Discussion – Paper 28

Pace of Change: Can you Cope?
Speed vs. maneuverability
Greater field of view in US aircraft, although less man. Than Russian aircraft
Greater orient/visualisation
OODA loop

Lind ODOA, applies better outside air force conference
Visualisation solution does not work in every context

People see same thing differently

Ray Kurzweil—Braille, nanobots
Computing speed doubling every three months by 2020
Have to design future systems now, not current systems, b/c by the time they’re built computing power has increased considerably

Quadrant one internal awareness
Quadrant two
Internal responsiveness
Quad 3
Responsiveness
Quad 4
External responsiveness
Wealth in innovation, not optimization
Balance between risk and effectiveness of innovation
People have values not organizations
Stop developing independently—develop a strategy for working group, take it to the brass
Leveraging collective wisdom to be more strategic and innovative
Institutional pride not seen in group—rather seeing institutional frustration
Managers of work rather than of people—be stewards evangelists of a combined effort
