Same as Report (SAR)
Qualification Description

• Qualification is a process that:
  – Demonstrates through testing a producer’s ability to make a specified product or family of products
  – Certifies that the manufacturer’s product or family of products is in compliance with the governing specification
Qualification Requirement

• Requirement for qualification must be specified in Section 3 of the specification

• Technical requirement for offeror to demonstrate capability prior to:
  – Bid opening (sealed bid)
  – Contract award (negotiation)
Qualification Policy

• Guidance for qualification is in:
  – Federal Acquisition Regulation, Subpart 9.2., Qualification Requirements
  – DoD 4120.24-M, Defense Standardization Policies and Procedures
  – SD-6, Provisions Governing Qualification
  – Federal Standardization Manual (for Federal Specifications)
Qualification

- Qualification criteria is prohibited in Commercial Item Descriptions
- Non-Government Standards (NGSs) may have a qualification requirement
  - DoD may be the Qualifying Activity, or there may be third party certification, such as the Performance Review Institute (PRI)
Qualification Oversight

- Initial qualification requirements in a specification require approval by the cognizant Departmental Standardization Office (DepSO).
- Waiver of qualification criteria can only be granted by the Preparing Activity, or, in the case of a Critical Safety Item, the Design Control Activity.
Qualification Criteria

- Testing time will exceed 30 days
- Test equipment is not readily available
- Life survival/emergency equipment
- Items designated as safety critical in the Federal Logistics System
- Ensure performance, quality & reliability, reduce risk of catastrophic failure to mission, equipment, safety, or life
Qualification Considerations

• No other practical way to obtain evidence of availability of products meeting requirements

• Two or more manufacturers are available and willing to submit products for qualification testing

• Test facilities and resources are available (estimated cost of testing and evaluation has been determined)
Qualification
Pluses & Minuses

• Advantages:
  – Avoid delivery delays for long-term or specialized testing
  – Can reduce inspection burden

• Disadvantages:
  – Administrative Burden
  – Lab facilities can be costly
  – It can limit competition
Qualification Retention

• Qualification is for a set period
  – Usually 1-3 years, some commodities longer (e.g. packaged lubricants).

• Retention not automatic

• Three modes for retention
  – Certification by manufacturer
  – Submission of new test data
  – Complete requalification
Qualified Products Database

DoD has an online database to manage qualification data (QPD)

- Access via https://assist.daps.dla.mil
- QPD went live in April 2006
- 96% of Paper QPLs and QMLs have been transitioned into the QPD
Qualified Products Database

• Level of access to QPLs is driven by the users role
• Users need an individual ASSIST account to load and maintain QPL Data
• Users with an ASSIST account can:
  – Conduct searches by part number, source name, governing spec, FSC, etc.
  – Run standard reports (i.e. manufacturer’s parts by CAGE code, or Gov’t designation)

• Distribution Statement A-Cleared for release by Public Affairs on 10 August 2011
Qualified Products Database

• Users may also access QPL data (read only) from either ASSIST QuickSearch or www.assistdocs.com.

• To be published in the QPD, suppliers must be registered in the Central Contractor Registry (www.ccr.gov) in an active status.
Qualified Products Database

• Most of the static paper QPLs have been transitioned into the QPD
• There is only a small percentage of paper QPL’s in the ASSIST—most have been converted to electronic QPLs
Qualified Products Database

• If you search in the ASSIST for a QPL that has been converted, clicking on the qualification link on the Document Analysis page (overview section) will take you to the QPL in the QPD

• Qualification Policy is being revised to reflect the new automated process

(see policy memo 07-03 for more information at http://www.dsp.dla.mil)
Qualified Products Database

To access the QPD, first log onto the ASSIST: https://assist.daps.dla.mil

After the DODSSP has reviewed and approved your application, a user account will be sent to the E-mail address you entered in your online application.

You will also be sent a temporary password in a separate E-mail.
Qualified Products Database
Qualified Products Database

Click on QPD Link
Due to a change in DoD policy, suppliers wishing to maintain their retention on a QPL/QML must be registered with the Central Contractor Registration (www.ccr.gov) and must maintain their registration in an active status.
Qualified Products Database

To comply with revised DOD policy, suppliers who wish to be listed or retained on a QPL or QML must register with Central Contractor Registration (CCR) @ www.ccr.gov and maintain their CCR registration in an "Active" status.

This QPL has been prepared for use by or for the Government in the acquisition of products covered by the subject specification and inclusion of a product is not intended to and does not connote endorsement of the product by the Department of Defense. All products included herein have been qualified under the requirements for the products as specified in the latest effective issue of the applicable specification. This QPL is updated as necessary and is subject to change without notice. Inclusion of a product does not release or otherwise affect the obligation of the manufacturer to comply with the specification requirements.

Qualified Products Database

The Qualified Products Database is a web-based tool designed to provide a comprehensive list of qualified products. It allows users to search for products by various criteria, such as government designation, type, form, grade, or classification. The database is searchable by grade, type, form, and subform, and it includes specific product descriptions, such as insulation, electrical, synthetic resin composition, nonrigid.

The database is useful for identifying qualified products for specific applications and ensuring compliance with government standards.

Privacy and Security Information and Section 508 Compliance Information

Unauthorized Access to the United States Government Computer System and Software is prohibited by Public Law 98-477 (The Computer Fraud and Abuse Act of 1986) and can result in administrative, disciplinary or criminal proceedings.
ASSIST-Quick Search provides direct access to Defense and Federal specifications and standards available in the official DoD repository, the ASSIST database. Enter your search criteria in one of the search fields to locate documents available for distribution by the ASSIST. Click on the label next to each search field block for a description and examples of search criteria.

(Please note that you can enter search criteria in more than one search field, however, Quick Search will then only find documents that satisfy all of the specified search criteria. If your search doesn’t yield the results you expected, please try again using only one search parameter, such as the document number.)
Example #1:
Enter QPL-10509 in Document ID text field
Qualified Products Database

Document ID: QPL-10509

Overview
Title: Resistors, Fixed, Film (High Stability), General Specification for (Replaced by the Qualified Products Database (QPD) see Notice for Additional Information)
Status: Active
FSC/Areas: 5905
Doc Category: Qualified Products List (Military)

Responsibilities
Lead Standardization Activity: CC
Preparing Activity: CC
Coordination: Full

Changes to military standards or handbooks issued after August 1, 2003 are incorporated in the modified document.

Revision History
QPL-10509, which identifies products meeting the requirements for qualification in MIL-R-10509, has been transformed into an electronic QPL in the Qualified Products Database (QPD). View QPD data for this specification.

Qualified Products Database

Qualified Products Database

The Qualified Products Database is a tool for finding government parts. It includes a Quick Search feature that allows users to filter by various criteria such as specification, date, and status. The database is updated regularly, as indicated by the date of the latest update, 28-JUL-2010.
