DISTRIBUTION STATEMENT A

APPROVED FOR PUBLIC RELEASE;
DISTRIBUTION UNLIMITED.
DEPARTMENT OF THE ARMY
HEADQUARTERS, 74TH MEDICAL BATTALION
APO 96491

AVCA MB-CD-5B

SUBJECT: Operational Report for Quarterly Period
Ending 31 October 1966 (RCS CSFOR-65)

TO: Commanding Officer
68th Medical Group
APO 96491

STATEMENT #2 UNCLASSIFIED
This document is subject to special export controls and each transmittal to foreign
governments or foreign nationals may be made only with prior approval of Dept of the Army,
Ofc of the Asst. Chief of Staff for Force Development, ATTN: FOR-01-03, Wash, D.C. 20310

SECTION I

SIGNIFICANT ORGANIZATION OR UNIT ACTIVITIES

1. The 74th Medical Battalion performed medical support missions (operations) the inclusive period of the report, a total of ninety-two (92) days.

2. HHD, 74th Medical Battalion provided command, administrative and logistical guidance and operational control, for all subordinate units.

a. Significant personnel changes did occur.

(1) Lieutenant Colonel Robert W. Irvin Jr. was reassigned within the 68th Medical Group on 8 August 1966 and Major Paul E. Wengrovitz assumed interim command of the Battalion.

(2) Lieutenant Colonel D. F. Morse assumed command of the Battalion on 19 September 1966.

(3) Other personnel changes follow:

(a) The personnel officer, Lt Samuel K. Rinton was reassigned 3 September 1966; Lt Robert V. Bonham III was assigned and assumed the duty the same date. He was subsequently reassigned 16 October 1966 and a replacement has not been received.

(b) Captain Jeffrey C. Lynch, S4 Officer, was reassigned on 1 October 1966; Captain Gerard J. Lehoux was assigned and assumed the S4 duties on 21 October 1966.

(c) At the end of the report period, the HHD is operating less two (2) officers of its eight (8) authorized complement; there is no significant enlisted personnel disparity within the HHD nor is there disparity among officer and enlisted categories of assigned units.
b. The battalion command and staff continued its established policy of each representative visiting each subordinate unit a minimum of once monthly. The merit of this policy stems from the basic exigency that organic administrative, supply, training and maintenance personnel are negligible and/or non-existent in dispensary units. Each staff section provides personal and frequent guidance to the units.

c. Incidental and/or miscellaneous training periods (courses) were attended by one individual from each assigned dispensary.

(1) The Medical Records Clerk of each dispensary attended a Medical Records and Reports Orientation of two (2) hours duration on 16 August 1966; the battalion staff's responsible officer was also in attendance. It was beneficial and particularly so from responsible individual/counterpart identification aspects.

(2) A designated individual of each operational dispensary attended a two (2) week sanitary inspection orientation 25 September - 8 October 1966. The course was presented by the 20th Preventive Medicine Company with an objective of training a Medical Specialist to conduct required periodic inspections in respective areas and thereby relieve medical officers completely of the direct task, except in supervisory capacities as desired. Results of the training period were most gratifying. Sanitary (Preventive Medicine) inspections had been the responsibility of the 26th Preventive Medicine Company.

d. Basic temporary facilities plan for the HMD was completed on 20 October, 1966. Improvements will perpetuate. This accomplishment facilitates one of all operations. It was accomplished through "self help" so that greater effort is now being directed to organization and unit mission accomplishments. The redirection of primary effort is readily evident.

e. A Command Maintenance Management Inspection was conducted of HMD, 74th Medical Battalion on 3 October 1966 by the area CMI Team. The indicator was a praiseworthy satisfactory. Such inspections are completely unannounced, a meritible characteristic.

f. Dispensary units provided area medical service support in designated areas, on becoming operational. Simultaneously, building and/or building improvement was accomplished. Much of this was accomplished through the "self help" process.

a. 2d Medical Dispensary Commander was given the duty of area surgeon of his area location during October 1966. The unit continued operation from the same location and facility.

b. The 25th Medical Dispensary completed a "self help" dispensary facility and billet accommodations for its assigned personnel, Officer and Enlisted, on 13 October, 1966. Movement was made into these facilities on the same date. "Self help" construction was necessary because of deterioration of initially erected tentage, the progression of the final type engineer facilities plan for the area, increase of personnel strength being supported by this dispensary and to fluctuating priority for permanent construction. These factors dictated expanded facilities and relocation. The results are adequate; facilities are temporary, subject to deterioration in a comparable time length previously experienced.
c. 202d Medical Dispensary facility was expanded during October 1966; the building project was accomplished by engineer work order request and subsequent accomplishment by responsible individuals. Complete division of dispensary functional areas has been accomplished; patient consultation and processing has been enhanced. Responsibility for medical support to a military intelligence battalion was given to this dispensary during August 1966. The nature of the battalion's work, its location in relation to that of the dispensary and the troop strength being supported dictated the unit be relieved of the responsibility and this was done during early September. The Commander of this unit is the area surgeon for his unit area location.

d. Activities of the 229th Dispensary follows:

(1) The unit arrived in Vietnam on 8 September, 1966, was received and staged by the HHD, 74th Medical Battalion.

(2) A medical element, one (1) medical officer and four (4) enlisted men, of this unit were transported to Can Tho on 12 September 1966. These personnel served to augment the medical dispensary (Medical Detachment OA) of the 13th Aviation Battalion, which was providing area type medical support. This mission was not compatible with mission of the aviation battalion, indicating a need for a separate dispensary to be located at Can Tho. The medical element of five (5) personnel provided censament until a dispensary could be so located. In effect, these personnel were the "advance party element" of the to be located dispensary.

(3) Another medical element of this unit, one (1) medical officer and three (3) enlisted personnel, was placed in support of newly located troops at Cat Lai, on 21 September 1966. This unit detachment of personnel was necessary because a medical unit was not immediately available nor justifiable; the detachment served to properly utilize personnel pending arrive of unit organic equipment and continues as a temporary plan pending the scheduled arrival of a small medical unit designated to assume the medical support mission.

(4) Equipment of the 229th Dispensary arrived on 3 October 1966; the unit became operational on 17 October replacing the 346th Dispensary in support of the 90th Replacement Battalion area. This dispensary was retained at Long Binh because it is an MC type dispensary and projected plans indicated best utilization at Long Binh as compared to Can Tho.

e. Activities of the 332d Dispensary follows:

(1) The unit became operational on 22 August 1966.

(2) A newly constructed Quonset type medical facility for this unit was completed on 27 September, 1966; the unit moved into the facility on the same date. The result is a nice facility, a smooth operation also but on the detracting side, too small a building (floor space 20' x 96') for a medical dispensary (K.B).

(3) The commander of this unit is the designated area surgeon for the Long Binh area.
f. Release from assignment to the 74th Medical Battalion of the 345th Dispensary and its attachment to the 36th Evacuation Hospital was effected 22 August 1966. Operational control is at Evacuation Hospital, thus relieving the 74th Medical Battalion of the unit's responsibility.

g. The 346th Dispensary discontinued operation in Long Binh on 17 October and moved to Can Tho on 18 October 1966. Equipment and personnel were moved simultaneously utilizing a C-130 Aircraft; two trips (movement increments) were necessary. The unit became operational in its new location on 3 November 1966. It is attached to the 13th Aviation Battalion for rations, quarters, maintenance support and finance administration.

h. 541st Dispensary completed a "self help" dispensary facility and billet accommodations on 14 September 1966. The result is redirected effort to medical support and mission type accomplishment. The medical facility is temporary, adequate and makes for an easier operation.

i. 673rd Dispensary activities follow:

(1) The unit moved into a quonset type medical facility on 14 August 1966.

(2) A Command Maintenance Management Inspection was conducted on the unit on 23 August 1966 by the area CMMI Team. A satisfactory rating was attained.

SECTION II
OBSERVATIONS (LESSONS LEARNED)

PERSONNEL

Item: Officer personnel loss:

Discussion: The battalion, HHD experienced the loss of half (4) of the original officer complement of eight (8) in less than a four month period. While the unit has gained officers by assignment, it operates currently at a net loss of two (2) officers. The fact that the officers of the unit are experienced compensates in part for the shortage, but only in part. Dispersion of assigned units of this headquarters and the type units assigned underlines the need for a full complement to provide completely the guidance the subordinate units require.

Observation: A planned loss of personnel is desirable when units deploy so that personnel turbulence at the time of DEROS is reduced and continuity of operations is improved. It is obvious however that despite the advantages of the method, a major disadvantage is the result that the unit may expect to operate short of authorized strength.

PLANS

Item: Dispensary design

Discussion: In instances where dispensary facilities are being constructed by the US Army Corps of Engineers, design is or appears to be at
discretion of the responsible engineer who obtains some basic idea of physical layout from METBS laymen (the users). Two quonset type treatment (dispensary) facilities have been constructed under these auspices. Though functional, the products are small for operations. Battalion staff has drafted recommended interior designs at the direction of higher headquarters and these designs are based on previous dispensary functional experience and on peculiarities to this location. These designs are still laymen, however.

Observation: Experience was gained that can be applied in subsequent dispensation of each type. It is anticipated, however, that responsible engineers will not respect these designs coming from laymen as much as would coming from METBS architects or otherwise authorities. Such a consultant would expedite construction and adequate facilities.

LOGISTICS

Item: Medical Supply Accounts:

Discussion: Group headquarters has established the policy that medical supplies for dispensaries located in closer proximity to hospitals then to platoons of the Medical Depot, will procure/obtain needed supplies from these hospitals; the phase in dates are established. The objectives are to decrease the number of accounts at depot and to simultaneously make more readily available, the needed supplies.

Observation: Travel distances to the depot platoon have been excessive. The numerous accounts at depot coupled with excess telephone queries to determine supplies available prior to making a trip for pick-up certainly detracted from depot operations. This plan appears plausible.

SECTION II
Part 2
RECOMMENDATIONS

None.

D. F. MORSE
LTC, MC
Commanding
SUBJECT: Operational Report for Quarterly Period Ending 31 October 1966

HEADQUARTERS, 68th Medical Group, APO 96491 17 November 1966

TO: Commanding Officer, 44th Medical Brigade, APO 96307

1. Reference paragraph 3e (2) and item on Dispensary Design, page 4, of basic report. In the absence of a qualified medical facility designer, the experiences gained by the 74th Medical Battalion will be invaluable in providing designs for future dispensary facilities. Additional space is now being requested for the 332d Med Det (AB).

2. Reference item on Officer Personnel Loss, page 4 of basic report. The shortage is recognized by this headquarters. Replacements will be provided as soon as available.

CHARLES C. PIXLEY
