U.S.S. BUTTE (APA 68)

SHIP CHARACTERISTICS

Building Yard: Consolidated Steel Corp.; Wilmington, California.

Commissioned: 21 November 1944.

HULL

Length Overall: 426 feet 0 inches.
Length on Waterline: 400 feet 0 inches.
Beam (extreme): 58 feet 0 inches.
Depth (molded to upper deck): 37 feet 0 inches.
Drafts at time of test: Fwd. 8 feet 8 inches.
Aft. 18 feet 4 inches.
Limiting displacement: 7,080 tons.
Displacement at time of test: 5,880 tons.

MAIN PROPULSION PLANT

Main Engines: Two sets of Westinghouse steam turbines, directly connected to Westinghouse main generators. Two main shaft motors.
Main Condensers: Two are installed in ship.
Boilers: Two Babcock and Wilcox boilers are installed in ship. 450 psi gauge - 750° F.
Propellers: Two are installed in ship.
Main Shafts: Two are installed in ship.
Ships Service Generators: Five are installed in ship.
Three - 250 KW. - 450 V. - A.C.
Two - 100 KW. - 120/240 V. - D.C.
OVERALL SUMMARY

I. Target Condition After Test.

(a) Drafts after test; general areas of flooding, sources.

There was no flooding, hence no change in drafts or list.

(b) Structural damage.

HULL

There is no apparent structural damage. A fragment pierced the upper deck at frame 150, starboard.

MACHINERY

No comment.

ELECTRICAL

No structural damage observed which affected electrical equipment.

(c) Other damage.

HULL

Not observed.

MACHINERY

The machinery of this vessel was not damaged by Test B, so far as can be determined by visual inspection.
ELECTRICAL

No electrical damage was observed as a result of Test B.

II. Forces Evidenced and Effects Noted.

(a) Heat.

HULL

None.

MACHINERY

No evidence.

ELECTRICAL

There was no evidence of heat.

(b) Fires and explosions.

HULL

None.

MACHINERY

No evidence.

ELECTRICAL

There was no evidence of fires or explosions.

(c) Shock.

HULL

None.
MACHINERY

Leads left in the bearings of one main turbo-generator and one ship's service generator during the test indicate very slight motion of the rotors. This indicates that the BUTTE received a slight underwater shock.

ELECTRICAL

There was no evidence of shock on electrical equipment.

(d) Pressure.

HULL

None.

MACHINERY

No evidence.

ELECTRICAL

There was no evidence of pressure on electrical equipment.

(e) Effects peculiar to the Atomic Bomb.

HULL

None.

MACHINERY

None, except radioactivity.

ELECTRICAL

There was no effects noted that are considered peculiar to the atomic bomb other than radioactivity.
III. Results of Test on Target.

(a) Effect on machinery, electrical, and ship control.

HULL

Not observed.

MACHINERY

None, as far as can be determined by visual inspection. No machinery except the emergency diesel generator and diesel fire pump were operated on this vessel after Test B, because of radiological hazard. Radioactivity was moderately high topside and was present in the machinery spaces in a few isolated spots, all near the shell of the ship, when she was inspected 15 days after the test.

ELECTRICAL

Although operability tests were not made, no evidence could be found that electrical equipment or ship control were affected by this test.

(b) Effect on gunnery and fire control.

HULL

Not observed.

MACHINERY

No comment.

ELECTRICAL

Gunnery and fire control were unaffected, electrically.
(c) Effect on watertight integrity and stability.

HULL

None.

MACHINERY

No comment.

ELECTRICAL

None.

(d) Effect on personnel and habitability.

HULL

None.

MACHINERY

None, except radioactivity.

ELECTRICAL

It is considered the only effect on personnel and habitability would have been that due to radioactivity.

(e) Effect on fighting efficiency.

HULL

None.

MACHINERY

None, except radioactivity. It should be noted that the boats, stowed inboard of the davits, had much higher radioactivity than any
other place on the ship. In view of the ship's mission as a transport, this might have a serious effect on her fighting efficiency. As all machinery was fully operable, she could presumably have steamed out of the contaminated area without being seriously affected by radioactivity in water around the ship. This, however, would not affect the radioactivity topside, as in the boats, which came from the water thrown upon the vessel by the explosion.

ELECTRICAL

There was no effect on the fighting efficiency of this vessel as a result of test B from electrical failures. It is considered that except for personnel casualties due to radioactivity, this vessel's fighting efficiency would have been unimpaired.

IV. General Summary.

HULL

No comment.

MACHINERY

The BUTTE was outside the effective range of physical damage from the explosion in Test B.

ELECTRICAL

The distance of this vessel from the blast was too great for electrical damage to occur.

HULL

None.

MACHINERY

None.

ELECTRICAL

None.
TECHNICAL INSPECTION REPORT

SECTION I - HULL

GENERAL SUMMARY OF HULL DAMAGE

I. Target Condition After Test.

(a) Drafts after test, general areas of flooding, sources.

There was no flooding, hence no change in drafts or list.

(b) Structural damage.

There is no apparent structural damage. A fragment pierced the upper deck at frame 150, starboard.

(c) Other damage.

Not observed.

II. Forces Evidenced and Effects Noted.

(a) Heat.

None.

(b) Fires and explosions.

None.

(c) Shock.

None.

(d) Pressure.

None.
(e) Effects peculiar to the atomic bomb.

None.

III. Results of Test on Target.

(a) Effect on machinery, electrical and ship control.

Not observed.

(b) Effect on gunnery and fire control.

Not observed.

(c) Effect on watertight integrity and stability.

None.

(d) Effect on personnel and habitability.

None.

(e) Effect on fighting efficiency.

None.

IV. General Summary.

No comment.

V. Recommendations.

None.

SECRET

U. S. S. BUTTE (APA68)
Details of the actual quantities of the various items aboard are included in Report 7, Stability Inspection Report, submitted by the ship's force in accordance with "Instructions to Target Vessels for Tests and Observations by Ship's Force" issued by the Director of Ships Material. This report is available for inspection in the Bureau of Ships Crossroads Files.
DETAILED DESCRIPTION OF HULL DAMAGE

A. General Description of Hull Damage.

No significant damage. General views of the ship after
Test B are on pages 32 and 33.

B. Superstructure.

No damage.

C. Turrets, guns and directors

No damage.

D. Torpedo mounts, depth charge gear.

Not applicable.

E. Weather deck.

Sixteen hatch boards from the forward cargo hatch and ten
hatch boards from the after hatch were dislodged and fell through to
the main deck. A fragment pierced the upper deck at frame 150,
starboard (Photos. 1874-1 and 2; pages 34 and 35).

F. Exterior hull.

No damage.

G. Interior compartments (above waterline).

No damage.
H. Armor decks and miscellaneous armor.
   Not applicable.
I. Interior compartments (below waterline).
   No damage.
J. Underwater hull.
   No damage.
K. Tanks.
   No damage.
L. Flooding.
   None.
M. Ventilation.
   No damage.
N. Ship control.
   No damage.
O. Fire control.
   No damage.
P. Ammunition behavior.
   No damage.
Q. Ammunition handling.
   No damage.
R. Strength.
No damage.

S. Miscellaneous.
No comment.
GENERAL SUMMARY OF MACHINE" DAMAGE

I. Target Condition after Test.
   (a) Drafts after test; list; general areas of flooding, sources.
       No data taken by machinery group.
   (b) Structural damage.
       No comment.
   (c) Other damage.
       The machinery of this vessel was not damaged by Test B, so far as can be determined by visual inspection.

II. Forces Evidenced and Effects Noted.
   (a) Heat.
       No evidence.
   (b) Fires and explosions.
       No evidence.
   (c) Shock.
       Leads left in the bearings of one main turbo-generator and one ship's service generator during the test indicate very slight motion of the rotors. This indicates that the BUTTE received a slight underwater shock.
(d) Pressure.

No evidence.

(e) Effects apparently peculiar to the atom bomb.

None, except radioactivity.

III. Effects of Damage.

(a) Effect on machinery and ship control.

None, as far as can be determined by visual inspection. No machinery except the emergency diesel generator and diesel fire pump were operated on this vessel after Test B, because of radiological hazard. Radioactivity was moderately high topside and was present in the machinery spaces in a few isolated spots, all near the shell of the ship, when she was inspected 15 days after the test.

(b) Effect on gunnery and fire control.

No comment.

(c) Effect on water-tight integrity and stability.

No comment.

(d) Effect on personnel and habitability.

None, except radioactivity.

(e) Total effect on fighting efficiency.

None, except radioactivity. It should be noted that the boats, stowed inboard of the davits, had much higher radioactivity than any other place on the ship. In view of the ship's mission...
as a transport this might have a serious effect on her fighting efficiency. As all machinery was fully operable she could presumably have steamed out of the contaminated area without being seriously affected by radioactivity in water around the ship. This, however, would not affect the radioactivity topside, such as in the boats, which came from the water thrown upon the vessel by the explosion.

IV. General Summary.

The BUTTE was outside the effective range of physical damage from the explosion in Test B.

V. Preliminary Recommendations.

None.
DETAILED DESCRIPTION OF MACHINERY DAMAGE

A. General Description of Machinery Damage.

1. This vessel sustained no apparent damage to machinery as a result of Test B.
   (a) Overall Condition.
   The overall condition of the machinery was unchanged by Test B.
   (b) Areas of major damage.
   There was no area of major damage.
   (c) Primary cause of damage in each area of major damage.
   Not Applicable.
   (d) Effect of target test on overall operation of machinery plant.
   The test had no apparent effect on the operation of the machinery plant.
   NOTE: Because of radiological hazard no machinery on this vessel except the emergency diesel generator and diesel fire pump has been operated since Test B.

B. Boilers.

No apparent damage.

C. Blowers.

No apparent damage.

D. Fuel Oil Equipment.

No apparent damage.
E. Boiler Feedwater Equipment.

No apparent damage.

F. Main Propulsion Machinery.

No apparent damage. Leads left in the bearings of the forward main turbo-generator indicate a slight vertical motion of the rotor during the test, with a possible maximum of .003 inch.

SECRET

USS BUTTE (APA68)
M. Propellers.

Not inspected. There is no reason to believe that they were damaged.

N. Distilling Plant.

No apparent damage.

O. Refrigeration Plant.

No apparent damage.

P. Winches, Windlasses, and Capstans.

No apparent damage.

Q. Steering Engine.

No apparent damage.

R. Elevators, Ammunition Hoists, Etc.

No apparent damage.

S. Ventilation (Machinery).

No apparent damage.

T. Compressed Air Plant.

No apparent damage.

U. Diesels (Generators and Boats).

1. The diesel generator and the diesel fire pumps are undamaged. They were operated under service conditions after Test B.
2. Boats stored aboard during the test are apparently undamaged mechanically, but have fairly high radioactivity. The highest radioactivity of any locality on this vessel is in these boats.

V. Piping Systems.

    No apparent damage.

W. Miscellaneous.

    No apparent damage.
TECHNICAL INSPECTION REPORT

SECTION III - ELECTRICAL

GENERAL SUMMARY OF ELECTRICAL DAMAGE

I. Target Condition After Test.

(a) Drafts after test; list; general areas of flooding, sources.

Drafts or list were not observed. There was no flooding.

(b) Structural damage.

No structural damage observed which affected electrical equipment.

(c) Other damage.

No electrical damage was observed as a result of Test B.

II. Forces Evidenced and Effects Noted.

(a) Heat.

There was no evidence of heat.

(b) Fires and explosions.

There was no evidence of fires or explosions.

(c) Shock.

There was no evidence of shock on electrical equipment.
(d) Pressure.

There was no evidence of pressure on electrical equipment.

(e) Any effects apparently peculiar to the atom bomb.

There was no effects noted that are considered peculiar to the atomic bomb other than radioactivity.

III. Effects of Damage.

(a) Effect on propulsion and ship control.

Although operability tests were not made, no evidence could be found that electrical equipment or ship control were affected by this test.

(b) Effect on gunnery and fire control.

Gunnery and fire control were unaffected, electrically.

(c) Effect on water-tight integrity and stability.

None.

(d) Effect on personnel and habitability.

It is considered the only effect on personnel and habitability would have been that due to radioactivity.

(e) Total effect on fighting efficiency.

There was no effect on the fighting efficiency of this vessel as a result of Test B from electrical failures. It is considered that except for personnel casualties due to radioactivity, this vessel's fighting efficiency would have been unimpaired.
IV. General Summary of Observers' Impressions and Conclusions.

The distance of this vessel from the blast was too great for electrical damage to occur.

V. Any Preliminary General or Specific Recommendations of the Inspecting Group.

None.
DETAILED DESCRIPTION OF ELECTRICAL DAMAGE

A. General Description of Electrical Damage.

(a) Overall condition.

This vessel received no damage to electrical equipment as a result of Test B.

(b) Areas of major damage.

None.

(c) Primary causes of damage in each area of major damage.

There was no electrical damage.

(d) Effect of target test on overall operation of electric plant.

Although operability tests were not conducted, the overall operation of the electric plant was apparently unaffected by this test.

(e) Types of equipment most affected.

None.

B. Electric Propulsion Rotating Equipment.

No damage.

C. Electric Propulsion Control Equipment.

No damage.

D. Generators - Ships Service.
