THIS PAGE IS UNCLASSIFIED
TITLE: M151 Transmission Clutch Hub Insert - P/N 7059129

OBJECT:
Metallurgical evaluation.

MATERIAL SUBMITTED:
Quantity 2, P/N 7059129, Manufacturer A. M. General, Contract No. DAAE07-70-C-4851, Submitted by AMSTA-QST.

TEST RESULTS:

1. Visual Examination:
One of the inserts had a dark heat color on one end and considerable wear on the surface of the other end. The second insert was broken at one end and also had heavy surface wear near the other end.

2. Magnetic Particle Inspection:

3. **Hardness Test:** (See Table(s) --, --, --)

   **Scale Used:** Rockwell 15N

   **Required:** Surface Hardness
   Core Hardness
   Total Case Depth
   Hardness at Depth

<td>0.02% below lower limit (based on check analysis).</td>
</tr>
</tbody>
</table>
COMMENTS:

1. The insert examined failed to meet drawing requirements for case depth and chemistry. The depth of the case was found to exceed the specified upper limit by 0.004 of an inch and the manganese content of the steel was 0.02% below the lower limit for the range of steel specified.

2. Such variations are not considered detrimental to the function of this component. The damage and failure of the inserts is attributed to mechanical rather than metallurgical factors. The heat discoloration and surface wear indicate that there is extensive metal to metal contact and possible overload which tend to reduce the structure integrity of the component.

3. All tests were conducted on equipment bearing current certification of calibration.

Inclosure I
MEMORANDUM FOR Defense Technical Information Center (DTIC-OQ), 8725 John J. Kingman Road, Fort Belvoir, VA 22060-6218

SUBJECT: Change of Classification Level to 4M151 Truck Documents

2. In accordance with the above reference, please change the classification and distribution level for the following documents:

   (1) The DTIC AD#: ADB271644
   (2) Title: M151 Transmission Clutch Hub Insert – P/N 7059129
   (3) Date of Document: 29 February 1972
   (4) New Distribution/Classification: Distribution A. Approved for public release; distribution is unlimited.
   (5) Reason for Change: This document has been reviewed for Operations Security (OPSEC) and has been deemed to contain no OPSEC concerns. The documents are for the M151 Truck that has not been in the military inventory since the early 1980s; the vehicle and associated documents are obsolete.
   (6) Date of Change: Immediately

   (1) The DTIC AD#: AD0474825
   (2) Title: ENGINEER DESIGN TEST OF TRUCK, UTILITY, 1/4-TON, 4X4, M151 (RIDE AND HANDLING CHARACTERISTICS)
   (3) Date of Document: 15 December 1965
SFAE-CSS
SUBJECT: Change of Classification Level to 4M151 Truck Documents

(4) New Distribution/Classification: Distribution A. Approved for public release; distribution is unlimited.

(5) Reason for Change: This document has been reviewed for OPSEC and has been deemed to contain no OPSEC concerns. The documents are for the M151 Truck that has not been in the military inventory since the early 1980s; the vehicle and associated documents are obsolete.

(6) Date of Change: Immediately

(1) The DTIC AD#: AD0857240

(2) Title: Product Improvement Test of Truck, Utility, 1/4-TON, 4X4, M151 Series with Modified Independent Rear Suspension System

(3) Date of Document: 27 June 1969

(4) New Distribution/Classification: Distribution A. Approved for public release; distribution is unlimited.

(5) Reason for Change: This document has been reviewed for OPSEC and has been deemed to contain no OPSEC concerns. The documents are for the M151 Truck that has not been in the military inventory since the early 1980s; the vehicle and associated documents are obsolete.

(6) Date of Change: Immediately

(1) The DTIC AD#: ADB273320

(2) Title: Bonded vs. Riveted Brake Lining Test

(3) Date of Document: 12 January 1977

(4) New Distribution/Classification: Distribution A. Approved for public release; distribution is unlimited.
