Appendix F: Project Area Maps
Appendix A:

SCOPE OF WORK
1.00 General

1.01 The cultural resources investigation reports serve several functions. The technical report is a planning tool which aids in the preservation and protection of our cultural heritage. It is also a comprehensive, scholarly document that not only fulfills federally-mandated legal requirements but also serves as a scientific reference for future professional studies. As such, the report's contents should be both descriptive and analytic in nature. The popular report provides the results of the survey in laymen's terms. It serves primarily as a means of educating the public about the cultural heritage of an area but also informs them of how the St. Paul District is fulfilling its obligations toward cultural resources.

1.02 The survey and reports represent partial fulfillment of the obligations of the St. Paul District toward cultural resources as required by the National Environmental Policy Act of 1969 (P.L. 91-190); National Historic Preservation Act of 1966 (P.L. 89-665); Protection and Enhancement of the Cultural Environment (EO 11593); Advisory Council's Procedures for the Protection of Historic and Cultural Properties (36 CFR 800); Preservation of Historic and Archaeological Data 1974 (P.L. 93-291); and Identification and Administration of Cultural Resources (33 CFR 305).

1.03 The cultural resources investigation shall focus on the study area(s) as described in paragraph 4.01 of this Appendix A. The study shall consist of the following tasks: (1) a comprehensive review of existing records and review of published and unpublished literature; (2) an evaluation of recorded cultural resources located within the study area(s); and (3) the preparation of a detailed technical report and a general, popular report.

1.04 The objectives of the literature search and records review are to identify all the known cultural resources which may be affected by the implementation of the proposed project, identify gaps existing in our knowledge of the cultural resources of the area, identify biases which may be inherent in the data base, and recommend research goals for future investigations.

1.05 The Contractor shall provide specialized skills and knowledge during the course of the study, to include expertise in the disciplines of archaeology, history, architectural history, and any other sciences as required. The Contractor shall also provide all materials and equipment necessary to expeditiously perform those services required of the study.
1.06 The Contractor shall designate, in writing, the name of the Principal Investigator; and the Principal Investigator shall sign the draft and final reports.

1.07 The extent and character of the work to be accomplished by the Contractor shall be subject to the general supervision, direction, control, and approval of the Contracting Officer.

2.00 Definitions

2.01 "Cultural resources" are defined to include any building, site, district, structure, object, data, or other material relating to the history, architecture, archaeology, or culture of an area.

2.02 "Literature search" is defined as an examination and review of written reports, books, articles, etc., published and unpublished, which are pertinent to the cultural resources investigation to be carried out for a particular project. The purpose of the literature search is to familiarize the Contractor with the culture history and past investigations which have been carried out in the area of the study, and to provide this information in a summarized form to the agency requesting the search. While the existing data could be extensive, the literature search should be limited, as much as possible, to providing a useable body of data for the purposes outlined above.

2.03 "Records review" is defined as the examination and review of records, files, etc., which are maintained by various local and State agencies. The purpose of the records review is to document the location of known sites which may exist within the project area, their condition, the extent of past work undertaken at the site, and any other information which may be relevant in assessing the significance of the site.

3.00 Project Description

3.01 The Upper Minnesota River Subbasin Study (a joint U.S. Soil Conservation Service and St. Paul District, Corps of Engineers, feasibility study) was authorized under Public Law 87-639. The overall study objectives are to identify water- and land-use problems and investigate solutions to downstream and crossover flooding on tributary streams, drainage, erosion, sedimentation, and water quality problems within the Yellow Bank, Lac qui Parle, Yellow Medicine, Redwood, and Cottonwood Subbasins in southwestern Minnesota and northeastern South Dakota. The range of major structural alternatives presently under evaluation includes approximately 69 small-scale tributary reservoirs in the Upland Coteau. Other major alternatives under preliminary consideration include 300 miles of channel modifications and levees on the downstream tributaries and environmental corridors along the Mainstem Upper Minnesota River. This feasibility study is currently scheduled over an 3-year period.
3.02 The Upper Minnesota Subbasin study area comprises 4,183.8 square miles, which is 33 percent of the Minnesota River Basin. It includes all or part of nine counties in Minnesota (Brown, Cottonwood, Lac qui Parle, Lincoln, Lyon, Murray, Pipestone, Redwood, and Yellow Medicine), and four counties in South Dakota (Deuel, Grant, Codington and Brookings). Present land use percentages break down as follows: cropland - 80 percent; pastureland - 9 percent; forest land - 2 percent; noninventory lands (urban, developed, water, and Federal) - 4 percent; and other - 5 percent.

3.03 The study area is within the "Western Lake Section" central lowland province of the interior plains physical division of the United States. This section has been characterized by young glaciated plains, moraines, lakes, and lacustrine plains. A number of former lakes have been drained and converted to agriculture. The surface materials and features are a product of recent glaciation. Glacial materials cover most of the sediment and ancient bedrock, although these earlier layers are exposed in a few places. The bedrock is among the oldest rock known on earth, dating back over 3 billion years.

3.04 The topography over the northeast two-thirds of the study area is flat to gently undulating. Subdued hills and ridges border the outer limits on the south and southwest. Interior watershed divides are indistinct, and the present drainage network is poorly defined. The Coteau des Prairies sloping escarpment rises about 2,000 feet along the southwest side of the study area, accounting for 1,225 feet of total relief.

3.05 Numerous sites of historical, paleontological, geological, and archaeological importance are known to exist in the study area. Under the statewide inventory program, Brown and Redwood Counties in Minnesota have been surveyed for archaeological sites and standing structures, and Pipestone County has been surveyed for standing structures only. Sites, structures, and landmarks have been documented for all the remaining counties even though they have never been systematically surveyed. The cultural resources potential of the entire study area is high.

4.00 Study Area

4.01 The areas to be examined shall be within the indicated study area as shown on Map 1, and made a part hereof. The study area includes the Yellow Bank, Lac qui Parle, Yellow Medicine, Redwood, and Cottonwood Subbasins of the Mainstem Minnesota River in southwestern Minnesota and northeastern South Dakota, as shown on Maps 2 to 6, to be furnished by the Government.

5.00 General Performance Specifications

5.01 Information and data contained in the literature search and records review should be obtained from, but not limited to, the following sources:
a. Published and unpublished reports such as books, journals, theses, dissertations, manuscripts, newspapers, surveyor's notes, and early atlases.

b. Site files maintained by the Office of the State Archaeologist, the State Historic Preservation Office, universities, and local historical societies.

c. National Register of Historic Places, including current additions and deletions as published by the Federal Register.

d. Consultation with professionals familiar with the cultural resources of the area.

e. Preliminary contacts with amateur archaeologists and individuals concerned with local history in order to locate sites and to identify and define local interests and resources perceived to be locally significant.

6.00 General Report Requirements

6.01 Upon completion of the literature search and records review, the Contractor shall prepare a technical report, detailing the results of the investigation, and a popular report, written in laymen's terms, suitable for release to the public. Normally, the length of the popular report will not exceed ten typewritten pages.

6.02 The technical report shall include, but is not limited to, the following sections:

a. Title page: The title page should provide the following information: the type of investigation undertaken; the cultural resources which were assessed (archaeological, historical, and architectural); the project name and location (county and State); the date of the report; the Contractor's name; the contract number; the name of the author(s) and/or Principal Investigator; the signature of the Principal Investigator; and the agency for which the report is being prepared.

b. Administrative Summary: The summary will be a synopsis of the report defining the project area and the level of the cultural resources investigation. It shall summarize the research objectives and problems; methods, numbers, and types of resources identified; the significant recommendations; and any unusual or innovative findings or techniques developed during the course of the investigation. Because this information will serve both as an administrative summary and as a portion of that information required by the Department of the Interior for its annual report to Congress (pursuant to section 5.c. of the Reservoir Salvage Act as amended), the summary should be as detailed and succinct as possible. Normally the summary will not exceed one typewritten page.
c. Table of Contents.

d. Introduction: This section should include the purpose of the report; a description of the proposed project; the location of the proposed project including a map of the general area; and a project map (a list of U.S.G.S. Quadrangle maps which cover the project area should also be included).

e. Environmental Setting: This section should contain a brief description of the environment of the study area, both present and past conditions, and it should be of a length commensurate with other sections of supporting type information.

f. Study Methods: This section should give an explicit statement of the study methods and rationale under which the investigation was completed. It should document the general sources which were sought and the types of data which were expected of these sources. (For example, an archaeological journal may provide information on past surveys and excavations which is useful not only for site locations but also for assessing the quality of past work and apparent data gaps which may exist, whereas field notes of General Land Office (GLO) surveys may provide information on the location of prehistoric and early historic sites and early vegetation of an area.).

g. Summary of Regional Prehistory and History: This section should discuss the regional cultural developments in their spatial and chronological position.

h. Study Results: This section should list those sites which were recorded in the literature or records reviewed. The section should describe the archaeological, architectural, or historical resources encountered including the size of the site, type of site (i.e., historic dwelling, prehistoric village, mound group, etc.), the cultural component(s) of the site (if discernable), and any available information on the general nature of the site. This section should contain a brief summary of previous archaeological and historical work undertaken at the site including the date, extent, and adequacy of the past work as it reflects on the interpretation of what might be found in the project area. Official site designations should be included for the resources discussed. A means of cross-referencing these sites with the bibliographic entries in which they may be located should also be developed.

i. Recommendations: This section should discuss the potential of the area to produce presently unknown cultural resources, and it should point out any biases which may be inherent in the resource base as it exists today. The section should outline any gaps in the present data base and should develop specific research goals which may be used in subsequent investigations.
References: American Anthropological Association format should be used.

Appendix: This section should contain the scope of work and the resume of the Principal Investigator.

The above items do not necessarily have to be discrete sections; however, they should be readily discernable to the reader.

**Format Specifications**

Text materials will be typed (single-spaced) on good quality bond paper, 8.5 inches by 11.0 inches, with a 1.5-inch binding margin on the left, 1-inch margins on the top and right, and a 1.5-inch margin at the bottom.

Information will be presented in textual, tabular, and graphic forms, whichever is most appropriate, effective, or advantageous to communicate the necessary information.

All figures must be readily reproducible by standard xerographic equipment.

**Submittals**

The Contractor shall complete all work and services under this contract within the following time limitations:

a. Ten copies of the draft report shall be submitted no later than 31 January 1979.

b. The Government shall have 60 calendar days following receipt of the draft report for review and comment.

c. An original and 15 copies of the final report shall be submitted 30 calendar days following the Contractor's receipt of the Government's review and comments.

d. If the Government review exceeds 60 calendar days, the period of service of the contract shall be extended on a day-by-day basis equal to any additional time taken by the Government for review.

The Contractor shall furnish separately, as part of contract correspondence, one copy each of Maps 2 to 6 as listed in paragraph 4.01 showing the location of all cultural resources located during the literature search and records review. Two copies of each map will be provided by the Contracting Officer. Additional maps as may be appropriate for the text of the reports will be provided by the Contracting Officer as needed.
8.03 The Contractor shall submit the photographic negatives for all black and white photographs which appear in the final report.

8.04 Neither the Contractor nor his representative shall release any sketch, photograph, report, or other material of any nature obtained or prepared under the contract without specific written approval of the Contracting Officer prior to the acceptance of the final report by the Government.

9.00 Method of Payment

9.01 Payment will be made in lump sum upon approval of the final reports by the Contracting Officer.

Appendix C:

USEFUL SOURCES FOR IDENTIFYING HISTORIC ARCHAEOLOGICAL SITES

(MINNESOTA HISTORICAL SOCIETY)
Useful Sources for Identifying Historic Archeological Sites

The following list was compiled from suggestions made by MHS staff who have conducted extensive research in the location and identification of historic sites. Materials are listed by repository. A general consensus of the staff was that the County listings in the MHS Library card catalogue and the original Land Survey records at the Secretary of State's Office were most useful. Of particular assistance in compiling this list were Sue Queripel, Robert Frame, Mike Landis, John Hackett, Liza Nagle and Susan Zeik.

MINNESOTA HISTORICAL SOCIETY

LIBRARY

Reading Room - Andreas' Atlas of Minnesota (1874)

Card Catalogue - consult the county heading; this will guide you to:
- County Atlases
- Plat Books
- Business Directories
- Miscellaneous Clipping and Pamphlet file
- Anniversary or Centennial Newspaper Editions
- County Histories

Post Office Department (summary of records - consult Roger Barr)

Geological and Natural History Survey of Minnesota

MAP COLLECTION

Maps of Minnesota, arranged chronologically, index being completed
Sanborn Insurance Maps - invaluable collection of maps of towns,
late 19th and early 20th century.

MANUSCRIPTS AND ARCHIVES

Manuscript Schedules of the U.S. Census, 1850, 1860, 1870, 1880.
Arranged by county. 1880 Census is most complete, all can
be very useful. State censuses also available.

WPA Papers - massive history projects compiled in 1930's. Oral History,
Newspaper Records
Consult the Bibliography of the Counties of Minnesota, call #FF600
W927

Consult subject file

Consult Card catalogue under appropriate county - "Inventory Sheets"
will give detailed info on collection contents.

AUDIO VISUAL COLLECTION

Consult card catalogue under appropriate county

NEWSPAPER COLLECTIONS

STATE HISTORIC PRESERVATION DEPARTMENT

County Files - Consult Liza Nagle or John Hackett 726-1171
Useful Sources for Identifying Historic Archeological Sites

MINNESOTA SECRETARY OF STATE'S OFFICE

ORIGINAL LAND SURVEYS

Consult Virginia Daniels - You will need the legal description. There is both a plat map and a written record of the surveyors' observations. Occasionally there were two surveys, one to establish the township and range lines, and a second to establish section lines. There is a separate record for Indian Reservations. Copies may be made.

U.S. ARMY CORPS OF ENGINEERS

MAP SECTION - ST. PAUL

Early maps of navigable waters made by the Corps frequently show cultural features. Early aerial photos are also available.

TRYGG LAND OFFICE AND ZENITH SURVEYING COMPANY

P.O. 628
ELY, MN 55731

Has published a complete set of composite maps of first land surveys, which are being continually updated. They also publish "written Trygg maps" which are summaries of first surveyors notes. Original land survey notes and plats in the Secretary of State's office are more satisfactory, however.

MINNESOTA GEOLOGICAL SURVEY

1633 Eustis Street
ST. PAUL, MN 55108

Historical Plat Maps of Hennepin County and Surrounding Areas, 1860, 1867, 1874, 1879, 1886, 1890.

COUNTY HISTORICAL SOCIETIES AND LOCAL LIBRARIES

City and Business Directories - often arranged by name, by address and by business.

Look also for a local "Heritage Room", often housed in the local library, court house or city hall.

COUNTY OFFICES

County Survey and Planning Offices, Assessors, Register or Recorder of Deeds and the Auditors offices frequently contain useful information, but it is the consensus of the researchers I talked to that they are often difficult to gain access to. Consult John Hackett, MHS State Historic Preservation Department, for suggestions and assistance on how to approach these records.
Useful Sources for Identifying Historic Archeological Sites

COUNTY AND LOCAL NEWSPAPERS

A good source, especially centennial, anniversary and other special editions. In some cases, MHS has more complete newspaper collections than local newspaper offices.

CORRESPONDENCE
24 October 1979

Mr. Scott Anfinson
Minnesota County and Municipal Highway Archaeologist
c/o The Minnesota Historical Society
Historic Fort Snelling
Building #27
St. Paul, Minnesota 55111

Re: A Cultural Resources Investigation of the Upper Minnesota River Subbasin,
Southwestern Minnesota and Northeastern South Dakota
Contract No. DACW37-79-C-0199
AFS, Inc. File No. 2032

Dear Mr. Anfinson:

Archaeological Field Services, Inc. has recently been contracted by the St. Paul
District, Army Corps of Engineers to conduct research and report on the above re-
ferenced project (see Attachment A: Project Area Map).

A list of state and federal public files and sources of recorded cultural resource
data which will be reviewed for this project is included (see Attachment B).

I am herein requesting your assistance by providing AFS, Inc. with any unrecorded
information regarding research which you personally have conducted within the pro-
ject area. I would also appreciate any information regarding little known sources
of which you have knowledge.

Due to our time restrictions, I would appreciate hearing from you as soon as pos-
sible.

Thank you for your time and consideration in this matter, and if I may provide any
additional information, or be of any assistance, please do not hesitate to contact
me.

Sincerely,

G. Joseph Hudak, President

Archaeological Field Services, Inc. has recently been contracted by the St. Paul District, Army Corps of Engineers to conduct research and report on the above referenced project (see Attachment A: Project Area Map).

A list of state and federal public files and sources of recorded cultural resource data which will be reviewed for this project is included (see Attachment B).

I am herein requested your assistance by providing AFS, Inc. with any unrecorded information regarding research which you personally have conducted within the project area. I would also appreciate any information regarding little known sources of which you have knowledge.

Due to our time restrictions, I would appreciate hearing from you as soon as possible.

Thank you for your time and consideration in this matter and if I may provide any additional information, or be of any assistance, please do not hesitate to contact me.

Sincerely,
ARCHAEOLOGICAL FIELD SERVICES, INC.

G. Joseph Hudak, President

29 October 1979

Bear Joe,

I have your letter asking for site information within the Upper Minnesota River Subbasin. Can't help you much for the Minnesota section as I've never worked in that area. You are welcome to look at Wilford's memos and notes at any time.

I noticed that the contract includes some portion of northeastern South Dakota. We did do some erratic survey work there in the early 60's and have some data on sites west of Traverse and Big Stone lakes. If this region falls within your survey area, I'll locate the field note data for you.

Sincerely,
5 November 1979

Professor Elden Johnson, Chairman
Department of Anthropology

215 Ford Hall
224 Church Street S.E.
Minneapolis, Minnesota 55455

Re: A Cultural Resources Investigation of the Upper Minnesota River Subbasins, Southwestern Minnesota and Northeastern South Dakota AFS, Inc. File No. 2032

Dear Professor Johnson:

Thank you for your letter of 29 October 1979 regarding the above referenced project. I will be contacting you in the near future to set up an appointment to review the Meno files.

I am enclosing a larger scale map of the project area than the one which I enclosed earlier. If you have conducted research in the Dakota region indicated, I would be most happy to make an appointment to discuss those investigations.

Thank you for your personal consideration in this matter and if I may provide you with any additional information, please do not hesitate to contact me.

Sincerely,

ARCHAEOLOGICAL FIELD SERVICES, INC.

G. Joseph Hudak, President

Enclosure

cc: AFS, Inc. File No. 2032
7 November 1979

Dear Joe,

Have your note with the map of the region you are to survey. Our work in South Dakota was north of your area (west of Big Stone and Traverse). Barbara Lass, a graduate student in our department, did a recon survey this past summer that does include a part of your area. She worked in Duell County has has quite a bit of site location data. She is now writing the report for some SD state agency, but I talked with her and she would be more than willing to sit down with you to locate sites and provide such data as she has. Barbara is here daily--she T.A.'s in the introductory so is tied up T and Th mornings and has class those same afternoons. If you could arrange a MW or F trip here it would be best. Let me know and I'll tell Barbara.

Sincerely,
November 20, 1979

Stillwater, Minnesota 55082

Dear Joe:

Re: AFS, Inc. File No. 2032
A Cultural Resources Investigation of the Upper Minnesota River Subbasin, Southwestern Minnesota and Northeastern South Dakota
Contract No. DACW37-79-C-0199

Regarding your request for information pertaining to unrecorded cultural resources in the above project area, I fear that I can be of little assistance. As I discussed with Lota Emery of your staff in October, I have been involved in a variety of small scale archaeological surveys within your study area under the auspices of the Minnesota Trunk Highway Archaeological Reconnaissance Survey since 1971. I believe that all archaeological resources recorded within the scope of these investigations have been filed in the Minnesota Prehistoric Archaeological Site Files and documented in the Annual Reports of the Trunk Highway Survey. It, therefore, appears that these data have been encountered in the course of your standard record search.

If I recall or encounter any additional information pertaining to your study, I will inform you. If I may be of any further assistance in this matter, please do not hesitate to contact me. Best of luck in a worthwhile venture.

Sincerely,

Leslie D. Peterson
Trunk Highway Archaeologist

Re: A Cultural Resources Investigation of the Upper Minnesota River Subbasin; Army Corps of Engineers

Dear Mr. Hudak:

We are in receipt of your letter of 28 October 1979 regarding the above-referenced project. The major survey for this area of which I am aware was conducted by the University of Minnesota. A copy of this report, authored by Richard Lane and Christy Caine, should be on file in the University Archaeology Laboratory.

In addition to the three files you plan to examine in the State Archaeologist's Office, you may wish to consult the correspondence which our office has had with the Corps of Engineers regarding this project (SAC File no. 113.12).

If we can be of further service regarding this project, please contact us.

Sincerely yours,

Christy A.R. Caine
State Archaeologist and Executive Secretary, CMA

Re: A Cultural Resources Investigation of the Upper Minnesota River
Subbasins, Southwestern Minnesota and Northeastern South Dakota
AFS, Inc. File No. 2032

Dear Ms. Lass:

As per our conversation of this morning regarding the above referenced project, Archaeological Field Services, Inc. is requesting your professional services to conduct the research for and compile a Cultural Overview with regard to the South Dakota portion of this project (see Attachment A: Project Area Map), which will be incorporated into the report and an additional Condensed Popular Version of that overview to be used by the Corps of Engineers (St. Paul District) for public distribution.

As you have related to me, I understand that all of the research and analysis has already been accomplished by yourself. For your reference, please find enclosed a list of sources and files which AFS, Inc. has reviewed or is in the process of reviewing for the Minnesota portion of this project (see Attachment B: List of Sources and Files). Please review this list carefully and if you find that additional sources need to be reviewed in South Dakota, please forward a list of them immediately.

At your earliest convenience, please call either myself or my associate, L. L. Emery and present a lump sum price for the proposed scope of work defined herein. If the figure meets with the approval of all concerned, a Special Services Contract will be forwarded for execution.

Please plan to bring all specific site data and documentation to our Stillwater office at a time in the near future which will be arranged and is mutually convenient. Please be advised that all copying charges will be paid by AFS, Inc.
If site data and documentation is provided prior to the submittal of the overview and popular version to this office, partial payment will be forwarded to you.

If I may provide you with any additional information or clarification, please do not hesitate to contact me.

Sincerely,

ARCHAEOLOGICAL FIELD SERVICES, INC.

AFS, Inc. File No. 2032

Dear Mr. Berwick:

In recent letters and conversations with Prof. Elden Johnson, he brought to my attention the fact that a graduate student of his, Ms. Barbara Lass, has recently completed cultural resources research including the study area in South Dakota which is a part of the above referenced project.

I had an interview with Ms. Lass on 26 November 1979 and have requested that she provide the data and Special Services to AFS, Inc. I am planning to use the funds originally allocated for a trip to South Dakota to conduct the research for Ms. Lass' services. I feel that this would be more productive than repeating the research efforts.

Prof. Johnson is Ms. Lass' advisor and in discussions regarding this matter, he concurs with the proposal herein presented.

Please inform me if this proposal is not satisfactory to you or Mr. Post.
If I may provide any additional information or assistance, please do not hesitate to contact me.

Sincerely,

Dear Mr. Post:

In response to your request of February 7, 1980, we have completed our review of the draft report entitled, "Cultural Resources Investigation of the Upper Minnesota River Sub-Basin, Southwestern Minnesota and Northeastern South Dakota." Enclosed please find comments of individual reviewers.

Reviewers agree that the report is a thorough and substantive document that clearly reflects a professional commitment. We suggest extensive editing of the report in order to make presentable an otherwise excellent document.

Thank you for allowing us to review this report; we trust that our comments prove useful.

Sincerely,

Jack R Rudy  
Chief, Interagency Archeological Services - Denver

Enclosures
Report review:
"Cultural Resources Investigation of the Upper Minnesota River Subbasin, Southwestern Minnesota and Northeastern South Dakota" Prepared for C/E, St. Paul District, Contract No. DACW-79-C-0199

Staff Archeologist (Hoffman)

The Scope-of-Work for this report was minimally directed at 1) a comprehensive review of existing records and review of published and unpublished literature, 2) an evaluation of recorded cultural resources located within the study area, 3) preparation of a detailed technical report, and 4) preparation of a popular narrative of the survey results.

Archaeological Field Services, Inc. has produced a substantive and thorough document which can be used as a preliminary management tool. The methodology employed in site information presentation has resulted in an easy-to-read comprehensive format. There are, however, some minor problems with this report which need to be addressed.

GENERAL COMMENTS

There are an outrageous number of typographical errors and missing words in this report (nearly one or two on each page). This especially is difficult to accept when it occurs in the site names (either the site name is misspelled or is inconsistent with the spelling in the text). This report needs to be read very carefully word for word to correct these errors.

SPECIFIC COMMENTS

Popular Report. The popular report is a very good, cohesive account of the prehistory and history of the Upper Minnesota River Subbasin. The criticism/suggestion I have for this part would be the addition of a location map and a chart or table depicting the various cultural periods, focii, and dates ("A picture is worth a thousand words."). The section on Paleo-Indian needs to be clarified. No dates are given and the allusions to various point types will be lost on the general public. We know that point types are indicators, but will the public? Rework this at a more basic level. A short glossary would also be a desirable. Remember, these agencies will be disseminating this to the general public for informational as well as public relational purposes.
Appendices. The appendices definitely need pagination.

Appendix C - I fail to understand the inclusion of this correspondence. Is it really necessary?

Appendix F: This is a duplication of Figure 1 and is not needed as a separate appendix.

Specifically required by the Scope-of-Work and not addressed are:

A. Section 6.02a. Title Page

The cover and title page should contain information on the type of investigation undertaken (literature review and records search), the cultural resources assessed (archeological, historical and architectural), etc.

B. Section 6.02b. Administrative Summary

Where is the administrative summary? The data is certainly all there in the report, but not in the one page, detailed and succinct form required by the Scope-of-Work. This is a vital requirement and should not have been overlooked. The administrative summary is to serve as the portion of information required for a Department of the Interior annual report to Congress.
Review of "Cultural Resources Investigation of the Upper Minnesota River Subbasin, Southwestern Minnesota and Northeastern South Dakota"

TO: Review Coordinator

Subject report is a two-volume draft prepared for St. Paul District, Corps of Engineers in preparation for further planning of water control measures within the subbasin. Purpose of the report is to produce a literature review of all known historic and prehistoric resources of the area. Results are presented both as a technical report, and as a popular overview.

It is a distinct pleasure to read this draft; in many respects it can serve as a model for reporting literature searches. The authors have produced a thorough accounting of known sites, as well as evaluating their data and the sources of their data. This is a complete professional job.

The technical report begins with statements of purpose, methodology, and environmental background. This is followed by a succinct but excellent overview of cultural history with ecological implications. The bulk of the report is a compilation of site summaries that include evaluation of the data and pertinent recommendations. The popular overview is largely a restatement of the technical overview, but presented in an easily readable style that is both informative and interesting.

A minor distraction of the draft is the plethora of typographic errors and spellings which will be cleansed from the final report. Otherwise, the format and content are excellent and well presented.

Both the contractor and the Corps deserve congratulations for this effort. To cite the authors' introductory statement, "This report will not only aid the present planners, but will serve as a scientific reference for future investigations in a variety of disciplines." I fully agree.
March 4, 1980

ROBERT F. POST, Chief
Environmental Resources Branch
Engineering Division
Department of the Army
St. Paul District Corps of Engineers
1135 U.S. Post Office and Custom House
St. Paul, MN 55101

Dear Mr. Post:

We have only had the opportunity to briefly review the information on South Dakota archaeological sites in the two volume report entitled CULTURAL RESOURCES INVESTIGATION OF THE UPPER MINNESOTA RIVER SUBBASIN, SOUTHWESTERN MINNESOTA AND NORTHEASTERN SOUTH DAKOTA.

We have, however, noticed a few omissions and conflicts in the report. The site listed on Page 77 should be given the designation 39GT2. Site 39D39 (Page 97) is located in Township 113N, not 114N. There may also be some confusion about the exact location of site 39DE13 within the NW1/4 of Section 19. Site numbers 39DE21 (Page 111) and 39DE22 (Page 113) are reversed from those in the official state inventory at Fort Meade. Perhaps Archaeological Field Services should contact Barb Lass, who recorded these sites, to help resolve the conflict.

Sincerely,

ROBERT ALEX
State Archaeologist

Dear Mr. Post:

RE: Review of the Cultural Resources Investigation of the Upper Minnesota River Subbasin, Southwestern Minnesota and Northwestern South Dakota.

MHS Referral File Number: K 337

Thank you for the copy of the above referenced report. In general, this is a well organized and comprehensive report. However, we do have several specific comments on portions of the report. These are as follows:

p. 27 Under "Prairie" - the Winchell citation date on the last line is incorrect. It should be 1884.

p. 42 line 5 - the Statewide Archaeological Survey is the correct project name.

p. 42 Site numbers should accompany the reference to a site in the text for easier cross reference to the appendices. It would also be helpful to note the archaeologist who identified these sites, as was done in other segments of the report.

p. 74 Level III - Cultural affiliation is often left blank because a large investment of time is required to determine with confidence the proper period or cultural assignment. In the absence of substantial amounts of data, it is better not to guess. If the archaeologist has only a feeling that a site belongs in a certain category, based on an incomplete artifact assemblage, then the appropriate course would be to state this interpretation followed by a question mark to indicate the lack of certainty. Whether a site is historic need not be "inferred" from the cards. Either a site is prehistoric, with or without a specific cultural designation, or it is recognizably historic and described as such.

GJH:blm

cc: AFS, Inc. File No. 2032
Mr. Joseph Hudak  
Archaeological Field Services, Inc.  
421 South Main Street - Suite 421E  
Stillwater, Minnesota 55082  

Dear Mr. Hudak:

This letter transmits the combined comments of the Minnesota Historical Society (Inclosure 1), the State Archaeologist (Inclosure 2), Interagency Archaeological Services (IAS) (Inclosure 3), and the St. Paul District, Corps of Engineers (Inclosure 4), for the report Cultural Resources Investigation of the Upper Minnesota River Subbasin, Southwestern Minnesota and Northeastern South Dakota, prepared under contract DACW37-79-C-0199.  

In general, the report is a well-organized and comprehensive work. Unfortunately, the great number of editorial errors made it difficult to review the content of the report. A careful editing and retyping of the report is in order. We are very pleased with the overall presentation and content of this report, and we appreciate the timely completion of the research and draft report.  

Ten copies of the final report, plus an original, should be submitted by 1 May 1980. Any questions concerning these comments should be directed to Mr. David Berwick of the Environmental Resources Branch at (612-725-7854).  

Sincerely,

ROBERT F. POST  
Chief, Environmental Resources Br.
5) The weakest aspect of the report is section VII.

a) Some of the discussion is phrased in a rather cumbersome manner (for example, paragraphs 1 and 6 on p. 177).

b) Suggestions could be made regarding some of the major research problems which must be approached in this area. Many individual site recommendations include the advice that the site be field checked to determine "future research needs." Such needs can only be assessed in light of research problems that are the overarching problems which can provide a base for determining "possible need for further investigation" (p. 66)? I think it would be extremely useful to add a discussion of research problems based on the overview and data given in the report.

c) Although it is recommended that standing structures be investigated regarding their National Register potential, no such recommendation is given for prehistoric sites. Obviously this should be done as well.

6) For reference purposes it would be helpful to have the counties within each subbasin listed in the table of contents.

7) Although this is a draft, the large number of typographical errors in the text interfere with evaluation of the content. In my understanding, a draft should be an end product subject to agency comment regarding organization and substantive content. If the draft submitted contained fewer errors of grammatical usage and spelling it would further the goal of producing a satisfactory final report.

The above comments are intended to be constructive. As a whole, this is one of the best executed overviews of this type produced thus far for diminents. I appreciate the opportunity to read it and to submit my comments. I look forward to receiving a copy of the final report.

Sincerely yours,
