

Hexavalent Chromium Reduction in the Aerospace Industry

Lisa Goldberg
Director, Environment, Health and Safety,
Aerospace Industries Association
SERDP/ESTCP Symposium
December 1, 2010

Report Documentation Page

*Form Approved
OMB No. 0704-0188*

Public reporting burden for the collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Washington Headquarters Services, Directorate for Information Operations and Reports, 1215 Jefferson Davis Highway, Suite 1204, Arlington VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to a penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.

1. REPORT DATE 01 DEC 2010	2. REPORT TYPE	3. DATES COVERED 00-00-2010 to 00-00-2010			
4. TITLE AND SUBTITLE Hexavalent Chromium Reduction in the Aerospace Industry		5a. CONTRACT NUMBER			
		5b. GRANT NUMBER			
		5c. PROGRAM ELEMENT NUMBER			
6. AUTHOR(S)		5d. PROJECT NUMBER			
		5e. TASK NUMBER			
		5f. WORK UNIT NUMBER			
7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES) Aerospace Industries Association, 1000 Wilson Blvd., Suite 1700, Arlington, VA, 22209		8. PERFORMING ORGANIZATION REPORT NUMBER			
9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES)		10. SPONSOR/MONITOR'S ACRONYM(S)			
		11. SPONSOR/MONITOR'S REPORT NUMBER(S)			
12. DISTRIBUTION/AVAILABILITY STATEMENT Approved for public release; distribution unlimited					
13. SUPPLEMENTARY NOTES Presented at the 15th Annual Partners in Environmental Technology Technical Symposium & Workshop, 30 Nov ? 2 Dec 2010, Washington, DC. Sponsored by SERDP and ESTCP. U.S. Government or Federal Rights License					
14. ABSTRACT AIA and its members have a long history in minimizing the use of hexavalent chromium in the manufacture of its products. Included in that history are the results of over 25 years of working with DoD engineering professionals through a variety of projects to test hexavalent chromium product replacements. Hexavalent chromium test data have been shared among companies within the industry since the early 1980s. Success in replacement use occurred for some sealant, primer, and plating applications. The industry continues to evaluate replacements for conversion coating, anodizing, descaling, passivation plating, cleaning and many other process and materials applications. Through the many individual company and joint research and testing programs, AIA members learned that the development and implementation of hexavalent chromium replacement compounds is exceptionally complex. Certification and qualification testing continues for many applications due to unique customer or weapon system requirements. Implementation of replacements are often hindered by cost and technical risks to a product's other system requirements. With increasing regulatory and public pressure to further reduce hexavalent chromium usage, the aerospace industry continues to seek alternatives.					
15. SUBJECT TERMS					
16. SECURITY CLASSIFICATION OF:			17. LIMITATION OF ABSTRACT Same as Report (SAR)	18. NUMBER OF PAGES 17	19a. NAME OF RESPONSIBLE PERSON
a. REPORT unclassified	b. ABSTRACT unclassified	c. THIS PAGE unclassified			

KEYNOTE ADDRESS
HEXAVALENT CHROMIUM REDUCTION IN THE AEROSPACE INDUSTRY

MS. LISA GOLDBERG
Aerospace Industries Association
1000 Wilson Blvd., Suite 1700

3rd century BC: Bronze tipped weapons found near Xian, China

- Not Corroded
- Analysis: Chromium coating

1761: Lehmann found an orange-red mineral in the Ural Mountains

- Named it: Siberian red lead.
- Chemically: lead chromate
- Popularly Known: mineral crocoite

1797-8: Vauquelin received samples of crocoite ore

- $\text{PbCrO}_4 + \text{hydrochloric acid (HCl)} \rightarrow \text{chromium oxide } \text{CrO}_3$
- Isolated Metallic Chromium: $\text{CrO}_3 + \text{Heat} \rightarrow \text{Cr}$

1800: Tassaert found chromium in an ore: chromite (PbCrO_4)

- Lead Chromate: Today a major source of chromium.

1800's: Usage: Component: paints and tanning salts

Today: Usage: 85-95%: metal alloys (aerospace, automotive)

5-15 % : chemical, refractory & foundry industries.

- High performance anti-corrosive
- Moisture Barrier
- Components must withstand:
 - Extreme temperature
 - Altitudes
- Atmospheric and Temperature Changes
- Repeated Take-off and Landings
 - Repeated Speed and acceleration changes

50+ Year History in Aerospace Industry

- Applied to Structures
- Coatings
- Pre-coating treatment for metal parts
- Chemical conversion coatings with aluminum and aluminum alloy
 - MIL-DTL-5541F,
- Anodizing
- Electroplating

1. Irritation/damage to the nose, throat, and lung (respiratory tract)
2. Irritation/damage to the eyes and skin from contact
3. Acute Toxicity
 - Kidney, Liver and Blood Cell damage
4. Carcinogenicity
 - Lung Cancer in workers: airborne ingestion

In United States:

1. Environmental Protection Agency ([EPA](#))
 1. Clean Air Act ([CAA](#))
 - Hazardous air pollutant ([HAP](#)) in accordance with the Aerospace National Emission Standards for Hazardous Air Pollutants ([NESHAP](#))
 - Safe Drinking Water Act
2. Occupational Safety and Hazard Administration ([OSHA](#))
 - Worker Protection Permissible Exposure Limit
3. DoD
 - Minimization Policy → Proposed Contract limits (DFAR)

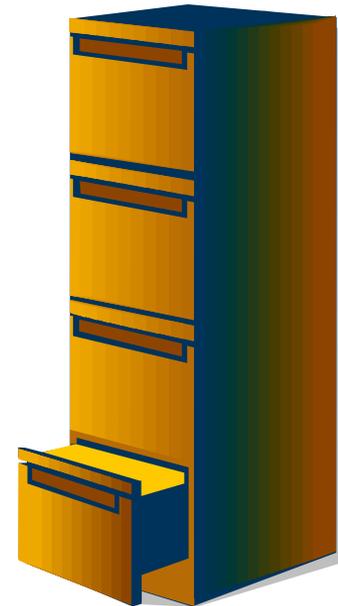

In the European Union EU:

1. REACH
 - a) Candidate list
 - PbCrO_3 ,
 - NaCrO_3
 - KCrO_3 and
 - $2\text{K}_2(\text{CrO}_3)$

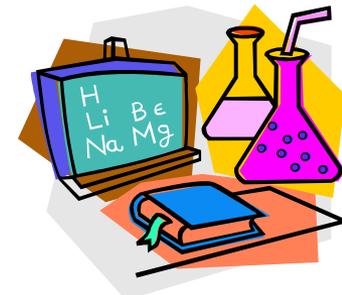

Content Reductions

- + Coating Substitutions
- + Tri-Chrome Introductions

Total = Difficult to Quantify (few baseline records)

1. Human Resistance
2. Product Performance Requirements
3. Cost/Funding
 - a. Research
 - b. Qualify/Performance Testing
 - c. Scale Up: Bench → Pilot → Production
4. Specifications and Standards
 - a. Military/Industry/Contract
5. Lack Documentation for all Applications
 - a. Supply chain data uncertain
 - b. No Requirements to provide complete composition data
 - c. Proprietary Formulas

“Drop In Replacement” vs. “Alternative Strategy”

- Preferred Mode
- Not always Possible
- Domino Effect (One change here → other changes elsewhere in product or process)

Engage all stakeholders

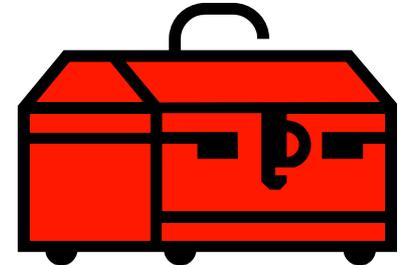

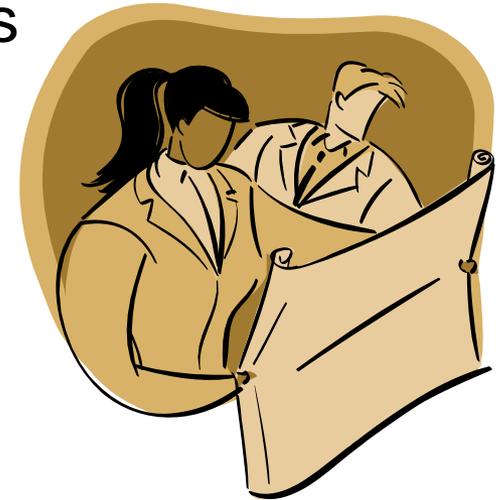

1. Identify all Stakeholders
 - i. Customers
 - ii. Designers
 - iii. Contracts/Logisticians
 - iv. Materials Engineers
 - v. Environmental
 - vi. Health and Safety
2. Identify and Track Uses/Applications
3. Assess Impacts
4. Performance Requirements
5. Risks
6. Alternatives
 - i. Material
 - ii. Process
 - iii. Performance

Manage Chemical Management Changes

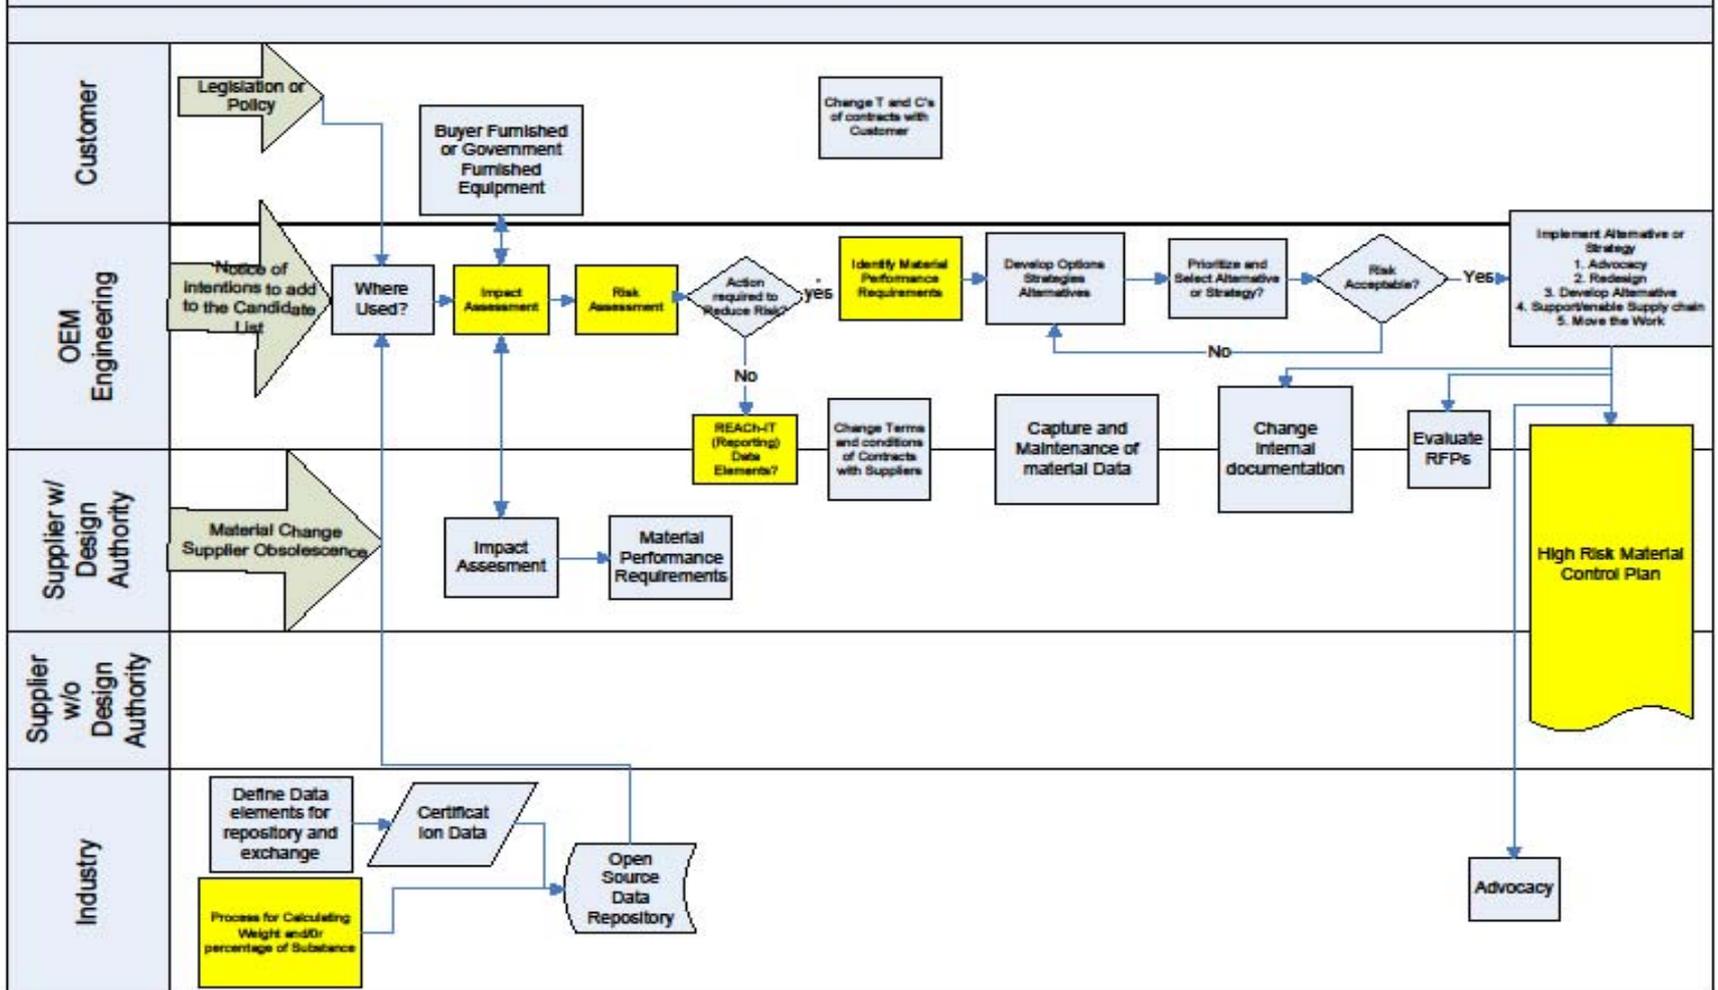

- Regulatory Restrictions
- Obsolescence
- Market Changes
- Availability

Need Tools to Predict Changes

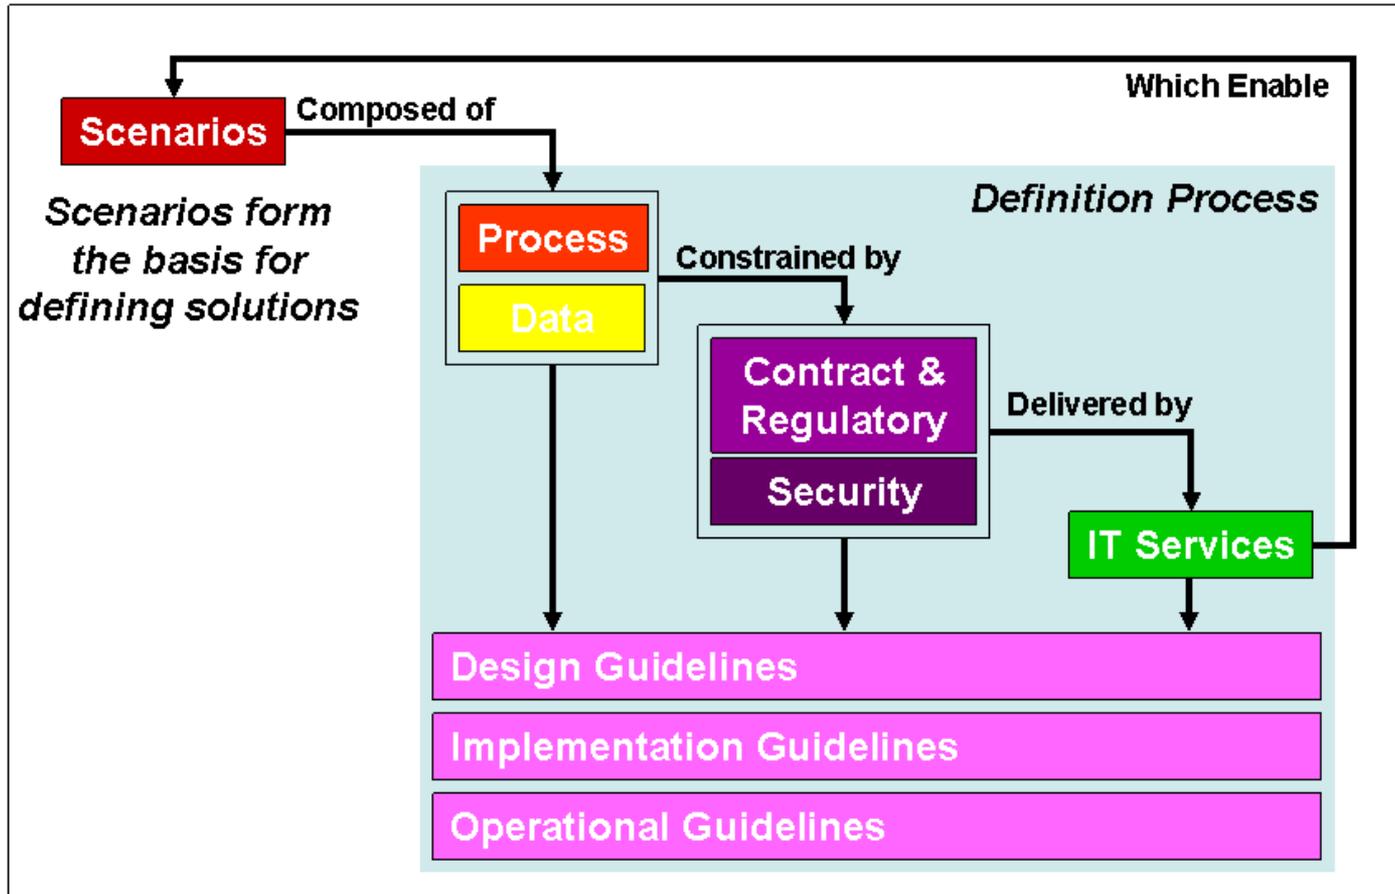

- IT Guidelines
- Engineering Plan/Scenario

REACH – Engineering Scenario for a change in Material requirement due to an external influence such as: Regulatory Mandate, availability, or Market Forces; perceived or otherwise

Delivering Business Solutions

AIA Members participate in:

1. The Aerospace Chrome Eliminate Project
 - a. Sealant
 - b. Primer
 - c. Plating Application
2. NASA –TEERM (Technology Evaluation for Environmental Risk Mitigation)
 - Coating Systems (Pretreatment, primer and topcoat) for avionic applications
3. DoD Programs
 - Lockheed Martin and the F-35
 - *Primers*
4. AIA Material Working Group
5. Individual Corporate Programs

1. DoD/NASA/AIA Sustainable Materials Management
2010 Workshops

Next Steps: Planning Stages

Identify Opportunities for Collaboration

2. AIA/ASD REACH Engineering Alternatives 2010
American/European Collaboration on Alternatives

2010 Workshop in Toulouse Fr:

Best Practice Sharing

Next Steps: Identify Collaborative Opportunities

- Need for Hexavalent Chromium Alternatives Growing
- Replicating Performance: Significant Hurdle
- Solid and Large Body of Work to Build Upon
- Baseline Existing Work
- Collaboration Recommended
 - Across Industry/Gov't/Academia
- Develop Tools and Process to Guide Efforts
 - IT and Engineering
- Lessons Learned will be Needed for the Next Chemical/Substance Target
