INTRODUCTION

The present report contains a listing of personalities and organizations engaged in research in the field of quantum radiophysics, and specifically on maser and laser devices. The time span covered by this report is largely that of the period of development of the subject in the USSR, ranging from about 1954 to the present. Entries bearing earlier dates have been included in some cases when their relationship to the main subject of this report was considered close enough.

Each entry in the list consists of the author's name, the name of the organization associated with the author, the title of his work and the bibliographic reference. Co-authors are listed by separate entries. The author's association with an organization is indicated only when the name of the organization appears in the article cited. The names of organizations and periodicals have been abbreviated and their full versions given in separate tables.
