NAVAIR 2010
Small Business Aviation Technology Conference
**DCAA And The Small Business Innovative Research (SBIR) Program**

Presented at the NAVAIR Small Business Aviation Technology Conference Nov 16-17, 2010, Southern Maryland Higher Education Center, California, MD 20619
Presentation Overview

• DCAA Background Information
• DCAA and the SBIR Program
• Common DCAA SBIR Reviews
• Available Resources
Defense Contract Audit Agency

DCAA
Background
Information
The DCAA Charter - DoD Directive 5105.36 states:

DCAA, while serving the public interest as its primary customer, shall perform all necessary contract audits for the Department of Defense and provide accounting and financial advisory services regarding contracts and subcontracts to all DoD Components responsible for procurement and contract administration. These services shall be provided in connection with negotiation, administration, and settlement of contracts and subcontracts to ensure taxpayer dollars are spent on fair and reasonable contract prices.

DCAA shall provide contract audit services to other Federal agencies, as appropriate.
DCAA Organizational Overview

- Approximately 4,000 employees
- More than 300 field audit offices
- United States and overseas
DCAA Products and Services

• Price Proposals
• Preaward Surveys
• Forward Pricing Labor & Overhead Rates
• Incurred Costs/Annual Overhead Rates
• Truth in Negotiation Act Compliance
• CAS (Cost Accounting Standards) Compliance & Adequacy
• Claims
• Contractor Internal Control System Audits
• Other reviews as requested by the contracting officer
What DCAA Will Not Do

- Establish accounting or any other types of management systems
- Recommend software programs
- Perform audits requested by the contractor
- Provide consulting services to the contractor
- Recommend a consultant
DCAA and the SBIR Program
Field Pricing Support

FAR 15.404-2:
The contracting officer should request field pricing assistance when information available at the buying activity is inadequate to determine a fair and reasonable price.
SBIR Phase I at NAVAIR

Phase I is a feasibility study in which the small businesses will receive up to $80,000 for a six month project to demonstrate the scientific, technical and commercial feasibility of the selected concept. An option is available for up to $70,000 for interim activities between Phase I and Phase II, if the project is selected to receive a Phase II award. Phase I is normally a FFP contract with partial payments based on the submission and acceptance of reports from the company to NAVAIR.

In most cases, the NAVAIR Contract Specialist or Contracting Officer does not request DCAA’s assistance with evaluating Phase I SBIRs.
SBIR Phase II at NAVAIR

Contractors with successful Phase I projects might be invited to participate in the next phase of the SBIR program. Phase II is typically a demonstration phase in which prototypes are built and tested. If selected, the small business will receive up to $750,000 award.

The vast majority of Phase II SBIR contracts awarded by NAVAIR are on a Cost Plus Fixed Fee basis. In order to receive a cost type contract an offeror must have in place, prior to award, an accounting system that is adequate for accumulating costs under a flexibly priced (cost type) contract environment.
For Phase III funding, NAVAIR utilizes a multi-sponsor Indefinite Delivery, Indefinite Quantity (IDIQ) contract vehicle. To be eligible for an IDIQ Phase III contract the technology must be broad and useful to multiple military customers, must have a Phase II contract in process or completed, and there must be at least one NAVAIR sponsor interested in funding a Phase III.

A typical Phase III IDIQ contract has a period of performance of five years and can have a total contract value of up to $25 million. Funding is allocated to the contract by Delivery Orders (DOs). DOs may be used on a time and materials, firm fixed price, or cost plus fixed fee basis.
Common
DCAA
SBIR Reviews
Common DCAA Reviews Associated with SBIR Phase II and III Effort

Preaward Contract Audit Services

- Preaward Accounting Survey
- Forward Pricing Proposals

Postaward Contract Audit Services

- Incurred Costs
- Other Audits such as: floor checks and public vouchers audits
The preaward accounting system survey is an audit to determine the acceptability of a contractor's accounting system for accumulating costs under a prospective Government contract.

The auditor will need to obtain an understanding of the design of the prospective accounting system so as to appropriately complete the **SF 1408 - “Preaward Survey of Prospective Contractor Accounting System”**.
SF 1408

- Proper segregation of direct costs from indirect costs
- Identification and accumulation of direct costs by contract
- A logical and consistent method for allocation of indirect costs to intermediate and final cost objectives
- Accumulation of costs under general ledger control
- A timekeeping system that identifies employees’ labor by intermediate or final cost objectives
- A labor distribution system that charges direct and indirect labor to the appropriate cost objectives
SF 1408

• Interim (at least monthly) determination of costs charged to a contract through routine posting to books of accounts

• Exclusion from costs charged to Government contracts of amounts that are not allowable pursuant to Federal Acquisition Regulation FAR 31, Contract Cost Principles and Procedures, or other contract provisions

• Identification of costs by contract line item and units if required by the proposed contract

• Segregation of preproduction costs from production costs
Common Problems Encountered During Accounting System Reviews

- Unallowable costs not accounted for separately
- No cumulative labor distribution and/or job cost ledgers
- No written policies and procedures
Common Problems Encountered During Accounting System Reviews

Timekeeping system problems:
• No official system in place
• No written instructions/policies/procedures
• System not linked to accounting system
• Recording of direct charges only
• Recording by direct-type personnel only
• All hours worked are not recorded
• Improper timecard preparation
INDIVIDUAL PRICE PROPOSALS (Common with Phase II/III SBIRs)
Represents effort expended to examine estimates of entire price proposals submitted by contractors in connection with the award of government contracts.

AUDIT OF A PART OF A PROPOSAL (Common with Phase II/III SBIRs)
Represents effort expended to examine and express an opinion on one or more parts of a forward pricing proposal. A part of a proposal may be an entire cost element or part of a cost element (e.g., rates or bases), but not the entire proposal.

AGREED UPON PROCEDURES
Represents effort expended to perform specific procedures as a result of command and auditor agreement (regarding the procedures to be performed) in the evaluation of forward pricing proposals.
Important! FAR 15.408, Table 15-2, provides instructions on preparing a proposal and the backup required when cost or pricing data are required.

There are a lot of additional aids and guidance out there. However, FAR is the actual regulation.

We do not have the time to go over Table 15-2 during this presentation. However, I will mention some common problems encountered during proposal reviews.
Chapter 3 of DCAA’s DCAAP 7641.90 “Information for Contractors” provides additional guidance regarding proposal requirements, examples of data DCAA may request, as well as a model proposal (www.dcaa.mil).

Data should be provided in electronic format.

An adequately supported proposal submission will result in an expedited audit evaluation.
Forward Pricing Proposals

Example is in DCAA’s “Information for Contractors”  [www.dcaa.mil](http://www.dcaa.mil)
Common Deficiencies Found in Forward Pricing Proposals

Failure to provide the basis for proposed material, labor, other direct costs

Lack of a consolidated bill of materials

No support for indirect expenses and/or improper allocation bases

Lack of budgetary data to evaluate indirect rates

Failure to account for period of performance - rates often change each contractor fiscal year
Common Deficiencies Found in Forward Pricing Proposals

Unallowable costs included in proposal (FAR 31.205)

Proposal not mathematically correct

Supporting schedules do not tie into summary

Poor or no index of cost & pricing data

Following examples too closely – if you don’t have a material overhead pool, don’t proposal a material overhead rate
The Allowable Cost And Payment clause (FAR 52.216-7) requires that the contractor submit an adequate final incurred cost proposal together with supporting data, within 6 months after the end of its fiscal year. This proposal should include a signed "Certificate of Indirect Costs" in accordance with FAR 42.703-2. A copy of this certificate may be found in FAR 52.242-4.
Incurred Cost Proposals

The Incurred Cost Electronically (ICE) Model, which is the electronic version of the Model Incurred Cost Proposal in Chapter 6 of DCAA’s DCAAP 7641.90, provides contractors with a standard user-friendly ICE submission package that will assist them in preparing adequate incurred cost proposals in accordance with FAR 52.216-7
Other Potential Audits

Floor Checks

DCAA auditors periodically perform physical observations of work areas and inquiries of employees to determine if: (1) employees are actually at work, (2) employees are performing in their assigned job classification, and (3) employee time is charged to the appropriate job or indirect account. These types of audits are referred to as floor checks. DCAA will perform unannounced floor checks to determine the adequacy and accuracy of the timekeeping system for reimbursement of labor costs under cost reimbursable contracts.

Public Vouchers

The contracting officer may request DCAA to review a public voucher.

Click on Audit Office Locator

DCAA Cognizant Field Audit Office (FAO) Locator

Welcome to the DCAA Locator Web Site.

This Web site queries the DCAA Cognizant FAO database and allows you to find the FAO(s) assigned to a given zip code. Along with each cognizant FAO, there will also be displayed the FAO's e-mail address which when selected will automatically generate a pre-addressed e-mail message for requesting DCAA services.

Enter a contractor's 5-digit zip code and the system will display the cognizant field audit office responsible for that area.

For 5-digit zip code information not found through the Search, the system will automatically submit an electronic request to our web site and continue to search for the cognizant FAO which most closely matches the first three digits of the 5-digit zip code entered.
Type in Contractor’s Zip Code and Hit Search
The Defense Contract Audit Agency, under the authority, direction, and control of the Under Secretary of Defense (Comptroller), is responsible for performing all contract audits for the Department of Defense, and providing accounting and financial advisory services regarding contracts and subcontracts to all DoD Components responsible for procurement and contract administration. These services are provided in connection with negotiation, administration, and settlement of contracts and subcontracts. DCAA also provides contract audit services to some other Government Agencies.

The ICE Model

Incurred Cost Electronically (ICE) Model
October 11, 2002 Version

The ICE Model, which is the electronic version of the "Model Incurred Cost Proposal" in Chapter 6 of the DCAAP 7641.90, provides contractors with a standard user-friendly ICE submission package that will assist them in preparing adequate incurred cost proposals in accordance with FAR 52.216-7, "Allowable Cost and Payment." (Please see note 1 below.) To assist contractors in meeting this requirement, this web page provides the October 11, 2002 version of DCAA's electronic model incurred cost proposal. The ICE Program changes included with this current version are summarized in the Word document, ICE Program - Major Changes.

If this is your first experience with the ICE Model, please contact your local DCAA Office to discuss the model and its requirements before preparing the proposal.

To download and execute the ICE Model files:

- Create a folder on the C: drive and name it ICE.
- Download the WinZip file, ice.zip, to the ICE folder. Then select "Open".
- Locate the ICE file in your ICE folder using My Computer or Windows Explorer.
- Before you open the ICE file, please see note 2 below.
- Double-click on ICE and the WinZip dialog box will open.
- Make certain the folder specified in the "selected folder" field is the ICE folder.
- Press the "Unzip Now" button and the files will extract.
- From the WinZip dialog box, press the "Close" button to exit.
- Your ICE folder will now show the ICE file plus one Word (.doc) file and two Excel (.xls) files.
- Open both MSample.xls and ICE MANUAL.doc. MSample.xls is linked to the ICE MANUAL Index. The manual includes user instructions, the purpose of each schedule, and identifies the linking among schedules in MSample.xls. The second Excel file (ICEDEMO.xls) can also be opened to view completed sheets and formulas while inputting into MSample.xls.
Final Comments

The following references will not address all of the regulations nor answer all your questions. However, when it comes to cost and accounting issues, the following references provide a very good foundation for SBIR contractors:

- FAR Part 15 Contracting by Negotiation
- FAR Part 31 Contract Cost Principles and Procedures
- DCAAP 7641.90 “Information for Contractors” The entire book is good, but the following are key for SBIRs
  - Chapter 2 - Preaward Surveys
  - Chapter 3 - Price Proposals
  - Chapter 5 - Contract Financing and Interim Billing
  - Chapter 6 – Incurred Cost Projections
