Agenda

- COIN Center Overview
- Understanding the Environment
- US COIN, Stability Operations, and Security Force Assistance Doctrine
- Human Terrain
- Assessments & Metrics

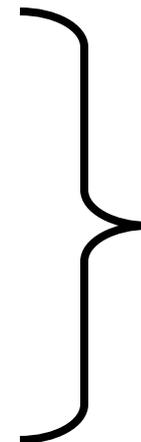

COIN Center Origin & Mission

- Founded Summer 06 – GEN Petraeus and Gen Mattis, USMC
- Assist with FM 3-24 Integration and Implementation
- **“Connect the Dots”**

Mission Statement: USA/USMC COIN Center provides oversight of ground force COIN integration in order to improve US ground forces' capability to operate in a full spectrum/COIN environment.

- **Integrate** COIN initiatives
- **Research** best practices
- **Improve Doctrine**
- **Improve Education**
- **Advise** leaders and organizations
- **Conduct Outreach** to other military & civilian entities

Lines of Effort

Assist Army/USMC in implementation/application of the body of thought in FM 3-24

Understanding the Environment

MG McChrystal
ISAF Commander
Assessment, 30 August 2009

“This is a different kind of fight. Our strategy cannot be focused on seizing terrain or destroying insurgent forces; **our objective must be the population**. Gaining their support will require a better understanding of the people’s choices and needs. [We must] change the operational culture to connect with the people. ISAF [must] focus on protecting the Afghan people, **understanding their environment**, and building relationships with them.”

Understanding the Operational Environment

Not ... *what to think*

Or even . . . *how to think*

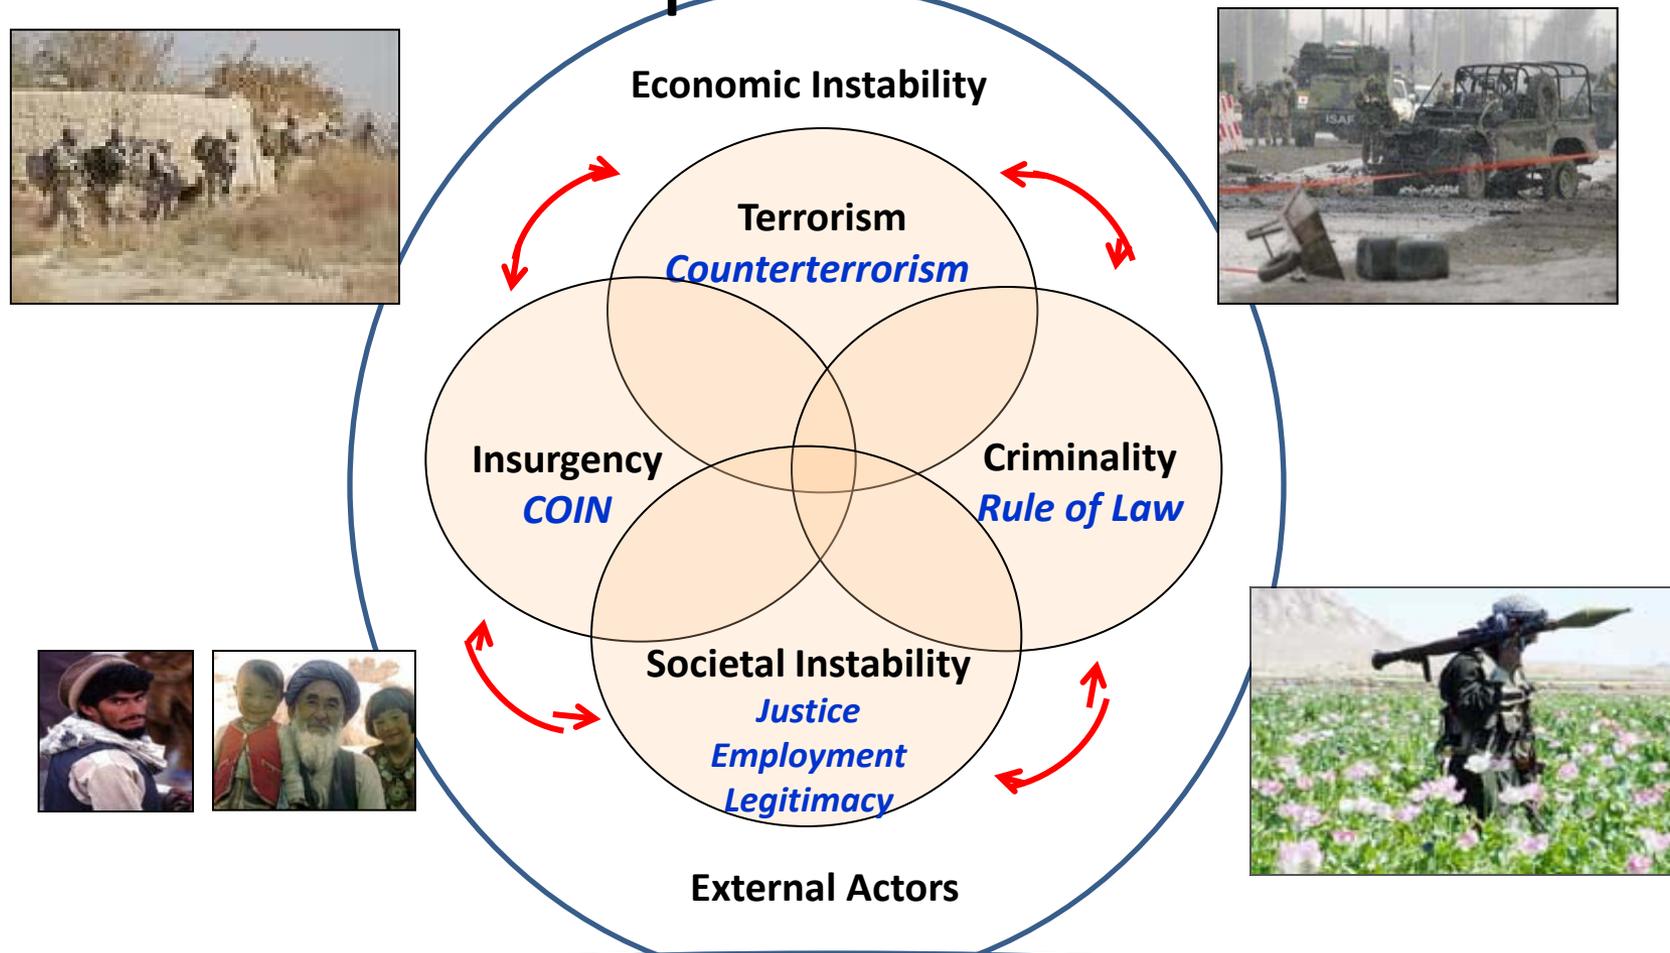

In COIN & Irregular Warfare, focus on ...

how to think about:

environment in which you operate &

how to influence both environment & actors in it.

A Multiple-Problem Set

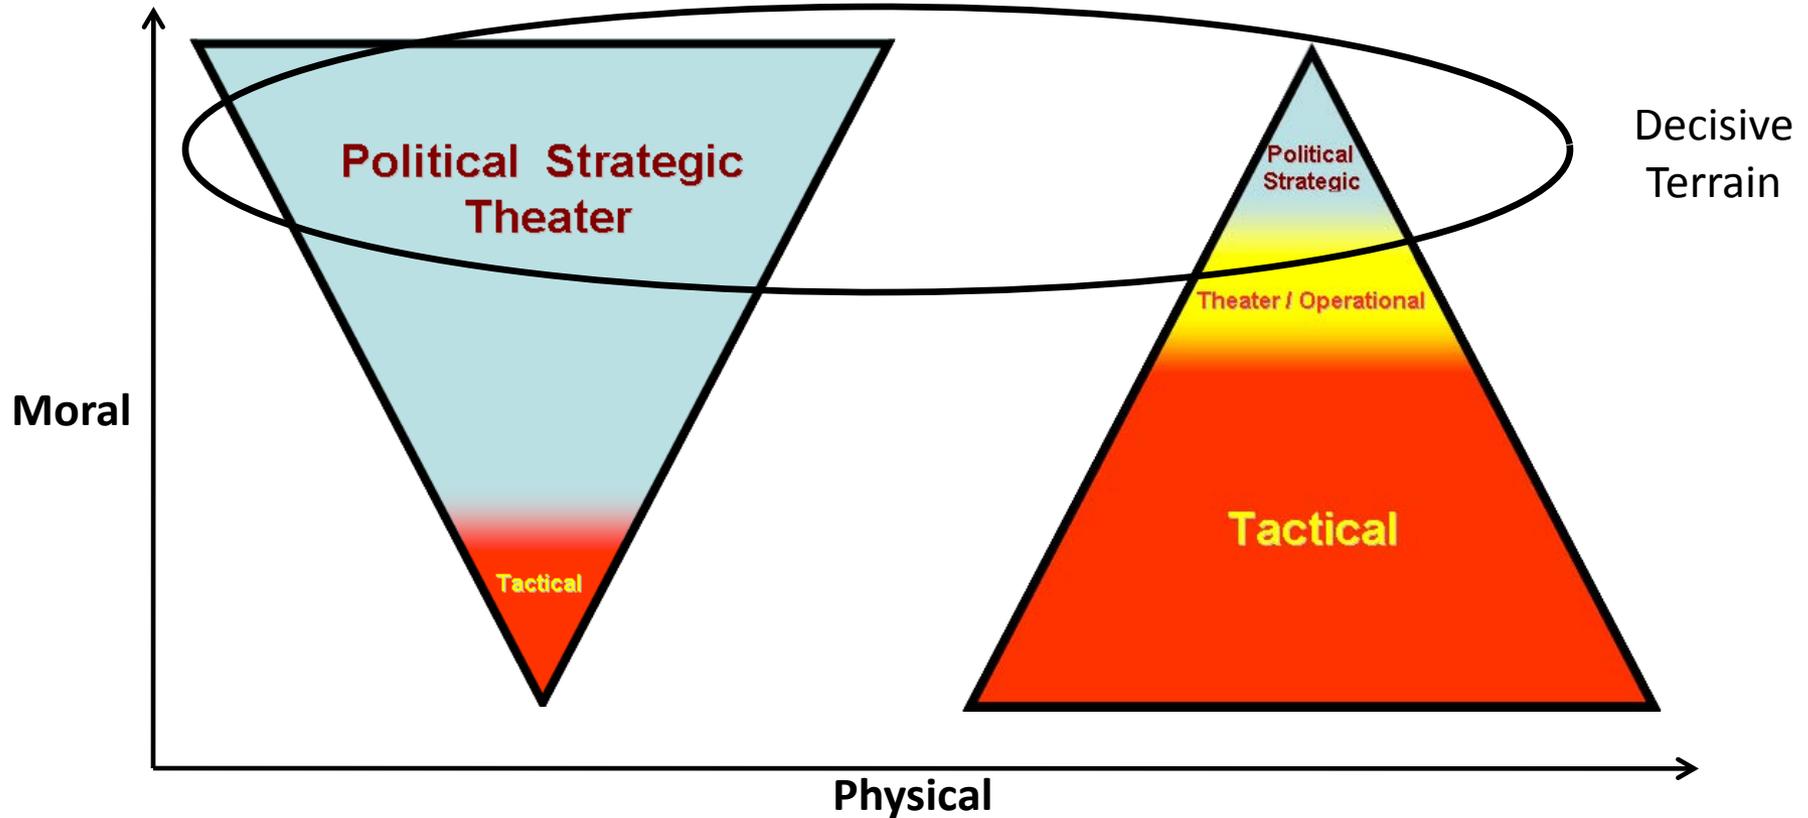

We must understand in detail the situation, however complex, and be able to explain it to others.

GEN McChrystal, 13 June 2009

Moral vs. Physical Domain

How an insurgent views things

How we tend to view things

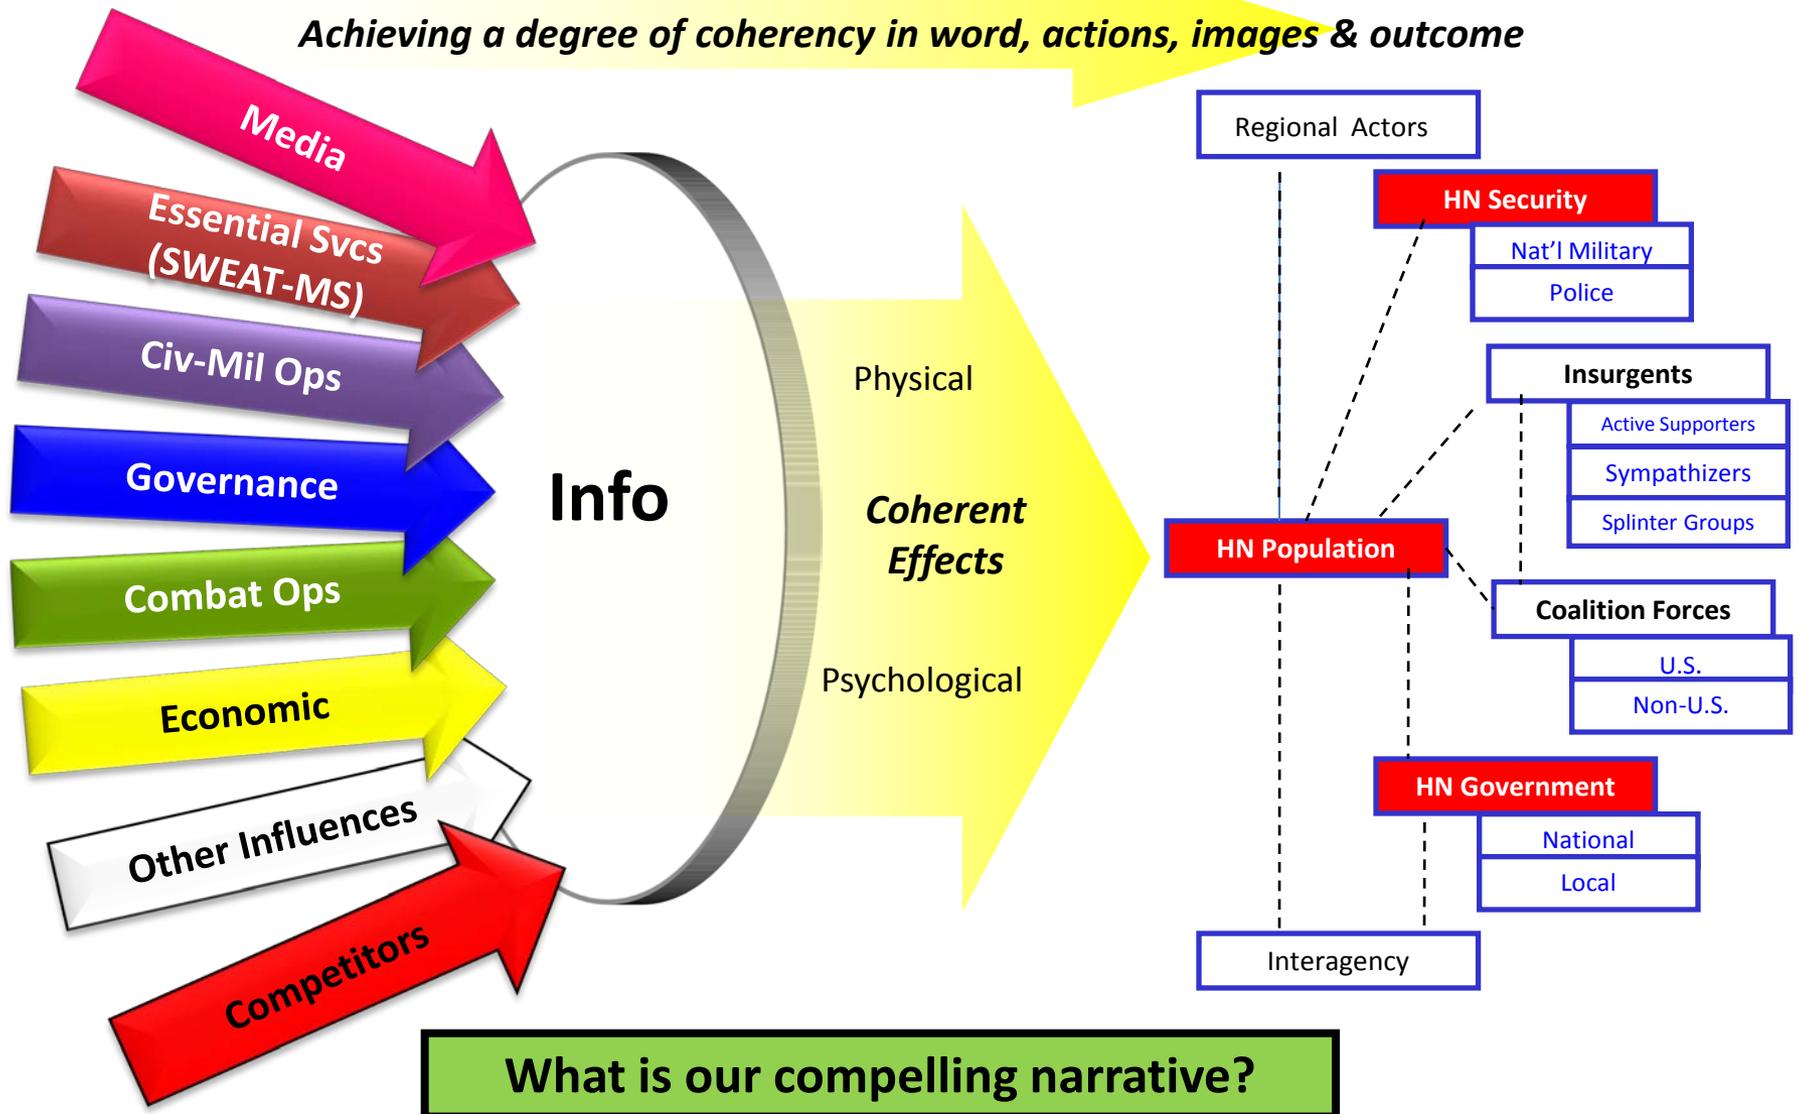

"It is an irony of political warfare—and a political fact to be considered and understood—that the rules are not the same for both sides."

Robert Taber, *War of the Flea*, 1965

Information as a "Lens" in COIN

Achieving a degree of coherency in word, actions, images & outcome

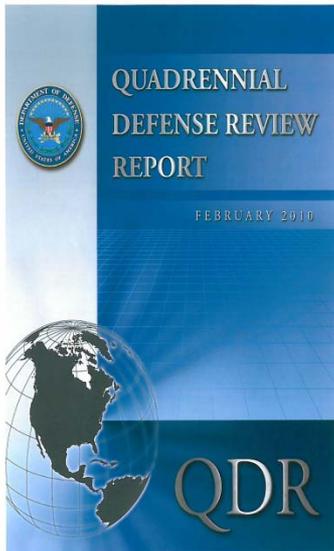

US COIN, Stability Operations, and Security Force Assistance Doctrine

Quadrennial Defense Review 2010

COIN/SO/SFA

Key Mission Areas

- Succeed in *counterinsurgency* and *stability operations*
 - retain the capability to conduct large-scale *counterinsurgency* and *stability operations* in a wide range of environments
 - increase *counterinsurgency* and *stability operations* competency and capacity in general purpose forces
- Build the *security capacity* of partner states
 - strengthen and institutionalize general purpose force capabilities for *security force assistance*

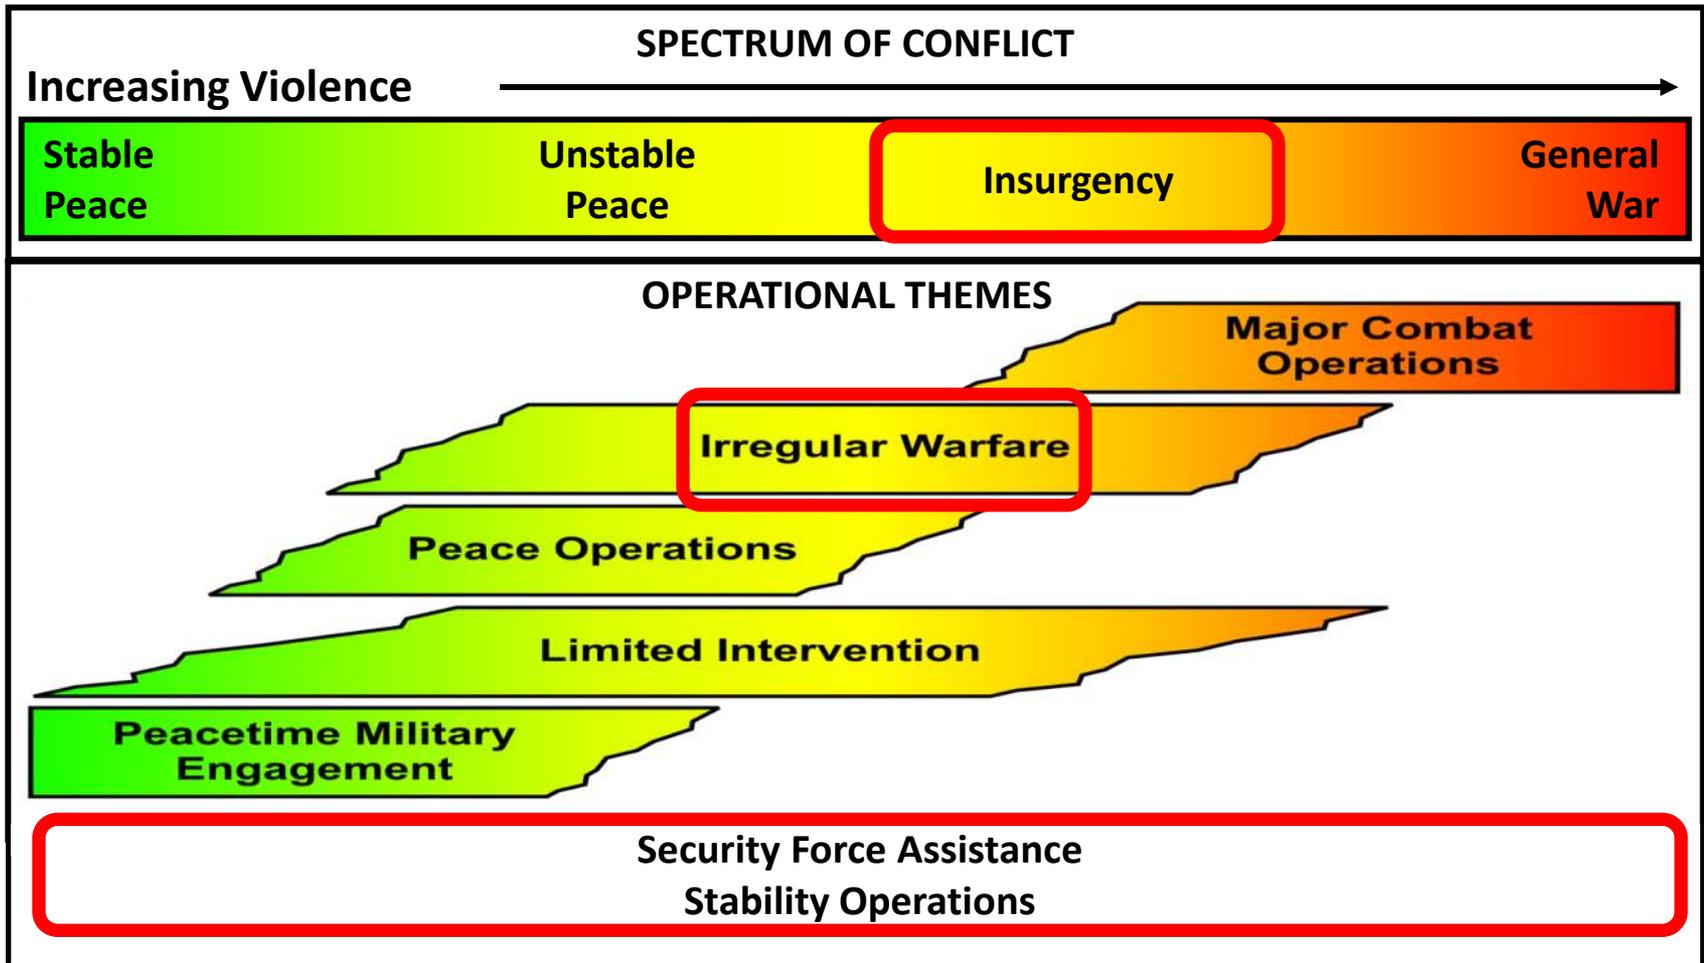

COMISAF Directive

“Counterinsurgency is an order. It is not a technique we record. It is how we are operating this campaign. It is how we will win. It is not open to people’s personal philosophy.”

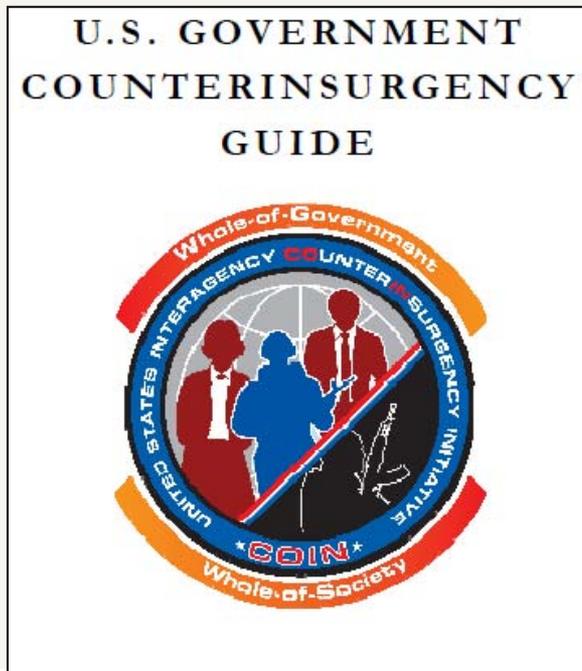

16 March 2010

COIN, IW, SO, & SFA

USG COIN Guide

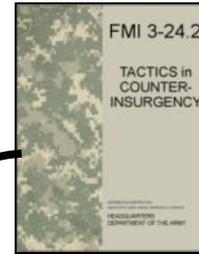

“Whether the United States should engage in any particular counterinsurgency is a matter of political choice, but that it will engage in such conflicts during the decades to come is a near certainty. This Guide...will serve best if treated not as a rigidly defined set of recipes, but rather, as a **stimulus to disciplined, but creative thought.**”

U.S. Government Counterinsurgency Guide Preface (January 2009)

FM 3-24 *Counterinsurgency (Next)*

“Today insurgency is mutating, thus forcing an intense reevaluation of U.S. strategy and operational concepts.”

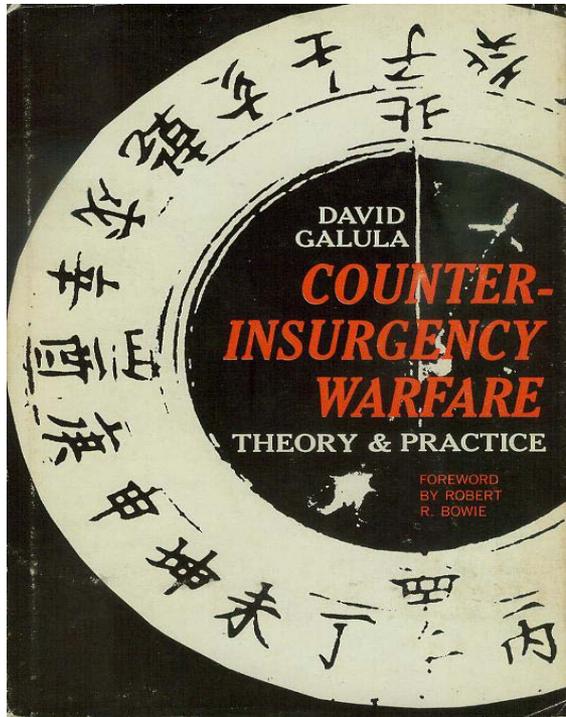

Steven Metz and Raymond Millen, “Insurgency and Counterinsurgency in the 21st Century”

FM 3-07 Stability Operations

A "Comprehensive Approach"

“Success” in Counterinsurgency

“A victory is not [just] the **destruction in a given area of the insurgent’s forces and his political organization.** It is that, plus the **permanent isolation of the insurgent from the population,** isolation not enforced upon the population but **maintained by and with the population.**”

David Galula, *Counterinsurgency Warfare*, 1964

Human Terrain

Human Terrain

The element of the operational environment encompassing the *cultural, sociological, political, and economic* factors of the local population.

“You cannot operate in this environment without a detailed understanding of all the PMESII variables, particularly the political and informational.”

GEN Ray Odierno, September 2009

Relevant Context in the Operational Environment

Operational Variables

- **Political**
- **Military**
- **Economic**
- **Social**
- **Infrastructure**
- **Information**
- **Physical terrain**
- **Time**

Civil Considerations

- **Areas**
- **Structures**
- **Capabilities**
- **Organizations**
- **People**
- **Events**

Integrate to paint detailed picture of local perceptions & dynamics

	P Political	M Military/Security	E Economic	S Social	I Infrastructure	I Information
A Areas	District / Provincial boundary	IED sites, military/ insurgent bases	Bazaars, farms, repair shops, bazaars	Picnic areas, bazaars, meeting sites	Irrigation networks, medical services	Radio, gathering points, graffiti, posters
S Structures	Shura halls, Court House	Police HQ's, military bases	Bazaars, banks, industrial plants	Mosques, Wedding halls	Roads, bridges, electrical lines, dams	Cell, radio and TV towers, print shops
C Capabilities	Dispute resolution, judges, local leadership	Military/Police Enemy recruiting potential?	Access to banks, development, black market	Traditional structures, means of justice	Ability to: build/maintain roads, dams, irrigation	Literacy rate, phone service
O Organizations	GOV & NGO organizations	Coalition & Host Nation Forces	Banks, landholders, economic NGO's	Tribes, clans, families	Gov Ministries, Construction companies	News organizations, mosques
P People	Governors, councils, elders, Judges	Coalition/ host nation military/ police leaders	Bankers, landholders, merchants, criminals	Religious/ civic leaders, elders, families	Builders, contractors, development councils	Civic/religious leaders, family heads
E Events	Elections, meetings, speeches, trials	Kinetic events, military/police operations	Drought, harvest, business opening	Weddings, deaths/births funerals, bazaar days	Road/bridge/school construction, well digging	Festivals, project openings

COMISAF Training Guidance

“You must understand your operational environment. **All of us must learn the ASCOPE methodology** to refine our awareness of the operational environment. This gives us an understanding of civil considerations from the point of view of the population, insurgent, and counterinsurgent.”

Information Management

PROBLEM: “Little [relevant information] from the ground level in Afghanistan reaches a central repository where customers who need information can access or search for it. Instead, vital information piles up in obscure SharePoint sites, inaccessible hard drives, and other digital junkyards.”

MG Michael Flynn, p. 17.

REQUIREMENT: An integrated capabilities-driven technical approach that can meet the need for normalized, time-sensitive, population-centric (PMESII-PT, ASCOPE, indicators) information. . . .

CHECKMATE Command Post
Executive Summary, 2010

JANUARY 2010

VOICES
FROM THE FIELD

**Fixing Intel: A Blueprint for Making
Intelligence Relevant in Afghanistan**

Civil Information Management

PROBLEM: The lack of a standardized assessment process that allows civil and military personnel to determine and target the grievances/root causes of instability and conflict in Area of Operations (AO).

What Information?

- Demographics
- Economics
- Social constructs
- Culture
- Political processes
- Political leaders
- Civil - military relationships

TCAPF – Tactical Conflict Assessment Planning Framework

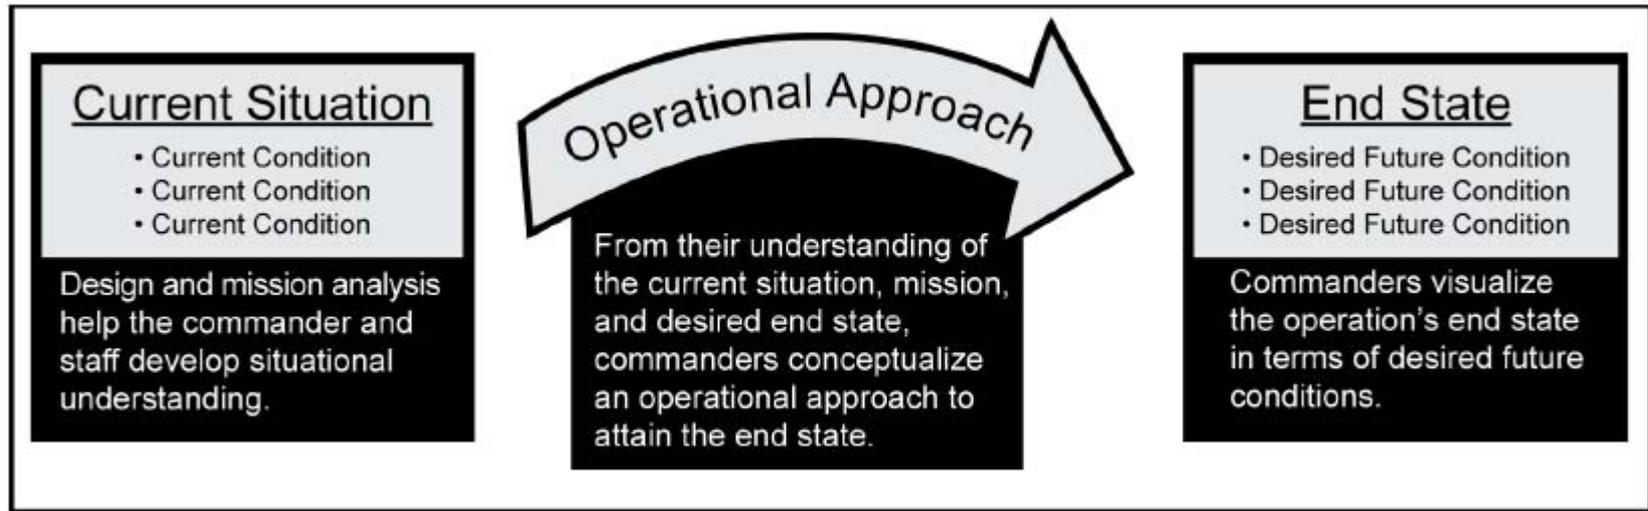

Reason for change in population?
What is the most important problem facing the village?
Who do you believe can solve your problems?
What should be done first to help your village?

Assessments & Metrics

Design

“When you get a new job to do, spend most of your time discovering exactly what your new mission is. Then break it down into workable units.”

GEN Matthew Ridgway

Frame the Problem

- What is the force trying to accomplish (ends)?
- What conditions, when established, constitute the desired end state (ends)?
- How will the force achieve the end state (ways)?
- What sequence of actions is most likely to attain these conditions (ways)?
- What resources are required, and how can they be applied to accomplish that sequence of actions (means)?
- What risks are associated with that sequence of actions, and how can they be mitigated (risk)?

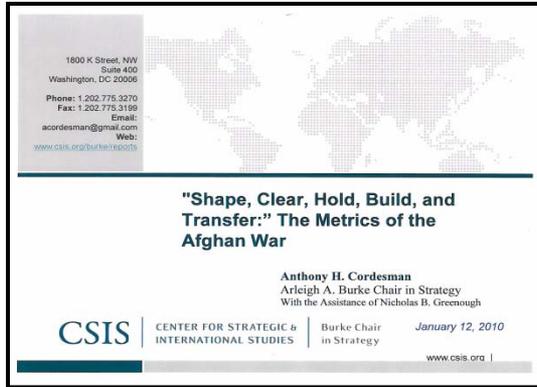

U S OBJECTIVE IN AFGHANISTAN

President Obama, United States Military
Academy, 1 December 2009

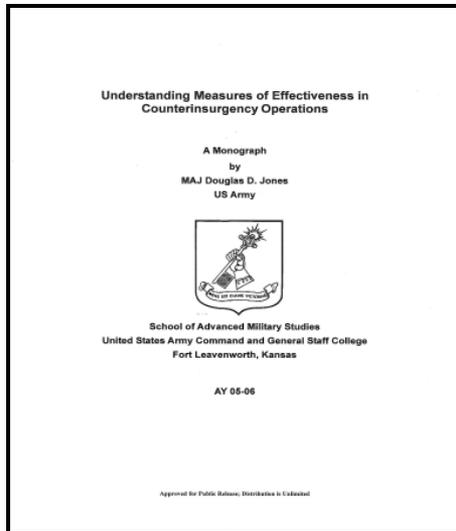

**“Our overarching goal...: to disrupt,
dismantle, and defeat al Qaeda in Afghanistan
and Pakistan, and to prevent its capacity to threaten
America and our allies in the future.”**

HOW DO WE MEASURE THAT?

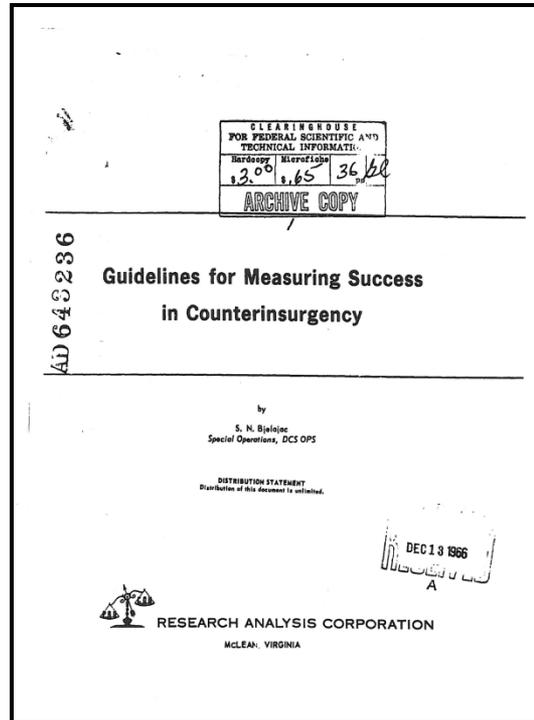

MOE – Not a New Issue

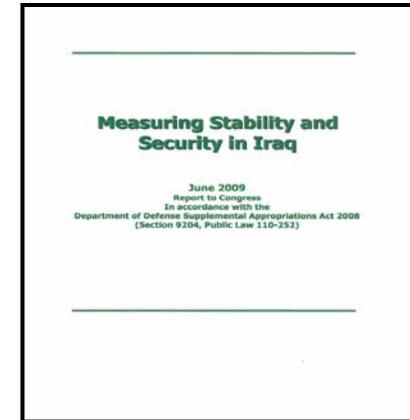

January 2010

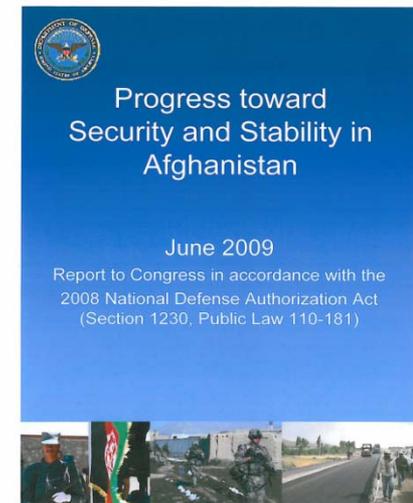

AY 05-06

December 1966

June 2009

June 2009

Measure of Effectiveness

“A criterion used to assess changes in system behavior, capability, or operational environment that is tied to measuring the attainment of an end state, achievement of an objective, or creation of an effect.”

(Joint Pub 3-0, Joint Operations.)

“At best, measures of combat efficiency are measures of how quickly or cheaply forces perform military missions. They do not gauge whether mission success will achieve political purposes.”

Robert S. Pape, *Bombing to Win: Air Power and Coercion in War*

History Repeating Itself?

*“...requirements exist for **methods or analytical models** that are suitable or adequate for gaining greater understanding of insurgency / counterinsurgency-type situations, **for measuring progress**; for detecting and assessing causal relationships; and for evaluating alternative allocations of effort, tactics, and strategies.”*

Lawrence J. Dondero, Head, Military Gaming
Dept “Measurement of Pacification Progress in
Vietnam (U)” Research Analysis Corporation
(RAC), **September 1968**

MOE in a Complex Environment

It is important to preface any attempt to establish analytic criteria, and measures of effectiveness, for a conflict like the Afghan War with some important caveats:

- There is a natural desire to find bottom line metrics and judgments, but the **task is to manage complexity and not to oversimplify**.
- Any **metrics or analysis which focus narrowly** on formal command structures, or national boundaries, **are inherently wrong**.
- It is far **easier to quantify what is easily measured** than to quantify what is relevant.
- **Metrics often imply a false precision**, particularly since they are rarely shown as full ranges or rounded to reflect uncertainty.
- **Numbers that are unsupported by narrative are a remarkably poor method of communication**.

**Andrew Cordesman, Analyzing the Afghan-Pakistan War, Draft 28 July 09*

MOE in Afghanistan

FY 2010 Defense Authorization Act

The committee requires the President to **assess U.S. progress** in four areas for Afghanistan, including: assisting the Afghan people with building a functional government; spreading the rule of law and reducing corruption; reducing the ability of anti-government elements to carry out attacks in and from Afghanistan; and improving the economy. The administration is directed to **develop goals and timelines** to achieve the aims listed, **in addition to measures of effectiveness for accurate assessments** in each area.

Measure of Effectiveness

“The measure of effectiveness will not be the number of enemy killed, it will be the number of Afghans shielded from violence.”

GEN Stanley McChrystal

“Because political objectives are just that—political—they are often ambiguous, contradictory; it is one of the greatest sources of frustration for soldiers. . . .”

Dr. Eliot Cohen

Concerns

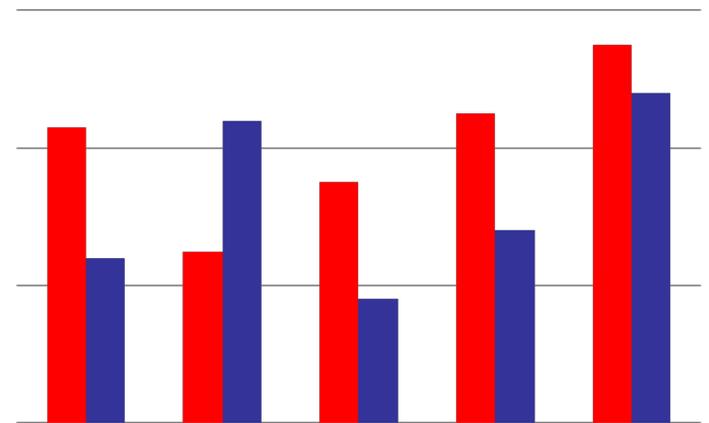

- What are the relevant indicators of success?
- How will those indicators be measured?
- How will information regarding those indicators be forwarded?
- How can the information be used by units on the ground?
- What are the conditions that have to be established for the desired end state?

"Not everything that can be counted counts,
and not everything that counts can be counted."

Einstein

To Determine Progress. . .

- Must maintain a common set of core metrics
- Must maintain a consistent methodology
- Cannot simply measure, must also interpret
- Must determine categories for metrics
 - Population
 - Host nation government
 - Security forces
 - Enemy
 - Development

Kilcullen, "Measuring Progress in Afghanistan," Dec 09

Attributes of Good Metrics

GENERAL

1. Operationally defined
2. Efficient, feasible, parsimonious
3. Variable
4. Created within spatial and temporal domains
5. Consider classification level and whether data exists at the required level

p. 4

SPECIFIC

1. Transparent
2. Repeatable
3. Shared
4. Layered
5. Reasonably easy to do
6. Defendable
7. Rigorous
8. Good enough
9. Linked
10. Generalizable
11. Systematic
12. Reliability

p. 10

In Co Af an
Parliamentary
Elections would be
held on 22 May. What
they did not announce
is that although
District elections are
mandated by the
Afghan constitution
they are cancelled for
2010. Parliamentary
and District elections
are not as sexy as the
presidential elections
of 2009, but from a
counterinsurgency
perspective, they play
a key role in
establishing the
legitimacy of the
government by

curity to the Chief
deputy Mr. Barakzai

providing a venue for people to solve their problems and govern themselves locally.

Unfortunately, the Afghan 2010 election cycle is flawed and doomed to further erode the already tenuous legitimacy of the Afghan Government and its electoral

Framework for COIN

Approach to Counterinsurgency

1. Separate insurgents from Population
2. Connect Population to Government
3. Transform Environment to be inhospitable to Insurgents

Framework for Counterinsurgency:
“War Amongst the People”

COIN Principles

- Legitimacy
- Unity of Effort
- Political is Primary
- Understand the Environment
- Intelligence
- Isolate Insurgents
- Security under Rule of Law
- Long term Commitment

- Insurgency Dynamics
- Leadership
- Ideology
- Objective
- Environment
- External Support
- Phases
- Organization

Successful COIN Practices- Afghanistan

Clear Hold Build

Build and develop cleared areas

“...use projects and work programs to bring communities together.”

Population

Focus on population

“We need to embrace the Afghan people.”

By/With/Through HN

Political and military cooperation

“Partner with ANSF at all echelons.”

Security

Deny sanctuary to insurgents

...separate insurgents from the center of gravity, the people.”

COMISAF Guidance, Aug 09

Security Force Assistance Activities

FM 3-07.1

Plan and **resource**

Host Nation security force operations.

Generate

Host Nation capacity.

Partner with HN security forces.

Embed advisors to support capacity building.

Transition

to Host Nation legitimate authority.

Sustain Host

Nation security forces. Develop and support relevant programs.

“Building [partner] capacity is arguably as important as, if not more so than, the fighting the United States does itself.”

Secretary of Defense Robert Gates
Foreign Affairs

PLAN

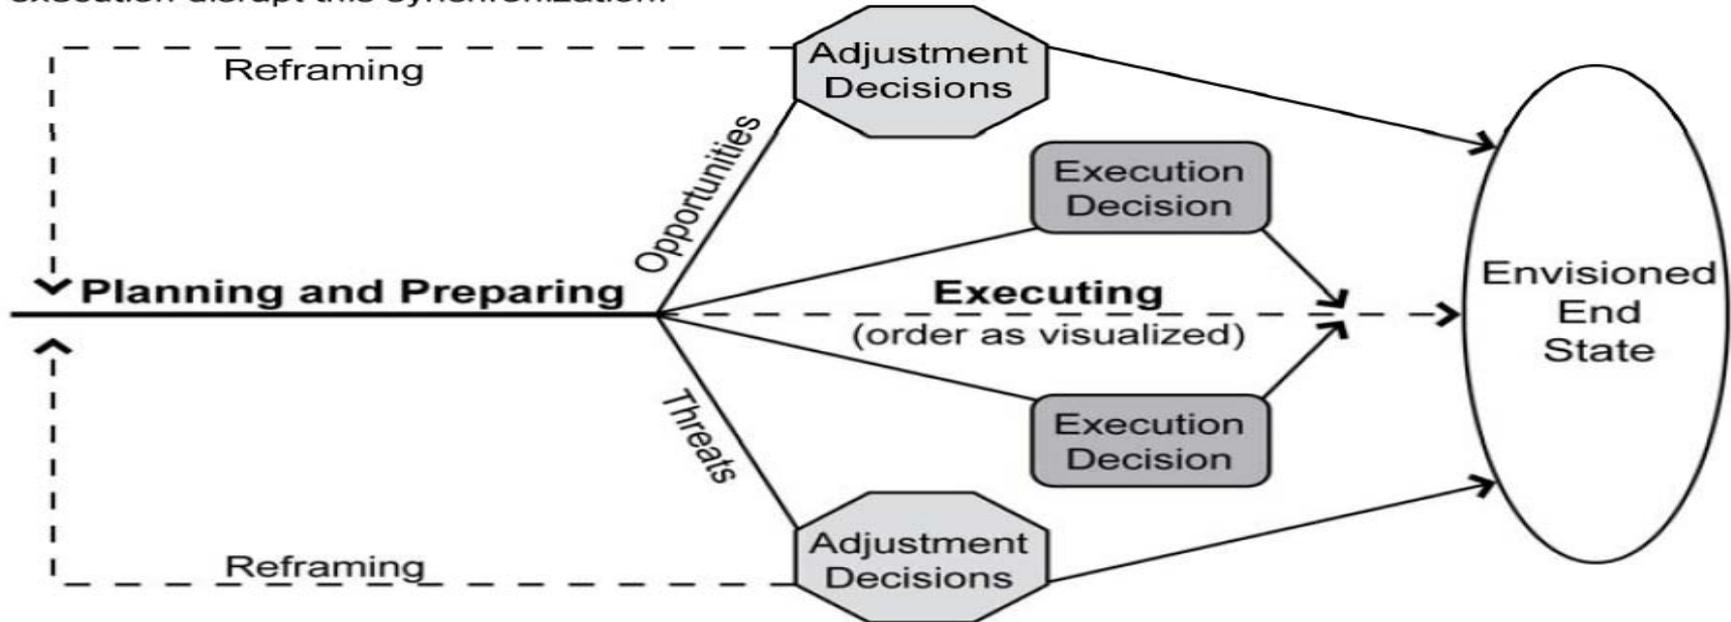

PREPARE

EXECUTE

Assessing

The warfighting functions are integrated and synchronized in the MDMP to generate combat power. Variances during execution disrupt this synchronization.

During execution, commanders and staff also assess the underlying framework of the plan itself. This involves reexamining the original design concept and determining if it is still relevant to the situation.
