CONSOLIDATED TRANSLATION SURVEY

An author index to items in this issue is appended.

This Survey is prepared monthly by Foreign Documents Division, CIA, from lists received through cooperation of US government agencies and includes translations of such agencies, private industry, universities, research institutions, and commercial translation organizations. It is a compilation of foreign documentary projects, completed or started during the month preceding this publication.

Translations are listed by area and subject category. Scientific projects are grouped as a section regardless of geographic area. Title in English, author, foreign language title of source of material, date and data of publication, and publication identification of the completed project are given when available.

Some of the above details may be unavailable on projects listed "in process." New projects in process will be listed only once, their subsequent listing being made when they are reported completed. Projects in process, i.e., not completed as of the date of this Survey, are noted with an asterisk (*), and when available, a project-control or "in-process" number is noted in parentheses following the title.

SCIENTIFIC AND TECHNICAL

Methods for obtaining steady conditions in the ultrasonic welding of metals. G. F. Balandin and L. L. Slin1 1 (1)*

Effect of welding conditions on the bead cross section in automatic submerged arc surfacing operations using a strip electrode. Yu. M. Belov 9 (6)

Features of the vibro-arc surfacing technique using a strip electrode. G. F. Sokolov and A. V. Polyachenko 13 (8)

Initial deformation in the cladding of metal, using surfacing techniques. G. B. Talypov 18 (12)

Intergranular corrosion of welded Tee joints in 1Kh18N9T steel. V. V. Roschin and L. M. Georgievskii 21 (13)

PRODUCTION

Automatic multi-pass submerged arc welding of 1Kh18N9T steel plate. B. I. Medovar, L. G. Puzrin and V. F. Koshevol 25 (15)

Vibro-arc overlaying of GAZ-51 cranks. N. E. Dotsenko 30 (18)

Expansion of mechanised welding operations in shipbuilding. K. N. Volkov, A. I. Safonov and L. N. Semenov 36 (22)

New equipment in which the gases are mixed in the nozzle, V. D. Nechaev 40 (24)

Automatic flash butt welding of tools. M. A. Shaterin 44 (26)

SUBSTITUTE GASES FOR ACETYLENE IN WELDING

The welding of grey cast iron using natural gas. P. I. Gavrilo 54 (31)

Welding torch for operation on propane-butane. A. I. Kazarev 58 (33)

Ms. Roberta Schoen
Deputy Director for Operations
Defense Technical Information Center
7725 John J. Kingman Road
Suite 0944
Ft. Belvoir, VA 22060

Dear Ms. Schoen:

In February of this year, DTIC provided the CIA Declassification Center with a referral list of CIA documents held in the DTIC library. This referral was a follow on to the list of National Intelligence Surveys provided earlier in the year.

We have completed a declassification review of the “Non-NIS” referral list and include the results of that review as Enclosure 1. Of the 220 documents identified in our declassification database, only three are classified. These three are in the Release in Part category and may be released to the public once specified portions of the documents are removed. Sanitization instructions for these documents are included with Enclosure 1.

In addition to the documents addressed in Enclosure 1, 14 other documents were unable to be identified. DTIC then provided the CDC with hard copies of these documents in April 2004 for declassification review. The results of this review are provided as Enclosure 2.

We at CIA greatly appreciate your cooperation in this matter. Should you have any questions concerning this letter and for coordination of any further developments, please contact Donald Black of this office at (703) 613-1415.

Sincerely,

Sergio N. Alcivar
Chief, CIA Declassification Center,
Declassification Review and Referral Branch
