SUBJECT: Combat Operations After Action Report

6. Intelligence:
   
a. Enemy Situation Before Operation: The VC 186th Local Force Battalion was known to have operated in the area north of the LA Nga River in the Binh Tuy and Lam Dong Provinces. D/82d Local Force Bn was located in northern Long Khanh Province. There had been many unconfirmed reports of large VC and NVA forces within the operational area, but there was little evidence to support these reports. The VC were known to operate Tax Collection Points along National Route 20; therefore, it was possible that Roadrunner operations conducted in conjunction with "AURORA II" might expect to encounter small VC forces. It was believed that the enemy had the capability of reinforcing their local force elements with the 640th Local Force Bn, which operated in Quang Duc and Lam Dong Provinces, and with the VC 274th and 275th Main Force Regiments.

b. Enemy Situation During Operation: The primary intelligence of value established during the operation was that of negation: ground reconnaissance of agent reports that large VC and NVA forces were located within the AO resulted in the subsequent reduction of the agent report and information evaluations to the proper perspective. Twenty-seven contacts were made with VC forces during the operation, eighteen of which were VC initiated. All contacts were with small VC elements of squad size or less. Most VC initiated contacts were minor incidents of sniping, harassment and attempts at reconnaissance of Brigade perimeters during the hours of darkness. Interrogation of detained VC suspects, questioning of Vietnamese commercial vehicle operators, and information of volunter nature.
revealed several locations and other pertinent data concerning VC Taxation Points in the area. Aircraft received ground fire from the area of operation on eleven separate occasions, three sustaining hits.

c. Area of Operations (AO):

(1) Weather Conditions: The climate in the AO was typical of tropical zones affected by the monsoons. Winds were gentle to moderate, occurring during the late afternoon and early evening hours. Visibility was generally fair, with ceilings of approximately 10,000 feet lowering to approximately 1,000 feet during showers.

(2) Terrain: The area is generally covered with steep jungle and brush-covered and deep-cleft stream-filled ravines. A variation is noted in the extreme southern portion of the AO, which is an alluvial valley formed by the La Nga River, the portion of a highly productive area referred to as the 'Rice Bowl'. The dominating terrain features are the steep hills in the area. The main road in the AO is National Route 20. It has a macadam base and a bituminous surface 14 to 18 feet wide and with good alignment and grade. The terrain and vegetation bordering National Route 20 would afford the enemy several excellent ambushes if he should choose to adopt that course of action.

9. Concept of Operation(s):

The 173d Abn Bde (Sep) initiated Operation "AURORA II" in three phases, utilizing air and ground movement. The AO was astride the II and III Corps boundary. An Infantry TF operated in each Corps area. Concurrently, Roadrunner and Anti-VC Tax Collection operations were run along

Route 20, the only highway between Saigon and Dalat. Specific search and destroy operations were assigned the Bde elements during the operation. Liaison was established with the 10th ARVN (III Corps) and with the II Corps elements in the AO.

The operation was conducted in Three (3) Phases as follows:

Phase I - BSCO (Bde Supply Operations Center) was transported to Position CRAB, vicinity Vo Dat (YT 702325), by CH-47's and C-130's, 17 July 1966.

Phase II - Bde elements were transported into AO by air and road, 18-19 July 1966.

Phase III - Redeployment of Bde to Bien Hoa by air and road 30 July - 3 August 1966.

10. Execution:

D - Day (17 July 1966)

a. The 173d Abn Bde (Sep) terminated Operation "AURORA I" and commenced Operation "AURORA II". The BSCO commenced movement of supplies from Position PLUTO to Vo Dat by CH-47's, completing at 1800 hrs. There were 64 sorties flown. The wheeled vehicles returned to Bien Hoa and were airlifted out by C-130's on 18 July. The Bde (-) remained at Position VENUS in preparation for deployment. E/17th Cav introduced 3 Long Range Patrols into AO AURORA II in the following locations: YT's; 906508, 827486, and 823516.
