CONSOLIDATED TRANSLATION SURVEY

An author index to items in this issue is appended.

This survey is prepared monthly by Foreign Documents Division, CIA, from lists received through cooperation of US government agencies and includes translations of such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects, completed or started during the month preceding this publication.

Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date and date of publication, and publication identification of the completed project are given when available.

Some of the above details may be unavailable on projects listed "in process." New projects in process will be listed only once, their subsequent listing being made when they are reported completed. Projects in process, i.e., not completed as of the date of this survey, are noted with an asterisk (*), and when available, a project-control or "in-process" number is noted in parentheses following the title.
Requests for copies of published projects should be made direct to the designated producing organization.

All requests for items prefixed by "CIA" should be addressed to Office of Central Reference, 2430 E Street, NW, Washington, D.C. 20505

ASTRONOMY
A Possible Mechanism of Radiation Emission in Chromospheric Flares.

CRYSTALLOGRAPHY
A Low-Temperature Hexagonal Modification of NaYF₄ with the Gagarinite Structure.

CYBERNETICS AND CONTROL THEORY
Finite p-Adic Automata.

FLUID MECHANICS
Two Problems in Splicing Solutions of Dirichlet's Problem.

MATHEMATICAL PHYSICS
An Approximate Method for the Solution of One Type of System of Linear, Singular, Integral Equations.

MECHANICS
A Case of the Integrability of the Equations of Motion for a Heavy, Solid Body with Cavities Filled with Liquid.

PHYSICS
Regge Poles and the Bethe-Salpeter Equation.

Radiation of a Particle Passing a Wedge-Shaped Metal Screen.

Effect of "Drift" Waves on Plasma Diffusion in a Magnetic Field.

Dielectric Properties of the Polycrystalline Solid Solution of Ba(Tl,Sn)₂.

Paramagnetic Component of the Magnetic Susceptibility of Semiconducting Crystals Calculated from the Experimental Data on the Distribution of Electron Density.

A Generalized Self-Consistent Field Method and Collective Excitations in the Superconductivity Theory.

Propagation of Light outside and inside a Singular Schwarzschild Sphere.

Synthesis in the Furan Series. II. Alkylation of 2- and 4-Mercaptopyridines by
Haloalkyl Nitriles, I. Kh. Felsdman and A. V. Voropaeva......................... 262

The Synthesis of Some Thiodi- and Thiolazoles, K. G. Dubenko, I. N. Barzina,
and P. S. Pol'kts................................................................. 266

Study of the Reaction of Urea with Hexoxides. N. Z. Rudenko...................... 269

The Oxidation of Acrilophospine Initiated by Peroxide Compounds,
S. D. Kuz'min................................................................. 274

The Preparation and Polargraphic Behavior of Derivatives of Bis-EthylbenzeneCromium,

Synthesis and Study of the Properties of Derivatives of 1,5-Diphenylthiocarboxydrilazole,
K. G. Dubenko and P. S. Pol'kts............................................... 282

The Synthesis of \alpha;N,N-(2-Chloromethyl)Amino-\alpha; Ionitrosocetone Hydrochloride.
I. A. Poplavskaya and M. I. Goryayev............................................ 287

Flavonoid Compounds of the Licorice Plant Glycyphillia glabra L.
V. I. Litvinenko, N. P. Makryutina, and I. G. Kolesnikov......................... 289

The Study of Substances in Ethereal Oils. I. Oxidation of Alloaromadendene
by Perbenzoic Acid and its Bromination. M. I. Goryayev and
F. S. Sharipova................................................................. 293

Syntheses Based on Scilareol. VII. Scilareol and 10-Episcilareol from Clary Sage,
D. P. Popa and G. V. Lazur'evskii.............................................. 296

Alkaloids of the Family of Ligustiace. II. Partial Structural Formula of Rosmarusin,
L. D. Yakhontova and A. D. Kuzovkov.......................................... 300

Ms. Roberta Schoen
Deputy Director for Operations
Defense Technical Information Center
7725 John J. Kingman Road
Suite 0944
Ft. Belvoir, VA 22060

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the "Non-NIS" referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

Sergio N. Alcivar
Chief, CIA Declassification Center,
Declassification Review and Referral Branch

Enclosures:
1. Declassification Review of CIA Documents at DTIC (with sanitization instructions for 3 documents)
2. Declassification Status of CIA Documents (hard copy) Referred by DTIC (with review processing sheets for each document)
## Processing of OGA-Held CIA Documents

The following CIA documents located at DTIC were reviewed by CIA and declassification guidance has been provided.
