DIFFUSION BIBLIOGRAPHY

By

Captain Donald G. Silva
Bioenvironmental Engineer
Space Systems Division (AFSC)
Los Angeles Air Force Station, California

15 May 1965
The emphasis placed on air pollution and diffusion by the Clean Air Act has necessitated a review of technical information published on diffusion and related areas. The author developed this bibliography while preparing a paper entitled "Propellant Toxicity and Diffusion Prediction Methods". The bibliography deals primarily with diffusion studies and prediction methods and was not intended to cover the entire field of air pollution. It is hoped that this effort will be useful to Air Force Bioenvironmental Engineers and Meteorologists who may have a need for this type of information. The author would appreciate comments or criticisms.
