SECURITY MARKING

The classified or limited status of this report applies to each page, unless otherwise marked. Separate page printouts MUST be marked accordingly.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE LAWS, TITLE 18, U.S.C., SECTIONS 793 AND 794. THE TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW.

NOTICE: When government or other drawings, specifications or other data are used for any purpose other than in connection with a definitely related government procurement operation, the U.S. Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use or sell any patented invention that may in any way be related thereto.
SUBJECT: Operational Report - Lessons Learned, Headquarters, 11th Combat Aviation Battalion, Period Ending 31 October 1968 (U)

1. Subject report is forwarded for review and evaluation in accordance with paragraph 5b, AR 525-15. Evaluations and corrective actions should be reported to ACSFOR OT UT, Operational Reports Branch, within 90 days of receipt of covering letter.

2. Information contained in this report is provided to insure that the Army realizes current benefits from lessons learned during recent operations.

3. To insure that the information provided through the Lessons Learned Program is readily available on a continuous basis, a cumulative Lessons Learned Index containing alphabetical listings of items appearing in the reports is compiled and distributed periodically. Recipients of the attached report are encouraged to recommend items from it for inclusion in the Index by completing and returning the self-addressed form provided at the end of this report.

11th Combat Aviation Battalion
SUBJECT: Operational Report of the 11th Combat Aviation Battalion for Period Ending 31 October 1968, WSPU.SP-65 (RI) (U)

Section 1, Operations: Significant Activities.

a. Mission. During the reported period there have been no changes to the 11th Combat Aviation Battalion's missions.

b. Organization.

(1) During the reported period there have been no changes in the organization of the 11th Combat Aviation Battalion. However, the 162nd Assault helicopter Company is currently in the process of relocating to Dong Tam, RN and will be reassigned to the 214th Combat Aviation Battalion effective 1 November 1968.

(2) The organization of the 11th Combat Aviation Battalion at the close of the reported period is attached as Inclosure 1.

c. Command and Staff.

(1) Significant changes in the 11th Combat Aviation Battalion Command and Staff structure during this reported period are shown below:

COMMAND

(a) On 1 October 1968, LTC Clarence D. Wilks, 075318, replaced LTC William F. Bauman, 068430, as Battalion Commander.

(b) On 5 August 1968, MAJ John P. Ladd, 074322, replaced LTC Clarence D. Wilks, 075318, as Battalion Executive Officer.

(c) On 19 August 1968, MAJ Augustus D. Scott, 05309773, replaced CPT Millard Burke, 0F104383, as Battalion S1.
CONFIDENTIAL

AVGC-AC

SUBJECT: UNCLASSIFIED

13 November 1968

31 October 1968, ECS GSAU-65 (RI) (U)

(d) On 31 August 1968, Maj John L. Carroll, 0587502, replaced Maj Harold E. Culley, 05310663, as Battalion S2.

(e) On 15 October 1968, Maj Edward C. Robinson, 087335, replaced CPT Monte H. Veal, OF106860, as Battalion S4.

UNIT COMMANDS

(f) On 11 September 1968, CPT Harold J. Hayes, 02283532, replaced CPT Donald J. Flohe, 05406141, as Commanding Officer of Headquarters and Headquarters Detachment.

(g) On 15 September 1968, Maj Donald R. Kelsey, 05307234, replaced Maj William H. Jarvis, OF106663, as Commanding Officer of the 128th Assault Helicopter Company.

(h) On 30 September 1968, Maj Morris L. Steenson, 05310067, replaced Maj Lee C. Smith, 083994, as Commanding Officer of the 173rd Assault Helicopter Company.

(2) The current Command and Staff Structure is shown in Inclosure 2.

1. (C) Intelligence.

(1) Physical Security.

(a) An additional tower has been constructed within the battalion's defensive sector of the Phu Loi Base Camp perimeter. The new tower, in conjunction with the existing tower, permits complete day and night observation of the battalion's entire sector of responsibility. Each tower is equipped with FM radio and land line communications, search light, star-light scope, binoculars, M60 machinegun, azimuth indicator, lensatic compass, map, and hand held flares. These towers are used as control centers for the battalion's defensive sector.

(b) Two husch flares per bunker within the battalion's defensive sector have been installed to provide emergency illumination. The flares are employed on each side of a bunker and as near the tactical wire as practical. The flares are sand bagged for protection against small arms fire and shell fragments. Each flare may be command detonated or activated through a trip wire. When ignited, this husch flare burns for about 1 hour illuminating an area approximately 90 meters in diameter.

(2) Internal security - A three row, concertine barbed wire fence with moveable road barriers has been erected, encircling the battalion's
cantonment and aircraft parking areas, to impede possible enemy sapper attacks. Defensive bunkers have been constructed in conjunction with the wire fence to cover by fire probable enemy routes of advance and withdrawal. Each bunker is equipped with land line communication to the Battalion Operation Center. To further protect the aircraft, a vehicle mounted patrol is utilized when enemy attacks are imminent. The patrol vehicle is manned by a three man crew, one of which is an NCO and is equipped with a radio, pedestal mounted M60 machinegun with a co-axially mounted search light, signal and illumination flares, and individual weapons.

J. (C) Operations and Training.

(1) Operations.

(a) During the reported period, the 11th Combat Aviation Battalion supported the following major allied forces: 1st Infantry Division, 9th Infantry Division, 25th Infantry Division, 11th Armored Cavalry Regiment, Capital Military Assistance Command and the 199th Light Infantry Brigade. Elements of these forces were participating in Operation Toan Thang II.

(b) Operation Toan Thang II commenced 3 June 1968 and continues at present. At the close of the reported period the 11th Combat Aviation Battalion had flown 100,389 sorties in 31,051 aircraft flying hours. The units transported a total of 201,349 passengers and 24,598 tons of cargo in support of the operation.

(c) The 11th Combat Aviation Battalion's Pathfinder Detachment was used extensively throughout the reported period. The Pathfinders were utilized during all night airmobile assaults and on all CH-47 missions which consisted of three or more sorties. During this reported period, the 11th Combat Aviation Battalion Pathfinders participated in 19 airmobile assault missions and 4,154 CH-47 missions. They assisted in moving 11,768 passengers and 4,834 tons of cargo. In addition to this heavy work load, the Pathfinders also instructed supported units in proper rigging techniques, procedures for inspecting aerial delivery equipment to determine serviceability, and conducted a comprehensive training program for the 1st Aviation Battalion's Pathfinder Detachment. This was accomplished even though the detachment was below 75 percent strength throughout the period.

(2) Training.

(a) Specialized and refresher training in helicopter airframes (UH-1B, C, D, and CH-47A) and turbine engines (T-53, T-55, T-63) offered by the Army Aviation Refresher Training School.
(ALHTS) continued to furnish the battalion with exceptional maintenance personnel. A technical supply course was also offered for battalion personnel by ALHTS. During this reported period the battalion filled five allocations to the UH-1 airframe course, three allocations to the CH-47A airframe course, two allocations to the T-53 engine course, five allocations to the T-55 engine course, and two allocations to the technical supply course.

(b) The WDU 44/A, 20 grain flechette warhead for the 2.75" FFAR was introduced to the 11th Combat Aviation Battalion during the reported period. An orientation and firing demonstration was conducted for selected members of all 11th Combat Aviation Battalion armed helicopter platoons on 24-26 September 1968. This instruction was followed by a visit to the 11th Combat Aviation Battalion by the Flechette New Equipment Training Team (NLTT) on 1-3 October 1968. During their stay, the NLTT conducted a two hour block of instruction for each of the assault helicopter companies assigned to the 11th Combat Aviation Battalion.

(c) An orientation program has been established by the 12th Combat Aviation Group to familiarize Battalion Operations Center (BOC) duty officers with the problems encountered by the II FFV Army Aviation Element (AAE) and promote a better understanding of the procedures employed in solving these problems at Group level. The program consists of a 24 hour visit to AAE for each assigned BOC duty officer. To date, only one of BOC duty officers has participated in this program. He reported that the program was very enlightening and serves the purpose intended. As a result, a smoother working relationship has been established with AAE.

(d) At the request of the 1st Aviation Battalion, 1st Infantry Division, a courtesy pathfinder training program has been initiated by the 11th Combat Aviation Battalion's PathFinder Detachment. Members of the 1st Aviation Battalion's PathFinder Detachment accompany 11th Combat Aviation Battalion pathfinders on missions in which pathfinders are employed. The training is primarily directed toward:

1. Inspection of rigging equipment to determine serviceability by detecting dry rot, fraying and other signs of materials failure.

2. Proper rigging techniques for all types of CH-47 loads.

3. Conduct of artillery operations utilizing CH-47 helicopters.

4. Pick-up and landing zone operations during airmobile operations.

The ultimate objective of this program is to substantially reduce the number of dropped loads within the 1st Infantry Division and promote a more efficient utilization of CH-47 helicopters.
(e) During the reported period an orientation program was initiated to familiarize Royal Australian Army pilots with the techniques and procedures employed by the United States Army on airmobile assaults. 2LT William A. Heron, 161st (Independent) Reconnaissance Flight visited the 11th Combat Aviation Battalion during the month of October. He spent his first week with the Battalion Operations Center (BOC) in order to develop a general understanding of the overall employment of the battalion and how mission assignments are made to subordinate units. The next two weeks, he spent with the 162nd Assault Helicopter Company observing combat assaults from the Command and Control Aircraft. This orientation training included basic armed and troop carrying helicopter tactics as well as transition training in the UH-1 series helicopters. The final week of Lieutenant Heron's stay was with the 213th Assault Support Helicopter Company observing CH-47 missions.

k. (U) Logistics. During the reported period there have been no changes in the mission or operation of the Battalion S4 section.

1. (U) Maintenance.

(1) During the reported period, the battalion experienced an increase in total flying hours and a higher flying hour average per UH-1 and CH-47 aircraft than in previous reporting periods. Battalion units had assigned an average of twenty-three UH-1B and C aircraft averaging 71.8 flying hours each per month, fifty-eight UH-1D and H aircraft averaging 134.5 hours each per month, and fifteen CH-47 aircraft which averaged 88.9 hours each per month.

(2) The assault helicopter companies retrograded twenty-four UH-1 aircraft and received twenty-eight UH-1 replacement aircraft during the reported period. The assault support helicopter company retrograded three CH-47 aircraft and received four CH-47 replacement aircraft. At the end of this period, the 11th Combat Aviation Battalion was short a total of twelve UH-1D/H and one CH-47 aircraft.

(3) Twenty-one Safety of Flight Inspections, ten UH-1 and eleven CH-47, were performed during the period which resulted in temporary grounding of the aircraft. These inspections were completed without adverse effect on operational commitments.

(4) One UH-1D, two UH-1H and one CH-47 aircraft remain to be retrofitted under the ZYR program. The ZYS addition to the ZYR is progressing with two UH-1B, eleven UH-1C, four UH-1D, two UH-1H and six CH-47 aircraft remaining to be retrofitted.
CONFIDENTIAL

AVGC-44C

13 November 1968

SUBJECT: ORL for Period Ending 31 Oct 68, RCS CSFUR-65 (II) (U)

m. (U) Aviation Safety. During the reported period, a quarterly safety inspection was conducted throughout the units of the 11th Combat Aviation Battalion. The major areas of interest were:

1. Aircraft parking areas.
2. Aircraft maintenance areas.
4. Billeting areas.

All units passed the inspection in a satisfactory manner.

n. (U) Medical.

1. During the reported period the mission and organization of the medical section have remained unchanged, except for the replacement of one basic medic (MOS 91A.10) by a Vietnamese National nurse under the Civilianization Program Six.

2. Beginning 1 December 1968, all battalion medical units are to be reorganized under an experimental TOE which will consist of a headquarters section and two or more detachments. The headquarters section will consist of one flight surgeon, one X-ray technician, one laboratory technician, one administration specialist, one medical records specialist and an NCUIIC. Each detachment will have one flight surgeon, four medics and an NCUIIC. An evaluation of the experimental TOE will be included in the next Operational Report.

p. (U) Civic Action. The following is a summary of Civic Action activities during the reported period:

1. Food and clothing were donated to the Lai Thieu Deaf and Dumb School by Headquarters and Headquarters Detachment, 11th Combat Aviation Battalion.

2. The 213th Assault Support Helicopter Company has done an outstanding job in support of the St. Joseph Leprosarium by obtaining food and clothing from US citizens and organizations to help these needy people.

3. The 173rd Assault Helicopter Company continues to support the elementary school that was built by the unit at Lai Khe, RVN. The school's current enrollment is 106 pupils.

CONFIDENTIAL
SUBJECT: URLT for Period Ending 31 Oct 68, KCS C3F04-K-65 (LI) (U)

2. (C) Section 2. Lessons Learned: Commander's Observation, Evaluation and Recommendations.

   a. (U) Personnel. None.

   b. (C) Operations.

      Item: Dropped Loads.

      (1) Observation: An analysis conducted by the 213th Assault Support Helicopter Company indicates that 48 percent of the dropped loads are caused by rigging equipment failure.

      (2) Evaluation: Aerial delivery slings are subject to varying climatic extremes in Vietnam which range from daily saturation during the monsoon season to intense heat and dust during the dry season. These conditions serve to shorten the service life of rigging equipment. Two loop slings become unacceptable for CH-47 loads in a very short time when subjected to these extreme climatic conditions.

      (3) Recommendations:

         (a) All CH-47 loads be rigged with three loop slings or double two loop slings only.

         (b) During the monsoon season, the service life of all sling equipment should be reduced from six (6) to three (3) months.

   c. (C) Training.

      Item: Dual Helmet Fire Control System and Modified M-5 Sighting System.

      (1) Observation: Both the dual helmet fire control system and the modified M-5 sighting system were tested by the 11th Combat Aviation Battalion. The dual helmet fire control system consists of two helmets equipped with illuminated reticles, mechanical linkage and electronic connections (to include lead-angle compensator). This system is capable of firing the M-21 weapon system. The modified M-5 sighting system consists of a standard M-5 sight into which a seven power monocular has been placed and affixed to a gyro-stabilized lens. This sight is capable of firing the M-5 weapon system.

      (2) Evaluation: The dual helmet fire control system is a vast improvement over the present M-6 sight. The dual helmet sighting system with the lead-angle compensator is extremely accurate and allows either
pilot to engage targets; therefore, targets which are off the planned firing axis may be engaged much faster and with greater probability of achieving first round hits. The modified M-5 sight, with its seven power magnification and the lead angle compensator, permits target detection at an increased range. The gyro-stabilized lens eliminates much of the "target bounce", permitting greater accuracy. When attempting to fire off axis with the modified M-5 sight, the same limitations, mechanical stops and blocked vision problems are prevalent as in the current M-5 sight.

(3) Recommendations:

(a) All UH-1 gunships which are presently equipped with the M-6 sight be converted to the dual helmet fire control system at the earliest possible date.

(b) The modified M-5 sight does not incorporate sufficient improvements over the present system to recommend its acceptance into the Army inventory.

d. (U) Intelligence. None.

TO: Assistant Chief of Staff for Force Development, Department of the Army, Washington, D.C. 20310

1. (U) This headquarters has reviewed this report, considers it to be adequate and concurs with the comments.

2. (C) The following additional comments are considered pertinent:

   a. Paragraph 1a(2), page 7. All 1st Aviation Brigade Assault Helicopter Companies are below their authorized UH-1D/H fill. As aircraft are received, equitable distribution is made to insure all units without operational priority are filled at approximately the same level.

   b. Paragraph 2b(3)(a), page 9. The current rated capacity of the FSC 1670 two loop sling is 6500 pounds. Since external loads for CH-47 aircraft are normally rigged to exceed 6500 pounds, the three loop or double two loop sling must be used.

   c. Paragraph 2b(3)(b), page 9. TM 55-450-11 specifies six months as the maximum service life for air delivery slings. Slings will be turned in through supply channels earlier than six months when it is determined that through deterioration or fair wear and tear, the slings are no longer serviceable for use as prescribed in TM 55-450-11.

   d. Paragraph 2c, page 9. A report of the evaluation conducted by the 11th CAB on the dual helmet fire control system and the modified M5 sighting system was submitted to HQ UHNAV. Report reflected conclusions and recommendations as contained in paragraph 2c(3).

3. (U) 1 Inclosure as stated on the 1st and 2d Inclosures is in error, and should be 6 Inclosures.

Period Ending 31 October 1968, RCS GSFOR-65 (R1) (U)

HEADQUARTERS, UNITED STATES ARMY VIETNAM, APO San Francisco 96375 27 DEC 1968

TO: Commander in Chief, United States Army, Pacific, ATTN: GPOP-DT, APO 96658

1. This headquarters has reviewed the Operational Report-Lessons Learned for the quarterly period ending 31 October 1968 from Headquarters, 11th Combat Aviation Battalion.

2. Comments follow:

   a. Reference item concerning dropped loads, page 9, paragraph 2b; and 3d indorsement, paragraph 2b: Concur. TM 55-450-11 and USARV Regulation 725-7 instructions were written expressly for use of three loop slings; however, two loop slings may be used in lieu of three loop within weight limitations. This substitution is required since it will be March 1969 before USARV will receive all the three loop slings required. TM 55-540-11 lists very specific criteria for the storage, inspection, and maintenance of air delivery slings. With the minimum precautions taken, slings will remain serviceable for six months.

   b. Reference item concerning dual helmet fire control system and modified M-5 sighting system, page 9, paragraph 2c. Concur. This headquarters forwarded these same recommendations in an evaluation report of the Dual Helmet Sight and the Modified M-5 Sight on 3 December 1968.

FOR THE COMMANDER:

W. C. ARNITZ
CPT, AGC
Assistant Adjutant General
TO: Assistant Chief of Staff for Force Development, Department of the Army, Washington, D.C. 20310

This headquarters has evaluated subject report and forwarding endorsements and concurs in the report as endorsed.
