non-scientist. ECOLINK includes this “PLAIN ENGLISH” section, written to address the questions and concerns of the average person. If you have additional health, safety or product questions, don’t hesitate to call us at 1-800-886-5240.

Health Hazards: ELECTRON is a non-halogenated industrial chemical. We call it “environmentally preferred” because it is intended to replace products that are more hazardous, (1,1,1-trichloroethane, mineral spirits, MEK, etc.). This does not mean that ELECTRON is completely harmless. It is strong enough to remove tough industrial soils, so it can irritate your skin. We suggest you wear gloves, and avoid extended exposure to unprotected skin. Don’t get it in your eyes, or breath large amounts of the vapor, (it will dry out your nasal passages). Used on a rag or from a spray bottle, the product won’t produce fumes in any great quantity, (don’t spray ELECTRON under high pressure without adequate ventilation). For more exposure and first aid information, refer to MSDS Sections II, VI.

Flashpoint: ELECTRON’s flashpoint is 147°F. This represents the temperature that the liquid must reach before it emits fumes that will ignite. This is pretty hot, so combustion in ordinary use isn’t a big concern. If ELECTRON is used on rags, the rags can ignite if exposed to an open flame because the solvent is "wicked" onto the cloth. Be sure to dispose of rags in an airtight container specifically designed to prevent spontaneous combustion. Do not use ELECTRON or any other combustible solvent around welding or any other hot work area.

Disposal: Straight from the drum, ELECTRON is not considered a hazardous waste product. Once it is contaminated with whatever you are cleaning, the resulting mixture may fall under a hazardous classification, depending on whether or not the material you are cleaning is hazardous. If you aren’t sure how to dispose of used ELECTRON, give us a call and we will help you make the right decisions.

Section II: Chemical or Hazardous Components

Chemical Name: Citrus Terpene
CAS No.: 68547-72-3
Approx. wt. %: >10%
Exposure: (*T.L.V. – 100 ppm

Chemical Name: Severely Hydrodistilled Light Distillates
CAS No.: 64742-47-8
Approx. wt. %: >75%
Exposure: (*P.E.L. – 100 ppm

(*) Manufacturer’s recommended exposure limits.

ALL MATERIALS IN PRODUCT ARE TSCA LISTED

RCRA REGULATED: No
CERCLA (superfund): Not Applicable
DOT regulated: No
DOT haz. class: Not applicable
DOT Shipping Name: Not applicable
DOT number: Not Applicable

(Questions concerning DOT information refer to DOT manual CFR 49, chapter 1, 1996 edition)

Section III: Physical Data

Appearance & Odor: Colorless liquid with mild citrus terpene odor

Boiling Point: 349°F @ 760 mmHg

Evaporation Rate: <1.0

Percent Volatile: 100%

Solubility In Water: Negligible

Specific Gravity: 0.9112

VOC Content: 810 g/mL

Vapor Density (Air=1): 122 g/m³ less exempt compounds

Vapor Pressure: 0.30 mmHg @ 68°F
Section IV: Fire and Explosion Hazard Data

Flash Point (Method):
- Bulk Liquid (TCC) 147°F

Flammable Limits:
- LEL 0.7%
- UEL 7.0%

Extinguishing Media:
- Regular foam, water fog, carbon dioxide, dry chemical, Class B

Special Fire Fighting Procedures:
- Keep fire exposed containers cool with water. Fire fighters should wear self-contained breathing apparatus with a full face piece operated in the positive pressure demand mode with appropriate gear and chemical resistant personal protective equipment.

Unusual Fire & Explosion Hazards:
- Vapors are heavier than air and may travel along the ground or be moved by ventilation and ignited by heat, pilot lights, other flames and ignition sources at locations distant from material handling point. Never use welding or cutting torch on or near drum (even empty) because product can ignite explosively.

Section V: Reactivity Data

Stability: Stable

Conditions to Avoid:
- Sources of ignition such as sparks, hot spots, welding, flames and cigarettes. Ignition/flash may result if concentration of product is in the flammable range. (See section IV for LEL and UEL values.)

Incompatibility (Materials to Avoid):
- Strong oxidizing agents and/or strong acids

Hazardous Decomposition:
- May form carbon dioxide and carbon monoxide.

Hazardous Polymerization:
- Will not occur

Section VI: Health Hazard Data

Primary Routes of Exposure:
- Oral, Inhalation, & Skin

Ingestion:
- Swallowing large amounts may be harmful by causing gastrointestinal irritation.

Inhalation:
- Breathing large amounts may be harmful by causing nose, throat, and respiratory tract irritation.

Eyes:
- Irritant. Liquid contact will irritate eyes and may cause stinging, tearing, and redness.

Skin or Contact:
- May cause mild irritation of redness and burning.

First Aid:

Ingestion:
- Seek medical attention immediately. If individual is drowsy or unconscious, do not give anything by mouth, place individual on left side with head down.
- Contact medical facility or poison Control center for advice on whether to induce vomiting.

Inhalation:
- Remove to fresh air. If breathing is difficult, give oxygen. Keep person warm and quiet. Seek medical attention.

Eyes:
- Irrigate immediately with water for at least 15 minutes. Get medical attention if irritation persists.

Skin:
- Wash with soap and water. Thoroughly clean contaminated clothes and shoes before re-use. If symptoms persist, seek medical attention.

Toxicity Data:

Acute Toxicity:
- Oral Toxicity (mice) – LD₅₀ 5.6 - 6.6 g/kg

Skin Toxicity:
- Absorption (rabbits) – LD₅₀ >5000 mg/kg

Carcinogen:
- NTP – Not Listed
- IARC Monographs – None
- OSHA REGS – Not Regulated

Section VII: Precautions for Safe Handling

HMIS Information:
- Health – 1 / Reactivity – 0
- Flammability – 2 / Personal Protection – B

HMIS Definition:
- 0 – Minimal, 1 – Slight, 2 – Moderate, 3 – Serious, 4 – Extreme
- "*" in the Health Category denotes material does not target any major organs.
- "**" in the Health Category denotes material may target certain organs.

Eye Protection:
- Safety glasses and splash protection required.

Protective Gloves:
- Nitrile gloves.

Respiratory Protection:
- Not required under conditions of normal use. If vapor mist is present, use NIOSH certified organic vapor mask.

Ventilation:
- Local exhaust hood or fan may be used.

Other Protective Clothing:
- None required under normal use.

Work Practices:
- Store bags used with this material in an airtight, metal container to prevent spontaneous combustion. Treat this chemical with respect and follow all MSDS instructions.
Section VIII: Control Measures

Small Spill: Absorb liquid on vermiculite, floor absorbent, or other absorbent material and transfer to hood.

Large Spill: Eliminate all ignition sources, (flares, flames including pilot lights, electrical sparks). Persons not wearing protective equipment should be excluded from area of spill until clean-up has been completed. Stop spill at source. Prevent from entering drains, sewers, streams, etc. If runoff occurs, notify authorities as required. Pump or vacuum transfer spilled product to clean containers for recovery. Transfer contaminated, absorbent soil and other materials to containers for disposal.

Waste Disposal Method: ELECTRON is to be disposed of according to local, state, and federal regulations. Please call us if you need additional disposal information.

Precautions To Be Taken In Handling & Storing: Since empty containers contain product residues, all hazard precautions given in the material safety data sheet must be observed. All metal pails or drums should be grounded and/or bonded when material is transferred. Any use of this product in elevated temperature processes should be thoroughly evaluated to establish and maintain safe operating conditions. Sudden release of hot organic chemical vapors or mists from process equipment operating at elevated temperatures may result in ignition.

Other Precautions: Keep this and all chemicals out of the reach of children.

Physical/Chemical Characteristics

=================================================================

Appearance And Odor: CLEAR WITH MILD CITRUS ODOR.
Boiling Point: 310F, 154C
Vapor Pressure (MM Hg/70 F): <10MMHG
Vapor Density (Air-1): >4
Specific Gravity: 0.77
Evaporation Rate And Ref: 0.3 (n-BUTYL ACETATE=1)
Solubility In Water: NOT WATER SOLUBLE
Percent Volatiles By Volume: 100
-----------------------------------------------------------------------------------------------------------------------------------
Fire and Explosion Hazard Data
-----------------------------------------------------------------------------------------------------------------------------------
Flash Point: 112F. 44C
Flash Point Method: PMCC
Lower Explosive Limit: 0.6
Upper Explosive Limit: 7
Extinguishing Media: FOAM, WATER SPRAY, DRY CHEMICAL, CARBON DIOXIDE.
Special Fire Fighting Proc: USE AIR SUPPLIED BREATHING EQUIPMENT FOR ENCLOSED AND CONFINED SPACES OR AS OTHERWISE NEEDED.
Unusual Fire And ExpI Hazards: NONE KNOWN.
-----------------------------------------------------------------------------------------------------------------------------------
Reactivity Data
-----------------------------------------------------------------------------------------------------------------------------------
Stability: YES
Cond To Avoid (Stability): NONE SPECIFIED BY MANUFACTURER.
Materials To Avoid: AVOID CONTACT WITH STRONG ACIDS AND STRONG OXIDIZING AGENTS.
Hazardous Decomp Products: OXIDES OF CARBON AND HYDROCARBONS.
Hazardous Poly Occur: NO
Conditions To Avoid (Poly): NONE
-----------------------------------------------------------------------------------------------------------------------------------
Health Hazard Data
-----------------------------------------------------------------------------------------------------------------------------------
LD50-IC50 Mixture: ORAL LD50 (RAT) IS UNKNOWN
Route Of Entry - Inhalation: YES
Route Of Entry - Skin: YES
Route Of Entry - Ingestion: NO
Health Haz Acute And Chronic: ACUTE PRODUCT CONTACTING THE EYE MAY CAUSE EYE IRRITATION. LOW ORDER ACUTE ORAL AND DERMAL TOXICITY. CHRONIC PROLONGED OR REPEATED SKIN EXPOSURE CAN LEAD TO MILD IRRITATION, DEFATTING AND DERMATITIS.
Carcinogenicity - NTP: NO
Carcinogenicity - IARC: NO
Carcinogenicity - OSHA: NO
Explanation Carcinogenicity: NONE KNOWN.
Signs/Symptoms Of Overexp: NONE SPECIFIED BY MANUFACTURER.
Med Cond Aggravated By Exp: SKIN CONTACT MAY AGGRAVE EXISTING DERMATITIS.
Emergency/First Aid Proc: EYES - IF EYE CONTACT OCCURS, FLUSH WITH WATER FOR AT LEAST 15 MIN OR UNTIL IRRITATION SUBSIDES. IF IRRITATION PERSISTS, CALL DOCTOR. SKIN - IN CASE OF SKIN CONTACT, REMOVE ANY CONTAMINATED CLOTHING & WASH SKIN THOROUGHLY WITH SOAP & WATER. INHALATION - IF OVERCOME BY VAPOR, REMOVE FROM EXPOSED AREA & CALL PHYSICIAN IMMEDIATELY. INGESTION - DO NOT INDECE VOMITING. CALL PHYSICIAN IMMEDIATELY.
-----------------------------------------------------------------------------------------------------------------------------------
Precautions for Safe Handling and Use
-----------------------------------------------------------------------------------------------------------------------------------
Steps If Mat Released/Spill: SHUT OFF AND ELIMINATE ALL IGNITABLE SOURCES. CONTAIN AND COLLECT MATERIAL. ABSORB RESIDUE.
Neutralizing Agent: NONE SPECIFIED BY MANUFACTURER.
Waste Disposal Method: CONTACT FEDERAL, STATE, COUNTRY OR LOCAL ENVIRONMENTAL REGULATORY AGENCIES FOR GUIDANCE.
Precautions-Handling/Storing: USE AND STORE AWAY FROM HEAT, SPARKS AND OPEN FLAMES. KEEP CONTAINER SEALED WHEN NOT IN USE.
Other Precautions: READ AND UNDERSTAND ALL CAUTIONS, LABELS AND MSDS BEFORE USING ANY CHEMICAL PRODUCT.

Control Measures

Respiratory Protection: NONE NORMALLY REQUIRED.
Ventilation: USE MECHANICAL VENTILATION WHENEVER PRODUCT IS USED IN CONFINED SPACE, IS HEATED ABOVE AMBIENT TEMPERATURE OR IS AGITATE.
Protective Gloves: USE CHEMICAL RESISTANT GLOVES, IF NEEDED.
Eye Protection: SPLASH GOGGLES/FACE SHIELD.
Other Protective Equipment: NONE NORMALLY REQUIRED.

Work Hygienic Practices: MINIMIZE BREATHING OF VAPOR OR MIST. AVOID PROLONGED OR REPEATED CONTACT SKIN.

Suppl. Safety & Health Data: WASH CONTAMINATED CLOTHING BEFORE RESUE. KEEP ALL CHEMICALS OUT OF THE REACH OF CHILDREN.

Kleen All Plus Material Safety Data Sheet

IDENTITY: #141, Truck, Bus, and Aircraft Wash

PRODUCT DESCRIPTION AND PURPOSE: A concentrated blend of mild alkaline detergents and
synthetic wetting agents to effectively clean vehicle surfaces. Requires minimum agitation of the surface and is
free rinsing. Can be used manually or mechanically. Use on houses, motor homes, trucks, trailers, helicopters,
planes, military vehicles, etc.

SECTION VI - Health Hazard Data
Route(s) of entry Inhalation? No Skin? Moderate Ingestion? Yes
Health Hazards (Acute and Chronic): Eye contact – May irritate and/or cause corneal damage. Ingestion – may damage throat and/or respiratory tract.
Carcinogenicity: NTP? No (ARC Monographs)? No OSHA Regulated? No
Medical Conditions Generally Aggravated by Exposure: None recognized
Emergency and First Aid Procedures: Flush eyes and skin with water. If irritation of eyes, persists, see physician. Ingestion – get immediate medical attention. Do NOT induce vomiting.

SECTION VII - Precautions for Safe Handling and Use
Steps to Be Taken In Case Material is Released or Spilled: Flush spill with water. Pick up with inert material.
Waste Disposal Method: According to federal, state and local authorities only
Precautions For Storing and Handling: Keep from freezing.
Other Precautions: None

SECTION VIII - Control Measures
Respiratory Protection (Specify Type): Should not be required
Ventilation Local Exhaust: Special: Mechanical: Other:
Protective Gloves: Impermeable
Eye Protection: Goggles if splashing may occur
Other Protective Clothing or Equipment: Eye wash should be accessible
Work Hygienic Practices: Wash thoroughly after handling

PRODUCT NAME: AGRI-SOL™
CHEMICAL NAME: Not applicable
CHEMICAL FAMILY: Methyl Ester Soybean Oil/Surfactant blend
FORMULA: Deodorizing, degreasing cleaning concentrate

SECtiON 2 - HaZaRDOuS iNgREDiEnTS

PRINCIPAL HAZARDOUS COMPONENT(S)  CAS NO.  % BY WT.  THRESHOLD LIMIT VALUE
1) Methyl Ester Soybean Oil  67784-80-9  >90  Not established

This product does not contain a toxic chemical subject to the reporting requirements of Section 313 of the Emergency Planning and Community Right-To-Know Act of 1986 (40CFR372).

SECtiON 3 - PHYSICAL & CHEMICAL CHARACTERISTICS (FIRE & EXPLOSION DATA)

BOILING POINT: 300°F - 320°F  SPECIFIC GRAVITY (H₂O=1) = 0.885
VAPOR PRESSURE (mm Hg): 1.6
PERCENT VOLATILE BY VOLUME (%): Nil
VAPOR DENSITY (Air = 1): Not established
EVAPORATION RATE (EUAC=1): Slower
SOLUBILITY IN WATER: Emulsifiable  REACTIVITY IN WATER: None
APPEARANCE AND ODOR: Amber liquid with slight sweet odor.
pH CONCENTRATE: Not applicable
FLASH POINT: >250°F
FLAMMABLE LIMITS IN AIR % BY VOLUME: Lower: Not established  Upper: Not established
EXTINGUISHER MEDIA: CO₂, foam, dry chemical, water spray.
AUTO-IGNITION TEMPERATURE: Not established
SPECIAL FIRE FIGHTING PROCEDURES: Wear self-contained breathing apparatus. Handle as oil fire. Use water spray to cool fire exposed surfaces to prevent pressure build up.
UNUSUAL FIRE & EXPLOSION HAZARDS: Spills may be slippery. Closed containers may rupture due to build up of pressure when exposed to extreme heat.
PRODUCT NAME: **AGRI-SOL™**

SECTION 4 - PHYSICAL HAZARDS

STABILITY: UNSTABLE ☑  
STABLE ☐

CONDITIONS TO AVOID: Excessive heat, spark, or open flame.

INCOMPATIBILITY (materials to avoid): Strong oxidizing agents, acids.

HAZARDOUS DECOMPOSITION PRODUCTS: CO, CO₂, irritating smoke.

HAZARDOUS POLYMERIZATION: MAY OCCUR ☐  WILL NOT OCCUR ☑

SECTION 5 - HEALTH HAZARDS

THRESHOLD LIMIT VALUE: Not established

PRIMARY ROUTE OF ENTRY: EYE ☑  DERMAL ☑  INHALATION ☐  INGESTION ☑

SIGNS AND SYMPTOMS OF EXPOSURE:

1. Acute Overexposure: Harmful if swallowed. Ingestion may cause vomiting, headache, and other medical problems. May be irritating to eyes. Skin contact may cause slight redness. Contains a potential skin sensitizers. Eye contact can cause moderate to high irritation. Inhalation can cause nose, throat, and respiratory tract irritation, coughing, and headache.

2. Chronic Overexposure: Prolonged or repeated exposure can cause drying, defecating, and dermatitis of skin.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: Dermatitis

CHEMICAL LISTED AS CARCINOGEN OR POTENTIAL CARCINOGEN:

1. National Toxicology Program: Yes ☑  No ☐
2. I.A.R.C. Monographs: Yes ☑  No ☐
3. OSHA: Yes ☑  No ☐

OSHA PERMISSIBLE EXPOSURE LIMIT: Not established

ACGIH THRESHOLD LIMIT VALUE: Not established

OTHER EXPOSURE LIMIT USED: None

EMERGENCY AND FIRST AID PROCEDURES:

1. INHALATION: Remove to fresh air. If breathing is difficult, get medical attention.
2. EYES: Flush with water for 15 minutes. If irritation persists, get medical attention.
3. SKIN: Wash with soap and water. If irritation persists, get medical attention.
4. INGESTION: Do not induce vomiting. Rinse mouth and drink one glass of water. Consult a physician.

SECTION 6 - SPECIAL PROTECTION INFORMATION

RESPIRATORY PROTECTION: Not normally required.

VENTILATION

LOCAL EXHAUST: Adequate  MECHANICAL (GENERAL): Recommended if necessary.

SPECIAL: None  OTHER: None

PROTECTIVE GLOVES: Chemically resistant gloves  EYE PROTECTION: Safety goggles

OTHER PROTECTIVE CLOTHING OR EQUIPMENT: Not usually needed.

PRODUCT NAME: **AGRI-SOL™**

SECTION 7 - SPECIAL PRECAUTIONS AND SPILL/LEAK PROCEDURES

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Do not store in or near heat sources. Product may build slight pressure in storage. Open container slowly. Keep container closed when not in use.

OTHER PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN! Do not cut or weld empty container.

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED: Soak up on absorbent material.

WASTE DISPOSAL METHODS: Incinerate or dispose of in accordance with local, state, and federal regulations.

HEALTH HAZARD INFORMATION FOR PRODUCT

EMERGENCY and FIRST AID PROCEDURES

Inhalation: Move to fresh air. Get medical attention if respiratory irritation occurs.

Ingestion: Drink large quantities of water. Get medical attention. Do not induce vomiting.

Eyes: Rinse with plenty of water for 15 minutes. If irritation persists, get medical attention.

Skin: Rinse with water.

EFFECTS OF OVEREXPOSURE (Acute and Chronic)

Inhalation: High concentrations may cause headache, drowsiness, irritation of respiratory tract.

Ingestion: Causes G.I. irritation with vomiting and diarrhea. Aspiration of vomit causes serious pneumonitis. Glycol ether has a toxic effect on the red blood cells.

Eyes: Causes irritation. Avoid contact with eyes.

Skin: Avoid prolonged contact with skin. De-fatting action on skin can lead to irritation and infection.

PREVENTIVE MEASURES

Steps to be taken upon release or spillage (including neutralizing):

- Treat as petroleum solvent. Prevent spills from entering sewers, watercourses or low areas. Contain spillage with sand or earth. Avoid using combustible material such as sawdust.

Waste disposal method:

- Treat as petroleum solvent. Consult an expert on disposal of recovered material. Insure compliance with government and local regulations.

Handling and Storage Requirements:

- Keep container closed. Store in cool, well ventilated area away from incompatibles.
- Material will accumulate static charges, which may cause a spark. Use proper grounding procedure.

Ventilation Requirements (Local or General):

- Use in ventilated area. Local exhaust ventilation is recommended.

Respiratory Protection:

- Where exposure limits may be exceeded, approved respirator may be necessary to prevent overexposure by inhalation.

Eye Protection:

- Chemical Workers goggles.

Other Protection:

- Impervious rubber gloves, overalls and apron should be worn.

3. HAZARDS IDENTIFICATION

SYMPTOMS/EFFECTS OF OVEREXPOSURE

Inhalation: May cause irritation of the upper respiratory passages.
Ingestion: May cause irritation of the mouth, throat, and gastrointestinal tract with nonspecific discomfort such as nausea, headache, diarrhea, thirst, and weakness.
Skin: May cause skin irritation or rash. Repeated contact may cause progressive dermatitis.
Eyes: Liquid or vapor contact may cause eye irritation with tearing or blurring of vision.
Listed Carcinogens: None

4. FIRST AID MEASURES

Inhalation: Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Consult a physician.
Ingestion: Do not induce vomiting. Immediately give two glasses of water; seek medical attention.
Skin: Remove contaminated clothing. Thoroughly wash affected area with soap and water; use skin cream if irritation is severe.
Eyes: Immediately flush eyes with water for 15 minutes. Call a physician if irritation persists.

5. FIRE FIGHTING MEASURES

Extinguishing Media: Chemical foam, dry chemical, carbon dioxide. Class BC, ABC fire extinguisher.
Special Fire Fighting Procedures: Self-contained positive pressure breathing apparatus and protective clothing should be worn in fighting fires involving chemicals.
Unusual Fire and Explosions Hazards: None known

6. ACCIDENTAL RELEASE MEASURES

Absorb spill with inert material, then place in chemical waste container. For large spills, dike for later disposal. Observe government regulations.

*Registered trademark of Petroferm Inc.
 AXAREL 32 8/5/04

7. HANDLING AND STORAGE
Store in original container, preferably in a cool, ventilated, fire-resistant building. Avoid overheating or freezing. Since empty containers may retain product residues (vapor, liquid, or solid) all label precautions must be observed.

8. EXPOSURE CONTROLS - PERSONAL PROTECTION
Respiratory: Use NIOSH/MSHA approved respirator if ventilation is not sufficient and if mists are generated.
Ventilation: If desirable to reduce odor, mechanical (general) ventilation should have an airflow of 55 CFM or greater. Local exhaust can also be effective in minimizing odor.
Clothing/Glove: Chemically resistant gloves should be used with all industrial chemicals.
Eye Protection: Safety glasses/goggles are recommended. Provide eye bath near work site.

9. PHYSICAL AND CHEMICAL PROPERTIES
Boiling Point (760 mm Hg): 430°F-503°F (221°C-295°C)
% Volatile (By Weight): Not determined.
Specific Gravity (H2O = 1): 0.85 @ 77°F (25°C)
Vapor Pressure (20°C): < 0.1 mm Hg
Vapor Density (Air = 1): 6.7
Evaporation Rate (SIAC = 1): < 0.1
Solubility in Water: < 0.1% by weight
Appearance and Odor: Colorless to light yellow liquid with a mild hydrocarbon odor.
Flammable Limits: Not determined (% By Volume in Air)
Flash Point: 205°F (96°C) (ASTM D93-85, Fensky-Martens Closed Cup)

10. STABILITY AND REACTIVITY
Stability: AXAREL 32 is stable.
Conditions to Avoid: Temperatures above 430°F (221°C). Keep away from heat, sparks, and open flames.
Incompatibility: Strong oxidizing agents, strong acids, strong bases.
Hazardous Decomposition Products: None, other than normal products of combustion.
Hazardous Polymerization: Will not occur.

11. TOXICOLOGICAL INFORMATION
Diisobutyl dibasic acid esters
LD50/oral/rat = 16,425 mg/kg
LC50/inhalation/4 hrs/rat = > 31.9 mg/L

12. ECOLOGICAL INFORMATION
Alkyl oxide polyethylene oxyethanol
96 hour LC50 in fathead minnows: 3.1 - 3.8 mg/L
48 hour LC50 in daphnia magna: 1.5 - 1.7 mg/L
Diisobutyl dibasic acid esters
96 hour LC50 in fathead minnows: 18 - 24 mg/L
48 hour LC50 in daphnia magna: 112 - 150 mg/L
13. DISPOSAL CONSIDERATIONS
Waste treat or incinerate used material in compliance with all applicable government regulations.

14. TRANSPORT INFORMATION
Non-Regulated.

15. REGULATORY INFORMATION
None of the components of AXAREL 32 is listed in the Threshold Limit Values and Biological Exposure Indices compiled by the American Conference of Governmental Industrial Hygienists.

None of the components of this product appear on any of the EPA’s lists of toxic or hazardous substances, or on the SARA 313 toxic chemicals list (40 CFR 372.65).

This product contains a secondary alcohol ethoxylate which contains traces of dioxane, ethylene oxide, formaldehyde, and acetaldehyde which are listed in California’s Safe Drinking Water and Toxic Enforcement Act of 1986 – Proposition 65 as chemicals known to cause cancer, birth defects, or other reproductive harm.

All components of this product are listed on the TSCA inventory.

Canadian WHMIS Classification: This is not a controlled product.

None of the components of this product are specifically regulated or proposed for regulation under the Federal Clean Water Act including the EPA list of 129 priority water pollutants or the EPA list of total toxic organic (TT0) (40 CFR 413.02).

   The full text for all R-Phrases are displayed in Section 16.

3. **HAZARDS IDENTIFICATION**

   **R10 Flammable.** R20 Harmful by inhalation. **R65** Harmful: may cause lung damage if swallowed. **R36/37/38** Irritating to eyes, respiratory system and skin. **R51/53** Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

4. **FIRST AID MEASURES**

   **INHALATION:** Move the exposed person to fresh air at once. Keep the affected person warm and at rest. Get prompt medical attention. For breathing difficulties oxygen may be necessary.

   **INGESTION:** Remove victim immediately from source of exposure. Rinse mouth thoroughly. DO NOT induce vomiting. Get medical attention immediately. If vomiting occurs, keep head low so that stomach content doesn’t get into the trachea.

   **SKIN:** Remove affected person from source of contamination. Wash the skin immediately with soap and water. Get medical attention if any discomfort continues.

   **EYES:** Promptly wash eyes with plenty of water while lifting the eye lids. Continue to rinse for at least 15 minutes. Get medical attention if any discomfort continues.

5. **FIRE FIGHTING MEASURES**

   **EXTINGUISHING MEDIA:** Use. Dry chemicals, sand, dioxide etc. Water spray. fog or mist. Carbon dioxide (CO2).

   **SPECIAL FIRE FIGHTING PROCEDURES:** Move container from fire area if it can be done without risk. Use water to keep fire exposed containers cool and disperse vapours.

6. **ACCIDENTAL RELEASE MEASURES**

   **SPILL CLEAN UP METHODS:** Extinguish all ignition sources. Avoid sparks, flames, heat and smoking. Ventilate. Stop leak if possible without risk. Ventilate well. Wear necessary protective equipment. Absorb in vermiculite, dry sand or earth and place into containers.

7. **HANDLING AND STORAGE**

   **USAGE PRECAUTIONS:** Keep away from heat, sparks and open flame. Avoid spilling, skin and eye contact. Ventilate well, avoid breathing vapours. Use approved respirator if air contamination is above accepted level. Static electricity and formation of sparks must be prevented.

   **STORAGE PRECAUTIONS:** Flammable/combustible - Keep away from oxidisers, heat and flames. Keep containers tightly closed.

   **USAGE DESCRIPTION:** Flammable liquid storage.

### 10. STABILITY AND REACTIVITY

**STABILITY:** Stable under normal temperature conditions.

**CONDITIONS TO AVOID:** Avoid heat, flames and other sources of ignition.

**HAZARDOUS COMPOSITION PRODUCTS:** Fire createres, Toxic gases/vapours/irritants of, Carbon monoxide (CO), Carbon dioxide (CO2).

### 11. TOXICOLOGY INFORMATION

**INHALATION:** Vapour from this chemical can be hazardous when inhaled.

**INGESTION:** Harmful: may cause lung damage if swallowed.

**SKIN CONTACT:** Prolonged or repeated exposure may cause severe irritation. Acts as a defatting agent on skin. May cause cracking of skin, and eczema.

**EYE CONTACT:** Repeated exposure may cause chronic eye irritation.

### 12. ECOLOGICAL INFORMATION

**ECOTOXICITY:** Toxic to aquatic organisms., May cause long term adverse effects in the aquatic environment.

### 13. DISPOSAL CONSIDERATIONS

**DISPOSABLE METHODS:** Dispose of waste and residues in accordance with local authority requirements.

### 14. TRANSPORT INFORMATION

**UN No ROAD:** 1268
SAFETY DATA SHEET

F084  TAR N GLUE

15. REGULATORY INFORMATION

LABEL FOR SUPPLY:

RISK PHRASES:
R10 Flammable, R20 Harmful by inhalation. R36/37/38 Irritating to eyes, respiratory system and skin.
R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
R65 Harmful: may cause lung damage if swallowed.

SAFETY PHRASES:
S2 Keep out of the reach of children. S26 In case of contact with eyes, rinse immediately with plenty of
water and seek medical advice. S31/32 Wear suitable gloves and eye/face protection. S40 If swallowed,
seek medical advice immediately and show this container or label. S51 Use only in well-ventilated areas.

STATUTORY INSTRUMENTS:
Chemicals (Hazard Information and Packaging) Regulations.

APPROVED CODE OF PRACTICE:
Safety Data Sheets for Substances and Preparations. Classification and Labelling of Substances and
Preparations Dangerous for Supply.

GUIDANCE NOTES:
Workplace Exposure Limits E146. CHIP for everyone H500.

16. OTHER INFORMATION

USER NOTES: The following risk phrases relate to the raw materials in the product and not the product itself:

*CONTAINS 2.4% INDIUM WEIGHT SUBJECT TO THE REPORTING REQUIREMENTS OF SARA 313 AND 317 CFR 261.

SECTION 3: EMERGENCY AND FIRST-AID PROCEDURES
FIRST AID: If this product comes in contact with eyes, rinse eyes with large quantities of water for at least 15 minutes. If irritation persists, seek immediate medical attention.
FIRST AID: If this product comes in contact with skin, flush skin with water for at least 15 minutes. If irritation persists, seek immediate medical attention.
FIRST AID: If swallowed, give 1-2 glasses of water. If more than 1 liter swallowed, seek immediate medical attention.

SECTION 4: HEALTH HAZARDS & ROUTES OF ENTRY
HEALTH HAZARDS: This material contains large amounts of organic solvents and may cause skin irritation and sensitization. Ingestion of low concentrations of this material may cause vomiting, nausea, and stomach pain. Ingestion of large quantities of this material may cause death.

SECTION 5: SPECIAL PROTECTION INFORMATION
VENTILATION: If necessary conditions are not met for reducing exposure, additional ventilators or extract systems may be required. Whole-body exposure may be present, so wear appropriate protective equipment.
RESPIRATORY PROTECTION: Eye protection must be used to protect against possible eye contact, irritation, or injury.
PROTECTIVE GLOVES: Use protective equipment to prevent skin contact and possible irritation. Wear resistant gloves, such as nitrile or neoprene.
OTHER PROTECTIVE EQUIPMENT: Keep all exposed areas free from the material. Use standard recommendations for the amount of protection needed.

SECTION 6: REACTIVITY DATA
STABILITY: This material is stable under normal conditions of storage and handling.
INCOMPATIBILITY (MATERIALS TO AVOID): This material is incompatible with strong oxidizing agents.
Hazardous decomposition products: The material may produce toxic gases and vapors when exposed to heat, oxygen, or water.

SECTION 7: SPILL OR LEAK PROCEDURES
PRECAUTIONS IN CASE OF SPILL: Keep container tightly closed. Keep container cool, dry, and away from sources of ignition. Do not leave exposed to heat, oxygen, or water. If spill occurs, avoid breathing the fumes. Avoid breathing the fumes. Avoid breathing the fumes. Avoid breathing the fumes.

SECTION 8: STORAGE, SHIPPING, & REGULATORY INFORMATION
STORAGE: Keep container tightly closed. Keep container cool, dry, and away from sources of ignition. Do not store this product with incompatible materials. Do not expose to heat, oxygen, or water. If spill occurs, avoid breathing the fumes. Avoid breathing the fumes. Avoid breathing the fumes.

SECTION 9: FIRE AND EXPLOSION HAZARD
PLACARD (DOT METHOD): 4.1F, 4.2, 5+9, 9, COC
FLASH POINT (CLOSED CUP): -30 F, 1.0 F
FLASH POINT (OPEN CUP): -30 F, 1.0 F
FLAMMABLE LIMITS IN AIR: 0.1% UPPER:MELTING POINT: 200 F
LOWER: 1.2% MELTING POINT: -40 F
VAPOR PRESSURE: Nil
APPEARANCE & ODOR: Green, mild characteristic
Vapor density: 1.2

DECLARATION OF EXPRESS OR IMPLIED WARRANTIES: No express or implied warranties are made for this product. This product is not suitable for use in household or industrial applications. This product is not suitable for use in household or industrial applications. This product is not suitable for use in household or industrial applications.

Issue Date: September, 2006
SOYsolV®

MATERIAL SAFETY DATA SHEET

SECTION 1 MATERIAL IDENTIFICATION

Material Trade Name: OLEOCAL ME-130  
Synonyms: METHYL SOYATE  
Chemical Family/Formula: METHYL ESTER OF SOYA OIL

Emergency Phone #: 800-231-4274  
Revised 3/24/00

SECTION 2 INGREDIENTS

Chemical Name: MIXED FATTY ACID METHYL ESTERS  
CAS NO: 67784-80-9

62.4% Linoleic  22.5% Oleic  9.5% Palmitic  3.2% Linolenic
3.0% Stearic  0.3% Palmitoleic  0.1% Eruc

SECTION 3 PHYSICAL DATA

Boiling Point, 760 mm Hg: >420°F  
Specific Gravity (H₂O=1): 0.88  
Vapor Pressure, mm Hg: <1  
Appearance and Odor: yellow liquid, mild fatty odor

Volatiles, % by Volume: <2%  
Solubility in H₂O, % by Volume: insoluble  
Evaporation Rate, Butyl Acetate=1: 0.0098

SECTION 4 FIRE & EXPLOSION DATA

Flash Point (Method Used): >300°F (COC)  
LEL: N/A  
UEL: N/A

Extinguishing Media: Dry chemical, foam, halon CO₂, water spray (fog). Water stream may splash burning liquid and spread fire.

Special Fire Fighting Procedures: Use water spray to cool drums exposed to fire.

Unusual Fire and Explosion Hazards: Firefighters should use self-contained breathing apparatus to avoid exposure to smoke and vapors.

SECTION 5 REACTIVITY DATA

Stability: Stable  
Hazardous Polymerization: Will not occur.

Conditions and Materials to Avoid: Strong oxidizing agents

Hazardous Decomposition Products: combustion produces carbon monoxide, carbon dioxide with thick smoke.

SECTION 6 OCCUPATIONAL EXPOSURE LIMITS

No TLV has been set for this product. As with all industrial materials, exposure of this product to the skin and eyes should be avoided.
SECTION 7 HEALTH INFORMATION

**Inhalation** hazard is negligible unless heated to produce vapors or as a mist. Vapors or finely misted materials may irritate the mucous membranes and cause irritation, dizziness and nausea. Remove to fresh air.

**Eye contact** may cause irritation. Irrigate eye with water for at least 15 to 20 minutes. Seek medical attention if symptoms persist.

Prolonged or repeated contact with the skin is not likely to cause significant skin irritation. Material is sometimes encountered at elevated temperatures. Thermal burns are possible.

No hazards anticipated from ingestion incidental to industrial exposure.

SECTION 8 EMERGENCY & FIRST AID PROCEDURES

Eyes: Irrigate eyes with water for at least 15 to 20 minutes.

Skin: Wash exposed areas of the body with soap and water.

**Inhalation**: Remove from area of exposure; seek medical attention if symptoms persist.

**Ingestion**: Give one or two glasses of water to drink. If gastro-intestinal symptoms develop, consult medical personnel. (Never give anything by mouth to an unconscious person.)

SECTION 9 EMPLOYEE PROTECTION

Respiratory Protection: If vapors or mists are generated, wear a NIOSH approved organic vapor/mist respirator.

Protective Clothing: Safety glasses, goggles or face shield recommended to protect eyes from mists or splashing. PVC coated gloves recommended to prevent skin contact.

Other Protective Measures: Employees must practice good personal hygiene, washing exposed areas of the skin several times daily and launder contaminated clothing before re-use.

SECTION 10 ENVIRONMENTAL PROTECTION

Spill Cleanup Procedures: Remove sources of ignition, contain spill to smallest area possible. Stop leak if possible. Pick up small spills with absorbent materials such as paper towels, "Oil Dry", sand or dirt. Recover large spills for salvage or disposal. Wash hard surfaces with safety solvent or detergent to remove remaining oil film. Greasy nature will result in a slippery surface.

Waste Disposal: Waste may be disposed of by a licensed waste disposal company. Contaminated absorbent materials may be disposed of in an approved land fill. Follow local, state and federal disposal regulations.

Environmental Hazards: None

SECTION 11 SPECIAL PRECAUTIONS

Store in closed containers between 50°F – 120°F.

Keep away from oxidizing agents, excessive heat and ignition sources.

Store and use in well ventilated areas.

Do not store or use near heat, sparks, or flame; store out of sun.

Do not puncture, drag, or slide this container.
Drum is not a pressure vessel; never use pressure to empty.

SECTION 12 TRANSPORTATION REQUIREMENTS

DOT Shipping Name: Fatty Acid Ester
DOT I.D. #: 144920
DOT Classification: Class 65
UN Hazard Class: N/A

SECTION 13 OTHER REGULATORY CONTROLS

OSHA STATUS:
This product is not hazardous under the criteria of the Federal OSHA Hazard communication Standard 29 CFR 1910.1200. However, thermal processing and decomposition fumes from this product may be hazardous as noted in Sections 2 and 7.

TSCA STATUS:
This product is listed on TSCA.

CERCLA: (Comprehensive Response compensation, and Liability Act)
NOT reportable.

SARA TITLE III (Superfund Amendments and Reauthorization Act)
Section 312 Extremely Hazardous Substances: None
Section 311/312 Hazard Categories: Non-hazardous Under Section 311/312
Section 313 Toxic chemicals: None

RCRA STATUS:
If discarded in its purchased form, this product would not be a hazardous waste either by listing or by characteristic. However, under RCRA, it is the responsibility of the product user to determine at the time of disposal, whether a material containing the product or derived from the product should be classified as a hazardous waste. (40 CFR 261.20-24)

CALIFORNIA PROPOSITION 65
The following statement is made in order to comply with the California Safe Drinking Water and Toxic Enforcement Act of 1986. The product contains no chemicals known to the State of California to cause cancer.

Emergency Phone #: 800-231-4274

SECTION 2 INGREDIENTS

Mixed Fatty Acid Methyl Esters CAS NO. 67784-50-9 Emulsifier CAS NO. 9016-45-9
This material is not known to contain any chemical listed as a carcinogen by OSHA, IARC or the National Toxicology Program (NTP) at a concentration greater than 0.1%.

SECTION 3 FIRE AND EXPLOSIVE HAZARDS

Flash Point °F: >300 Pensky-Martin closed cup
Flammable Limits: N/D
Extinguishing Media: Dry chemical, water spray, water fog, CO2, foam, or sand/earth
Special Firefighting Procedures: N/D
Unusual Fire & Explosive Hazards: N/D

SECTION 4 HEALTH HAZARD

Oral Toxicity: Slight throat irritation and respiratory discomfort
Eye Irritation: Slight irritation
Skin Irritation: Mild to moderate irritation
Chronic Effects of Overexposure: N/D
Acute Toxicological Properties: Mild to moderate irritation

SECTION 5 EMERGENCY FIRST AID PROCEDURES

Skin: Immediately flush with larger amounts of water for at least 15 minutes.
Eye: Immediately flush with larger amounts of water for at least 15 minutes.
Inhalation: Remove to fresh air. If breathing is difficult, give oxygen and call a physician.
Oral: If swallowed, call a physician.
Ventilation Procedure: Local, mechanical, special

SECTION 6 SPECIAL PROTECTION INFORMATION

Glove Protection: Rubber or plastic, solvent resistant
Eye Protection: Chemical safety goggles
Other Protection: Neoprene protective type apron
SECTION 7  PHYSICAL DATA

Vapor Pressure: 0.0 mm Hg  Determined by ASTM d-323 which is method approved by CA EPA
Vapor Density:  N/D
Specific Gravity: 0.88
Water Solubility: Emulsifies in water
% Volatile: 0%
pH: 5-7
Evaporation Rate: 0.0006
Odor: Fatty
Appearance: Amber liquid
Form: Liquid

SECTION 8  STABILITY

Stability: The product is stable under normal conditions.
Incompatibility: Keep away from strong oxidizers such as hydrogen peroxide, bromine, and chromic acid.
Polymerization: Not applicable.
Thermal Decomposition: Carbon monoxide and carbon dioxide from burning.

SECTION 9  SPILL OR LEAK PROCEDURES

Spill Procedure: Absorb with an inert material such as sand or vermiculite; sweep up and dispose in accordance with federal, state, and local regulations.
Waste Disposal: Dispose of in accordance with federal, state, and local regulations.

SECTION 10  SPECIAL PRECAUTIONS

Special Precautions: Precautions to be taken in handling and storage. Store between 40° - 120°F.

SECTION 11  TRANSPORTATION & LABELING

DOT Proper Shipping Name: Methyl Soyate, emulsified.
DOT Hazard Class: Not regulated.

SECTION 12  OTHER REGULATORY INFORMATION

Section 313 (Title III Superfund Amendment and Reauthorization Act)

THIS PRODUCT MEETS CALIFORNIA B.A.C.T. REQUIREMENTS OF 0.2 MM HG VAPOR PRESSURE.
SOYsolv® II Plus

MATERIAL SAFETY DATA SHEET

SECTION 1 MATERIAL IDENTIFICATION

Product Name: SOYsolv II Plus
Revision Date: 3/24/00
Chemical Name: Ethyl Hydroxy Propionate/ Fatty Acid Methyl Esters
DOT Classification: Compound Cleaning Liquid N.O.S. UN NA 1903

SOYsolv® 800-231-4274
6154 N OR 33 e-mail: sales@soysolv.com
Tiffin OH 44883 www.soysolv.com
Emergency Phone #: 800-231-4274

Formula: Blend

SECTION 2 HAZARDOUS INGREDIENTS

Chemical/Common Name | Percent | CAS NO. | Applicable PEL-OSHA | Exposure Limits TLV-ACGIH
--- | --- | --- | --- | ---
Ethyl Lactate | 10-90 | 97-64-3 | none | none
Methyl Soyate | 10-90 | 67784-80-9 | none | none

SECTION 3 HEALTH HAZARD DATA

Acute Health Effects:
Eyes: Risk of damage
Skin Contact: Not an irritant
Ingestion: None
Inhalation: Possible narcotic effects at excessive exposure

Chronic Health Effects: None known; not listed as a carcinogen

Routes of Entry: Most common – skin and inhalation

Medical Conditions Aggravated by Exposure: May cause eye/respiratory irritation with coughing

SECTION 4 FIRST AID MEASURES

Eyes: Immediately flush with water for at least 15 minutes. See a medical doctor immediately.
Skin: Rinse with water
Inhalation: Remove to fresh air. If discomfort occurs and persists, obtain medical attention.
Ingestion: Induce vomiting. See a doctor immediately.

SECTION 5 FIRE FIGHTING MEASURES

Extinguishing Media: Water, water fog, carbon dioxide (CO₂), dry chemical
Special Procedures: Wear NIOSH approved respirator
Degree of Fire and Explosion Hazard: Moderate. Rags soaked with any solvent can present a fire hazard and should be stored in certain conditions can lead to spontaneous combustion.
Hazardous Decom-Position Procedures: None. Decomposes to water and CO₂ when completely combusted.

SECTION 6 ACCIDENTAL RELEASE/SPILL MEASURES

Procedure for Release or Spill: Cover with large quantity of absorbent material (e.g. kitty litter) and collect in drums for disposal. Clean contaminated area with water and discharge to sewer.
SECTION 7  CHEMICAL AND PHYSICAL DATA

Melting Point: not applicable
Boiling Point: 202°F
Vapor Pressure (mmHg): 0.9 @ 68°F
Vapor Density (air=1): 4.1
Flash Point (method used): 150°F
Flammable limits @ 212°F:
L EL — no data
U EL — no data
Extinguishing Media: water, foam, CO₂
Special Fire Fighting Proc. to avoid: none
Special Fire Fighting Proc. to use: CO₂
Incompatibility (materials): not required
Partition coefficient: n-octanol/water – not applicable
Autoignition Temperature: no data
Explosive Properties: not applicable
Oxidizing Properties: not applicable
Odor Threshold: no data
Appearance and Odor: Clear colorless to light yellow, liquid, mild odor
pH of water dispersion: 6.9
Specific Gravity (H₂O=1): 0.946
Percent volatilization by volume (%): 55

SECTION 8  STABILITY AND REACTIVITY DATA

Stability: stable
Hazardous Polymerization: none known
Conditions to Avoid: none known
Materials to Avoid: strong oxidizing agents
Major Contaminants that Contribute to Instability: none
Incompatibility: none known
Hazardous Decomposition Products: none
Sensitivity to Static Discharge: none

SECTION 9  TOXICOLOGICAL INFORMATION

Eye Contact: irritant
Skin Contact: LD₅₀ (rats/24 hrs.) >2000mg/kg
Skin Absorption: no data available
Inhalation: LC₅₀ (rat/d 4 hrs.) > 5400 mg/m³
Ingestion: LD₅₀ > 4000 mg/kg (rat) (RTECS 1985-96)
Acute Effects from Overexposure: may cause irritation of the eyes
Chronic Effects from Overexposure: none identified

(effects considered include: sensitivities, carcinogenicity, teratogenicity, mutagenicity, synergistic, products, and any medical conditions generally recognized as being aggravated by exposure)

SECTION 10  ECOLOGICAL INFORMATION

Environmental Fate: 100% biodegradable
Environmental Effects: No adverse effects known or suspected. Not listed toxic chemical under SARA Title 111.302, 304 or 313

SECTION 11  HANDLING AND STORAGE

Handling: Keep container tightly closed. Store in a cool, dry, well-ventilated, liquid storage area.
Ventilation: Use adequate general or local exhaust ventilation to keep vapor and mist levels as low as possible.
Storage: Store in a cool, dry area away from acids.
SECTION 12  EXPOSURE CONTROL/PERSONAL PROTECTION

Recommended Personal Protective Equipment:

Respiratory: None required where adequate ventilation conditions exist.
Ventilation: None required where adequate ventilation conditions exist.
(Local Exhaust): recommended
(Mechanical – general): general dilution
Eye Protection: Use chemical goggles.
Gloves: Use impervious gloves to prevent skin contact.
Special Clothing and Equipment: Aprons recommended. If clothing becomes contaminated, remove and launder before reuse.
Other Protective Equipment: none identified
Foot Protection: industrial safety shoes
Other Engineering Controls: none identified
Work Practices: Do not smoke in areas of storage or use. Avoid all contact with skin and eyes.
Control Measures: Minimize eye and skin contact by using appropriate protective equipment. Use local or general room ventilation to control vapors or mist that may be generated into the work environment.

SECTION 13  SPECIAL PRECAUTIONS DATA

Precautions to be Taken in Handling and Storing – Avoid all contact with eyes or skin. Wear the appropriate protective equipment. Protect containers from physical damage.

Maintenance Personnel – Wash down vessels. Check the oxygen and combustible vapor content of the vessel atmosphere. Use the appropriate protective equipment.

SECTION 14  DISPOSAL PROCEDURES

Waste Disposal Method: Take up with sand or other non-combustible absorbent material and place into container for later disposal. Flush area with water. Dispose in accordance with all applicable Federal, State and local environmental regulations.

SECTION 15  TRANSPORT INFORMATION

DOT Proper Shipping Name: Compound Cleaning Liquid, N.O.S.
IATA: not applicable
IMDG: Class 3.3
DOT Classification: Combustible Liquid N.O.S.
DOT Labels: Flammable Liquid, 3
DOT Marking: not applicable
DOT Placard: bulk flammable liquid; no placard required under 110 gal.
UN Number: NA 1993, PG III
Hazardous Substance/RQ: not applicable
49 STCC Number: not applicable
Precautions To Be Taken in Transport: none needed
Other Shipping Information: none
SECTION 16  REGULATORY INFORMATION

OSHA Exposure Limits Substance(s): Ethyl Lactate
   OSHA FEL-TWA: not applicable
   STEL: not applicable

Label Language (US/Canada) Health:
   Physical Handling and Storage: Keep container tightly closed. Store in a cool, dry, well-ventilated liquid storage area.
   First Aid: In case of contact, immediately flush eyes with water for at least 15 minutes. If irritation persists, obtain medical attention. Flush skin with water.

State Regulations:
SECTION 17 ADDITIONAL INFORMATION

OSHA permissible exposure limit or ACGIH threshold limit value has not been established.

SECTION 18 HMIS LABEL

HEALTH: 1
FLAMMABILITY: 2
REACTIVITY: 0
PERSONAL PROTECTION: B

DEPARTMENT OF TRANSPORTATION

Hazardous Materials Regulations, 49 CFR
Proper Shipping Name: Compound Cleaning Liquid, N.O.S.
Hazard Class: 3
Packaging Group: III
Reportable Quantity: None
Label Required (drums): None
Placard Required (bulk): Placard flammable liquid
Maximum Quantity – Aircraft: No limit
Stowage on vessels: Above or Below Deck
MATERIAL SAFETY DATA SHEET

MANUFACTURER:

Emerald Edge Environmental, Inc.
1312 FM 646 Suite 6, Dickinson, Texas 77539
EMERGENCY PHONE 281-614-0180

SECTION I: IDENTIFICATION

PRODUCT: GoldSolv
DESCRIPTION: Organic Industrial Solvent

SECTION II: INGREDIENTS AND HAZARDOUS CLASSIFICATION

NO HAZARDOUS COMPONENTS
All Ingredients are Organic and 100% Biodegradable

SARA HAZARD: TITLE III SECTION 313 – Not Listed FIRE (Section 311/312): None Listed

SECTION III: HEALTH INFORMATION

INHALATION: No known effects
INGESTION: Considered non-toxic (16 CFR 1500.3 Code of Federal Regulations 16 Federal Hazardous Substances Act Regulations Part 1500.3), however as with any cleaner, avoid ingestion.
EYE CONTACT: Mild transient discomfort and irritation. Avoid contact.
SKIN CONTACT: Non-corrosive and non-irritating to normal skin upon incidental contact, however, always rinse with clean water after each contact.

EFFECTS OF OVEREXPOSURE:

INHALATION: No negative effects likely with normal ventilation
INGESTION: Mild transient gastrointestinal irritation
EYES: Mild transient dryness.
SKIN: Extended contact causes depletion of skin oils resulting in dryness/irritation

SECTION IV: OCCUPATIONAL EXPOSURE LIMITS

PEL: No OSHA PEL
TLV: No ACHIH TLV

SECTION V: EMERGENCY FIRST AID PROCEDURES

INHALATION: Not a known problem, however, if problems develop remove to fresh air
INGESTION: Call physician or poison control center if swallowing is suspected.
SKIN: Wash affected area with water, reduce or discontinue contact.
EYES: Flush with plenty of water. If irritation persists, contact physician.

SECTION VI: PHYSICAL DATA:
SECTION VII: FIRE AND EXPLOSION HAZARDS

Flash Point: 212 degrees F. (CC)
Volatile Organic Compounds (VOC'S): None
Extinguishing Media: Water/CO2 /Foam
Special Fire Fighting Procedures: None
Unusual Fire/Explosion Hazards: Soaked rags/sponges should be stored in UL approved covered containers.
NFPA Rating: 1/1/0/0

SECTION VIII: REACTIVITY DATA

Stability: Stable
Materials to Avoid: Strong oxidizers, acids, alkalis
Conditions to avoid: None
Hazardous Decomposition Products: None

SECTION IX: EMPLOYEE PROTECTION

Control Measures: Provide normal indoor/outdoor exchange ventilation
Respiratory Protection: Respirators normally not required
Protective Clothing: Impervious gloves
Eye Protection: Safety glasses/goggles recommended
HMIS III Rating: 1/0/0/B (0 =Minimal 1 =Slight 2 =Moderate 3 =Serious 4 = Severe)
(B = Safety Glasses/Goggles/Gloves)

SECTION X: ENVIRONMENTAL PROTECTION

Special Precautions: Avoid release; containment measures should be implemented.
Spill or leak Precautions: Contain and secure. If not possible, rinse/dilute with plenty of water
Waste Disposal: No known negative impact would be expected if released in diluted form, however, any
disposal must be in accordance with all local state and federal laws.

SECTION XI: TRANSPORTATION REGULATORY CONTROLS

DOT Classification: Class 55
Proper Shipping Name: Cleaning compound
Other Requirements: None
Hazard/Placard: None Required

EXTINGUISHING MEDIA
Dry chemical, foam, or carbon dioxide. Do not use water except as a mist or foam, as it may spread the burning liquid.

SPECIAL FIRE FIGHTING PROCEDURES
Exhaustive area of unprotected personnel. Firefighters should wear protective equipment and NFPA-approved self-contained breathing apparatus.

UNUSUAL FIRE AND EXPLOSION HAZARDS
Cool fire-exposed containers with water spray.

Rags soaked with this product may spontaneously ignite. To avoid this danger, used rags should be soaked with water and/or steved in a container full of soapy water. In a fire, closed containers of this product may burst or rupture due to pressure build-up, greatly increasing the fire hazard.
REACTIVITY DATA

STABILITY: STABLE □ UNSTABLE X
CONDITIONS TO AVOID: None known

INCOMPATIBILITY (Materials To Avoid):
Avoid contact with strong acids and oxidizing agents.

HAZARDOUS DECOMPOSITION OR BY PRODUCTS:
When ignited, this product produces carbon monoxide and carbon dioxide.

HAZARDOUS POLYMERIZATION: WILL NOT OCCUR □ MAY OCCUR □ CONDITIONS TO AVOID: None known

HEALTH HAZARD DATA

HEALTH HAZARDS:
EYES: May cause irritation. SKIN: Prolonged or repeated exposure can cause skin irritation and may produce irritation. Some individuals may develop a rash or allergic reaction after prolonged skin contact. INHALATION: Breathing fumes may irritate nose, throat, lungs and may cause nausea.

IF SWALLOWED: Swallowing large amounts, more than a few ounces, may cause nausea, upset stomach and vomiting.

CARCINOGENICITY: NTP? No IARC MONOGRAPHS? No OSHA REGULATED? No

This product contains a chemical known to the state of California to cause cancer or reproductive toxicity.

SIGNS AND SYMPTOMS OF OVEREXPOSURE:
EYES: Irritation. SKIN: Irritation, rash or allergic reaction. INHALATION: Irritation of the nose, throat and lungs and nausea.

IF SWALLOWED: Nausea, upset stomach and vomiting.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY OVEREXPOSURE:

DURATIONS:
Target organs:
Eyes and skin

EMERGENCY AND FIRST AID PROCEDURE:
EYES: Flush with plenty of cool water for at least 15 minutes and call a physician or poison center.

SKIN: Wash with soap and water; if irritation persists, call a physician or poison center.

INHALED: Remove to fresh air. Apply CPR if needed. Call a physician or poison center immediately.

IF SWALLOWED: DO NOT induce vomiting. Call a physician or poison center immediately.

PRECAUTIONS FOR SAFE HANDLING AND USE:

STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED:
Eliminate all sources of ignition. Ventilate area. Absorb on inert, non-combustible material and place in suitable container for disposal.

WASTE DISPOSAL METHOD:
Consult your local, state, and federal officials for proper disposal guidelines.

PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:
Keep this product in properly labeled, tightly closed containers. Store in a cool, well-ventilated area, away from sources of ignition. Keep out of reach of children.

CONTROL MEASURES:

FOR USE WHERE SIGNIFICANT EYE, SKIN OR INHALATION EXPOSURE IS LIKELY:

RESPIRATORY PROTECTION (Specify Type):
IF TLV is exceeded, use NIOSH-approved respirator for organic vapors.

VENTILATION: MECHANICAL (General) LOCAL EXHAUST
Provide adequate ventilation Provide adequate ventilation

PROTECTIVE GLOVES:
Nitrile, neoprene, latex, rubber or PVA

EYE PROTECTION:
Safety goggles

OTHER PROTECTIVE CLOTHING OR EQUIPMENT:
Shirts with long sleeves are recommended.

WORK HYGIENIC PRACTICES:
Remove contaminated clothing immediately; wash thoroughly with soap before reusing. Wash hands and face with soap and water after using this product.

If yes to any of the above, specify:

Section 7 - Preventive Measures

Protective equipment: Eyewear, clothing, gloves.
Handling procedures: Keep away from ignition source.
Waste disposal methods: Dispose as per local, state and federal regulations.
Leak/spill procedures: Danger! Slippery! Pick up the product using protective equipment.
Storage requirements: Store between 20°-25°C, away from oxidizers.
Engineering controls: Ensure adequate ventilation.
Handling equipment: None
Special shipping information: UN 1993, Class 3, P.G. III, flammable liquid.

Section 8 - First Aid Measures

Skin contact: Rinse immediately with plenty of warm water for at least 15 minutes.
Eye contact: Rinse immediately with plenty of warm water for at least 15 minutes.
Inhalation: Remove victim to fresh air.
Ingestion: Do not induce vomiting. Consult a physician immediately.
Other: Remove contaminated clothing and wash before reusing. In all cases, consult a physician.

Section 9 - Preparation of MSDS

Prepared by: Chemical Tools Manager
Telephone: (860) 296-1100
Date: May 1, 2006

This data is offered in good faith as typical values and not as a product specification. No warranty, either express or implied is hereby made. The recommended industrial hygiene and safe handling procedures are believed to be generally applicable. However, each user should review these recommendations in the specific context of the intended use and determine whether they are appropriate.

Note lack of lip after modified protocol. The water rinse also helps remove residue. (Compare Bioclean with original and modified protocol.)
As part of its mission, the Sustainable Painting Operations for the Total Army (SPOTA) working group evaluated solvents that will not impact the environment while cleaning armament equipment, in particular ground vehicles. ERDC-CERL researchers, in support of the SPOTA program, were tasked with conducting a preliminary study and develop a methodology to evaluate environmentally friendly cleaners that would be effective in cleaning road tar on military vehicles. The study involved an extensive literature review of commercial environmentally friendly tar removers (both products and methodologies). Twenty six commercial tar removal products were identified as possible solvents for removing the tar stains from ground vehicles. In addition, laboratory coupon evaluations were conducted using three select commercial products. This report presents the results of the search for commercial tar removal solvent systems, and a laboratory evaluation of select solvent systems for removing tar from steel coupons.
